The National Park System of the United States

Source: National Park Service.

The National Park System of the United States, administered by the National Park Service, a bureau of the Department of the Interior, embraces a total of 177 areas, containing approximately 22,396,000 acres in federal ownership. Started with the establishment of Yellowstone National Park in 1872, the system includes not only the most extraordinary and spectacular scenic exhibits in the United States proper and in Alaska, Hawaii and the Virgin Islands but also a large number of sites distinguished for their historic or prehistoric importance or scientific interest. The number and extent of the various types of areas which comprise the system, as of December 31, 1957, are as follows:

Type of Area	Number	Federal land (acres)	Lands within exterior boundaries not federally owned (acres)	Total lands within exterior boundaries (acres)
National Parks	29	13,136,239.13	416,493.11	13,552,732.24
National Historical Parks	8	31,968.32	5,455.60	37,423.92
National Monuments	83	8,974,660.89	160,219.59	9,134,880.48
National Military Parks	11	24,450.04	2,329.24	26,779.28
National Memorial Park	1	68,679.72	1,694.58	70,374.30
National Battlefield Parks	3	5,516.25	2,177.84	7,694.09
National Battlefield Sites	5	188.63	547.35	735.98
National Historic Sites	10	1,354.07	2.12	1,356.19
National Memorials	12	4,428.90	58.13	4,487.03
National Cemeteries	10	215.10	5.00	220.10
National Seashore Recreational Area	1	24,705.23	3,794.77	28,500.00
National Parkways	3	85,558.59	27,256.85	112,815.44
National Capital Parks	1	38,518.31	1,446.30	39,964.61
Total, National Park System	177	22,396,483.18	621,480.48	23,017,963.66

¹ Includes Catoctin Mountain Park, Chesapeake and Ohio Canal, Prince William Forest Park, Baltimore-Washington Parkway, Sultland Parkway among the 797 units administered by National Capital Parks.

National Parks

Name, location and year established as National Park	Area in U. S. ownership, acres	Outstanding characteristics
Acadia (Maine), 1919	30,685.67	Rugged seashore on Mt. Desert Island and adjacent mainland
Big Bend (Texas), 1944	697,980.70	Mountains and desert bordering the Rio Grande
Bryce Canyon (Utah), 1928	35,010.38	Area of grotesque eroded rocks brilliantly colored
Carlsbad Caverns (N. Mex.), 1930	45,846.59	One of the world's largest known caves; spectacular flight of bats
Crater Lake (Oregon), 1902	160,290.33	Deep blue lake in crater of inactive volcano
Everglades (Florida), 1947	1,258,639.73	Subtropical area with abundant bird and animal life
Glacier (Montana), 1910	999,567.24	Rocky Mountain scenery with many glaciers and lakes
Grand Canyon (Arizona), 1919	673,203.35	Mile deep gorge, 4 to 18 miles wide, 217 miles long (105 in park)
Grand Teton (Wyoming), 1929	301,290.88	Picturesque range of high mountain peaks
Great Smoky Mts. (N. C.-Tenn.), 1930	507,869.50	Highest mountain range east of Black Hills; luxuriant plant life
Hawaii (Territory Hawaii), 1916	187,480.61	Spectacular volcanic area; luxuriant vegetation at lower levels
Hot Springs (Arkansas), 1921	986.11	47 mineral hot springs said to have therapeutic value
Isle Royale (Michigan), 1940	539,338.51	Largest wilderness island in Lake Superior; great moose herd
Kings Canyon (California), 1940	453,718.38	Huge canyons; high mountains; giant sequoias
Lassen Volcanic (California), 1916	104,480.68	Only recently active volcano in United States proper
Mammoth Cave (Kentucky), 1936	50,695.73	Vast limestone labyrinth with underground river
Mesa Verde (Colorado), 1906	51,017.87	Best preserved prehistoric cliff dwellings in United States
Mount McKinley (Alaska), 1917	1,939,319.04	Highest mountain in North America; spectacular wildlife
Mount Rainier (Washington), 1899	241,571.09	Greatest single-peak glacial system in United States
Olympic (Washington), 1938	888,557.79	Finest mountain wilderness of Pacific Northwest
Platt (Oklahoma), 1906	911.97	Cold mineral springs with distinctive properties
Rocky Mountain (Colorado), 1915	255,793.54	Section of the Rocky Mountains; 65 named peaks over 10,000 feet
Sequoia (California), 1890	385,258.32	Giant sequoias; Mt. Whitney, highest mountain in U. S. proper
Shenandoah (Virginia), 1935	193,062.74	Tree-covered mountains; scenic Skyline Drive
Virgin Islands (U. S. V. Islands), 1956	5,086.41	Beaches; lush hills; prehistoric Carib Indian relics
Wind Cave (South Dakota), 1903	27,892.66	Limestone caverns in Black Hills, buffalo herd
Yellowstone (Wyoming-Montana-Iaho), 1872	2,213,206.55	World's greatest geyser area; spectacular falls and canyon; one of world's great wildlife sanctuaries
Yosemite (California), 1890	758,019.60	Mountains; inspiring gorges and waterfalls; giant sequoias
Zion (Utah), 1919	128,457.16	Multicolored gorge in heart of southern Utah desert

Art from Egyptian to modern times, including Far East. Emphasis on painting and sculpture. Classes, lectures, concerts, films. Professional art school.

The Great Seal of the United States

On July 4, 1776, the Continental Congress appointed a committee consisting of Benjamin Franklin, John Adams and Thomas Jefferson "to bring in a device for a seal of the United States of America." After many delays, a verbal description of a design by William Barton was finally approved by Congress on June 20, 1782. The seal shows an American bald eagle with a ribbon in its mouth bearing the

device *E pluribus unum* (One out of many). In its talons are the arrows of war and an olive branch of peace.

"In God We Trust"

"In God We Trust" first appeared on U.S. coins after April 22, 1864, when Congress passed an act authorizing the coinage of a 2-cent piece bearing this motto. Thereafter, Congress extended its use to other coins. On July 30, 1956, it became the national motto.

Bill protecting FBI files from unrestricted use by defendant in criminal cases.		351	0	74	2	Sept. 3, 1957
Civil Rights Act of 1957. Created 6-member Civil Rights Commission; provided for additional Assistant Attorney General to head special Civil Rights section within Justice Department; barred interference with voting rights.	Dem. Rep.	128 151	82 15	23 37	15 0	Sept. 9, 1957

¹ Passed with added provisions and sent back to House. ² Dixon-Yates contract ordered canceled by President and funds dropped by Congress from appropriations bill. ³ Bill killed, since all money bills must originate in House.

NOTE: For bills and treaties enacted in 1958, see *News Record of 1958*.

How a Bill Becomes a Law

When a Senator or a Representative introduces a bill, he sends it to the clerk of his house, who gives it a number and title. This is the *first reading*, and the bill is referred to the proper committee.

The committee may decide the bill is unwise or unnecessary and *table* it, thus killing it at once. Or it may decide the bill is worthwhile and hold hearings to listen to facts and opinions presented by experts and other interested persons. After members of the committee have debated the bill and perhaps offered amendments, a vote is taken; and if the vote is favorable, the bill is sent back to the floor of the house.

The clerk reads the bill sentence by sentence to the house, and this is known as the *second reading*. Members may then debate the bill and offer amendments. In the House of Representatives, the time for debate is limited by a *cloture rule*, but there is no such restriction in the Senate except by a two-thirds vote for cloture. This makes possible a *filibuster*, in which one or more opponents hold the floor to defeat the bill.

The *third reading* is by title only, and the bill is put to a vote, which may be by voice or roll call, depending on the circumstances and parliamentary rules. Members who must be absent at the time but who wish to record

their vote may be paired if each negative vote has a balancing affirmative one.

The bill then goes to the other house of Congress, where it may be defeated, or passed with or without amendments. If the bill is defeated, it dies. If it is passed with amendments, a joint Congressional committee must be appointed by both houses to iron out the differences.

After its final passage by both houses, the bill is sent to the President. If he approves, he signs it, and the bill becomes a law. However, if he disapproves, he *veto*es the bill by refusing to sign it and sending it back to the house of origin with his reasons for the veto. The objections are read and debated, and a roll-call vote is taken. If the bill receives less than a two-thirds vote, it is defeated and goes no farther. But if it receives a two-thirds vote or greater, it is sent to the other house for a vote. If that house also passes it by a two-thirds vote, the President's veto is *overridden*, and the bill becomes a law.

Should the President desire neither to sign nor to veto the bill, he may retain it for ten days, Sundays excepted, after which time it automatically becomes a law without signature. However, if Congress has adjourned within those ten days, the bill is automatically killed, that process of indirect rejection being known as a *pocket veto*.

Assassinations and Attempts in U. S. Since 1865

CERMAK, Anton J. (Mayor of Chicago):

Shot Feb. 15, 1933, in Miami by Giuseppe Zangara, who attempted to assassinate Franklin D. Roosevelt; Cermak died Mar. 6.

GARFIELD, James A. (President of U. S.):

Shot July 2, 1881, in Washington, D. C., by Charles J. Guiteau; died Sept. 19.

LINCOLN, Abraham (President of U. S.):

Shot Apr. 14, 1865, in Washington, D. C., by John Wilkes Booth; died Apr. 15.

LONG, Huey P. (U. S. Senator from Louisiana):

Shot Sept. 8, 1935, in Baton Rouge by Dr. Carl A. Weiss; died Sept. 10.

McKINLEY, William (President of U. S.):

Shot Sept. 6, 1901, in Buffalo by Leon Czolgosz; died Sept. 14.

ROOSEVELT, Franklin D. (President-elect of U. S.):

Escaped assassination unhurt Feb. 15, 1933, in Miami. *See Cermak.*

ROOSEVELT, Theodore (ex-President of U. S.):

Escaped assassination (though shot) Oct. 14, 1912, in Milwaukee while campaigning for President.

SEWARD, William H. (Secretary of State):

Escaped assassination (though injured) Apr. 14, 1865, in Washington, D. C., by Lewis Powell (or Paine), accomplice of John Wilkes Booth.

TRUMAN, Harry S. (President of U. S.):

Escaped assassination unhurt Nov. 1, 1950, in Washington, D. C., as 2 Puerto Rican nationalists attempted to shoot their way into Blair House.

The Liberty Bell

The Liberty Bell was cast in England in 1752 for the Pennsylvania Statehouse (now Independence Hall). Damaged in transit, it was recast in Philadelphia in 1753. It is inscribed with the words, "Proclaim liberty throughout all the land unto all the inhabitants thereof" (Lev. 25:10). The bell was rung on July 8, 1776, for the first pub-

lic reading of the Declaration of Independence. Hidden in Allentown during the British occupation of Philadelphia, it was replaced in Independence Hall in 1778 where it remains today. The bell cracked on July 8, 1835, while tolling the death of Chief Justice John Marshall.

Impeachments

U. S. Constitution, Article I, Section 3.

The Senate shall have the sole power to try all Impeachments. When sitting for that Purpose, they shall be on Oath or Affirmation. When the President of the United States is tried, the Chief Justice shall preside: And no Person shall be convicted without the Concurrence of two thirds of the Members present.

Judgment in Cases of Impeachment shall not extend further than to removal from Office, and disqualification to hold and enjoy any Office of honor, Trust, or Profit under the United States: but the Party convicted shall nevertheless be liable and subject to Indictment, Trial, Judgment and Punishment, according to Law.

Federal Impeachments

Source: Congressional Directory.

The Senate has sat as a court of impeachment in the following cases:

WILLIAM BLOUNT, Senator from Tennessee; charges dismissed for want of jurisdiction, January 14, 1799.

JOHN PICKENS, Judge of the U. S. District Court for New Hampshire; removed from office March 12, 1804.

SAMUEL CHASE, Associate Justice of the Supreme Court; acquitted March 1, 1805.

JAMES H. PECK, Judge of the U. S. District Court for Missouri; acquitted Jan. 31, 1831.

WEST H. HUMPHREYS, Judge of the United States District Court for the middle, eastern, and western districts of Tennessee; removed from office June 26, 1862.

ANDREW JOHNSON, President of the United States; acquitted May 26, 1868.

WILLIAM W. BELKNAP, Secretary of War; acquitted Aug. 1, 1876.

CHARLES SWAYNE, Judge of the United States District Court for the northern district of Florida; acquitted Feb. 27, 1905.

ROBERT W. ARCHBOLD, Associate Judge, United States Commerce Court; removed from office January 13, 1913.

GEORGE W. ENGLISH, Judge of the U. S. District Court for the eastern district of Illinois; resigned office November 4, 1926; impeachment proceedings dismissed.

HAROLD LOUDERBACK, Judge of the U. S. District Court for the northern district of California; acquitted May 24, 1933.

HALSTEN L. RITTER, Judge of the U. S. District Court for the southern district of Florida; removed April 17, 1936.

THE UNITED STATES ARMED SERVICES

U. S. MILITARY ACADEMY

Source: U. S. Military Academy.

Established in 1802 by an Act of Congress, the U. S. Military Academy is located on the west bank of the Hudson River some 50 miles north of New York City. Admission may be gained only by appointment to one of the 2,496 cadetships authorized by law. These cadetships are allocated among the following sources of nomination:

Noncompetitive:

Representatives (4 each)	1,740
Senators (4 each)	384
Other:	
Vice Presidential	3
Hawaii and Alaska	8
District of Columbia	6
Canal Zone Government ...	2
Puerto Rico	4

Competitive:

Army and Air Force:	
Regular components	90
Reserve components	90
Presidential	89
Sons of deceased veterans	40
Honor military & honor naval schools	40
Total	2,496

Graduation of the senior class normally leaves about 750 of these cadetships vacant and hence available to new candidates each year. Candidates may be nominated for these vacancies during the year preceding the admission date—the first Tuesday in July.

Candidates must be citizens of the U. S., of good moral character, have never been married, between the ages of 17 and 22, high school graduates and able to meet the mental, medical and physical aptitude requirements. A candidate's mental qualification for admission is determined by his performance on prescribed tests of the College Entrance Examination Board. The College Board tests which have been adopted by the Military Academy are—The Scholastic Aptitude Test and Achievement Tests in English Composition and Intermediate Mathematics. The particular College Board tests which a candidate must take to qualify for entrance to the Military Academy depend upon whether the candidate's nomination is competitive or non-competitive, and whether the applicant has completed satisfactorily at least one semester of study at college. Entrance requirements and procedures for appointment are described in the U. S. Military Academy Catalogue, available without charge from The Registrar, U. S. Military Academy, West Point, N. Y.

Cadets receive their entire education at Government expense and are paid \$111.15 per month. From this sum, they pay for their uniforms, textbooks, etc. Upon successful completion of the 4-year course, the graduate receives the degree of Bachelor of Science and is commissioned a second lieutenant in the regular Army.

U. S. NAVAL ACADEMY

Source: U. S. Naval Academy.

On October 10, 1845, the Naval School was established at Fort Severn, Annapolis, Maryland. Five years later it was renamed the United States Naval Academy, and the following year a regular four-year course was adopted. At present, the curriculum consists of courses in the following departments: executive; seamanship and navigation; ordnance and gunnery; marine engineering; aviation; electrical engineering; mathematics; English, history and government; foreign languages; hygiene; and physical education.

Candidates are selected as follows:

- 5 from the District of Columbia.
- 40 sons of men and women killed in action or who have died, or may hereafter die of wounds or injuries, or disease contracted, in active service in World Wars I and II and other periods.
- 75 annually from among sons of officers and enlisted men in the regular Army, Navy, Marine Corps, Air Force and Coast Guard.
- 160 enlisted Navy and Marine personnel selected annually by competitive examination.
- 160 annually chosen by the Secretary of the Navy from the Naval and Marine Corps Reserves.
- 5 Puerto Ricans chosen by the Resident Commissioner of Puerto Rico.
- 1 on the recommendation of the Governor of Puerto Rico.
- 4 Filipinos designated by the President of the United States.
- 1 from the Canal Zone.
- 20 annually from schools designated by the Army and Navy as honor schools and from NROTC schools.
- 20 from the American republics and the Dominion of Canada.
- Unlimited: Sons of persons who have been or shall hereafter be awarded the Medal of Honor.

Each Senator, Representative, delegate to Congress, and the Vice President may have not more than 5 Midshipmen at the Naval Academy. The Board of Commissioners selects the 5 from the District of Columbia. The President selects the 40 sons of deceased veterans of World Wars and the 75 sons of officers and enlisted men in the regular Army, Navy, Marine Corps, Air

Force and Coast Guard. The President also appoints the sons of holders of the Medal of Honor.

Subject to the existence of vacancies and the availability of accommodations, the Secretary of the Navy may nominate for appointment a limited number of additional candidates. These must be recommended by the Academic Board from among the fully qualified, regularly nominated alternate and competitive candidates of the same year who were unable to enter because of the appointment of men preceding them in nomination.

Candidates for admission must be between 17 and 22 years of age on July 1 of their entering year. They may qualify by submitting acceptable scores on College Entrance Examination Board aptitude and achievement tests, or by presenting acceptable high school and college certificates. Details of the entrance requirements, scholastic and physical, may be obtained from the Naval Academy or from the Navy Department, Washington, 25, D.C. Candidates must also meet physical requirements and be unmarried.

Midshipmen are paid \$111.15 per month. Graduates of the Academy are granted Bachelor of Science degrees and are commissioned as ensigns in the Navy or second lieutenants in the Marine Corps.

U. S. COAST GUARD ACADEMY

Source: U. S. Coast Guard Academy.

The cadet system of the Coast Guard was established by law on July 31, 1876, when the "School of Instruction" for the Revenue Cutter Service, predecessor to the Coast Guard, was authorized.

The *J. C. Dobbin*, a converted schooner, served as the first schoolship, and was succeeded in 1878 by the bark *Chase*, a ship built for cadet training. First winter quarters were in a sail loft at New Bedford, Mass. The school was moved in 1900 to a two-story frame school at Curtis Bay, Md., to provide a more technical education; and in 1910 to Fort Trumbull, New London, Conn. In 1932 the Academy moved to its present site in the latter city.

The 4-year college-level curriculum leads to a Bachelor of Science degree and to a commission of ensign in the U. S. Coast Guard.

Cadets receive appointment to the Academy through a nation-wide competitive examination, held annually in February. Candidates must be between 17 and 22 years of age, physically sound, unmarried and at least 5' 4" tall. They must agree to remain unmarried until graduation and to serve at least 4 years on active duty. Cadets receive \$111.15 per month to cover their uniform and incidental expenses, and are furnished their rations and quarters. Applications for appointment may be made

to the Commandant (PTP), U. S. Coast Guard, Washington 25, D. C.

U. S. MERCHANT MARINE ACADEMY

Source: U. S. Merchant Marine Academy.

The U. S. Merchant Marine Cadet Corps was established Mar. 15, 1938, and its Academy is located on the south shore of Long Island Sound at Kings Point, N. Y.

The Academy has a complement of 900 cadets representing every U. S. state, D. C., Alaska, the Canal Zone, Hawaii, Puerto Rico, Guam, American Samoa and the Virgin Islands. In addition, it is authorized to admit for the full period of training not more than 12 candidates from Central and South American republics.

Competitive examinations are held annually among candidates nominated by Senators and members of the House of Representatives. Appointments to the Academy are governed by a state and territory quota system based on population. A candidate must be an unmarried citizen not less than 17 and not yet 22 years of age by July 1 of the year in which admission is sought. He must have 15 high-school credits, including 3 units in mathematics (from algebra, geometry and/or trigonometry), 1 unit in science (physics or chemistry) and 3 in English.

The course is 4 years, consisting of 1 year as Fourth Classman at the Academy, 1 year as Third Classman aboard a merchant ship, and 2 years as Second and First Classman at the Academy. Study includes marine engineering, navigation, electricity, ship construction, naval science and tactics, economics, business, languages, history, and other subjects.

On completion of their courses, cadets are examined for their original Merchant Marine license as deck or engineer officers in any ship in the U. S. Merchant Marine. They also receive Bachelor of Science degrees and commissions as officers in the U. S. Naval Reserve.

U. S. AIR FORCE ACADEMY

Source: U. S. Air Force Academy.

The bill establishing the Air Force Academy was signed by President Eisenhower on Apr. 1, 1954. The first class of 306 cadets was sworn in on July 11, 1955, at Lowry Air Force Base, Denver, Colo., the Academy's temporary location. The Cadet Wing moved into the Academy's permanent home north of Colorado Springs in Aug. 1958.

Eventually the Academy will have a complement of 2,520. Qualified sons of Medal of Honor winners will be admitted in addition to the number of vacancies.

Candidates must be citizens of the U. S., at least 17 but less than 22 on July 1 of the year for which they seek admission,

unmarried, at least 5' 4" and not more than 6' 4" tall and able to meet the mental and physical requirements. A candidate is required to take the following examinations and tests: (1) the Air Force Medical Examination for Flying Training; (2) the Air-Force Officer Qualifying Test; (3) the College Entrance Examination Board Tests; and (4) a physical examination.

Cadets receive their entire education at

Government expense and, in addition, are paid \$111.15 per month. From this sum, they pay for their uniforms, textbooks, etc. Upon completion of the 4-year course, leading to a bachelor's degree, a cadet who meets the physical qualifications is appointed a second lieutenant in the regular U. S. Air Force as a navigator, then receives full-scale pilot training if still physically qualified.

History of the Armed Services

Source: U. S. Department of Defense.

U. S. ARMY

When Gen. Washington, on July 3, 1775, took command of the colonial militia (about 8,000 men) besieging Boston, the event marked the union of the forces of the 13 separate colonies under one head, and the U. S. Army was born. In Jan. 1776, the Continental Congress decided that these troops should be separate in organization from those of local communities and established them as the U. S. Regular Army. When these forces were disbanded after the war, only some 80 officers and men were retained to guard U. S. Army stores. From this humble beginning, in the ensuing years, the strength of the U. S. Army rose or fell according to national and international conditions.

U. S. NAVY

In Sept. and Oct. 1775, Gen. Washington maintained 5 schooners and a sloop with officers and men from his army for the purpose of preying on inbound English supply vessels and thereby caused the birth of the U. S. Navy. In Dec. 1775, the Continental Congress expanded this by providing for construction of naval craft and the appointment of a marine committee (one member from each colony) which continued until 1794 when further ships and manpower were provided for by act of Congress. Upon completion of these ships in 1798, a Navy Department was established as the controlling agency, and the secretary given Cabinet rank.

U. S. AIR FORCE

Until creation of the National Military Establishment in September 1947, which united the services under one department, military aviation was a part of the U. S. Army. In the Army, aeronautical operations came under the Signal Corps from 1907 to 1918, when the U. S. Air Service was established. In 1926, the U. S. Air Corps came into being and remained until 1942, when the Army Air Forces succeeded it as the Army's air arm.

In the Navy, ship-based fighters and bombers are attached to the several fleets and are under the orders of the fleet commanders. Marine Corps aviation comes under control of the Navy.

In 1947, the U. S. Air Force was established as an independent military service under the National Military Establishment. At that time, the name U. S. Air Corps and the names of the services within the Army Air Forces were abolished.

U. S. COAST GUARD

Our country's oldest continuous seagoing service, the U. S. Coast Guard traces its history back to 1790 when the First Congress authorized the construction of ten vessels for the collection of revenue. Known first as the Revenue Marine, and later as the Revenue Cutter Service, the Coast Guard received its present name in 1915 under an act of Congress combining the Revenue Cutter Service with the Life-Saving Service. In 1939, the Lighthouse Service of the Department of Commerce was also consolidated with this unit. The Bureau of Marine Inspection and Navigation was transferred temporarily to the Coast Guard in 1942, permanently in 1946. Through its antecedents, the Coast Guard is one of the oldest organizations under the Federal government and, until the Navy Department was established in 1798, served as the only U. S. armed force afloat. In time of peace it operates under the Treasury Department, serving as the Nation's primary agency for promoting marine safety and enforcing Federal maritime laws. In time of war, or on direction of the President, it is attached to the Navy Department.

U. S. MARINE CORPS

Founded in 1775 and observing its official birthday on Nov. 10, the U. S. Marine Corps was developed to be able to serve to advantage on land or sea.

It has been used successfully in every U. S. war beginning with the Revolution, when it consisted of 2 battalions. It reached its high in achievement in World War II and in the Korean conflict when over 75% of its officers and men saw combat.

Selective Service Classifications

- I-A:** Available for military service.
I-A-O: Conscientious objector available for noncombatant military service only.
I-C: Member of Armed Forces, Coast and Geodetic Survey or Public Health Service.
I-D: Member of reserve component or student taking military training.
I-O: Conscientious objector available for civilian work contributing to maintenance of national health, safety or interest.
I-S: Student deferred by statute.
I-W: Conscientious objector performing civilian work contributing to maintenance of national health, safety or interest.
II-A: Registrant deferred because of civilian occupation (except agriculture and activity in study).

- II-C:** Registrant deferred because of agricultural occupation.
II-S: Registrant deferred because of activity in study.
III-A: Registrant with child or children; and registrant deferred by reason of extreme hardship to dependents.
IV-A: Registrant who has completed service; sole surviving son.
IV-B: Officials deferred by law.
IV-C: Aliens.
IV-D: Minister of a religion or a divinity student.
IV-F: Physically, mentally or morally unfit.
V-A: Registrant over age of liability for military service.

Fleet Admirals: William D. Leahy; Chester W. Nimitz.

Admirals: Arleigh A. Burke; Felix B. Stump; Jerauld Wright; Robert P. Briscoe; Walter F. Boone; Harry D. Felt; James L. Holloway, Jr.; Herbert G. Hopwood.

MARINE CORPS

General: Randolph McC. Pate.
Lieutenant Generals: Vernon E. Megee; Edwin A. Pollock; Merrill B. Twining; Verne J. McCaul; Robert E. Hogaboom.

COAST GUARD

Vice Admiral: Alfred C. Richmond, Commandant.
Rear Admiral: James A. Hirshfield, Assistant Commandant.

U. S. Military Actions Other Than Declared Wars

HAWAII (1893): U. S. Marines, ordered to land by U. S. Minister Stevens, aided the revolutionary Committee of Safety in overthrowing the native government. Stevens then proclaimed Hawaii a U. S. protectorate. Annexation, resisted by the Democratic regime in Washington, was not formally accomplished until 1898.

CHINA (1900): Boxers (a group of Chinese revolutionists) occupied Peking and laid siege to foreign legations. U. S. troops joined an international expedition which relieved the city.

PANAMÁ (1903): After Colombia had rejected a proposed agreement for relinquishing sovereignty over the Panama Canal Zone, revolution broke out, aided by promoters of the Panama Canal Co. Two U. S. warships were standing by to protect American privileges. The U. S. recognized the Republic of Panamá on Nov. 6.

DOMINICAN REPUBLIC (1904): When the Dominican Republic failed to meet debts owed to the U. S. and foreign creditors, Theodore Roosevelt declared the U. S. inten-

tion of exercising "international police power" in the Western Hemisphere whenever necessary. The U. S. accordingly administered customs and managed debt payments of the Dominican Republic from 1905-07.

NICARAGUA (1911): The possibility of foreign control over Nicaragua's canal route led to U. S. intervention and agreement. The U. S. landed Marines in Nicaragua (Aug. 14, 1912) to protect American interests there. A small detachment remained until 1933.

MEXICO (1914): Mexican Dictator Huerta, opposed by President Wilson, had the support of European governments. An incident involving unarmed U. S. sailors in Tampico led to the landing of U. S. forces on Mexican soil. Vera Cruz was bombarded by the Navy to prevent the landing of munitions from a German vessel. At the point of war, both powers agreed to mediation by Argentina, Brazil and Chile. Huerta abdicated, and Carranza succeeded to the presidency.

HAITI (1915): U. S. Marines imposed a military occupation. Haiti signed a treaty making it a virtual protectorate of the U. S. until troops were withdrawn in 1934.

MEXICO (1916): Raids by Pancho Villa cost American lives on both sides of the border. President Carranza consented to a punitive expedition lead by Gen. Pershing. Two silver bars
but antagonism grew in Mexico. Wilson

withdrew the U. S. force when war with Germany became imminent.

DOMINICAN REPUBLIC (1916): Renewed intervention in the Dominican Republic with internal administration by U. S. naval officers lasted until 1924.

* While serving as Chairman of Joint Chiefs of Staff, Chief of Staff of the Army, Chief of Naval Operations, Chief of Staff of the Air Force, or Commander of the Marine Corps, basic pay for this grade is \$1,875 regardless of cumulative years of service. † For commissioned officers who have not been credited with over 4 years' active service as enlisted member. ‡ For commissioned officers who have been credited with over 4 years' active service as an enlisted member.

Special Incentive Pay Rates

Members of the uniformed services are entitled to receive special pay for special kinds of duty. In addition to the incentive rates for aircraft and submarine crews listed

1. Frequent and regular aerial flights not as a crew member.
2. Parachute jumping as a part of military duty.
3. Duty involving exposure to lepers.
4. Duty involving demolition of explosives.
5. Submarine escape training tank duty.
6. Deep sea diving duty (including helium-oxygen diving).
7. Human acceleration or deceleration duty.
8. Low pressure chamber duty.

Medical and Dental Officers

Monthly incentive pay for medical and dental officers is based on cumulative service:

elsewhere in this section, the following types of hazardous duty receive flat rates of \$110 per month for officers and \$55 per month for enlisted personnel.

0-2 years, \$100; 2-6 years, \$150; 6-10 years, \$200; over 10 years, \$250.

Diving as in Salvage and Repair

The monthly rate is not less than \$5 or more than \$30, plus \$5 for each diving hour spent in salvage or repair operations. Pay applies to pay grades E-1 through E-9 only.

Sea and Foreign Duty

Pay grade	Monthly rate	Pay grade	Monthly rate
E-7, E-8, E-9.....	\$22.50	E-4.....	\$13.00
E-6.....	20.00	E-3.....	9.00
E-5.....	16.00	E-2, E-1.....	8.00

Proficiency Pay

An enlisted member designated as possessing special proficiency in a military skill may—

(1) Be advanced to any enlisted pay grade that is higher than his pay grade at the time of designation; or

(2) Be paid proficiency pay at a monthly rate not to exceed the following maximum rates for the proficiency rating to which he

is assigned: Rating P-1, \$50; P-2, \$100; P-3, \$150.

An enlisted member with less than 8 or 10, as the case may be, cumulative years of enlisted service for basic pay purposes, who is advanced to pay grade E-8 or E-9, respectively, is entitled to the minimum amount of pay prescribed for that pay grade until his cumulative years of service entitle him to a higher rate.

Special Pay for Certain Designated Officers

Officers in pay grades O-3 through O-6 who hold positions of unusual responsibility which are of a critical nature to the service concerned, may receive special pay, in addition to any other pay prescribed by law, at a monthly rate as follows: Pay grades O-3 and O-4, \$50; O-5, \$100; O-6, \$150.

tion to any other pay prescribed by law, at a monthly rate as follows: Pay grades O-3 and O-4, \$50; O-5, \$100; O-6, \$150.

Arlington Cemetery

Arlington National Cemetery occupies 408 acres in Virginia on the Potomac River directly opposite Washington. This land was part of the estate of John Parke Custis, Martha Washington's son, who built the mansion which later became the home of Robert E. Lee. In 1864 Arlington became a national military cemetery. Many thousands

of soldiers as well as hundreds of distinguished Americans are buried there. In 1921, an Unknown Soldier from World War I was buried in a temporary crypt in the cemetery; the completed tomb was dedicated in 1932. Two more Unknowns, one from World War II and one from the Korean War, were buried May 30, 1958, in adjacent crypts.

The American's Creed

By William Tyler Page

"I believe in the United States of America as a government of the people, by the people, for the people; whose just powers are derived from the consent of the governed; a democracy in a republic; a sovereign Nation of many sovereign States; a perfect union, one and inseparable; established upon those principles of freedom, equality, justice, and humanity for which American patriots sacrificed their lives and fortunes.

"I therefore believe it is my duty to my country to love it; to support its Constitution; to obey its laws; to respect its flag, and to defend it against all enemies."

NOTE: William Tyler Page, Clerk of the U. S. House of Representatives, wrote "The American's Creed" in 1917. It was accepted by the House on behalf of the American people on April 3, 1918.

Extra Pay for Wartime Service

Act of March 3, 1847, during the Mexican War, provided for \$2 a month extra pay for "distinguished service." This continued in force beyond the war and applied in the Civil War.

In the Spanish American War, there was a 20 per cent increase of enlisted men's pay for war service.

In World War I, additional pay was offered for all types of services, usually as incentive for special qualifications as gun pointer, expert rifleman, etc. Among these items is pay for certificate of merit of \$2 a month. By the new law passed in 1920, the number of reasons for additional pay had expanded. Recipients of the Medal of Honor, Distinguished Service Cross and Distinguished Service Medal received \$2 a month extra, while each bar in lieu of these medals also

added another \$2 a month. Added to this was a foreign service bonus of 20 per cent.

Act of June 30, 1944 authorized compensation of \$5 a month to enlisted men qualified as expert infantrymen and \$10 to those qualified as combat infantrymen. These amounts were payable for the duration of war and six months thereafter.

By the Act of July 6, 1945 for the duration of war and for six months thereafter enlisted men entitled to wear Medical Badges received additional pay of \$10.

Act of July 10, 1952 authorized \$45 a month for each month beginning after May 31, 1950, for which the member was entitled to receive basic pay and during which he was a member of a combat unit in Korea. This applies to officers and enlisted men.

ALLOWANCES FOR SUBSISTENCE

Officers receive \$47.88 per month. Enlisted personnel receive allowances for subsistence under the following provisions: (1) when rations in kind are not available, \$2.57 per day; (2) when permission to mess separately is granted, \$1.05 per day; (3) when assigned to duty under emergency conditions where no government messing facilities are available, up to and not to exceed \$3.42 per day.

Veterans' Benefits

Although programs of benefits of various kinds have a history tracing back to Colonial days, veterans of World War I were the first to receive disability compensation for injuries, allotments for the support of dependents, life insurance, complete medical care and vocational rehabilitation. Beginning with 1940, these benefits were slowly broadened.

The following benefits available to veterans of World War II and the Korean War have specific time limitations and, in most cases, are applicable only to those whose discharge was not under dishonorable conditions.

Education and Training: *Veterans of the Korean War:* For a maximum period of 1½ times the duration of active service, not exceeding 36 months, the VA pays sums varying from \$110 to \$160 per month toward subsistence, tuition, supplies, etc.

Re-employment: The veteran is to be reinstated in the same position or an equivalent one unless, in the case of a private employer, changed circumstances make this impossible.

Unemployment allowances: Korea veterans out of work are entitled to unemployment allowances of \$26 a week for up to 26 weeks. Application should be made to the local state employment office.

Loans: Only loans for the purchase or construction of a home, to buy a farm and farm equipment or business property and equipment, are permissible. The VA will guarantee the lender against loss up to 60% of a home loan with a maximum of \$7,500. On other loans, the guarantee is up to 50% with a maximum of \$4,000 involving real estate and \$2,000 on non-real

estate loans. The interest rate in all cases must not exceed 4¾% per year.

The following benefits are also available to those having some service-connected illness or disability:

Disability Compensation: The VA pays from \$19 to \$225 per month with additional sums for specific conditions up to \$450 per month, plus allowances for wife, children or dependent parents.

Vocational rehabilitation: Necessary training expenses, special equipment, etc., toward a definite job objective are paid for, plus a monthly allowance varying from \$65 to \$120 in addition to compensation.

Medical and dental care: This includes complete care in VA or certain other Federal hospitals. It also covers treatment (not requiring hospitalization) at a VA field station or by an approved private physician or dentist. Medicine, instruments, appliances, mechanical equipment, etc., are supplied. Full domiciliary care is also provided where necessary.

War Orphans Education: \$110 a month for up to 36 months of schooling may be paid to sons and daughters of veterans who died of service-connected causes. Students must usually be between 18 and 23.

Death benefits: Up to \$10,000 of GI Insurance may be paid to the beneficiaries of deceased veterans. Compensation to a widow is \$87 per month, with an allowance for each child.

NOTE: Since our space has permitted only a general statement of the principal benefits available to veterans, the reader is referred to his local office of the Veterans Administration (VA) for detailed information.

U. S. Postal Regulations

Source: U. S. Post Office.

FIRST CLASS:

Letters and written and sealed matter: 4¢ for each oz., except that drop letters are subject to 3¢ for each oz. when deposited for local delivery at offices not having letter-carrier service, provided they are not collected or delivered by rural or star-route carriers.

Government postal cards: single, 3¢; double, 6¢.

Private mailing or post cards: 3¢.

Limit of size: Min. size, $2\frac{3}{4}$ " x 4"; max. 3-9/16" x 5-9/16".

Limit of weight when mailed from one first-class post office to another: 40 lb. in local, first and second zones, 20 lb. in third to eighth zones.

Limit of weight when mailed to or from second-, third- and fourth-class post offices: 70 lb.

AIRMAIL (LIMIT 8 OZ.):

7¢ for each oz. or fraction thereof within the continental U. S., within any Territory or possession of the U. S., or between any of the foregoing. This includes airmail to or from Alaska, Hawaii, Puerto Rico, Virgin Islands of the U. S., Canton Island, Canal Zone, Guam and any other place where the U. S. mail service is in operation.

Post cards: 5¢.

AIR PARCEL POST (OVER 8 OZ. TO 70 LB.):

The zone rates below shall apply to mailable matter of any class carried by air. Such matter shall not exceed 100 in. in length and girth combined, including written and other matter of the first class, whether sealed or unsealed. Fractions of a lb. are charged as a full lb.

Parcels weighing less than 10 lb. and measuring more than 84 in., but not more than 100 in. in length and girth combined, shall be subject to the 10-lb. rate.

Air Parcel-Post Zone Rates

Zone and (miles)	First lb.	Addl. lbs.
First, Second & Third (to 300)	60¢	48¢
Fourth (300-600)	65¢	50¢
Fifth (600-1,000)	70¢	56¢
Sixth (1,000-1,400)	75¢	64¢
Seventh (1,400-1,800)	75¢	72¢
Eighth (over 1,800)	80¢	80¢

The eighth-zone rate shall be charged on air parcel post between the U. S. or its Territories and possessions and overseas A.P.O.'s and Fleet post offices, as well as naval vessels and commands afloat addressed in care of Fleet post offices at New York or San Francisco.

For restrictions to certain A.P.O.'s and F.P.O.'s, consult local post office.

Limit of size to A.P.O. or F.P.O.: 100 in. length and girth; limit of weight: 70 lb.

Air parcels mailed at New York, N. Y., and addressed to Puerto Rico and the Virgin Is. are subject to the seventh-zone rate.

SECOND CLASS (NO WEIGHT LIMIT):

Newspapers, magazines and other periodicals containing notice of second-class entry.

For rates for publications mailed by the publishers or registered news agents, consult local postmaster.

Transient rate for matter mailed by others than the publishers or registered news agents: 2¢ for the first 2 oz., 1¢ for each additional oz. However, if the fourth-class rate is cheaper, it shall apply.

THIRD CLASS (UNDER 16 OZ.):*

Merchandise, books, printed matter and all other mailable matter not in first or second class.

Regular rate: 3¢ for the first 2 oz., $1\frac{1}{2}$ ¢ for each additional oz.

Bulk rate: for \$20† per year or fraction thereof, separately addressed identical pieces of third-class matter in quantities of not less than 20 lb. or of not less than 200 pieces are subject to the lb. rates of postage applicable to the entire bulk mailed at one time.

The bulk rate for miscellaneous printed matter, etc. is 16¢† for each lb., with a minimum charge of 2¢† per piece. For books and catalogs of 24 pages or more, seeds, etc., the rate is 10¢ for each lb., with a minimum charge of 2¢† per piece.

Pieces of such size or form as to prevent ready facing and tying in bundles and requiring individual distributing throughout mailed singly or in bulk are subject to a minimum charge of 6¢ each.

FOURTH CLASS (PARCEL POST) (OVER 8 OZ.):

Merchandise, books, printed matter and all other mailable matter not in first, second or third classes.

The zone rates below shall apply to fourth-class matter, except catalogs, books, library books, publications or records for the blind, and certain controlled circulation publications.

Limit of size§: 72 in. in length and girth combined.

Limit of weight§: over 8 oz. to 40 lb. in local, first and second zones, over 8 oz. to 20 lb. in third to eighth zones.

Note: The following five items have a size limit of 100 in. in length and girth combined, a weight limit of over 8 oz. to 70 lb.: (1) parcels sent to or from rural or star routes; (2) parcels sent to or from

* Regular piece and pound rates will apply after Jan. 1, 1959, to matter sent by certain nonprofit organizations, except that the per piece minimum under bulk mailings will be 50% of the regular minimum rate. † Effective Jan. 1, 1959. ‡ Effective Jan. 1, 1959; to be raised to 2½¢ on July 1, 1960. § When mailed from one first-class post office to another.

second-, third-, and fourth-class post offices; (3) parcels containing baby fowl, live plants, trees, shrubs, or agricultural commodities (not including manufactured products thereof); (4) parcels containing books; (5) parcels mailed between the U. S. and any Army or Fleet post office or between the U. S. and any Territory or possession of the U. S.

Fourth-Class Zone Rates

Zone and (miles)	First lb.	Addl. lbs.
Local	\$.18	\$.0145
First & Second (to 150) *	.23	.0395
Third (150-300)	.23	.0515
Fourth (300-600)	.24	.0690
Fifth (600-1,000)	.26	.0925
Sixth (1,000-1,400)	.28	.1195
Seventh (1,400-1,800)	.30	.1520
Eighth (over 1,800)	.32	.1805

* In the 1st or 2nd zone, where the distance by the shortest practicable mail route is 300 mi. or more, the rate shall be the same as for the 3rd zone.

The zone rates below shall apply to individually addressed catalogs and similar printed advertising matter in bound form weighing more than 8 oz. but not exceeding 10 lb.

Catalog Zone Rates*

Zone and (miles)	First lb.	Addl. half-lbs.
Local	\$.12	\$.0075
First & Second (to 150)†	.13	.0150
Third (150-300)	.14	.0200
Fourth (300-600)	.15	.0250
Fifth (600-1,000)	.17	.0325
Sixth (1,000-1,400)	.18	.0400
Seventh (1,400-1,800)	.19	.0500
Eighth (over 1,800)	.20	.0600

* Fractions of one-half cent or less are counted as one-half cent; fractions of a cent exceeding one-half cent are counted as one cent in the total amount.

† In the 1st or 2nd zone, where the distance by the shortest practicable mail route is 300 mi. or more, the rate shall be the same as for the 3rd zone.

BOOKS (LIMIT 70 LB.):

Books (containing no advertising matter other than incidental announcements of books), 16-mm. film in final state for viewing, 16-mm. film catalogs, school test materials, printed music (in bound or sheet form), phonograph recordings, and manuscripts for books, periodical articles and music, 9¢ first lb., 5¢ each additional lb. (Rate applies for films and catalogs except when mailed to commercial theaters.) Must be endorsed "Educational Material."

LIBRARY BOOKS (LIMIT 70 LB.):

Books sent by authorized libraries to readers and when returned by such readers, 4¢ first lb., 1¢ each additional lb. Rate also applies to printed music (in bound or sheet form), bound volumes of academic theses, phonograph recordings and other library materials.

SPECIAL DELIVERY AND SPECIAL HANDLING:

The prepayment of the special-delivery

fee entitles mail to the most expeditious handling and special delivery.

Prepayment of the special-handling fee entitles fourth-class matter to the most expeditious handling, transportation and delivery possible, but not special delivery.

Special Delivery and Special Handling

Weight	Special delivery		Special handling (4th class only)
	First class*	2nd, 3rd, 4th class	
Up to 2 lb.	30¢	45¢	25¢
2 to 10 lb.	45¢	55¢	35¢
Over 10 lb.	60¢	70¢	50¢

* Including air parcel post.

MONEY ORDERS:

Money orders for amounts from 1¢ to \$100 are issued upon written application* made by the remitter or his agent showing the amount of the order and the names and addresses of payee and remitter.

Amount of order	Fee
\$.01 to \$ 5.00	.15¢
5.01 to 10.00	.20¢
10.01 to 100.00	.30¢

* As of Oct. 1, 1955, 1st- and 2nd-class post offices will issue money orders without written application.

REGISTERED MAIL:

Fees for domestic registered mail (first-, second- and third-class matter, and sealed fourth-class matter on which postage at the first-class rate has been paid):

Declared value (must be full value)	Fee if mailer has no commercial or other insurance	Fee if mailer has commercial or other insurance

Over 15,000,000.00	(4 ¹)	(5 ²)

¹ Postal liability: declared value. ² Postal liability: Declared value or prorated. ³ Postal liability: \$1,000 maximum or prorated. ⁴ Postal liability: \$10,000. ⁵ Fee increased 15 cents per \$1,000 or fraction above \$10,000. ⁶ Fee increased 10 cents per \$1,000 or fraction above \$10,000. ⁷ Additional fee charges may be applied based on consideration of weight, space and value.

Restricted delivery, 50¢. Return receipts: showing to whom and when delivered, 10¢; to whom, when and address where delivered, 35¢; requested after mailing, showing to whom and when delivered, 25¢.

CERTIFIED MAIL:

Certified mail service provides for a receipt to the sender and a record of delivery at the office of address. No record is kept at the office where mailed. It is handled in the ordinary mails and no insurance coverage is provided.

Any first-class mail having no intrinsic value will be accepted as certified mail. This does not exclude articles of a non-negotiable character and other matter which would involve a cost of duplication if lost or destroyed. The mail may be sent by air on payment of the required postage. Return receipt service requested at the time of mailing only, and special delivery service are available.

Fees are as follows: Fee in addition to postage, 20¢; return receipt showing to whom and when delivered, 10¢; return receipt showing to whom, when, and address where delivered, 35¢; restricted delivery, 50¢.

INSURED MAIL:

Fees for domestic insured mail (third- and fourth-class matter):

Insurance coverage	Fee
\$.00 to \$ 10.00	10¢
10.01 to 50.00	20¢
50.01 to 100.00	30¢
100.01 to 200.00	40¢

C.O.D. MAIL:

Fees for domestic unregistered C.O.D. mail (third- and fourth-class matter and sealed domestic mail matter of any class bearing postage at the first-class rate):

Indemnity limit	Fee
\$.01 to \$ 5.0030
5.01 to 10.0040
10.01 to 25.0060
25.01 to 50.0070
50.01 to 100.0080
100.01 to 150.0090
150.01 to 200.00	1.00

Fees for domestic registered C.O.D. mail (sealed domestic mail of any class bearing postage at the first-class rate):

Amount collectible and indemnity payable	Fee
\$.01 to \$ 10.0080
10.01 to 50.00	1.10
50.01 to 100.00	1.20
100.01 to 200.00*	1.40

* Limit of collections.

When indemnity in excess of \$200 is desired, the fees for domestic registered C.O.D. mail are:

Indemnity limit	Fee
\$200.01 to \$ 300.00	\$1.50
300.01 to 400.00	1.60
400.01 to 500.00	1.70
500.01 to 600.00	1.80
600.01 to 700.00	1.90
700.01 to 800.00	2.00
800.01 to 1000.00	2.10

MISCELLANEOUS:

In registered and insured mail, a receipt card will be returned to the sender upon request. When a card is requested showing to whom and when the delivery was made, the rate is 10¢ if the request is made at the time of mailing, 25¢ if made thereafter. When a card is requested showing to whom and when the delivery was made and the address, the rate is 35¢ and must be paid at the time of mailing.

Fees for effecting delivery of domestic registered, insured, and C.O.D. mail to addressee only or to addressee or order: 50¢.

Fee for notifying sender or his representative of inability to deliver a C.O.D. article: 5¢.

Certificates of mailing for ordinary mail of any class: 5¢ for each article described thereon. Additional certificates for ordinary, registered, insured and C.O.D. mail: 2¢ for each article described thereon.

C.O.D. mail cannot be sent to Navy personnel on board ships or at overseas shore stations.

FOREIGN REGULAR MAIL:

Letters and letter packages: To Canada and Mexico, 4¢ per oz. or fraction. To all other countries, 8¢ for 1st oz., 5¢ per additional oz. or fraction. Weight limit: 4 lb. 6 oz. (60 lb. to Canada).

Post cards: To Canada and Mexico, 3¢ each, 6¢ with reply paid. To all other countries, 5¢ each, 10¢ with reply paid.

FOREIGN AIRMAIL:

Air-letter sheets: Air letters, consisting of sheets which can be folded into the form of an envelope and sealed, are acceptable for dispatch by airmail at a uniform rate of 10¢ each to all foreign countries. The sheets are sold at all post offices at 10¢ each. No enclosures, adhesive tape or stickers are permitted.

Letters and letter packages: See table for rates.

¹ For letters and letter packages. Unless otherwise indicated, rate shown is per each ¼ oz., and weight is limited to 4 lb., 6 oz. For rates for commercial papers, printed matter, samples of merchandise, small packages, 8-oz. merchandise packages, combination packages and articles grouped together, consult local postmaster. ² Rate for 4 oz. or fraction thereof. ³ Rate for each additional 4 oz. or fraction thereof. ⁴ Parcels for Brazil exceeding 22 lb. accepted for following offices only: Belém (Para), Belo Horizonte, Florianópolis, Fortaleza, Manaus, Pelotas, Porto Alegre, Recife (Pernambuco), Rio de Janeiro, Rio Grande (Rio Grande do Sul), Salvador (Bahia), Santos and São Paulo. ⁵ Per oz.; post cards each 1¢. ⁶ Articles limited to 60 lb. in weight. ⁷ Registered and ordinary articles in regular mails for Island of Formosa (Taiwan) will be accepted for air transmission to destination. ⁸ Parcels for many offices are limited to 22 lb. or 7 lb. Consult local postmaster for limitations. ⁹ Service to Cuba is limited to parcels weighing over 8 oz. and up to 22 lb. Cost for initial weight unit, which is over 8 oz. and up to 12 oz., is \$1.10. Each additional 4 oz. or fraction is 15¢. Packages weighing 8 oz. or less must not have customs declarations or parcel post stickers attached. ¹⁰ Parcels for Honduras exceeding 22 lb. accepted for following offices only: Amapala, Comayagua, La Ceiba, Olanchito, Progreso, Puerto Castilla, Puerto Cortez, San Pedro Sula, Tegucigalpa and Tela. ¹¹ Air parcels for Saudi Arabia limited to the following places only: Al Gaba, Al Lith, Al Wejh, Daba, Dammam, Dhahran, Hassa, Jiddah, Jizam, Katif, Khobar, Mecca, Medina, Qunūdhā, Rabigh, Rastanurra, Rivadh, Umm Lej and Yenbo. ¹² Limit to Chahba and Salkhad is 11 lb.; limit to Tel-Abiad and Yabroud is 22 lb. ¹³ Parcels for Lebanon exceeding 11 lb. not accepted for following offices: Ain-Zhalta, Baino, Falougha, Hermel, Koubayat, Maaser-el-Chouf, Ras-Baalbeek and Souk-el-Gharb. NOTE: For rates to countries not shown in this table, consult local postmaster. Leaders (....) indicate that there is no air-parcel-post service to the country.

HOW A PRESIDENT IS ELECTED

Selection of Delegates

FIRST, AT FULL DRESS MEETINGS several months before, the national committees decide the time and place of the conventions. Before the conventions meet, each party selects delegates from every state and territory.

Democrats allow 2 delegates with 1 vote apiece for each Senator, or 4 delegates with $\frac{1}{2}$ vote apiece. Two delegates are allowed for each Congressman. Also, a bonus vote of 4 is allowed each state that went Democratic in the last Presidential election. These states may elect 8 delegates with $\frac{1}{2}$ vote each. Six delegates each are allowed to Puerto Rico, D. C., Alaska, and Hawaii, and 2 each to the Canal Zone and the Virgin Islands.

Republicans allow each state 4 delegates-at-large and 2 for each Representative-at-large, as well as 6 additional delegates if the state went Republican in the previous Presidential election or, in that election or a subsequent one held prior to the next Republican National Convention, elects a Republican U. S. Senator or Governor. In addition, each Congressional district within the state that cast 2,000 Republican votes at the last election is permitted a delegate, with an additional delegate if that district cast 10,000 votes. Republicans further allow 4 delegates-at-large for Alaska, 6 for D. C., 6 for Hawaii (plus 4 for having elected a Delegate to Congress), 3 for Puerto Rico and 1 for the Virgin Islands.

Each party provides for the selection of an equal number of alternates to serve in the absence of the regular delegates. Delegates are chosen differently in the different states.

The Conventions

At each convention a temporary chairman is chosen, usually to deliver the party's keynote speech. After a credentials committee seats the various delegates, a permanent chairman is elected. The convention then votes on a platform, drawn up by the platform committee.

By the third or fourth day, Presidential nominations begin. The chairman calls the roll of states alphabetically. A state may place a candidate in nomination or yield to another state.

Voting, again alphabetically by voice vote, begins after all nominations have been made and seconded. A simple majority is required in each party, although this may require many ballots.

Finally, the Vice Presidential candidate is selected. Although there is no law saying that the candidates *must* come from different states, it is practically necessary for this to be the case. Otherwise, accord-

ing to the Constitution (see Amendment XII), electors from that state could vote for only one of the candidates and would have to cast their other vote for some person of another state. This could result in the awkward situation of a Presidential candidate's receiving a majority electoral vote and his running mate's failing to.

The Electoral College

The next step in the process is the nomination of electors in each state, according to its laws. These electors must not be Federal office holders. In the November election, the voters cast their votes for electors, not for President. In some states, the ballots include only the names of the Presidential and Vice Presidential candidates; in others, they include only names of the electors. Nowadays, it is rare for electors to be split between parties. The last such occurrence was in Tennessee in 1948; the last before that, in West Virginia in 1916. On three occasions (1824, 1876 and 1888), the candidate with the largest popular vote failed to obtain an electoral-vote majority.

Each state has as many electors as it has United States Senators and members of the House of Representatives. There are 96 Senators and 435 Representatives, a total of 531 electoral votes, of which 266 are needed to win.

On the first Monday after the second Wednesday in December, the electors cast their votes in their respective state capitols. Constitutionally they may vote for someone other than the party candidate but practically they cannot since they are pledged to one party and its candidate on the ballot. Should the Presidential or Vice-Presidential candidate die between the November election and the December meetings, the electors pledged to vote for him could vote for whomever they pleased. However, it seems certain that the national committee would attempt to get an agreement among the state party leaders for a replacement candidate.

The votes of the electors, certified by the states, are sent to Congress, where the president of the Senate opens the certificates and has them counted in the presence of both Houses on January 6. The new President is inaugurated at noon on January 20.

Should no candidate receive a majority of the electoral vote for President, the House of Representatives chooses a President from among the three highest candidates, voting, not as individuals, but as states, with a majority (now 25) needed to elect. Should no Vice Presidential candidate obtain the majority, the Senate, voting as individuals, chooses from the highest two.

¹ The Convention adopted the name Union party so as to attract War Democrats and others favoring prosecution of the war. ² In session until July 10, 1924. ³ 103d ballot. ⁴ States' Rights delegates from 13 Southern states. ⁵ Progressive party.

Presidential Succession

The following is the order of the succession to the Presidency. No person may become President, however, unless he is eligible under the Constitution.

1. Vice President of the U. S.
2. Speaker of the House.
3. President pro tempore of the Senate.
4. Secretary of State.

5. Secretary of the Treasury.
6. Secretary of Defense.
7. Attorney General.
8. Postmaster General.
9. Secretary of the Interior.
10. Secretary of Agriculture.
11. Secretary of Commerce.
12. Secretary of Labor.

Presidential Elections, 1789 to 1956

	Thomas Jefferson	Anti-Federalist	4		Charles C. Pinckney	Federalist	64
	Aaron Burr	Anti-Federalist	1		John Jay	Federalist	1
	Votes not cast		6				

¹ For the original method of electing the President and the Vice President, see Article II, Section 1, of the Constitution. ² Only 10 states participated in the election. The New York legislature chose no electors, and North Carolina and Rhode Island had not yet ratified the Constitution. ³ As Jefferson and Burr were tied, the House of Representatives chose the President. In a vote by states, 10 votes were cast for Jefferson, 4 for Burr; 2 votes were not cast.

¹ The first election in which the electors voted for President and Vice President on separate ballots. (See Amendment XII to the Constitution.) ² As no candidate had an electoral-vote majority, the House of Representatives chose the President from the first three. In a vote by states, 13 votes were cast for Adams, 7 for Jackson, and 4 for Crawford. ³ The Antimasonic party on Sept. 26, 1831, was the first party to hold a nominating convention to choose candidates for President and Vice President. ⁴ As Johnson did not have an electoral-vote majority, the Senate chose him 33-14 over Granger, the others being legally out of the race. ⁵ Harrison died Apr. 4, 1841, and Tyler succeeded him Apr. 6. ⁶ Taylor died July 9, 1850, and Fillmore succeeded him July 10. ⁷ Also known as the Know-Nothing party. ⁸ Lincoln died Apr. 15, 1865, and Johnson succeeded him the same day. ⁹ 23 Southern electoral votes were excluded. ¹⁰ Name adopted by the Republican National Convention of 1864. Johnson was a War Democrat.

NOTE: For minor party vote and candidates, see tables on following pages for 1948-1956.

¹ For those candidates receiving over 75,000 votes. ² Greeley died Nov. 29, 1872, before his 66 electors voted. In the electoral balloting for President, 63 of Greeley's votes were scattered among Hendricks, Brown, Jenkins and Davis; the other 3, included in "Votes not counted," were cast for Greeley by electors from Georgia. This was the first election in which every state chose its electors by popular vote. ³ After the voting of the electoral college, Tilden had 184 undisputed votes, and Hayes 163. However, 22 other votes were in doubt, because two sets of electoral ballots were received from South Carolina, Louisiana, Florida and Oregon. For each of the three Southern states, one set was completely Democratic, the other completely Republican. For Oregon, one set gave all 3 of the state's votes to Hayes, the other gave one of the votes to Tilden. To settle the dispute, Congress created an Electoral Commission on Jan. 29, 1877. This Commission, consisting of 5 Supreme Court justices, 5 senators and 5 representatives (8 Republicans and 7 Democrats), gave the 22 votes in question to Hayes. ⁴ Garfield died Sept. 19, 1881, and Arthur succeeded him Sept. 20. ⁵ The members of the People's party were known as Populists. ⁶ McKinley died Sept. 14, 1901, and Roosevelt succeeded him the same day. ⁷ James S. Sherman, Republican candidate for Vice President, died Oct. 30, 1912, and the Republican electoral votes were cast for Butler. ⁸ Harding died Aug. 2, 1923, and Coolidge succeeded him Aug. 3. ⁹ Roosevelt died Apr. 12, 1945, and Truman succeeded him the same day. ¹⁰ One electoral vote from Alabama was cast for Walter B. Jones.

Presidential Election of 1948

CANDIDATES FOR PRESIDENT AND VICE PRESIDENT

Democratic—Harry S. Truman, Missouri; Alben Barkley, Kentucky.

Republican—Thomas E. Dewey, New York; Earl Warren, California.

States' Rights Democratic—J. Strom Thurmond, South Carolina; Fielding L. Wright, Mississippi.

Progressive—Henry A. Wallace, Iowa; Glen H. Taylor, Idaho.

Socialist—Norman Thomas, New York; Tucker P. Smith, Michigan.

Prohibition—Claude A. Watson, California; Dale Learn, Pennsylvania.

Socialist Labor—Edward A. Teichert, Pennsylvania; Stephen Emery, New York.

¹ Registration of all or part of the voters is required in most states. ² Annual levy. Although poll (or head) taxes are levied in several other states, those listed make payment of the tax a condition for voting. ³ Precinct or ward. ⁴ Precinct. ⁵ City or town, and 15 days in precinct. ⁶ City or town. ⁷ Minimum voting age in Alaska is 19, in Georgia it is 18, in all other states it is 21. ⁸ Precinct; 6 mo. in city or town. ⁹ Township. ¹⁰ Township or ward. ¹¹ Parish. ¹² Must be able to read, understand and/or write any section of state constitution. ¹³ 6 months if previously qualified elector or natural-born citizen of state. ¹⁴ 1953 act makes poll tax noncumulative except for 2 years preceding election in which elector offers to vote. ¹⁵ To qualify to vote for representatives to general assembly or states. ¹⁶ County, city, or town. ¹⁷ City, town, ward, or precinct. ¹⁸ Repealed in 1945. ¹⁹ Precinct, municipality 4 mo. ²⁰ A person must take freeman's oath as qualification for voting. ²¹ \$1.50 levied by state; 25 cents levied by most counties, but not all. ²² To vote for county officials requires 30 days residence in the county; for municipal officials, 30 days in the municipality. State residents may vote in national and state-wide elections without days local residence. ²³ Residents of less than one year may vote in presidential elections if eligible to vote elsewhere prior to moving. ²⁴ If person moves during 30-day period, he has to vote in old location.

Plurality and Majority

In order to win a plurality, a candidate must receive a greater number of votes than anyone running against him. If he receives 50 votes, for example, and two other candidates receive 40 and 2, he will have a plurality of one vote over his closest opponent. However, a candidate does not have a majority unless he receives more than 50% of the total votes cast. In the example above, the candidate does not have a majority, because his votes are less than 50% of the 101 votes cast.

Presidents and Vice Presidents of the U. S.

Annual Salaries of Federal Officials

Source: U. S. Department of the Treasury

President of the U. S.	\$100,000 ¹	Secretaries of the Army, Navy, Air Force.....	22,000
Vice President of the U. S.	35,000 ²	Senators and Representatives.....	22,500
Cabinet members.....	25,000	Speaker of the House.....	35,000 ³
Undersecretaries of executive departments.....	21,000 ³	Chief Justice of the Supreme Court.....	35,500
Deputy Secretary of Defense.....	22,500	Associate Justices of the Supreme Court.....	35,000

¹ Plus taxable \$50,000 for expenses and a nontaxable sum (not to exceed \$40,000 a year) for traveling and official entertainment expenses. ² Plus taxable \$10,000 for expenses. ³ Except Undersecretary of State, who receives \$22,500. NOTE: All salaries shown above are taxable.

Footnotes for Table on Preceding Page

¹ F—Federalist; DR—Democratic-Republican; D—Democratic; W—Whig; R—Republican; U—Union. ² Same party as President, except as indicated. ³ No party for first election. The party system in the U. S. made its appearance during Washington's first term. ⁴ Democratic-Republican. ⁵ Died in office Apr. 20, 1812. ⁶ Died in office Nov. 23, 1814. ⁷ Resigned Dec. 28, 1832, to become U. S. Senator. ⁸ Died in office. ⁹ Died in office Apr. 18, 1853. ¹⁰ Died in office (shot Apr. 14 by John Wilkes Booth). ¹¹ Died in office Nov. 22, 1875. ¹² Died in office (shot July 2 by Charles J. Guiteau). ¹³ Died in office Nov. 25, 1885. ¹⁴ Died in office (shot Sept. 6 by Leon F. Czolgosz). ¹⁵ Died in office Nov. 21, 1899. ¹⁶ Died in office Oct. 30, 1912. ¹⁷ The Republican National Convention of 1864 adopted the name Union party. It renominated Lincoln for President; for Vice President it nominated Johnson, a War Democrat. Although frequently listed as a Republican Vice President and President, Johnson undoubtedly considered himself strictly a member of the Union party. When that party broke apart after 1868, he returned to the Democratic party. ¹⁸ Johnson was not a professed church member; however, he admired the Baptist principles of church government.

BIOGRAPHIES OF THE PRESIDENTS

GEORGE WASHINGTON

was born February 22, 1732 (February 11, 1731/2, old style) in Westmoreland County, Virginia. He early trained as a surveyor; but in 1752 he was appointed adjutant in the Virginia militia, and for the next three years he took an active part in the wars against the French and Indians, serving as General Braddock's aide in the disastrous campaign against Fort Duquesne. In 1759 he resigned from the militia, married Martha Dandridge Custis, a widow, and settled down as a gentleman farmer at Mount Vernon.

As a militiaman, he had been exposed to the arrogance of the British officers, and his experience as a planter with British commercial restrictions increased his anti-British sentiment. He opposed the Stamp Act of 1765 and after 1770 became increasingly prominent in organizing resistance. A delegate to the Continental Congress, Washington was selected as commander in chief of the Continental Army and took command at Cambridge, Massachusetts, on July 3, 1775.

Inadequately supported and sometimes covertly sabotaged by the Congress, in charge of troops who were inexperienced, badly equipped and impatient of discipline, Washington conducted the war on the policy of avoiding major engagements with the British and wearing them down by harassing tactics. His able generalship, along with the French alliance and the growing weariness within Britain, brought the war to a conclusion with the surrender of Cornwallis at Yorktown on October 19, 1781.

The chaotic years under the Articles of Confederation led Washington to return to public life in the hope of promoting the formation of a strong central government. He presided over the Constitutional Convention and yielded to the universal demand that he serve as first President. In office, he sought to unite the nation in the service of establishing the authority of new government at home and abroad. Greatly distressed by the emergence of the Hamilton-Jefferson rivalry, he worked to maintain neutrality but actually sympathized more with Hamilton. Following his unanimous re-election in 1792, his second term was dominated by the Federalists. His Farewell Address rebuked party spirit and warned against foreign entanglements.

He died at Mt. Vernon on December 14, 1799. Tall, dignified and impressive, Washington gave a public impression of austerity, though he was capable of gaiety in private. His life was characterized by a

strict sense of duty to his people. The standard biographies are by Fitzpatrick, Ford, Hughes and Stephenson.

JOHN ADAMS

was born on October 30 (October 19, old style), 1735, at Braintree (now Quincy), Massachusetts. A Harvard graduate, he considered teaching and the ministry but finally turned to law and was admitted to the bar in 1758. He opposed the Stamp Act, served as lawyer for patriots indicted by the British and, by the time of the Continental Congresses, was in the vanguard of the movement for independence. In 1778 he went to France as commissioner. Subsequently he helped negotiate the peace treaty with Britain, and in 1785 became the U. S. envoy to London. Resigning in 1788, he was elected Vice President under Washington, and was re-elected in 1792.

Though a Federalist, Adams did not get along with Hamilton who sought to prevent his election to the presidency in 1796, and thereafter intrigued against his administration. Adams was chosen with 71 electoral votes to 68 for his closest competitor, Thomas Jefferson, who became Vice President. In 1798 Adams' independent policy averted a war with France but completed the break with Hamilton and the right-wing Federalists while, at the same time, the enactment of the Alien and Sedition Acts, directed against foreigners and against critics of the government, exasperated the Jeffersonian opposition. The split between Adams and Hamilton elected Jefferson in 1800. Adams retired to his home in Quincy, Massachusetts. He later corresponded with Jefferson and they died on the same day, July 4, 1826.

Stout, somewhat vain and irascible, Adams was honest, fearless and essentially fair-minded. His *Defence of the Constitutions of Government of the United States* (1787) contains original and striking if conservative political ideas. He married Abigail Smith in 1764, and their life together was long and happy. The standard biographies are by Morse and Chinard.

THOMAS JEFFERSON

was born on April 13 (April 2, old style), 1743, at Shadwell in Goochland (now Albemarle) County, Virginia. A William and Mary graduate, he studied law but from the start showed an interest in science and philosophy. His literary skill and political clarity brought him to the forefront

of the revolutionary movement in Virginia. As delegate to the Continental Congress, he drafted the Declaration of Independence. In 1776 he entered the Virginia House of Delegates and initiated a comprehensive reform program for the abolition of feudal survivals in land tenure and the separation of church and state.

In 1779 he became governor, but constitutional limitations on his power combined with his own lack of executive energy caused an unsatisfactory administration, culminating in Jefferson's virtual abdication when the British invaded Virginia in 1781. He now retired to his beautiful home at Monticello, to his wife, Martha Wayles Skelton, whom he had married in 1772 and who died in 1782, and to his children.

Jefferson's *Notes on Virginia* (1784-85) illustrate his many-faceted interests, his limitless intellectual curiosity, his deep faith in agrarian democracy. Sent to Congress in 1783, he helped lay down the decimal system and drafted basic reports on the organization of the western lands. In 1785 he was appointed minister to France, where the Anglo-Saxon liberalism he had drawn from Locke was stimulated by contact with the thought which would soon ferment in the French Revolution. In 1789 Washington appointed him Secretary of State. While favoring the Constitution and a strengthened central government, Jefferson came to believe that Hamilton contemplated the establishment of a monarchy. Growing differences resulted in Jefferson's resignation on Dec. 31, 1793.

Elected Vice President in 1796, Jefferson continued to serve as spiritual leader of the opposition to Federalism, particularly to the repressive Alien and Sedition Acts. He was elected President in 1801 by the House of Representatives as a result of Hamilton's decision to throw the Federalist votes to him rather than to Aaron Burr, who had tied him in electoral votes. The purchase of Louisiana from France in 1803, though in violation of his earlier constitutional scruples, was the most notable act of his administration. Re-elected in 1804 with 162 electoral votes to 14 for the Federalist Charles C. Pinckney, Jefferson tried desperately during his second term to keep the United States out of the Napoleonic Wars in Europe, employing to this end the unpopular embargo policy.

After his retirement to Monticello in 1809, he developed his interest in education, founding the University of Virginia and watching its development with never-lagging interest. He died at Monticello on July 4, 1826. Tall, loose-jointed, a poor speaker, Jefferson had an enormous variety of interests and skills, ranging from education and science to architecture and music. Economically his conception of democracy presupposed an essentially rural

community of small freeholds; but his deep and abiding faith in the common man provides inspiration for future generations. The standard biographies are by Chinard, Bowers, Kimball, Randall and Malone.

JAMES MADISON

was born in Port Conway, Virginia, on March 16, 1751 (March 5, 1750/1, old style). A Princeton graduate, he joined the struggle for independence on his return to Virginia in 1771. In the seventies and eighties he was active both in state politics, where he championed the Jefferson reform program, and in the Continental Congress. He was influential in the Constitutional Convention as leader of the group favoring a strong central government and as recorder of the debates; and he subsequently wrote, in collaboration with Alexander Hamilton and John Jay, the *Federalist* papers to aid the campaign for the adoption of the Constitution.

In the new Congress, Madison soon emerged as the leader in the House of the men who opposed Hamilton's financial program and his pro-British leanings in foreign policy. Retiring from Congress in 1797, he continued active in Virginia and drafted the Virginia Resolution protesting the Alien and Sedition Acts. His intimacy with Jefferson made him natural choice for Secretary of State in 1801.

In 1809 Madison succeeded Jefferson as President, with 122 electoral votes to 47 for the Federalist, C. C. Pinckney, and 6 scattering. His attractive wife, Dolly Payne Todd, whom he married in 1794, brought a new social sparkle to the executive mansion. In the meantime, increasing tension with Britain culminated in the War of 1812—a war for which the United States was unprepared, and for which Madison lacked the executive talent to clear out incompetence and mobilize the nation's energies. Madison was re-elected in 1812, with 128 electoral votes to 89 for the Federalist, De Witt Clinton. In 1814 the British actually captured Washington and forced Madison to flee to Virginia.

In his domestic program, Madison capitulated to the Hamiltonian policies that he had resisted twenty years before, signing bills to establish a United States Bank and a higher tariff. Following his presidency, he remained in retirement in Virginia until his death on June 28, 1836. Small, wrinkled, unimpressive, Madison had an acute political intelligence but lacked executive force. The standard biographies are by Hunt, Brant and Rives.

JAMES MONROE

was born on April 28, 1758, in Westmoreland County, Virginia. A William and Mary graduate, he served in the army during

the first years of the Revolution and was wounded at Trenton. He then entered Virginia politics and later national politics under the sponsorship of Jefferson. In 1786 he married Eliza Kortright.

Fearing centralization, Monroe opposed the adoption of the Constitution and, as senator from Virginia, was highly critical of the Hamiltonian program. In 1794 he was appointed minister to France where his ardent sympathies with the Revolution exceeded the wishes of the State Department. A troubled diplomatic career ended with his recall in 1796. From 1799 to 1802 he was governor of Virginia. In 1803 Jefferson sent him to France to help negotiate the Louisiana Purchase and for the next few years he was active in various continental negotiations.

In 1808 Monroe flirted with the radical wing of the Republican party, which opposed Madison's candidacy; but the presidential boom came to naught and, after a brief term as governor of Virginia in 1811, Monroe accepted Madison's offer of the State Department. During the war he vainly sought a field command and served as Secretary of War from Sept., 1814, to Mar., 1815.

Elected President in 1816 with 183 electoral votes to 34 for the Federalist Rufus King, and re-elected without opposition in 1820, Monroe, the last of the Virginia dynasty, pursued the course of systematic tranquilization which won for his terms the name "the era of good feeling." He continued Madison's surrender to the Hamiltonian domestic program, signed the Missouri Compromise, acquired Florida and, with the able assistance of his Secretary of State, John Quincy Adams, promulgated the Monroe Doctrine in 1823, declaring against foreign colonization or intervention in the Americas. He died in New York City on July 4, 1831.

A sound man of medium abilities, Monroe possessed qualities of judgment rather than of leadership. The standard biographies are by Morgan, Gilman and Styron.

JOHN QUINCY ADAMS

was born on July 11, 1767, at Braintree (now Quincy), Massachusetts, the son of John Adams. He spent his early years in Europe with his father, graduated from Harvard and entered law practice. His anti-Jeffersonian newspaper articles won him political attention. In 1794 he became minister to the Netherlands, the first of several diplomatic posts which occupied him until his return to Boston in 1801. In 1797 he married Louisa Catherine Johnson.

In 1803 he was elected to the Senate, nominally as a Federalist, but his repeated displays of independence on such issues as the Louisiana Purchase and the embargo caused his party to compel his resignation

and ostracize him socially. In 1809 Madison rewarded him for his support of Jefferson by appointing him minister to St. Petersburg. He helped negotiate the Treaty of Ghent in 1814 and in 1815 became minister to London. In 1817 Monroe appointed him Secretary of State where he served with great distinction, gaining Florida from Spain without hostilities and playing an equal part with Monroe in formulating the Monroe Doctrine.

When no presidential candidate received a majority of electoral votes in 1824, Adams, with the support of Henry Clay, was elected by the House in 1825 over Andrew Jackson who had the original plurality. Adams had ambitious plans of government activity to foster internal improvements and promote the arts and sciences; but congressional obstructionism combined with his own unwillingness or inability to play the role of a politician meant that little was accomplished. Retiring to Quincy after his defeat in 1828, he was elected to the House of Representatives in 1831 where, though nominally a Whig, he pursued as ever an independent course. He led the fight to force Congress to receive anti-slavery petitions and fathered the Smithsonian Institution.

Stricken on the floor of the House, he died on February 23, 1848. Tactless, brusque, conscientious, a rough and savage debater, Adams spared neither himself nor his enemies. His long and detailed *Diary* gives a unique picture of the personalities and politics of the times. The standard biographies are by Morse and Clark.

ANDREW JACKSON

was born on March 15, 1767, in what is now generally agreed to be Waxhaw, South Carolina. After a turbulent boyhood as an orphan and a British prisoner, he moved west to Tennessee where he soon qualified for law practice but found time for such frontier pleasures as horse racing, cock-fighting and dueling. His marriage to Rachel Donelson Robards in 1791 was complicated by subsequent legal uncertainties about the status of her divorce. During the seventeen-nineties Jackson served in the Tennessee constitutional convention, the federal House of Representatives, the federal Senate and the Tennessee supreme court.

After some years as a country gentleman, living at the Hermitage near Nashville, Jackson in 1812 was given command of Tennessee troops sent against the Creeks. He defeated the Indians at Horseshoe Bend in 1814; subsequently he became a major general and won the Battle of New Orleans over veteran British troops though after the treaty of peace had been signed at Ghent. In 1818 General Jackson invaded Florida, captured Pensacola and hanged two Englishmen named Arbuthnot and

Ambrister, creating an international incident. A presidential boom began for him in 1821 and in its service he returned to the Senate (1823-25). Though he won a plurality of electoral votes in 1824, he lost in the House when Clay threw his strength to Adams; he won easily in 1828 by an electoral vote of 178 to 83.

As President, Jackson greatly expanded the power and prestige of the presidential office and carried through an unexampled program of domestic reform, vetoing the bill to extend the United States Bank, moving toward a hard-money currency policy and checking the program of federal internal improvements. He also vindicated federal authority against South Carolina with its doctrine of nullification and against France on the question of debts. The support given his policies by the workingmen of the East as well as by the farmers of the East, West and South resulted in his triumphant re-election in 1832 over Clay by an electoral vote of 219 to 49, with 8 scattering and 2 not cast.

After watching the inauguration of his hand-picked successor, Martin Van Buren, Jackson retired to the Hermitage where he maintained a lively interest in national affairs until his death on June 8, 1845. A tall, dignified man with a drawn and wrinkled face, Jackson has been endowed by partisan historians with a violence and rascality he appears not to have possessed. His great contribution was to adjust the presidential office and the democratic doctrines of Jefferson to the new situation created by the Industrial Revolution. The standard biographies are by James, Bassett and Parton.

MARTIN VAN BUREN

was born on December 5, 1782, at Kinderhook, New York. After graduating from the village school, he became a law clerk, entered practice in 1803 and soon became active in state politics as state senator and attorney general. In 1821 he was elected to the United States Senate. He threw the support of his efficient political organization, known as the Albany Regency, to William H. Crawford in 1824 and to Jackson in 1828. After leading the opposition to Adams' administration in the Senate, he served briefly as governor of New York and resigned to become Jackson's Secretary of State. He soon became in close personal terms with Jackson and played an important part in turning the Jacksonian program from the ones intended by his original Western backers.

In 1832 Van Buren became Vice President; in 1836, President, with an electoral vote of 170 against 124 scattered among our opponents. The Panic of 1837 overshadowed his term. He attributed it to

the overexpansion of the credit and favored the establishment of an independent treasury as repository for the federal funds. In 1840 he established a ten-hour day on public works. Defeated by Harrison in 1840, he was the leading contender for the Democratic nomination in 1844 until he publicly opposed immediate annexation of Texas and was subsequently beaten by the Southern delegations at the Baltimore convention. This incident increased his growing misgivings about the slave power.

After working behind the scenes among the antislavery Democrats, Van Buren joined in the movement which led to the Free-Soil party and became its candidate for President in 1848. He subsequently returned to the Democratic party while continuing to object to its pro-Southern policy. He died in Kinderhook on July 24, 1862. His *Autobiography* throws valuable sidelights on the political history of the times.

Small, erect, dapper, Van Buren had a reputation for slick politicking which won him such sobriquets as the Little Magician and the Red Fox of Kinderhook; but, as his later career showed, he was capable of taking firm and unpopular stands on public issues. His wife Hannah Hoes, whom he married in 1807, died in 1819.

The standard biographies are by Shepard and Lynch.

WILLIAM HENRY HARRISON

was born in Charles City County, Virginia, on February 9, 1773. Joining the army in 1791, he was active in Indian fighting in the Northwest, became secretary of the Northwest Territory in 1798 and governor of Indiana in 1800. He married Anna Symmes in 1795. Growing discontent over white encroachments on Indian lands led to the formation of an Indian alliance under Tecumseh to resist further aggressions. In 1811 Harrison won a nominal victory over the Indians at Tippecanoe and in 1813 a more decisive one at the Battle of the Thames, where Tecumseh was killed.

After resigning from the army in 1814, Harrison had an obscure career in politics and diplomacy, ending up in twenty years as a county recorder in Ohio. Nominated for President in 1835 as a military hero whom the conservative politicians hoped to be able to control, he ran surprisingly well against Van Buren in 1836. Four years later he defeated Van Buren by an electoral vote of 234 to 60 but caught pneumonia and died in Washington a month after his inauguration, April 4, 1841. Harrison's qualities were those of a soldier rather than of a statesman or political leader. The standard biographies are by Cleaves and Goebel.

JOHN TYLER

was born in Charles City County, Virginia, on March 29, 1790. A William and Mary graduate, he entered law practice and politics, serving in the House of Representatives (1816-21) and later as governor of Virginia (1825-27), and as senator. A thorough-going strict constructionist, he supported Crawford in 1824 and Jackson in 1828 but broke with Jackson over his Bank policy and became a member of the Southern state-rights group which co-operated with the Whigs. In 1836 he resigned from the Senate rather than follow instructions from the Virginia legislature to vote for a resolution expunging censure of Jackson from the Senate record.

Elected Vice President on the Whig ticket in 1840, Tyler succeeded to the presidency on Harrison's death. His strict-constructionist views soon caused a split with the Henry Clay wing of the Whig party and a stalemate on domestic questions. Tyler's more considerable achievements were his support of the Webster-Ashburton Treaty with Britain and his success in bringing about the annexation of Texas through joint congressional resolution.

After his presidency he lived in retirement in Virginia until the outbreak of the Civil War when he emerged briefly as chairman of a peace convention and then as delegate to the provisional Congress of the Confederacy. He died on January 18, 1862. He was married first to Letitia Christian March in 1813 and, two years after her death in 1842, to Julia Gardiner. Witty, amiable, courteous, Tyler was a Virginia gentleman whose presidency was hamstrung by the basic contradiction between his own ideas and those of the party which put him on the ticket as Vice President. The standard biographies are by Chitwood and Tyler.

JAMES KNOX POLK

was born in Mecklenburg County, North Carolina, on November 2, 1795. A graduate of the University of North Carolina, he moved west to Tennessee, was admitted to the bar and soon became prominent in state politics. In 1825 he was elected to the House of Representatives where he opposed Adams and, after 1829, became Jackson's floor leader in the fight against the Bank. In 1835 he became Speaker of the House. In 1839 he was elected governor of Tennessee but was beaten in tries for re-election in 1841 and 1843.

The supporters of Van Buren for the Democratic nomination in 1844 counted on Polk as his running mate; but, when Van Buren's stand on Texas alienated Southern support, the convention swung to Polk on the ninth ballot. He was elected over Henry Clay, the Whig candidate, by an

electoral vote of 170 to 105. Rapidly disillusioning those who thought that he would not run his own administration, Polk proceeded steadily and precisely to achieve four major objectives—the acquisition of California, the settlement of the Oregon question, the reduction of the tariff and the establishment of the independent treasury. He also enlarged the Monroe Doctrine to exclude all non-American intervention in American affairs, whether forcible or not; and he forced Mexico into a war which he waged to a successful conclusion. His wife Sarah Childress, whom he married in 1824, was a woman of charm and ability. Polk died in Nashville, Tennessee, on June 15, 1849.

Serious, hardworking, lacking in color, Polk has long been underrated by historians who mistakenly regarded him as a slaveholders' puppet; in fact, few presidents have so thoroughly controlled their own administration or have so ably accomplished the purposes they set for themselves. Polk's *Diary* reflects the mood and problems of his presidency. The standard biography is by McCormac.

ZACHARY TAYLOR

was born at Montebello, Orange County, Virginia, on November 24, 1784. Embarking on a military career in 1808, Taylor fought in the War of 1812, the Black Hawk War and the Seminole War, holding in between garrison jobs on the frontier or desk jobs in Washington. A brigadier general as a result of his victory over the Seminoles at Lake Okeechobee (1837), Taylor held a succession of Southwestern commands and in 1846 established a base on the Rio Grande, where his forces engaged in hostilities which precipitated the war with Mexico. He captured Monterrey in Sept., 1846, and, disregarding Polk's orders to stay on the defensive, defeated Santa Anna at Buena Vista in February, 1847, ending the war in the northern provinces.

Though Taylor had never cast a vote for President, his party affiliations were Whiggish, and his availability was increased by his difficulties with Polk. He was elected President over the Democrat Lewis Cass by an electoral vote of 163 to 127. During the revival of the slavery controversy, which was to result in the Compromise of 1850, Taylor began to take an increasingly firm stand against appeasing the South; but he died in Washington on July 9, 1850, in the midst of the fight over the Compromise. He married Margaret Mackall Smith in 1810. His bluff and simple soldierly qualities won him the name of Old Rough and Ready. During his brief term as President he displayed a growing insight into political questions. The standard biographies are by Hamilton and by Bent and McKinley.

MILLARD FILLMORE

was born at Locke, Cayuga County, New York, on January 7, 1800. A lawyer, he entered politics as an Antimason under the sponsorship of Thurlow Weed, editor and party boss, and subsequently followed Weed into the Whig party. He served in the House of Representatives (1833-35 and 1837-43) and played a leading role in writing the tariff of 1842. Defeated for governor of New York in 1844, he became comptroller in 1848, was put on the Whig ticket with Taylor as a concession to the Clay wing of the party and became President upon Taylor's death in 1850.

As President, Fillmore broke with Weed and William H. Seward and associated himself with the pro-Southern Whigs, supporting the Compromise of 1850. Defeated for the Whig nomination in 1852, he ran for President in 1856 as candidate of the American or Know-Nothing party, which sought to unite the country against foreigners in the alleged hope of diverting it from the explosive slavery issue. Fillmore opposed Lincoln during the Civil War. He died in Buffalo on March 8, 1874. He was married in 1826 to Abigail Powers, who died in 1853, and in 1858 to Caroline Carmichael McIntosh. Urbane, gracious, colorless and weak, Fillmore was an undistinguished President. The standard biography is by Griffiths.

FRANKLIN PIERCE

was born at Hillsboro, New Hampshire, on November 23, 1804. A Bowdoin graduate and lawyer, he won rapid political advancement in the Democratic party, in part because of the prestige of his father, Governor Benjamin Pierce. By 1831 he was Speaker of the New Hampshire House of Representatives; from 1833 to 1837 he served in the federal House and from 1837 to 1842 in the Senate. His wife, Jane Means Appleton, whom he had married in 1834, disliked Washington and the somewhat dissipated life led by Pierce; and in 1842 Pierce, resigning from the Senate, took up a successful law practice in Concord, New Hampshire.

During the Mexican War Pierce was a brigadier general. Thereafter he continued to oppose antislavery tendencies within the Democratic party. As a result, he was the Southern choice to break the deadlock at the Democratic convention of 1852 and was nominated on the 49th ballot. Pierce rolled up 254 electoral votes to 42 for Winfield Scott, the Whig candidate.

As President, Pierce followed a course of appeasing the South at home and of playing with schemes of territorial expansion abroad. The failure of both his foreign and domestic policies prevented his renomination; and he died in Concord, New Hampshire, on October 8, 1869, in relative ob-

scurity. A kindly and courteous person, Pierce was weak, unstable and lacking in presidential qualities. The standard biography is by Nichols.

JAMES BUCHANAN

was born near Mercersburg, Pennsylvania, on April 23, 1791. A Dickinson graduate and a lawyer, he entered Pennsylvania politics as a Federalist. With the disappearance of the Federalist party, he became a Jacksonian Democrat. He served with ability in the House (1821-31), as minister to St. Petersburg (1832-33) and in the Senate (1834-45), and in 1845 became Polk's Secretary of State. Disappointed in the presidential nomination in 1852, Buchanan became minister to Britain in 1853 where he participated with other American diplomats in Europe in drafting the expansionist Ostend Manifesto.

In 1856 Buchanan received the Democratic nomination and won the election, gaining 174 electoral votes to 114 for John C. Frémont, the Republican candidate, and 8 for Millard Fillmore, American party. The growing crisis over slavery presented Buchanan with problems he lacked the will to tackle. His appeasement of the South alienated the Stephen Douglas wing of the Democratic party without reducing Southern militancy on slavery issues. While denying the right of secession, Buchanan also denied that the federal government could do anything about it. He supported the administration during the Civil War and died in Lancaster, Pennsylvania, on June 1, 1868.

The only President to remain a bachelor throughout his term, Buchanan used his charming niece Harriet Lane as White House hostess. Legalistic, indecisive and timorous as President, Buchanan filled his other public offices capably. The standard biography is by Curtiss.

ABRAHAM LINCOLN

was born in Hardin (now Larue) County, Kentucky, on February 12, 1809. His family moved to Indiana and then to Illinois, and Lincoln gained what education he could along the way. While reading law, he worked in a store, managed a mill, surveyed, and split rails. In 1834 he went to the state legislature as a Whig and became the party's floor leader. For the next twenty years he remained in law practice in Springfield, except for a single term (1847-49) in Congress where he denounced the Mexican War. In 1855 he was a candidate for senator and in 1856 he joined the new Republican party.

A leading but unsuccessful candidate for the vice-presidential nomination with Frémont, Lincoln gained national attention in 1858 when, as Republican candidate for

senator from Illinois, he engaged in a series of debates with Stephen A. Douglas, the Democratic candidate. He lost the senatorial election, but continued to prepare the way for the 1860 Republican convention and was rewarded with the presidential nomination on the third ballot. He polled 180 electoral votes, as against the 123 of his three opponents, but had only a plurality of the popular vote.

From the start, Lincoln made clear that, unlike Buchanan, he believed the national government had the power to crush the rebellion. Not an abolitionist, he held the slavery issue subordinate to that of preserving the Union but soon perceived that the war could not be brought to a successful conclusion without freeing the slaves. His administration was hampered by the incompetence of many Union generals, the inexperience of the troops and the harassing political tactics both of the Republican Radicals, who favored a hard policy toward the South, and the Democratic Copperheads, who desired a negotiated peace. The Gettysburg Address of November 19, 1863, marks the high point in the record of American eloquence. His patient search for a winning combination finally brought Generals Ulysses S. Grant and William T. Sherman to the top; and their series of victories in 1864 dispelled the mutterings from both Radicals and Peace Democrats which at one time seemed to threaten Lincoln's re-election. He received 212 electoral votes to 21 for George B. McClellan, the Democratic candidate. His inaugural address urged leniency toward the South: "With malice toward none, with charity for all . . . let us strive on to finish the work we are in; to bind up the nation's wounds . . ." This policy aroused growing opposition on the part of the Republican Radicals, but Lincoln was shot by John Wilkes Booth at Ford's Theater, Washington, on April 14, 1865, before the matter could be put to test. He died the following day.

Lincoln's marriage to Mary Todd in 1842 was often unhappy and turbulent, in part because of his wife's pronounced instability. By his remarkable literary artistry, his essential patience and devotion, his profound sense of the importance of government by, for and of the people, by the manner of his life and of his death, Lincoln has won a unique place in the hearts of Americans. The standard biographies are by Sandburg, Herndon, Nicolay and Hay.

ANDREW JOHNSON

was born at Raleigh, North Carolina, on December 29, 1808. Self-educated, he became a tailor in Greeneville, Tennessee, but soon went into politics where he rose steadily. From 1843 to 1853 he served in the House of Representatives, 1853-57 as governor of Tennessee and in 1857 was

elected Senator. Politically he was a Jacksonian Democrat, and his specialty was the fight for a more equitable land policy. Alone among the Southern Senators, he stood by the Union during the Civil War. In 1862 he became war governor of Tennessee and carried out a thankless and difficult job with great courage. Johnson became Lincoln's running mate in 1864 as result of an attempt to give the ticket a nonpartisan and nonsectional character. Succeeding to the presidency on Lincoln's death, Johnson sought to carry out his policy but without his political skill. The result was a hopeless conflict with the Radical Republicans who dominated Congress, passed measures over Johnson's vetoes and attempted to limit the power of the executive concerning appointments and removals. The conflict culminated with Johnson's impeachment for attempting to remove his disloyal Secretary of War in defiance of the Tenure of Office Act which required senatorial concurrence for such dismissals. The opposition failed by one vote to get the two-thirds necessary for conviction.

After his presidency, Johnson maintained an interest in politics and in 1875 was elected to the Senate. He died near Carter Station, Tennessee, on July 31, 1875. He married Eliza McCauley in 1827. An honest, courageous and intelligent man, Johnson lacked the tact, patience and self-control to be an effective President.

The standard biographies are by Winston, Stryker and Milton.

ULYSSES SIMPSON GRANT

was born (as Hiram Ulysses Grant) at Point Pleasant, Ohio, on April 27, 1822. He finished West Point in 1843 and served without particular distinction in the Mexican War. In 1848 he married Julia Dent. He resigned from the army in 1854, following warnings from his commanding officer about his drinking habits, and for the next six years held a wide variety of jobs in the Middle West. With the outbreak of the Civil War, he sought a command and soon, to his surprise, was made a brigadier general. His continuing successes in the western theaters, culminating in the capture of Vicksburg in 1863, brought him national fame and soon the command of all the Union armies. His dogged, implacable policy of concentrating on dividing and destroying the Confederate armies brought the war to an end in 1865. In 1866 he was made full general.

Grant's relations with Johnson grew steadily worse; and in 1868, as the Republican candidate for President, Grant was elected with 214 electoral votes to 80 for the Democrat Horatio Seymour. From the start Grant showed his unfitness for the office. His cabinet was weak, his do-

mestic policy was confused, many of his intimate associates were corrupt. The notable achievement in foreign affairs was the settlement of controversies with Great Britain in the Treaty of London (1871), negotiated by his able Secretary of State, Hamilton Fish.

Nominated for a second term, he defeated Horace Greeley, the Democratic and Liberal Republican candidate, 286 votes to 63. The Panic of 1873 created difficulties for his second term.

After retiring from office, Grant toured Europe for two years and returned in time to accede to a third-term boom, but was beaten in the convention of 1880. Illness and bad business judgment darkened his last years, but he worked steadily at the *Personal Memoirs* which were to be so successful when published after his death at Mount McGregor, near Saratoga, New York, on July 23, 1885. Inarticulate, taciturn, loyal to his friends, he was an able general who should never have accepted the presidency. The standard biographies are by Hesseltine and Woodward.

RUTHERFORD BIRCHARD HAYES

was born at Delaware, Ohio, on October 4, 1822. A graduate of Kenyon College and the Harvard Law School, he practiced law in Sandusky and then in Cincinnati, Ohio. In 1852 he married Lucy Webb. A Whig, he joined the Republican party in 1855. During the Civil War he rose to the rank of major general. He served in Congress from 1865 to 1867 and then confirmed a reputation for honesty and efficiency in two terms as governor of Ohio. His re-election as governor in 1875 made him the logical candidate for those Republicans who wished to stop James G. Blaine in 1876, and he was successfully nominated.

The result of the election was for some time in doubt and hinged upon disputed returns from South Carolina, Louisiana, Florida and Oregon. Samuel J. Tilden, the Democratic candidate, had the larger popular vote but was adjudged by the strictly partisan decisions of the Electoral Commission to have one less electoral vote, 185 to 184. The national acceptance of this result was due in part to the general understanding that Hayes would pursue a conciliatory policy toward the South. He withdrew the troops from the South, took a conservative position on financial and labor issues and urged civil service reform.

Hayes served only one term by his own wish and spent the rest of his life in various humanitarian endeavors. He died in Fremont, Ohio, on January 17, 1893. A hard-working, conscientious, sensible man, Hayes represented the best type of Republican of his day. The standard biographies are by Eckenrode and Williams.

JAMES ABRAM GARFIELD,

the last President to be born in a log cabin, was born at Cuyahoga County, Ohio, on November 19, 1831. A Williams graduate, he taught school for a time and entered Republican politics in Ohio. In 1858 he married Lucretia Rudolph. During the Civil War he had a promising career, rising to the rank of major general of volunteers; but in 1863 he was elected to the House of Representatives where he served until 1880. His oratorical and parliamentary abilities soon made him the leading Republican in the House, though his record was marred by his unorthodox acceptance of a fee in the DeGolyer paving contract case and by suspicions of his complicity in the Crédit Mobilier scandal.

In 1880 Garfield was elected to the Senate, but, instead became the presidential candidate on the 36th ballot as a result of a deadlock in the Republican convention. He gained 214 electoral votes to 155 for General Winfield Scott Hancock, the Democratic candidate. Garfield's administration was barely under way when he was shot by Charles J. Guiteau, a disappointed office seeker, in July. He died in Elberon, New Jersey, on September 19, 1881. An attractive and eloquent man, he was much beloved in his day.

The standard biographies are by Smith and Caldwell.

CHESTER ALAN ARTHUR

was born at Fairfield, Vermont, on October 5, 1830. A graduate of Union College, he became a successful New York lawyer. In 1859 he married Ellen Herndon. During the Civil War he held administrative jobs in the Republican state administration and in 1871 was appointed collector of the Port of New York by Grant. This post gave him control over considerable patronage; and, though not personally corrupt, Arthur managed his power in the interests of the New York machine so openly that President Hayes in 1877 called for an investigation, and in 1878 Arthur was suspended from his responsibilities.

In 1880 Arthur was nominated for Vice President in the hope of conciliating the followers of Grant and the powerful New York machine. As President on Garfield's assassination, Arthur, stepping out of his familiar role as spoilsman, backed civil service reform, reorganized the cabinet and prosecuted political associates accused of post office graft. Losing machine support and failing to gain the reformers, he was not renominated. He died in New York City on November 18, 1886. A tall, handsome, dignified man with real administrative abilities, he was a better President than his previous record promised. The standard biography is by Howe.

STEPHEN GROVER CLEVELAND

was born at Caldwell, New Jersey, on March 18, 1837. He was admitted to the bar in Buffalo, New York, in 1859 and lived there as a lawyer, with occasional incursions into Democratic politics, for more than twenty years. He did not participate in the Civil War. As mayor of Buffalo in 1881, he carried through a reform program so ably that the Democrats ran him successfully for governor in 1882. In 1884 he won the Democratic nomination for President. The campaign contrasted Cleveland's spotless public career with the uncertain record of James G. Blaine, the Republican candidate, and Cleveland received enough Mugwump (independent Republican) support to win by 219 to 182 electoral votes.

As President, Cleveland pushed civil service reform, opposed the pension grab and attacked the high tariff rates. While in the White House he married Frances Folsom (1886). Renominated in 1888, Cleveland was defeated by Benjamin Harrison, polling more popular but fewer electoral votes. In 1892 he was re-elected over Harrison, 277 to 145, with 22 votes for James B. Weaver, the Populist candidate. When the Panic of 1893 burst upon the country, Cleveland's attempts to solve it by sound-money measures alienated the free-silver wing of the party, while his tariff policy alienated the protectionists. In 1894 he sent troops to break the Pullman strike. In foreign affairs his firmness caused Great Britain to back down in the Venezuela border dispute.

In his last years Cleveland was an active and much respected public figure. He died in Princeton, New Jersey, on June 24, 1908. An honest, stubborn, high-principled man, Cleveland was an old-fashioned liberal in the nineteenth-century sense who was baffled by the new problems of industrial society. The standard biographies are by Nevins and McElroy.

BENJAMIN HARRISON

was born in North Bend, Ohio, on August 20, 1833, the grandson of William Henry Harrison. A graduate of Miami University, he took up the law in Indiana and became active in Republican politics. In 1853 he married Caroline Lavinia Scott. During the Civil War he rose to the rank of brigadier general. A sound-money Republican, he was elected senator from Indiana in 1880 and in 1888 received the Republican nomination for President on the 8th ballot. Though behind on the popular vote, he won over Grover Cleveland in the electoral college by 233 to 168.

As President, Benjamin Harrison failed to please either the bosses or the reform element in the party. In foreign affairs he backed Secretary of State Blaine whose policy foreshadowed later American im-

perialism. In 1892 Harrison was renominated, but Cleveland beat him in the election. His wife died in the White House in 1892, and Harrison married her niece, Mary Scott (Lord) Dimmick, in 1896. After his presidency, he resumed law practice. He died in Indianapolis, Indiana, on March 13, 1901. Harrison was an honest man of very medium abilities.

WILLIAM MCKINLEY

was born in Niles, Ohio, on January 28, 1843. A graduate of Allegheny College, he rose from the ranks to become a major in the Civil War. Subsequently he opened a law office in Canton, Ohio, and in 1871 married Ida Saxton. Elected to Congress in 1876, he served there steadily till 1891 except for 1883-85. His faithful advocacy of business interests culminated in the passage of the highly protective McKinley Tariff of 1890. With the support of Mark Hanna, a shrewd Cleveland businessman interested in safeguarding tariff protection, McKinley became governor of Ohio in 1892 and Republican presidential candidate in 1896. The business community, alarmed by the progressivism of William Jennings Bryan, the Democratic candidate, spent considerable money to assure McKinley's victory which was by the margin of 271 to 176 in the electoral college.

The chief event of McKinley's administration was the war with Spain which resulted in our acquisition of the Philippines and other islands. With imperialism as an issue, McKinley defeated Bryan again in the election of 1900 by 292 to 155. On September 6, 1901, he was shot at Buffalo by Leon F. Czolgosz, an anarchist, and he died there on September 14.

The standard biography is by Olcott.

THEODORE ROOSEVELT

was born in New York City on October 27, 1858. A Harvard graduate, he was early interested in ranching, in politics and in writing picturesque historical narratives. He was a Republican member of the New York Assembly in 1882-84, an unsuccessful candidate for mayor of New York in 1886, a U. S. Civil Service Commissioner under Harrison, Police Commissioner of New York City in 1895 and Assistant Secretary of the Navy under McKinley in 1897. After exuding a belligerence which helped bring on the war with Spain, he resigned in 1898 to help organize a volunteer regiment named the Rough Riders and take a more direct part in the war. Always publicity-shrewd, he won the New York gubernatorial nomination in 1898 in spite of pronounced lack of enthusiasm on the part of the bosses.

After two years of T.R. in Albany, the New York bosses succeeded in getting him the vice-presidential nomination in 1900

Roosevelt accepted it with reluctance, feeling that his career had been ruined. As President on McKinley's assassination, he perceived the new popular mood of progressivism and initiated a policy of trust busting, designed to control giant corporations. He also strengthened government powers over interstate commerce and launched a conservation program to save natural resources. In foreign affairs he pursued a truculent policy, permitting the instigation of a revolt in Panamá to dispose of Colombian objections to the Panama Canal and helping to maintain the balance of power in the East by bringing the Russo-Japanese war to an end. In 1904 he decisively defeated Alton B. Parker, his conservative Democratic opponent, by an electoral margin of 336 to 140.

Following his second term he went big-game hunting in Africa and toured Europe. On his return to the United States, his increasing coldness toward Taft led him to overlook his earlier disclaimer of third-term ambitions and to re-enter politics. Defeated by the machine in the Republican convention of 1912, he organized the Progressive party and polled more votes than Taft, though the split brought about the election of Wilson. From 1915 on, Roosevelt strongly favored intervention in the European war. He became deeply embittered at Wilson's refusal to allow him to raise a volunteer division. He died in Oyster Bay, New York, on January 6, 1919. He was married twice: in 1880 to Alice Hathaway Lee, who died in 1884; and in 1886 to Edith Kermit Carow.

The athletic advocate of the strenuous life, with his high voice, prominent teeth and thick glasses, Roosevelt captured the imagination of the American people. He was one of the great personalities of American history. The standard biography is by Pringle.

WILLIAM HOWARD TAFT

was born in Cincinnati, Ohio, on September 15, 1857. A Yale graduate, he entered Ohio Republican politics in the eighteen eighties. In 1886 he married Helen Herron. From 1887 to 1890, he served on the Ohio superior court; 1890-92, as solicitor general of the United States; 1892-1900, on the federal circuit court. In 1900 McKinley appointed him president of the Philippine Commission and in 1901 governor general. Taft had great success in pacifying the Filipinos, solving the problem of the church lands, improving economic conditions and establishing limited self-government. His period as Secretary of War 1904-08 further demonstrated his capacity as administrator and conciliator; and he was Roosevelt's hand-picked successor in 1908.

In the election he polled 321 electoral votes to 162 for William Jennings Bryan.

As President, though he carried on many of Roosevelt's policies, Taft got into increasing trouble with the progressive wing of the party and displayed mounting irritability and indecision. After his defeat in 1912, he became professor of constitutional law at Yale. In 1921 he was appointed Chief Justice of the United States. He died in Washington on March 8, 1930. Enormously large, deliberate and good-humored, Taft excelled as an administrator and judge, not as a political leader.

The standard biography is by Pringle.

THOMAS WOODROW WILSON

was born in Staunton, Virginia, on December 28, 1856. A Princeton graduate, he turned from law practice to post-graduate work in political science at Johns Hopkins University, receiving his Ph.D. in 1886. He taught at Bryn Mawr, Wesleyan and Princeton, and in 1902 was made president of Princeton. After an unsuccessful attempt to democratize the social life of Princeton, he welcomed an invitation in 1910 to be the Democratic gubernatorial candidate in New Jersey. His success in fighting the machine and putting through a reform program attracted national attention.

In 1912, after a protracted contest at Baltimore, Wilson won the Democratic nomination on the 46th ballot. In the election he received 435 electoral votes to 88 for Roosevelt and 8 for Taft. During his first term Wilson proceeded under the standard of the New Freedom to enact a program of domestic reform, including the Federal Reserve Act, the Clayton Anti-trust Act, the establishment of the Federal Trade Commission and other measures designed to restore competition in the face of the great monopolies. In foreign affairs, while privately sympathetic with the Allies, he strove to maintain strict neutrality in the European war and warned both sides against encroachments on American interests.

Re-elected in 1916 as a peace candidate, he tried to mediate between the warring nations; but, when the Germans resumed unrestricted submarine warfare in 1917, Wilson brought the United States into what he now believed was a war to make the world safe for democracy. He supplied the classic formulations of Allied war aims; and the armistice of November, 1918, was negotiated on the basis of Wilson's Fourteen Points. In 1919 he strove at Versailles to lay the foundations for enduring peace. He accepted the imperfections of the Versailles Treaty in the expectation that they could be remedied by action within the

League of Nations. He probably could have secured ratification of the treaty if he had adopted a more conciliatory attitude toward the mild reservationists; but his insistence on all or nothing eventually caused the diehard isolationists and diehard Wilsonites to unite in rejecting a compromise.

In September, 1919, Wilson suffered a paralytic stroke which limited his future activity. After the presidency he lived on in retirement in Washington, dying February 3, 1924. He was married twice—in 1885 to Ellen Louise Axson, who died in 1914, and in 1915 to Edith Bolling Galt. A man of high principle, inspiring eloquence and great intellectual ability, Wilson was the first leader to fire the imagination of the masses of the world with the vision of world peace. The standard biography is by Baker.

WARREN GAMALIEL HARDING

was born in Morrow County, Ohio, on November 2, 1865. After attending Ohio Central College, Harding became interested in journalism and in 1884 bought the *Marion (Ohio) Star*. In 1891 he married a wealthy widow, Florence Kling De Wolfe. As his paper prospered, he entered Republican politics, serving as state senator (1899–1903), and as lieutenant governor (1904–06). In 1910 he was defeated for governor but in 1914 was elected to the Senate. His reputation as orator made him keynoter in the 1916 convention.

When the 1920 Republican convention was deadlocked between Leonard Wood and Frank O. Lowden, Harding was made the dark-horse nominee on his solemn affirmation that there was no reason in his past that he should not be. Straddling the League question, Harding was elected easily, with 404 electoral votes to 127 for James M. Cox, his Democratic opponent. His cabinet contained some able men, but also some manifestly unfit for public office. Harding's own intimates were mediocre when they were not corrupt. The impending disclosure of scandals in the Interior and Justice departments and in the Veterans' Bureau, as well as political setbacks, profoundly worried him. On his return from Alaska in 1923, he died suddenly at San Francisco on August 2. A handsome and genial man, undiscriminating in his associates, lacking in political ideas or fortitude, Harding was totally unfitted for the presidency.

JOHN CALVIN COOLIDGE

was born in Plymouth, Vermont, on July 4, 1872. An Amherst graduate, he went into law practice at Northampton, Massachusetts, in 1897. He married Grace Anna Goodhue in 1905. He entered Republican

state politics, becoming successively mayor of Northampton, state senator, lieutenant governor and, in 1919, governor. His conduct in regard to the Boston police strike in 1919 won him a somewhat undeserved reputation for decisive action and brought him the Republican vice-presidential nomination in 1920. After Harding's death Coolidge handled the Washington scandals with care and finally managed to save the Republican party from public blame for the widespread corruption.

In 1924 Coolidge won re-election without difficulty, getting 382 electoral votes to 136 for the Democrat, John W. Davis, and 13 for Robert M. La Follette running on the Progressive ticket. His second term, like his first, was characterized by a general satisfaction with the existing economic order. He stated that he did not choose to run in 1928.

After his presidency, Coolidge lived quietly in Northampton, writing an unilluminating *Autobiography* and conducting a syndicated column. He died in Northampton, Massachusetts, on January 5, 1933. His dry, Yankee humor, his frugality and glumness made him a paradoxically popular President in the boom period. The standard biographies are by White and Fuess.

HERBERT CLARK HOOVER

was born at West Branch, Iowa, an August 10, 1874. A Stanford graduate, he worked from 1895 to 1913 as a mining engineer and consultant in North America, Europe, Asia, Africa and Australia. In 1899 he married Lou Henry. During the First World War he served with distinction as chairman of the American Relief Committee in London, as chairman of the Commission for Relief in Belgium and as United States Food Administrator. His political affiliations were still sufficiently indeterminate for him to be mentioned as a possibility for both Republican and Democratic nominations in 1920; but after the election he served both Harding and Coolidge as Secretary of Commerce.

In the election of 1928 Hoover received 444 electoral votes to 87 for Alfred E. Smith, the Democratic candidate. He soon faced the worst depression in the nation's history; but his attacks upon it were hampered by his devotion to the theory that the forces which brought the crisis would soon bring the revival, and then by his belief that in too many areas the federal government had no power to act. In a succession of vetoes he struck down measures proposing a national employment system or national relief; he reduced income tax rates; and only at the end of his term did he yield to popular pressure and set up agencies such as the Reconstruction Finance Corporation to make emergency loans to assist business.

After his 1932 defeat, Hoover returned to private business. In 1946, President Truman charged him with various world food missions; and from 1947 to 1949 and again from 1953 to 1955, he was head of the Commission on Organization of the Executive Branch of the Government.

FRANKLIN DELANO ROOSEVELT

was born in Hyde Park, New York, on January 30, 1882. A Harvard graduate, he attended Columbia Law School and was admitted to the New York bar. In 1910 he was elected to the New York state senate as a Democrat. Re-elected in 1912, he was appointed Assistant Secretary of the Navy by Woodrow Wilson in 1913. In 1920 his radiant personality and his war services resulted in his nomination for Vice President as James M. Cox's running mate. After his defeat, he returned to law practice in New York. In August, 1921, Roosevelt was stricken with infantile paralysis while at Campobello, New Brunswick. After a long and gallant fight against the disease he recovered partial use of his legs. In 1924 and 1928 he led the fight at the Democratic national conventions for the nomination of Governor Alfred E. Smith of New York; and in 1928 Roosevelt was himself induced to run for governor of New York. He was elected and was re-elected in 1930.

In 1932 Roosevelt received the Democratic nomination for President and immediately launched a campaign which brought new spirit to a weary and discouraged nation. He won the election over Herbert Hoover by a margin of 472 to 59 in the electoral college. His first term was characterized by an unfolding of the New Deal program, with greater benefits for labor, the farmers and the unemployed, and the progressive estrangement of most of the business community.

At an early stage Roosevelt became aware of the menace to world peace involved in the existence of totalitarian fascism, and from 1937 on he tried to focus public attention on the trend of events in Europe and Asia. As a result he was widely denounced as a warmonger. He was re-elected in 1936 over Alfred M. Landon by the overwhelming electoral margin of 523 to 8; and the gathering international crisis caused him to decide to run again in 1940. He defeated Wendell L. Willkie by a vote of 449 to 82.

Roosevelt's program to bring maximum aid to Britain and, after June, 1941, to Russia was opposed, until the Japanese attack on Pearl Harbor restored national unity. During the war Roosevelt shelved the New Deal in the interests of conciliating the business community, both in order to get full production during the war and to prepare the way for a united

acceptance of the peace settlements after the war. A series of conferences with Winston Churchill and Joseph Stalin laid down the bases for the postwar world. In 1944 he was elected to a fourth term, running against Governor Thomas E. Dewey of New York.

On April 12, 1945, Roosevelt died at Warm Springs, Georgia, shortly after his return from the Yalta Conference. His wife, Anna Eleanor Roosevelt, whom he married in 1905, is a woman of great ability who made significant contributions to her husband's policies. No President has been faced with so many staggering responsibilities, both at home and abroad.

HARRY S. TRUMAN

was born on a farm near Lamar, Missouri, on May 8, 1884. During the First World War he served in France with the 129th Field Artillery. He married Bess Wallace in 1919. After engaging briefly and unsuccessfully in the haberdashery business in Kansas City, Truman entered local politics. Under the sponsorship of Thomas Pendergast, Democratic boss of Missouri, he held a number of local offices, preserving his personal honesty in the midst of a notoriously corrupt political machine. In 1934 he was elected to the Senate and was re-elected in 1940. During his first term he was a loyal but quiet supporter of the New Deal; but in the course of his second term, an appointment as head of a Senate committee to investigate war production brought out his special qualities of honesty, common sense and hard work, and he won widespread respect.

Elected Vice President in 1944, Truman became President upon Roosevelt's death in 1945 and immediately had to face complex postwar problems, both domestic and foreign. His first attempts did not meet with marked success, and the Republicans won control of Congress in 1946. The next two years were distinguished by the Truman Doctrine, the Marshall Plan and civil-rights proposals; and his general record, highlighted by a vigorous Fair Deal campaign, brought about his unexpected and impressive re-election in 1948.

Truman's second term was primarily concerned with the Cold War with the Soviet Union, the implementing of the North Atlantic Pact, the United Nations police action in Korea, and the vast rearmament program with its accompanying problems of economic stabilization.

On Mar. 29, 1952, Truman announced that he would not run again for the Presidency. He campaigned actively for Adlai E. Stevenson. After Eisenhower's inauguration, Truman returned to his Independence, Missouri, home to write his memoirs. He further busied himself with the organization of the Harry S. Truman Library in Independence, Missouri.

DWIGHT DAVID EISENHOWER

was born in Denison, Texas, on October 14, 1890. His ancestors lived in Germany, and emigrated to America, settling in Pennsylvania, early in the 18th century. His father, David, had a general store in Hope, Kansas, which failed. After a brief time in Texas, the family moved to Abilene, Kansas.

After graduating from Abilene High School in 1909, Dwight Eisenhower did odd jobs for almost two years. He won an appointment to the Naval Academy at Annapolis, but it turned out that he was too old for admittance. Then he received an appointment in 1910 to West Point. He was graduated a 2nd lieutenant in 1915.

He did not see service in World War I, having been assigned to the 19th Infantry at Fort Sam Houston, Texas. There he met Mamie Geneva Doud, whom he married in Denver on July 1, 1916. Their first son died in infancy. Their second son is Major John Sheldon Doud Eisenhower.

A paper he wrote about 1930 attracted the attention of General Douglas MacArthur, then Chief of Staff, who asked that Eisenhower be assigned to his office. When MacArthur went to the Philippines as military adviser in 1935, Eisenhower accompanied him and remained with him until 1939.

General George C. Marshall brought him into the War Department General Staff and, in 1942, put him in command of the

Allied invasion of North Africa. In 1944, Eisenhower was made Supreme Allied Commander of the invasion of Europe.

After the war, Eisenhower served as Army Chief of Staff from November, 1945, until February, 1948, when he was appointed president of Columbia University.

In December 1950, President Truman recalled Eisenhower to active duty to command the North Atlantic Treaty Organization forces in Europe. He held this post until the end of May 1952.

In the Republican Convention of July, 1952 in Chicago, Eisenhower won the Presidential nomination on the first ballot in a close race with Senator Robert A. Taft of Ohio. In November, he won the election, defeating Adlai E. Stevenson by an electoral vote of 442 to 89.

Eisenhower's Administration from 1952 to the fall of 1958 was marked by alternating periods of tension and relaxation in foreign affairs. On the home front, following a middle-of-the-road line, he did little to abandon the social policies of the New Deal-Fair Deal, but he sought wider state participation and the assumption of a larger responsibility by business for investment and employment. His illnesses in Sept., 1955, and June, 1956, raised the question of his availability for a second term. He announced his candidacy on July 10, and was renominated. He was re-elected by a total of 457 electoral votes to 73 for Adlai E. Stevenson.

Also see, *Headline History* for 1957 and for later events see *News Items* for 1958.

How to Number the Presidents

Did Eisenhower take office as the 33rd President or as the 34th?

The difficulty started with Grover Cleveland. He became our 22nd President back in 1885. Then came Benjamin Harrison, who was obviously the 23rd President, serving from 1889-93. At this point, Cleveland returned to the White House for a second (but nonconsecutive) term.

Cleveland was still the same man who had been our 22nd President. But in his later term, it would look silly—some folks thought—to continue to call him our 22nd President. That would make the 22nd President follow the 23rd. Numbers should go in order—so ran the argument—and Cleveland should therefore be designated both as the 22nd President in his first term and as the 24th in his second term.

The people who argued the other way found an eloquent spokesman in John Kieran. He said: "Write down the names of all the Presidents, and you will only get 33. If you write Cleveland twice, you'll get 34—but in that case you've got

to write Franklin D. Roosevelt's name four times. Until they prove to me that Grover Cleveland was two men, Eisenhower can't be the 34th President."

The *Congressional Directory*, which must be considered the official final authority, grappled with the problem of numbering the Presidents. Until recent years, it has followed John Kieran's theory.

After the election of President Truman, and before the election of President Eisenhower, the *Congressional Directory* changed its official mind. In the 1956 *Congressional Directory*, Truman is the 33rd President, and Eisenhower is listed as the 34th. (Cleveland has two numbers—22nd and 24th.)

The 1957 *Congressional Directory* lists Presidents without numbering them—we don't know why. Although we are listing the Presidents on the basis of the *Congressional Directory* of 1956 we can't help thinking of John Kieran's remark: "Put the busts of all the Presidents in a row and count them and you will get 33, and only 33."

Executive Departments and Agencies

Source: U.S. Government Manual.

(Unless otherwise indicated, addresses shown are in Washington, D.C.; officials listed are as of Sept. 1958.)

Executive Office of the President

THE WHITE HOUSE OFFICE

1600 Pennsylvania Ave., NW.

The Assistant to the President: Sherman Adams. (Resigned Sept. 22, 1958.)

The Deputy Assistant to the President: Wilton B. Persons.

Secretary to the President: Thomas B. Stephens.

Press Secretary to the President: James C. Hagerty.

Special Counsel to the President: Gerald D. Morgan.

Special Assistant to the President for National Security Affairs: Gordon Gray.

Activities: Serves President in performance of activities incident to his office.

BUREAU OF THE BUDGET

Executive Office Bldg.

Established: June 10, 1921.

Director: Maurice H. Stans.

Activities: Assists President in preparing budget and formulating fiscal program; supervises administration of budget; coordinates advice on proposed legislation; plans improvements in statistical services; keeps President informed of progress of activities by government agencies so that Congressional appropriations are spent most economically.

NATIONAL SECURITY COUNCIL (NSC)

Executive Office Bldg.

Members: 5. *Established:* July 26, 1947.

Chairman: Dwight D. Eisenhower, President of the U. S.

Other members: Richard M. Nixon, Vice President of the U. S.; John Foster Dulles, Secretary of State; Neil H. McElroy, Secretary of Defense; Leo A. Hoegh, Director of Office of Defense & Civilian Mobilization.

Director of Central Intelligence Agency: Allen W. Dulles.

Chairman of Operations Coordinating Board: Christian A. Herter.

Activities: Assesses and appraises objectives, commitments and risks of U. S. in relation to our actual and potential military power in interests of national security. Central Intelligence Agency advises NSC on all intelligence matters. Operations Coordinating Board provides for integrated implementation of national security policies.

COUNCIL OF ECONOMIC ADVISERS

(CEA)

Executive Office Bldg.

Members: 3. *Established:* Feb. 20, 1946.

Chairman: Raymond J. Saulnier.

Other members: Joseph S. Davis, Paul W. McCracken.

Activities: Assists President in preparation of economic reports to Congress;

studies economic trends; appraises government activities on nation's economy; recommends economic policies.

OFFICE OF DEFENSE AND CIVILIAN MOBILIZATION

Executive Office Bldg.

Established: July 1, 1958, from merger of Office of Defense Mobilization and Federal Civil Defense Administration.

Director: Leo A. Hoegh.

Activities: Advises President on co-ordination of military, industrial and civilian mobilization.

Executive Departments

DEPARTMENT OF STATE

21st St. & Virginia Ave., NW.

Established: 1781 as Department of Foreign Affairs; reconstituted, 1789, following adoption of Constitution; name changed to Department of State Sept. 15, 1789.

Secretary: John Foster Dulles.

Under Secretary: Christian A. Herter.

Activities: Determines government policy in relation to international problems; formulates measures for promoting friendship with other countries; develops policies and programs for U. S. participation in U. N. and other international organizations; conducts correspondence with our representatives abroad and with accredited foreign representatives here.

DEPARTMENT OF THE TREASURY

15th St. & Pennsylvania Ave., NW.

Established: Sept. 2, 1789.

Secretary: Robert B. Anderson.

Under Secretary: Fred C. Scribner, Jr.

Activities: Manages national finances; grants warrants for money drawn from Treasury pursuant to legal appropriations; handles collection of revenue; keeps and renders public accounts; prepares plans for improvement of revenue and for support of public credit; reports annually to Congress on condition of public finances; controls coinage and printing of money; administers Coast Guard, Bureau of Narcotics and Secret Service.

DEPARTMENT OF DEFENSE

The Pentagon

Established: July 26, 1947, as National Military Establishment; name changed to Department of Defense on Aug. 10, 1949. Subordinate to Secretary of Defense are Secretaries of Army, Navy, Air Force.

Secretary: Neil H. McElroy.

Deputy Secretary: Donald A. Quarles.

Secretary of the Army: Wilber M. Brucker.

Secretary of the Navy: Thomas S. Gates, Jr.

Commandant, Marine Corps: Gen. Randolph McC. Pate.

Secretary of the Air Force: James H. Douglas.

*Joint Chiefs of Staff:** Gen. Nathan F. Twining, chairman; Gen. Maxwell D. Taylor, Army; Adm. Arleigh A. Burke, Navy; Gen. Thomas D. White, Air Force; Gen. Randolph McC. Pate, Marine Corps (on Marine Corps matters only).

Activities: Provides for security of U. S. by establishing integrated policies and procedures; co-ordinates and directs the activities of 3 separately administered military departments (Army, Navy, Air Force).

DEPARTMENT OF JUSTICE

Constitution Ave. & 10th St., NW.

Established: Office of Attorney General was created Sept. 24, 1789. Although he was one of original Cabinet members, he was not executive department head until June 22, 1870, when Department of Justice was established.

Attorney General: William P. Rogers.

Deputy Attorney General: Lawrence E. Walsh.

Director of FBI: J. Edgar Hoover.

Activities: Provides means for enforcing Federal laws; investigates and detects violations; represents U. S. in legal matters generally and gives advice and opinions when requested by President or heads of executive departments; directs FBI, Bureau of Prisons, Immigration and Naturalization Service.

POST OFFICE DEPARTMENT

12th St. & Pennsylvania Ave., NW.

Established: Office of Postmaster General and temporary post office system created Sept. 22, 1789. Act of Feb. 20, 1792, made detailed provisions for Post Office Department. Postmaster General became Cabinet member in 1829. Department received executive status June 8, 1872.

Postmaster General: Arthur E. Summerfield.

Deputy Postmaster General: Edson O. Sessions.

Activities: Maintains Postal Service of U. S. and executes all laws relative to it; negotiates, subject to approval of President, postal treaties with foreign governments.

DEPARTMENT OF THE INTERIOR

C St. between 18th & 19th Sts., NW.

Established: Mar. 3, 1849.

Secretary: Fred A. Seaton.

Under Secretary: Hatfield Chilson.

Activities: Develops and conserves natural resources of U. S. and territories; supervises public business relating to such offices as Bureau of Land Management, Bureau of Reclamation, Geological Survey, Bureau of Indian Affairs, National Park Service, Bureau of Mines, Fish and Wildlife Service, Office of Territories, etc.

* Consisting of a chairman and the chiefs of each service.

DEPARTMENT OF AGRICULTURE

14th St. & Independence Ave., SW.

Established: May 15, 1862. Administered by Commissioner of Agriculture until Feb. 9, 1889, when it was made executive department and office of Secretary was created.

Secretary: Ezra Taft Benson.

Under Secretary: True D. Morse.

Activities: Conducts comprehensive research and educational program relating to agriculture; provides crop reports, commodity standards, meat inspection and other marketing services; administers national forests; aids in flood control; administers price-support and production-adjustment programs; makes loans to farmers.

DEPARTMENT OF COMMERCE

14th St. between Constitution Ave. & E St., NW.

Established: Department of Commerce and Labor was created Feb. 14, 1903. On Mar. 4, 1913, all labor activities were transferred out of Department of Commerce and Labor and it was renamed Department of Commerce.

Secretary: Sinclair Weeks.

Under Secretary: Walter Williams.

Activities: Fosters and develops foreign and domestic commerce of U. S.; maintains Bureau of the Census, Office of Business Economics, Civil Aeronautics Administration, Coast and Geodetic Survey, Maritime Administration, Patent Office, Bureau of Public Roads, National Bureau of Standards, Weather Bureau, etc.

DEPARTMENT OF LABOR

14th St. & Constitution Ave., NW.

Established: Bureau of Labor was created in 1884 under Department of the Interior; later became independent department without executive rank. Returned to bureau status in Department of Commerce and Labor, but on Mar. 4, 1913, became independent executive department under its present name.

Secretary: James P. Mitchell.

Under Secretary: James T. O'Connell.

Activities: Promotes welfare of wage earners of U. S., improving their working conditions and advancing their opportunities for profitable employment; directs collection and collation of statistics concerning labor conditions; promulgates and enforces certain maximum-hour, minimum-wage, child-labor, safety and health standards.

DEPARTMENT OF HEALTH, EDUCATION AND WELFARE

330 Independence Ave., SW.

Established: Apr. 11, 1953, replacing Federal Security Agency, which was created Apr. 25, 1939.

Secretary: Arthur S. Flemming.

Under Secretary: Bertha Sheppard Adkins.

Activities: Supervises and co-ordinates various organizations within the department. Organizations are: Food and Drug Administration, Office of Education, Office of Vocational Rehabilitation, Public Health Service, St. Elizabeths Hospital, Social Security Administration; also following Federally supported corporations: American Printing House for the Blind, Gallaudet College and Howard University.

Independent Agencies

(Because of space limitations, only agencies of interest to the general public are listed here.)

Executive Department

ATOMIC ENERGY COMMISSION (AEC)

19th St. & Constitution Ave., NW.

Members: 5. **Established:** Aug. 1, 1946.

Chairman: John A. McCone.

Other members: John F. Floberg, Dr. W. F. Libby, John S. Graham, Harold S. Vance.

Activities: Promotes Federally conducted and private research and development; controls dissemination of information and production, ownership and use of fissionable materials.

CIVIL AERONAUTICS BOARD (CAB)

Dept. of Commerce Bldg.

Members: 5. **Established:** June 30, 1940.

Chairman: James R. Durfee.

Activities: Regulates economic aspects of U. S. air carrier operation; prescribes safety standards; investigates and analyzes aircraft accidents; assists in development of international air transportation.

FARM CREDIT ADMINISTRATION (FCA)

South Bldg., Dept. of Agriculture.

Established: July 17, 1916.

Chairman: M. H. Edwards.

Activities: Supervises and coordinates cooperative credit system for agriculture; provides long- and short-term credit to farmers and their cooperative marketing, purchasing and business service organizations.

FEDERAL COMMUNICATIONS COMMISSION (FCC)

Post Office Dept. Bldg.

Members: 7. **Established:** 1934.

Chairman: John C. Doerfer.

Activities: Regulates interstate and foreign communications by wire and radio, including amateur radio and TV; regulates operator's licenses; classifies radio stations and prescribes their services; enforces use of radio for safety purposes on U. S. ships.

FEDERAL MEDIATION AND CONCILIATION SERVICE (FMCS)

Department of Labor Bldg.

Established: 1947.

Director: Joseph F. Finnegan.

Activities: Assists in labor-management disputes in industries affecting interstate commerce to reach settlements by mediation or conciliation; promotes better relations between labor and management.

FEDERAL POWER COMMISSION (FPC)

General Accounting Office Bldg., 441 G St., NW.

Established: June 23, 1930.

Chairman: Jerome K. Kuykendall.

Activities: Licenses hydroelectric projects on U. S. Government lands or navigable waters; has jurisdiction over interstate commerce involving sale of electric energy and natural gas and companies engaged therein; handles transmission of electric energy and natural gas between U. S. and foreign countries.

FEDERAL RESERVE SYSTEM (FRS), BOARD OF GOVERNORS OF

20th St. & Constitution Ave., NW.

Members: 7. **Established:** Dec. 23, 1913.

Chairman: William McC. Martin, Jr.

Activities: Supervises Federal Reserve banks; influences credit conditions; regulates open-market operations; issues Federal Reserve notes.

FEDERAL TRADE COMMISSION (FTC)

6th St. & Pennsylvania Ave., NW.

Members: 5. **Established:** Sept. 26, 1914.

Chairman: John W. Gwynne.

Activities: Prevents unfair competition, deceptive practices, false advertising, price discrimination, monopolies.

HOUSING AND HOME FINANCE AGENCY (HHFA)

1626 K St., NW.

Established: July 27, 1947.

Administrator: Albert M. Cole.

Activities: Provides single agency responsible for principal housing programs and functions of Federal government; supervises and co-ordinates activities of Federal National Mortgage Association (FNMA), Federal Housing Administration (FHA), Public Housing Administration (PHA), Federal Flood Indemnity Administration; Voluntary Home Mortgage Credit Program, Urban Renewal Administration, and Community Facilities Administration.

INTERSTATE COMMERCE COMMISSION (ICC)

12th St. & Constitution Ave., NW.

Members: 11. **Established:** Feb. 4, 1887.

Chairman: Howard G. Freas.

Activities: Regulates railroads, motor

carriers, water carriers and freight forwarders as to rates, through-routes, services and bills of lading; authorizes mergers or consolidations; authorizes issue of securities by carriers.

NATIONAL LABOR RELATIONS BOARD (NLRB)

3rd & C Sts., SW.

Members: 5. *Established:* July 5, 1935.

Chairman: Boyd Leedom.

Activities: Prevents unfair labor practices by employers or labor organizations; conducts secret ballots among employees to determine their choice of bargaining representatives.

SECURITIES AND EXCHANGE COMMISSION (SEC)

425 2nd St., NW.

Members: 5. *Established:* June 6, 1934.

Chairman: Edward N. Gadsby.

Activities: Registers and issues regulations for securities and exchanges; registers securities offered for public sale; penalizes violators of regulations subject to appeal to U. S. Court of Appeals.

SELECTIVE SERVICE SYSTEM (SSS)

451 Indiana Ave., NW.

Established: 1948.

Director: Lt. Gen. Lewis B. Hershey.

Activities: Handles registration, examination, classification and selection for induction into armed forces or other disposition of men required to register under Universal Training and Service Act.

SMALL BUSINESS ADMINISTRATION (SBA)

811 Vermont Ave., NW.

Established: July 30, 1953.

Administrator: Wendell B. Barnes.

Activities: Aids and assists the interests of small business firms to insure a fair share of total government contracts; makes loans to small firms and victims of flood and disaster.

TENNESSEE VALLEY AUTHORITY (TVA)

New Sprinkle Bldg., Knoxville, Tenn. (Wash. office: Woodward Bldg., 15th & H Sts., NW.)

Members: 3. *Established:* May 18, 1933.

Chairman: Herbert D. Vogel.

Other members: Arnold R. Jones, Frank J. Welch.

Activities: Provides navigable channel and flood control of Tennessee River and some of its larger tributaries; disposes of surplus electric power; improves, increases and cheapens fertilizer production.

U. S. CIVIL SERVICE COMMISSION (CSC)

8th & F Sts., NW.

Members: 3. *Established:* Jan. 16, 1883.

Chairman: Harris Ellsworth.

Activities: Provides examinations to test fitness of applicants for positions in competitive service; provides personnel in response to requests from appointing officers; investigates applicants for national security purposes; classifies positions; maintains service records.

U. S. INFORMATION AGENCY (USIA)

1776 Pennsylvania Ave., NW.

Established: Aug. 1, 1953.

Director: George V. Allen.

Activities: Directs information to foreign peoples, such as explanation and interpretation of policies of U. S. Government and delineation of U. S. life and culture.

U. S. TARIFF COMMISSION

E St. between 7th & 8th Sts., NW.

Members: 6. *Established:* Sept. 8, 1916.

Chairman: Edgar B. Brossard.

Activities: Investigates customs laws, unfair competition and foreign and domestic manufacturing costs; advises the President on duty rates.

VETERANS' ADMINISTRATION (VA)

Vermont Ave. between H & I Sts., NW.

Established: July 21, 1930.

Administrator: Sumner G. Whittier.

Activities: Administers laws authorizing benefits for veterans and for their dependents or beneficiaries. Included are hospitalization, pensions, insurance, loans, education, etc.

Legislative Department

GENERAL ACCOUNTING OFFICE (GAO)

441 G St., NW.

Established: June 10, 1921.

Comptroller General of the U. S.: Joseph Campbell.

Activities: Performs independent audits of government financial transactions to provide basis for settlement of accounts and to evaluate management of financial affairs by agencies; exercises power of disallowance based on Comptroller General's settlement of accounts and claims; issues reports to Congress on its findings.

LIBRARY OF CONGRESS

First St., SE, between East Capitol St. and Independence Ave.

Established: Apr. 24, 1800.

Librarian of Congress: L. Quincy Mumford.

Activities: Intended primarily for service of Congress, it has come to include entire governmental establishment and public at large. (For further description, consult index.)

U. S. Cabinet Members with Dates of Appointment

Although the Constitution made no provision for a President's advisory group, the heads of the three executive departments (State, Treasury and War) and the Attorney General were organized by Washington into such a group; and by about 1793, the name "Cabinet" was applied to it. With the exception of the Attorney General up to 1870 and the Postmaster General from 1829-72, Cabinet members have been heads of executive departments, although other government officials may be called to sit in whenever necessary.

A Cabinet member is appointed by the President, subject to the confirmation of the Senate; and as his term is not fixed, he may be replaced at any time by the

President. At a change in Administration, it is customary for him to tender his resignation, but he remains in office until a successor is appointed.

The table of Cabinet members lists only those members who actually served after being duly commissioned. It does not include ad-interim appointments or cases where the appointee declined the office after appointment.

The dates shown are those of appointment. "Contd" indicates that the term continued from the previous Administration for a substantial amount of time. Those cases where the term continued for only a few days, until a new appointment could be made, are not indicated.

¹ George Dent (Md.) was elected Speaker pro tempore for Apr. 20 and May 28, 1798. ² Resigned during 2d session of 13th Congress. ³ Resigned between 1st and 2d sessions of 16th Congress. ⁴ Resigned during 1st session of 23d Congress. ⁵ Elected Speaker and served the day of adjournment. ⁶ Died between 1st and 2d sessions of 44th Congress. During 1st session, there were two Speakers pro tempore: Samuel S. Cox (N. Y.), appointed for Feb. 17, May 12 and June 19, 1876, and Milton Saylor (Ohio), appointed for June 4, 1876. ⁷ Died 1934 after adjournment of 2nd session of 73rd Congress. ⁸ Died during 2d session of 74th Congress. ⁹ Died during 3d session of 76th Congress.

The White House

Source: National Park Service.

The White House, the official residence of the President, is located on Pennsylvania Avenue in Washington, D. C. The site covering about 18 acres was selected by President Washington and Pierre Charles L'Enfant, and the architect was James Hoban. The design of the mansion is said to have been suggested by the Duke of Leinster's Palace in Ireland. The cornerstone was laid Oct. 13, 1792, and the first residents were President and Mrs. John Adams in Nov., 1800. The building was fired by the British in 1814, and the sandstone exterior was painted white during the course of reconstruction.

The rooms for public functions are on the first floor; on the second and third are the President's apartments. The most celebrated public room is the East Room, where formal receptions take place. Other public rooms are the Red Room, the Green Room, and the

Blue Room. The State Dining Room is used for formal dinners.

The Executive Office, a three-story structure at the west end of the West Terrace, was added to the original building in 1902 to accommodate the President's office staff, and several additions have since been made. In 1942, a three-story building was erected at the end of the East Terrace, and now serves as the White House main entrance. In 1948, a second-story balcony was added to the White House inside the Ionic pillars of the south portico.

From Nov., 1948, to Mar., 1952, the White House was closed for social engagements and sightseers because of a full-scale renovation of the building. The walls were retained and strengthened, and the interior was rebuilt. There are now 132 rooms instead of the former 62.

THE DECLARATION OF INDEPENDENCE

IN CONGRESS, JULY 4, 1776

THE UNANIMOUS DECLARATION of the thirteen united STATES OF AMERICA.

WHEN in the Course of human events it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness.—That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed,—That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security.—Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their Public Records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislative Powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the mean time exposed to all the dangers of invasion from without, and convulsions within.

NOTE: On April 12, 1776, the legislature of North Carolina authorized its delegates to the Continental Congress to join with others in a declaration of separation from Great Britain; the first colony to instruct its delegates to take the actual initiative was Virginia on May 15. On June 7, 1776, Richard Henry Lee of Virginia offered a resolution to the Congress to the effect "that these United Colonies are, and of right ought to be, free and independent States. . . ." A committee, consisting of Thomas Jefferson, John Adams, Benjamin Franklin, Robert R. Livingston and Roger

Sherman was organized to "prepare a declaration to the effect of the said first resolution." The Declaration of Independence was adopted on July 4, 1776.

Most delegates signed the Declaration August 2, but George Wythe (Va.) signed August 27; Richard Henry Lee (Va.), Elbridge Gerry (Mass.) and Oliver Wolcott (Conn.) in September; Matthew Thornton (N. H.), not a delegate until September, in November; and Thomas McKean (Del.), although present on July 4, not until 1781 by special permission, having served in the army in the interim.

He has endeavoured to prevent the population of these States; for that purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migrations hither, and raising the conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary Powers.

He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of New Offices, and sent hither swarms of Officers to harass our people, and eat out their substance.

He has kept among us, in times of peace, Standing Armies without the Consent of our legislatures.

He has affected to render the Military independent of and superior to the Civil Power.

He has combined with others to subject us to a jurisdiction foreign to our constitution, and unacknowledged by our laws; giving his Assent to their Acts of pretended Legislation:

For quartering large bodies of armed troops among us:

For protecting them, by a mock Trial, from punishment for any Murders which they should commit on the Inhabitants of these States:

For cutting off our Trade with all parts of the world:

For imposing Taxes on us without our Consent:

For depriving us in many cases, of the benefits of Trial by Jury:

For transporting us beyond Seas to be tried for pretended offences:

For abolishing the free System of English Laws in a neighbouring Province, establishing therein an Arbitrary government, and enlarging its Boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies:

For taking away our Charters, abolishing our most valuable Laws and altering fundamentally the Forms of our Governments:

For suspending our own Legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated Government here, by declaring us out of his Protection and waging War against us.

He has plundered our seas, ravaged our Coasts, burnt our towns, and destroyed the lives of our people.

He is at this time transporting large Armies of foreign Mercenaries to compleat the works of death, desolation and tyranny, already begun with circumstances of Cruelty & Perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.

He has constrained our fellow Citizens taken Captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethren, or to fall themselves by their Hands.

He has excited domestic insurrections amongst us, and has endeavoured to bring on the inhabitants of our frontiers, the merciless Indian Savages, whose known rule of warfare, is an undistinguished destruction of all ages, sexes and conditions.

In every stage of these Oppressions We have Petitioned for Redress in the most humble terms: Our repeated Petitions have been answered only by repeated injury. A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people.

Nor have We been wanting in attentions to our Brittish brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace Friends.

WE, THEREFORE, the Representatives of the UNITED STATES OF AMERICA, in General Congress, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name, and by Authority of the good People of these Colonies, solemnly publish and declare, That these United Colonies are, and of Right ought to be

FREE AND INDEPENDENT STATES; that they are Absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain, is and ought to be totally dissolved; and that as Free and Independent States, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which Independent States may of right do.—And for the support of this Declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our Lives, our Fortunes and our sacred Honor.

IN CONGRESS

JANUARY, 18, 1777.

Ordered:

That an authenticated copy of the Declaration of Independency, with the names of the Members of Congress subscribing the same, be sent to each of the United States, and that they be desired to have the same put on record.

By order of Congress.

Attest, CHAS. THOMSON, *Secy.* A true copy. JOHN HANCOCK, *Presidt.*

The Statue of Liberty

The Statue of Liberty ("Liberty Enlightening the World") is a 225-ton copper female figure, 152 ft. 5 in. in height, facing the ocean from Liberty* Island in New York Harbor. The right hand holds aloft a torch, and the left hand carries a tablet upon which is inscribed: "July 4, 1776."

The statue was designed by Frédéric Auguste Bartholdi, at the request of the French government, as a present to the U. S. to commemorate the centennial of American independence. It cost \$450,000.

The pedestal, 151 ft. 1 in. in height, was erected by the U. S., and its cost of \$350,000 was met by popular subscription in this country. The cornerstone was laid Aug.

* Called Bedloe's Island prior to 1956.

5, 1884, and the unveiling of the statue took place Oct. 28, 1886.

On a tablet inside the main entrance of the pedestal is engraved the following sonnet, written by Emma Lazarus:

The New Colossus

Not like the brazen giant of Greek fame,
With conquering limbs astride from land to land;
Here at our sea-washed, sunset gates shall stand
A mighty woman with a torch, whose flame
Is the imprisoned lightning, and her name
Mother of Exiles. From her beacon hand
Glows world-wide welcome; her mild eyes com-
mand
The air-bridged harbor that twin cities frame.
"Keep, ancient lands, your storied pomp!" cries she
With silent lips. "Give me your tired, your poor,
Your huddled masses yearning to breathe free,
The wretched refuse of your teeming shore.
Send these, the homeless, tempest-tost to me,
I lift my lamp beside the golden door."

CONSTITUTION of the UNITED STATES OF AMERICA

THE oldest federal constitution in existence was framed by a convention of delegates from twelve of the thirteen original states in Philadelphia in May 1787, Rhode Island failing to send a delegate. George Washington presided over the session, which lasted until September 17, 1787. The draft (originally a preamble and seven Articles) was submitted to all thirteen states and was to become effective when ratified by nine states. It went into effect on the first Wednesday in March 1789, having been ratified by New Hampshire, the ninth state to approve, on June 21, 1788. The states ratified the Constitution in the following order:

Delaware	December 7, 1787	South Carolina	May 23, 1788
Pennsylvania	December 12, 1787	New Hampshire	June 21, 1788
New Jersey	December 18, 1787	Virginia	June 25, 1788
Georgia	January 2, 1788	New York	July 26, 1788
Connecticut	January 9, 1788	North Carolina	November 21, 1789
Massachusetts	February 6, 1788	Rhode Island	May 29, 1790
Maryland	April 28, 1788		

Outline of the Constitution

ARTICLE I

SEC. 1. Legislative powers; in whom vested.

SEC. 2. House of Representatives, how and by whom chosen—Qualifications of a Representative—Representatives and direct taxes, how apportioned—Enumeration—Vacancies to be filled—Power of choosing officers, and of impeachment.

SEC. 3. Senators, how and by whom chosen—How classified—State Executive, when to make temporary appointments, in case, etc.—Qualifications of a Senator—President of the Senate, his right to vote—President pro tem., and other officers of the Senate, how chosen—Power to try impeachments—When President is tried, Chief Justice to preside—Sentence.

SEC. 4. Times, etc., of holding elections, how prescribed—At least one Session in each year.

SEC. 5. Membership—Quorum—Adjournments—Rules—Power to punish or expel—Journal—Time of adjournments, how limited, etc.

SEC. 6. Compensation—Privileges—Disqualification in certain cases.

SEC. 7. House to originate all revenue bills—Veto—Bill may be passed by two-thirds of each house, notwithstanding, etc.—Bill, not returned in ten days, to become a law—Provisions as to orders, concurrent resolutions, etc.

SEC. 8. Powers of Congress.

SEC. 9. Provision as to migration or importation of certain persons—Habeas Corpus—Bills of attainder, etc.—Taxes, how apportioned—No export duty—No commercial preference—Money, how drawn from treasury, etc.—No titular nobility—Officers not to receive presents, etc.

SEC. 10. States prohibited from the exercise of certain powers.

ARTICLE II

SEC. 1. President; his term of office—Electors of President; number and how appointed—Electors to vote on same day—Qualification of President—On whom his duties devolve in case of his removal, death, etc.—President's compensation—His oath of office.

SEC. 2. President to be commander in chief—He may require opinions of Cabinet Officers, etc., may pardon—Treaty-making power—Nomination of certain officers—When President may fill vacancies.

SEC. 3. President shall communicate to Congress—He may convene and adjourn Congress, in case of disagreement, etc.—Shall receive ambassadors, execute laws, and commission officers.

SEC. 4. All civil offices forfeited for certain crimes.

ARTICLE III

SEC. 1. Judicial powers—Tenure—Compensation.

SEC. 2. Judicial power; to what cases it extends—Original jurisdiction of Supreme Court—Appellate—Trial by jury, etc.—Trial, where.

SEC. 3. Treason defined—Proof of—Punishment of.

ARTICLE IV

SEC. 1. Each State to give credit to the public acts, etc., of every other State.

SEC. 2. Privileges of citizens of each State—Fugitives from justice to be delivered up—Persons held to service having escaped, to be delivered up.

SEC. 3. Admission of new States—Power of Congress over territory and other property.

SEC. 4. Republican form of government guaranteed—Each State to be protected.

ARTICLE V

Constitution; how amended—Proviso.

ARTICLE VI

Certain debts, etc., declared valid—Supremacy of Constitution, treaties, and laws of the United States—Oath to support Constitution, by whom taken—No religious test.

ARTICLE VII

What ratification shall establish Constitution.

AMENDMENTS

- I. Religious establishment prohibited—Freedom of speech, of the press, and right to petition.
- II. Right to keep and bear arms.
- III. No soldier to be quartered in any house, unless, etc.
- IV. Right of search and seizure regulated.
- V. Provisions concerning prosecution, trial and punishment—Private property not to be taken for public use, without compensation.
- VI. Further provision respecting criminal prosecutions.
- VII. Right of trial by jury secured.

VIII. Excessive bail or fines and cruel punishments prohibited.

IX. Rule of construction of Constitution.

X. Same subject; rights of States.

XI. Same subject; judicial powers construed.

XII. Manner of choosing President and Vice President.

XIII. Slavery abolished.

XIV. Citizenship; representation—Public debt.

XV. Right of suffrage—By whom exercised.

XVI. Taxes on incomes.

XVII. Election of Senators—Filling of vacancies.

XVIII. Prohibition.

XIX. Suffrage; not to be denied because of sex.

XX. Commencement of terms of President, Vice President and members of Congress; time of assembling of Congress.

XXI. Repeal of Prohibition.

XXII. No person to serve as President for more than two terms.

The Constitution of the United States of America

PREAMBLE.—WE THE PEOPLE of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America.

ARTICLE I

Section 1

Legislative powers vested in Congress.—All legislative Powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

Section 2

Composition of the House of Representatives.—1. The House of Representatives shall be composed of Members chosen every second Year by the People of the several States, and the Electors in each State shall have the Qualifications requisite for Electors of the most numerous Branch of the State Legislature.

Qualifications of Representatives.—2. No Person shall be a Representative who shall not have attained to the Age of twenty-five Years, and been seven Years a Citizen

of the United States, and who shall not, when elected, be an Inhabitant of that State in which he shall be chosen.

Apportionment of Representatives and direct taxes—census.*—3. [Representatives and direct Taxes shall be apportioned among the several States which may be included within this Union, according to their respective Numbers, which shall be determined by adding to the whole Number of free Persons, including those bound to Service for a Term of Years, and excluding Indians not taxed, three fifths of all other Persons.] The actual Enumeration shall be made within three Years after the first Meeting of the Congress of the United States, and within every subsequent Term of ten Years, in such Manner as they shall by Law direct. The Number of Representatives shall not exceed one for every thirty Thousand, but each State shall have at Least one Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to chuse three, Massachusetts eight, Rhode-Island and Providence Plantations one, Connecticut five, New York six, New Jersey four, Pennsylvania eight, Delaware one, Maryland six, Virginia ten, North Carolina five, South Carolina five, and Georgia three.

Filling of vacancies in representation.—

4. When vacancies happen in the Representation from any State, the Executive

* The clause included in brackets is amended by the 14th Amendment, Section 2.

Authority thereof shall issue Writs of Election to fill such Vacancies.

Selection of officers; power of impeachment.—5. The House of Representatives shall chuse their Speaker and other Officers; and shall have the sole Power of Impeachment.

Section 3*

The Senate.—[1. The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six Years; and each Senator shall have one Vote.]

Classification of Senators; filling of vacancies.—2. Immediately after they shall be assembled in Consequence of the first Election, they shall be divided as equally as may be into three Classes. The Seats of the Senators of the first Class shall be vacated at the Expiration of the second Year, of the second Class at the Expiration of the fourth Year, and of the third Class at the Expiration of the sixth Year, so that one-third may be chosen every second Year; and if Vacancies happen by Resignation, or otherwise, during the Recess of the Legislature of any State, the Executive thereof may make temporary Appointments [until the next Meeting of the Legislature, which shall then fill such Vacancies].

Qualification of Senators.—3. No Person shall be a Senator who shall not have attained to the Age of thirty Years, and been nine Years a Citizen of the United States, and who shall not, when elected, be an Inhabitant of that State for which he shall be chosen.

Vice President to be President of Senate.—4. The Vice President of the United States shall be President of the Senate, but shall have no Vote, unless they be equally divided.

Selection of Senate officers; President pro tempore.—5. The Senate shall chuse their other Officers, and also a President pro tempore, in the Absence of the Vice President, or when he shall exercise the Office of President of the United States.

Senate to try impeachments.—6. The Senate shall have the sole Power to try all Impeachments. When sitting for that Purpose, they shall be on Oath or Affirmation. When the President of the United States is tried, the Chief Justice shall preside: And no Person shall be convicted without the Concurrence of two thirds of the Members present.

Judgment in cases of impeachment.—7. Judgment in Cases of Impeachment shall not extend further than to removal from Office, and disqualification to hold and en-

joy any Office of honor, Trust, or Profit under the United States: but the Party convicted shall nevertheless be liable and subject to Indictment, Trial, Judgment and Punishment, according to Law.

Section 4

Control of congressional elections.—1. The Times, Places and Manner of holding Elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by Law make or alter such Regulations, except as to the Places of chusing Senators.

Time for assembling of Congress.—2. The Congress shall assemble at least once in every Year, and such Meeting shall be on the first Monday in December, unless they shall by Law appoint a different Day.

Section 5

Each house to be the judge of the election and qualifications of its members; regulations as to quorum.—1. Each House shall be the Judge of the Elections, Returns and Qualifications of its own Members, and a Majority of each shall constitute a Quorum to do Business; but a smaller Number may adjourn from day to day, and may be authorized to compel the Attendance of absent Members, in such Manner, and under such Penalties as each House may provide.

Each house to determine its own rules.—2. Each House may determine the Rules of its Proceedings, punish its Members for disorderly Behaviour, and, with the Concurrence of two thirds, expel a Member.

Journals and yeas and nays.—3. Each House shall keep a Journal of its Proceedings, and from time to time publish the same, excepting such Parts as may in their Judgment require Secrecy; and the Yeas and Nays of the Members of either House on any question shall, at the Desire of one fifth of those Present, be entered on the Journal.

Adjournment.—4. Neither House, during the Session of Congress shall, without the Consent of the other, adjourn for more than three days, nor to any other Place than that in which the two Houses shall be sitting.

Section 6

Compensation and privileges of Members of Congress.—1. The Senators and Representatives shall receive a Compensation for their Services, to be ascertained by Law, and paid out of the Treasury of the United States. They shall in all Cases, except Treason, Felony and Breach of the

* The 1st paragraph of this section and as much of the 2nd paragraph as relates to filling vacancies are amended by the 17th Amendment.

† Amended by the 20th Amendment, Section 2.

Peace, be privileged from Arrest during their Attendance at the Session of their respective Houses, and in going to and returning from the same; and for any Speech or Debate in either House, they shall not be questioned in any other Place.

Incompatible offices; exclusions.—2. No Senator or Representative shall, during the Time for which he was elected, be appointed to any civil Office under the Authority of the United States, which shall have been created, or the Emoluments whereof shall have been increased during such time; and no Person holding any Office under the United States, shall be a Member of either House during his Continuance in Office.

Section 7

Revenue bills to originate in House.—1. All Bills for raising Revenue shall originate in the House of Representatives; but the Senate may propose or concur with Amendments as on other Bills.

Manner of passing bills; veto power of President.—2. Every Bill which shall have passed the House of Representatives and the Senate, shall, before it becomes a Law, be presented to the President of the United States; If he approve he shall sign it, but if not he shall return it, with his Objections to that House in which it shall have originated, who shall enter the Objections at large on their Journal, and proceed to reconsider it. If after such Reconsideration two thirds of that House shall agree to pass the Bill, it shall be sent, together with the Objections, to the other House, by which it shall likewise be reconsidered, and if approved by two thirds of that House, it shall become a Law. But in all such Cases the Votes of both Houses shall be determined by Yeas and Nays, and the Names of the Persons voting for and against the Bill shall be entered on the Journal of each House respectively. If any Bill shall not be returned by the President within ten Days (Sundays excepted) after it shall have been presented to him, the Same shall be a Law, in like Manner as if he had signed it, unless the Congress by their Adjournment prevent its Return, in which Case it shall not be a Law.

Concurrent orders or resolutions, to be passed by President.—3. Every Order, Resolution, or Vote to which the Concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment) shall be presented to the President of the United States; and before the Same shall take Effect, shall be approved by him, or being disapproved by him, shall be repassed by two thirds of the Senate and House of Representatives, according to the Rules and Limitations prescribed in the Case of a Bill.

Section 8

General powers of Congress.*

The Congress shall have Power.—1. To lay and collect Taxes, Duties, Imposts and Excises, to pay the Debts and provide for the common Defence and general Welfare of the United States; but all Duties, Imposts and Excises shall be uniform throughout the United States;

Borrowing of money.—2. To borrow Money on the credit of the United States;

Regulation of commerce.—3. To regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes;

Naturalization and bankruptcy.—4. To establish a uniform Rule of Naturalization, and uniform Laws on the subject of Bankruptcies throughout the United States;

Money, weights and measures.—5. To coin Money, regulate the Value thereof, and of foreign Coin, and fix the Standard of Weights and Measures;

Counterfeiting.—6. To provide for the Punishment of counterfeiting the Securities and current Coin of the United States;

Post offices.—7. To establish Post Offices and post Roads;

Patents and copyrights.—8. To promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries;

Inferior courts.—9. To constitute Tribunals inferior to the supreme Court;

Piracies and felonies.—10. To define and punish Piracies and Felonies committed on the high Seas, and Offences against the Law of Nations;

War; marque and reprisal.—11. To declare War, grant Letters of Marque and Reprisal, and make Rules concerning Captures on Land and Water;

Armies.—12. To raise and support Armies, but no Appropriation of Money to that Use shall be for a longer Term than two Years;

Navy.—13. To provide and maintain a Navy;

Land and naval forces.—14. To make Rules for the Government and Regulation of the land and naval Forces;

Calling out militia.—15. To provide for calling forth the Militia to execute the Laws of the Union, suppress Insurrections and repel Invasions;

Organizing, arming and disciplining militia.—16. To provide for organizing, arming, and disciplining, the Militia, and for governing such Part of them as may be

* By the 16th Amendment, Congress is given the power to lay and collect taxes on incomes.

employed in the Service of the United States, reserving to the States respectively, the Appointment of the Officers, and the Authority of training the Militia according to the discipline prescribed by Congress;

Exclusive legislation over District of Columbia.—17. To exercise exclusive Legislation in all Cases whatsoever, over such District (not exceeding ten Miles square) as may, by Cession of particular States, and the Acceptance of Congress, become the Seat of the Government of the United States, and to exercise like Authority over all Places purchased by the Consent of the Legislature of the State in which the Same shall be, for the Erection of Forts, Magazines, Arsenals, dock-Yards, and other needful Buildings;—And

To enact laws necessary to enforce Constitution.—18. To make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers, and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof.

Section 9

Migration or importation of certain persons not to be prohibited before 1808.—1. The Migration or Importation of such Persons as any of the States now existing shall think proper to admit, shall not be prohibited by the Congress prior to the Year one thousand eight hundred and eight, but a Tax or duty may be imposed on such Importation, not exceeding ten dollars for each Person.

Writ of habeas corpus not to be suspended; exception.—2. The Privilege of the Writ of Habeas Corpus shall not be suspended, unless when in Cases of Rebellion or Invasion the public Safety may require it.

Bills of attainder and ex post facto laws prohibited.—3. No Bill of Attainder or ex post facto Law shall be passed.

Capitation and other direct taxes.—4. No Capitation, or other direct, Tax shall be laid, unless in Proportion to the Census or Enumeration herein before directed to be taken.*

Exports not to be taxed.—5. No Tax or Duty shall be laid on Articles exported from any State.

No preference to be given to ports of any State; interstate shipping.—6. No Preference shall be given by any Regulation of Commerce or Revenue to the Ports of one State over those of another: nor shall Vessels bound to, or from, one State, be obliged to enter, clear, or pay Duties in another.

Money, how drawn from treasury; finan-

cial statements to be published.—7. No Money shall be drawn from the Treasury, but in Consequence of Appropriations made by Law; and a regular Statement and Account of the Receipts and Expenditures of all public Money shall be published from time to time.

Titles of nobility not to be granted; acceptance by government officers of favors from foreign powers.—8. No Title of Nobility shall be granted by the United States: And no Person holding any Office of Profit or Trust under them, shall, without the Consent of the Congress, accept of any present, Emolument, Office, or Title, of any kind whatever, from any King, Prince, or foreign State.

Section 10

Limitations of the powers of the several States.—1. No State shall enter into any Treaty, Alliance, or Confederation; grant Letters of Marque and Reprisal; coin Money; emit Bills of Credit; make any Thing but gold and silver Coin a Tender in Payment of Debts; pass any Bill of Attainder, ex post facto Law, or Law impairing the Obligation of Contracts, or grant any Title of Nobility.

State imposts and duties.—2. No State shall, without the Consent of the Congress, lay any Imposts or Duties on Imports or Exports, except what may be absolutely necessary for executing its inspection Laws: and the net Produce of all Duties and Imposts, laid by any State on Imports or Exports, shall be for the Use of the Treasury of the United States; and all such Laws shall be subject to the Revision and Control of the Congress.

Further restrictions on powers of States.

—3. No State shall, without the Consent of Congress, lay any Duty of Tonnage, keep Troops, or Ships of War in time of Peace, enter into any Agreement or Compact with another State, or with a foreign Power, or engage in War, unless actually invaded, or in such imminent Danger as will not admit of delay.

ARTICLE II

Section 1

The President; the executive power.—1. The executive Power shall be vested in a President of the United States of America. He shall hold his Office during the Term of four Years, and, together with the Vice President, chosen for the same Term, be elected, as follows

Appointment and qualifications of presidential electors.—2. Each State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors, equal to the whole Number of Senators and

* See the 16th Amendment.

Representatives to which the State may be entitled in the Congress: but no Senator or Representative, or Person holding an Office of Trust or Profit under the United States, shall be appointed an Elector.

Original method of electing the President and Vice-President.*—[The Electors shall meet in their respective States, and vote by Ballot for two Persons, of whom one at least shall not be an Inhabitant of the same State with themselves. And they shall make a List of all the Persons voted for, and of the Number of Votes for each; which List they shall sign and certify, and transmit sealed to the Seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the Presence of the Senate and House of Representatives, open all the Certificates, and the Votes shall then be counted. The Person having the greatest Number of Votes shall be the President, if such Number be a Majority of the whole Number of Electors appointed; and if there be more than one who have such Majority, and have an equal Number of Votes, then the House of Representatives shall immediately chuse by Ballot one of them for President; and if no person have a Majority, then from the five highest on the List the said House shall in like Manner chuse the President. But in chusing the President, the Votes shall be taken by States, the Representation from each State having one Vote; A quorum for this Purpose shall consist of a Member or Members from two thirds of the States, and a Majority of all the States shall be necessary to a Choice. In every Case, after the Choice of the President, the Person having the greatest Number of Votes of the Electors shall be the Vice President. But if there should remain two or more who have equal Votes, the Senate should chuse from them by Ballot the Vice President.]

Congress may determine time of choosing electors and day for casting their votes.—

3. The Congress may determine the Time of chusing the Electors, and the Day on which they shall give their Votes; which Day shall be the same throughout the United States.

Qualifications for the office of President.†

—4. No Person except a natural born Citizen, or a Citizen of the United States, at the time of the Adoption of this Constitution, shall be eligible to the Office of President; neither shall any Person be eligible to that Office who shall not have attained to the Age of thirty five Years, and been fourteen Years a Resident within the United States.

Filling vacancy in the office of Presi-

dent.‡—5. In Case of the Removal of the President from Office, or of his Death, Resignation, or Inability to discharge the Powers and Duties of the said Office, the same shall devolve on the Vice President, and the Congress may by Law provide for the Case of Removal, Death, Resignation or Inability, both of the President and Vice President, declaring what Officer shall then act as President, and such Officer shall act accordingly, until the Disability be removed, or a President shall be elected.

Compensation of the President.—6. The President shall, at stated Times, receive for his Services, a Compensation, which shall neither be increased nor diminished during the Period for which he shall have been elected, and he shall not receive within that Period any other Emolument from the United States, or any of them.

Oath to be taken by the President.—7. Before he enter on the Execution of his Office, he shall take the following Oath or Affirmation:—"I do solemnly swear (or affirm) that I will faithfully execute the Office of President of the United States, and will to the best of my Ability, preserve, protect and defend the Constitution of the United States."

Section 2

The President to be commander-in-chief of army and navy and head of executive departments; may grant reprieves and pardons.—1. The President shall be Commander in Chief of the Army and Navy of the United States, and of the Militia of the several States, when called into the actual Service of the United States; he may require the Opinion, in writing, of the principal Officer in each of the executive Departments, upon any subject relating to the Duties of their respective Offices, and he shall have Power to grant Reprieves and Pardons for Offences against the United States, except in Cases of Impeachment.

President may, with concurrence of Senate, make treaties, appoint ambassadors, etc.; appointment of inferior officers, authority of Congress over.—2. He shall have Power, by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur; and he shall nominate, and by and with the Advice and Consent of the Senate, shall appoint Ambassadors, other public Ministers and Consuls, Judges of the supreme Court, and all other Officers of the United States, whose Appointments are not herein otherwise provided for, and which shall be established by Law: but the Congress may by Law vest the Appointment of such inferior Officers, as they think proper, in the President alone, in

* This clause has been superseded by the 12th Amendment.

† For qualifications of the Vice President, see 12th Amendment.

‡ Amended by the 20th Amendment, Sections 3 and 4.

the Courts of Law, or in the Heads of Departments.

President may fill vacancies in office during recess of Senate.—3. The President shall have Power to fill up all Vacancies that may happen during the Recess of the Senate, by granting Commissions which shall expire at the End of their next Session.

Section 3

President to give advice to Congress; may convene or adjourn it on certain occasions; to receive ambassadors, etc.; have laws executed and commission all officers.—He shall from time to time give to the Congress Information of the State of the Union, and recommend to their Consideration such Measures as he shall judge necessary and expedient; he may, on extraordinary Occasions, convene both Houses, or either of them, and in Case of Disagreement between them, with Respect to the Time of Adjournment, he may adjourn them to such Time as he shall think proper; he shall receive Ambassadors and other public Ministers; he shall take Care that the Laws be faithfully executed, and shall Commission all the Officers of the United States.

Section 4

All civil officers removable by impeachment.—1. The President, Vice President and all civil Officers of the United States, shall be removed from Office on Impeachment for, and Conviction of, Treason, Bribery, or other high Crimes and Misdemeanors.

ARTICLE III

Section 1

Judicial powers; how vested; term of office and compensation of judges.—The judicial Power of the United States, shall be vested in one supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish. The Judges, both of the supreme and inferior Courts, shall hold their Offices during good Behaviour, and shall, at stated Times, receive for their Services, a Compensation, which shall not be diminished during their Continuance in Office.

Section 2

Jurisdiction of Federal courts.*—1. The judicial Power shall extend to all Cases, in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties made, or which shall be made, under their Authority;—to all Cases affecting Ambassadors, other public Ministers and Consuls;—to all Cases of Admiralty and maritime Jurisdiction;—to Controversies to which the United States shall be a Party;—to Controversies between two or more States;—between a State and

Citizens of another State;—between Citizens of different States,—between Citizens of the same State claiming Lands under Grants of different States, and between a State, or the Citizens thereof, and foreign States, Citizens or Subjects.

Original and appellate jurisdiction of Supreme Court.—2. In all Cases affecting Ambassadors, other public Ministers and Consuls, and those in which a State shall be Party, the supreme Court shall have original Jurisdiction. In all the other Cases before mentioned, the supreme Court shall have appellate Jurisdiction, both as to Law and Fact, with such Exceptions, and under such Regulations as the Congress shall make.

Trial of all crimes, except impeachment, to be by jury.—3. The Trial of all Crimes, except in Cases of Impeachment, shall be by Jury; and such Trial shall be held in the State where the said Crimes shall have been committed; but when not committed within any State, the Trial shall be at such Place or Places as the Congress may by Law have directed.

Section 3

Treason defined; conviction of.—1. Treason against the United States, shall consist only in levying War against them, or, in adhering to their Enemies, giving them Aid and Comfort. No Person shall be convicted of Treason unless on the Testimony of two Witnesses to the same overt Act, or on Confession in open Court.

Congress to declare punishment for treason; proviso.—2. The Congress shall have power to declare the Punishment of Treason, but no Attainder of Treason shall work Corruption of Blood, or Forfeiture except during the Life of the Person attainted.

ARTICLE IV

Section 1

Each State to give full faith and credit to the public acts and records of other States.—Full Faith and Credit shall be given in each State to the public Acts, Records, and judicial Proceedings of every other State. And the Congress may by general Laws prescribe the Manner in which such Acts, Records and Proceedings shall be proved, and the Effect thereof.

Section 2

Privileges of citizens.—1. The Citizens of each State shall be entitled to all Privileges and Immunities of Citizens in the several States.

Extradition between the several States.—2. A Person charged in any State with Treason, Felony, or other Crime, who shall flee from Justice, and be found in another State, shall on Demand of the executive

* This section is abridged by the 11th Amendment.

Authority of the State from which he fled, be delivered up, to be removed to the State having Jurisdiction of the Crime.

Persons held to labor or service in one State, fleeing to another, to be returned.*

—3. No Person held to Service or Labour in one State, under the Laws thereof, escaping into another, shall, in Consequence of any Law or Regulation therein, be discharged from such Service or Labour, but shall be delivered up on Claim of the Party to whom such Service or Labour may be due.

Section 3

New States.—1. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the Jurisdiction of any other State; nor any State be formed by the Junction of two or more States, or Parts of States, without the Consent of the Legislatures of the States concerned as well as of the Congress.

Regulations concerning territory.—2. The Congress shall have Power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States; and nothing in this Constitution shall be so construed as to Prejudice any Claims of the United States, or of any particular State.

Section 4

Republican form of government and protection guaranteed the several States.—The United States shall guarantee to every State in this Union a Republican Form of Government, and shall protect each of them against Invasion; and on Application of the Legislature, or of the Executive (when the Legislature cannot be convened) against domestic Violence.

ARTICLE V

Ways in which the Constitution can be amended.—The Congress, whenever two thirds of both Houses shall deem it necessary, shall propose Amendments to this Constitution, or, on the Application of the Legislatures of two thirds of the several States, shall call a Convention for proposing Amendments, which, in either Case, shall be valid to all Intents and Purposes, as Part of this Constitution, when ratified by the Legislatures of three fourths of the several States, or by Conventions in three fourths thereof, as the one or the other Mode of Ratification may be proposed by the Congress; Provided that no Amendment which may be made prior to the Year One thousand eight hundred and eight shall in any Manner affect the first and fourth Clauses in the Ninth Section of the first Article; and that no State, without its Consent, shall be deprived of its equal Suffrage in the Senate.

ARTICLE VI

Debts contracted under the confederation secured.—1. All Debts contracted and Engagements entered into, before the Adoption of this Constitution, shall be as valid against the United States under this Constitution, as under the Confederation.

Constitution, laws and treaties of the United States to be supreme.—2. This Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby, any Thing in the Constitution or Laws of any State to the Contrary notwithstanding.

Who shall take constitutional oath; no religious test as to official qualification.—3. The Senators and Representatives before mentioned, and the Members of the several State Legislatures, and all executive and judicial Officers, both of the United States and of the several States, shall be bound by Oath or Affirmation, to support this Constitution; but no religious Test shall ever be required as a Qualification to any Office or public Trust under the United States.

ARTICLE VII

Constitution to be considered adopted when ratified by nine States.—The Ratification of the Conventions of nine States shall be sufficient for the Establishment of this Constitution between the States so ratifying the Same.

Done in Convention by the Unanimous Consent of the States present the Seventeenth Day of September in the Year of our Lord one thousand seven hundred and Eighty seven and of the Independence of the United States of America the Twelfth. In witness whereof We have hereunto subscribed our Names.

AMENDMENTS TO THE CONSTITUTION OF THE UNITED STATES

(Amendments I to X inclusive, popularly known as the Bill of Rights, were proposed and sent to the states by the first session of the First Congress. They became effective Dec. 15, 1791.)

ARTICLE I

Freedom of religion, speech, of the press, and right of petition.—Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

ARTICLE II

Right of people to bear arms not to be infringed.—A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed.

ARTICLE III

Quartering of troops.—No Soldier shall, in time of peace be quartered in any house, without the consent of the Owner, nor in time of war, but in a manner to be prescribed by law.

ARTICLE IV

Persons and houses to be secure from unreasonable searches and seizures.—The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

ARTICLE V

Trials for crimes; just compensation for private property taken for public use.—No person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or in the Militia, when in actual service in time of War or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation.

ARTICLE VI

Civil rights in trials for crimes enumerated.—In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the Assistance of Counsel for his defence.

ARTICLE VII

Civil rights in civil suits.—In Suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury, shall be otherwise re-examined in any Court of the United States, than according to the rules of the common law.

ARTICLE VIII

Excessive bail, fines and punishments prohibited.—Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

ARTICLE IX

Reserved rights of people.—The enumeration in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people.

ARTICLE X

Powers not delegated, reserved to states and people respectively.—The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

ARTICLE XI

(The proposed amendment was sent to the states Mar. 5, 1794, by the Third Congress. It became effective Jan. 8, 1798.)

Judicial power of United States not to extend to suits against a State.—The Judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by Citizens of another State, or by Citizens or Subjects of any Foreign State.

ARTICLE XII

(The proposed amendment was sent to the states Dec. 12, 1803, by the Eighth Congress. It became effective Sept. 25, 1804.)

Present mode of electing President and Vice-President by electors.*—The Electors shall meet in their respective states, and vote by ballot for President and Vice-President, one of whom, at least, shall not be an inhabitant of the same state with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President, and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which lists they shall sign and certify, and transmit sealed to the seat of the government of the United States, directed to the President of the Senate;—The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates and the votes shall then be counted;—The person having the greatest number of votes for President, shall be the President, if such number be a majority of the whole number of Electors appointed; and if no person have such majority, then from the persons having the highest numbers not exceeding three on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by states, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. And if the House of Representatives shall not choose a President whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President.—The person having the greatest number of votes as Vice-President, shall be the Vice-President, if such number be a majority of the whole number of Electors appointed, and if no person have a majority, then from the two highest numbers on the list, the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

ARTICLE XIII

(The proposed amendment was sent to the states Feb. 1, 1865, by the Thirty-eighth Congress. It became effective Dec. 18, 1865.)

Section 1

Slavery prohibited.—Neither slavery nor

involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

Section 2

Congress given power to enforce this article.—Congress shall have power to enforce this article by appropriate legislation.

ARTICLE XIV

(The proposed amendment was sent to the states June 16, 1866, by the Thirty-ninth Congress. It became effective July 28, 1868.)

Section 1

Citizenship defined; privileges of citizens.—All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

Section 2

Apportionment of Representatives.—Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice-President of the United States, Representatives in Congress, the Executive and Judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male inhabitants of such State, being twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion, or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

Section 3

Disqualification for office; removal of disability.—No person shall be a Senator or Representative in Congress, or elector of President and Vice President, or hold any office, civil or military, under the United States, or under any State, who having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, sha-

* Amended by the 20th Amendment, Sections 3 and 4.

have engaged in insurrection or rebellion against the same, or given aid or comfort to the enemies thereof. But Congress may by a vote of two-thirds of each House, remove such disability.

Section 4

Public debt not to be questioned; payment of debts and claims incurred in aid of rebellion forbidden.—The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection or rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations and claims shall be held illegal and void.

Section 5

Congress given power to enforce this article.—The Congress shall have power to enforce, by appropriate legislation, the provisions of this article.

ARTICLE XV

(The proposed amendment was sent to the states Feb. 27, 1869, by the Fortieth Congress. It became effective Mar. 30, 1870.)

Section 1

Right of certain citizens to vote established.—The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

Section 2

Congress given power to enforce this article.—The Congress shall have power to enforce this article by appropriate legislation.

ARTICLE XVI

(The proposed amendment was sent to the states July 12, 1909, by the Sixty-first Congress. It became effective Feb. 25, 1913.)

Taxes on income; Congress given power to lay and collect.—The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration.

ARTICLE XVII

(The proposed amendment was sent to the states May 16, 1912, by the Sixty-second Congress. It became effective May 31, 1913.)

Election of United States Senators; filling of vacancies; qualifications of electors.

1. The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for

six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislatures.

2. When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: *Provided*, That the legislature of any State may empower the executive thereof to make temporary appointment until the people fill the vacancies by election as the legislature may direct.

3. This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

ARTICLE XVIII*

(The proposed amendment was sent to the states Dec. 18, 1917, by the Sixty-fifth Congress. It was approved by three-quarters of the states by Jan. 16, 1919, and became effective Jan. 16, 1920.)

Manufacture, sale or transportation of intoxicating liquors, for beverage purposes, prohibited.—1. After one year from the ratification of this article the manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

Congress and the several States given concurrent power to pass appropriate legislation to enforce this article.—2. The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.

Provisions of article to become operative, when adopted by three-fourths of the States.—3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by Congress.

ARTICLE XIX

(The proposed amendment was sent to the states June 4, 1919, by the Sixty-sixth Congress. It became effective Aug. 26, 1920.)

The right of citizens to vote shall not be denied because of sex.—The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any States on account of sex.

Congress shall have power to enforce this article by appropriate legislation.

ARTICLE XX

(The proposed amendment, sometimes called the "Lame Duck Amendment," was sent to the states Mar. 3, 1932, by the Seventy-second Congress. It became effective Feb. 5, 1933; but, in accordance with Section 5, Sections 1 and 2 did not go into effect until Oct. 15, 1933.)

* Repealed by the 21st Amendment.

Section 1

Terms of President, Vice-President, Senators and Representatives.—The terms of the President and Vice-President shall end at noon on the twentieth day of January, and the terms of Senators and Representatives at noon on the third day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

Section 2

Time of assembling Congress.—The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the third day of January, unless they shall by law appoint a different day.

Section 3

Filling vacancy in office of President.—If, at the time fixed for the beginning of the term of the President, the President-elect shall have died, the Vice-President-elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President-elect shall have failed to qualify, then the Vice-President-elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President-elect nor a Vice-President-elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice-President shall have qualified.

Section 4

Power of Congress in Presidential succession.—The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice-President whenever the right of choice shall have devolved upon them.

Section 5

Time of taking effect.—Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

Section 6

Ratification.—This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the

several States within seven years from the date of its submission.

ARTICLE XXI

(The proposed amendment was sent to the states Feb. 20, 1933, by the Seventy-second Congress. It became effective Dec. 5, 1933.)

Section 1

Repeal of Prohibition Amendment.—The eighteenth article of amendment to the Constitution of the United States is hereby repealed.

Section 2

Transportation of intoxicating liquors.—The transportation or importation into any State, Territory, or possession of the United States for delivery or use therein of intoxicating liquors, in violation of the laws thereof, is hereby prohibited.

Section 3

Ratification.—This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by convention in the several States, as provided in the Constitution, within seven years from the date of the submission thereof to the States by the Congress.

ARTICLE XXII

(The proposed amendment was sent to the states Mar. 21, 1947, by the Eightieth Congress. It became effective Feb. 26, 1951.)

Section 1

Limit to number of terms a President may serve.—No person shall be elected to the office of the President more than twice, and no person who has held the office of President, or acted as President, for more than two years of a term to which some other person was elected President shall be elected to the office of the President more than once. But this Article shall not apply to any person holding the office of President when this Article was proposed by the Congress, and shall not prevent any person who may be holding the office of President, or acting as President, during the term within which this Article becomes operative from holding the office of President or acting as President during the remainder of such term.

Section 2

Ratification.—This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission to the States by the Congress.

Lincoln's Gettysburg Address

The Battle of Gettysburg, one of the most noted battles of the Civil War, was fought on July 1, 2, and 3, 1863. On November 19, 1863, the field was dedicated as a national cemetery by President Lincoln in a two-minute speech that was to become immortal. At the time of its de-

livery the speech was relegated to the inside pages of the papers, while a two-hour address by Edward Everett, the leading orator of the time, caught the headlines. The following is the text of the address revised by President Lincoln from his own notes:

FOURSCORE and seven years ago our fathers brought forth on this continent a new nation conceived in liberty and dedicated to the proposition that all men are created equal. Now we are engaged in a great civil war testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battlefield of that war. We have come to dedicate a portion of that field as a final resting-place for those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this. But, in a larger sense, we cannot dedicate, we cannot consecrate, we cannot hallow this ground. The brave men, living and dead, who struggled here have consecrated it far above our poor power to add or detract. The world will little note nor long remember what we say here, but it can never forget what they did here. It is for us the living rather to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us—that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion—that we here highly resolve that these dead shall not have died in vain, that this nation under God shall have a new birth of freedom, and that government of the people, by the people, for the people shall not perish from the earth.

The Monroe Doctrine

The Monroe Doctrine was announced in President James Monroe's message to Congress, during his second term on December 2, 1823 in part as follows:

"In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been deemed proper for asserting as a principle in which rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European power. . . . We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the governments who have declared their independence and maintain it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States."

Minority Presidents

Thirteen candidates have become President of the U. S. with a popular vote less than 50 per cent of the total vote cast. It should be noted, however, that in elections before 1872, presidential electors were not chosen by popular vote in all states. Adams' election in 1824 was by the House of Representatives, which chose him over Jackson, who had a plurality of both electoral and popular votes, but not a majority in the electoral college.

Besides Jackson in 1824, only two other candidates receiving the largest popular vote have failed to gain a majority in the electoral college—Samuel J. Tilden (D) in 1876 and Grover Cleveland (D) in 1888.

The "minority" Presidents follow:

Year	President	Electoral	Popular vote
		Pct.	Pct.
1824	John Q. Adams.....	31.8	29.8
1844	James K. Polk (D).....	61.8	49.3
1848	Zachary Taylor (W).....	56.2	47.3
1856	James Buchanan (D).....	58.7	45.3
1860	Abraham Lincoln (R).....	59.4	39.9
1876	Rutherford B. Hayes (R).....	50.1	47.9
1880	James A. Garfield (R).....	57.9	48.3
1884	Grover Cleveland (D).....	54.6	48.8
1888	Benjamin Harrison (R).....	58.1	47.8
1892	Grover Cleveland (D).....	62.4	46.0
1912	Woodrow Wilson (D).....	81.9	41.8
1916	Woodrow Wilson (D).....	52.1	49.3
1948	Harry S. Truman (D).....	57.1	49.5

The Mayflower Compact

On September 6, 1620, the *Mayflower*, a sailing vessel of about 180 tons, started her memorable voyage from Plymouth, England with about 100* pilgrims aboard, bound for Virginia to establish a private permanent colony in North America. Arriving at Provincetown, Mass., on November 11 (November 21, new style calendar),

forty-one of the passengers signed the famous "Mayflower Compact" as the boat lay at anchor in that Cape Cod harbor. A small detail of the pilgrims, led by William Bradford, assigned to select a place for permanent settlement landed at what is now Plymouth, Mass., on December 21, N.S.

The text of the compact follows:

IN THE NAME OF GOD, Amen. We, whose names are underwritten, the Loyal Subjects of our dread Sovereign Lord, King James, by the Grace of God, of Great Britain, France and Ireland, King, Defender of the Faith, &

Having undertaken for the Glory of God, and Advancement of the Christian Faith, and the Honour of our King and Country, a voyage to plant the first colony in the northern Parts of Virginia; do by these Presents, solemnly and mutually in the Presence of God and one of another, covenant and combine ourselves together into a civil Body Politick, for our better Ordering and Preservation, and Furtherance of the Ends aforesaid; And by Virtue hereof to enact, constitute, and frame, such just and equal Laws, Ordinances, Acts, Constitutions and Offices, from time to time, as shall be thought most meet and convenient for the General good of the Colony; unto which we promise all due Submission and Obedience.

In WITNESS whereof we have hereunto subscribed our names at Cape Cod the eleventh of November, in the Reign of our Sovereign Lord, King James of England, France and Ireland, the eighteenth, and of Scotland the fifty-fourth. Anno Domini, 1620

* Historians differ as to whether 100, 101, or 102 passengers were aboard.

The Early Congresses

At the urging of Massachusetts and Virginia, the First Continental Congress met in Philadelphia on September 5, 1774, and was attended by representatives of all the colonies except Georgia. Patrick Henry of Virginia declared: "The distinctions between Pennsylvanians, New Yorkers and New Englanders are no more. I am not a Virginian but an American." This Congress, which adjourned October 26, 1774, passed intercolonial resolutions calling for extensive boycott by the colonies against British trade.

The following year, most of the delegates from the colonies were chosen by popular election to attend the Second Continental Congress, which assembled in Philadelphia on May 10. As war had already begun between the colonies and England, the chief problems before the Congress were the procuring of military supplies, the establishment of an army and proper defenses, the issuing of continental bills of credit, etc. On June 15, 1775, George Washington

was elected to command the Continental army. Congress adjourned Dec. 12, 1776.

Other Continental Congresses were held in Baltimore (1776-77), Philadelphia (1777), Lancaster, Pa. (1777), York, Pa. (1777-78) and Philadelphia (1778-81).

In 1781, the Articles of Confederation, although establishing a league of the thirteen states rather than a strong central government, provided for the continuance of Congress. Known thereafter as the Congress of the Confederation, it held sessions in Philadelphia (1781-83), Princeton, N. J. (1783), Annapolis, Md. (1783-84) and Trenton, N. J. (1784). Five sessions were held in New York City between the years 1785 and 1789.

The Congress of the United States, established by the ratification of the Constitution, held its first meeting on Mar. 4, 1789, in New York City. Several sessions of Congress were held in Philadelphia, and the first meeting in Washington, D. C., was on Nov. 17, 1800.

Presidents of the Continental Congresses

Name	Elected	Born	Died

The Star-Spangled Banner

Francis Scott Key, 1814

O say, can you see, by the dawn's early light,
What so proudly we hail'd at the twilight's last gleaming?
Whose broad stripes and bright stars, thro' the perilous fight,
O'er the ramparts we watch'd, were so gallantly streaming?
And the rockets' red glare, the bombs bursting in air,
Gave proof thro' the night that our flag was still there.

O say, does that star-spangled banner yet wave
O'er the land of the free and the home of the brave?

On the shore dimly seen thro' the mists of the deep,
Where the foe's haughty host in dread silence reposes,
What is that which the breeze, o'er the towering steep,
As it fitfully blows, half conceals, half discloses?

Now it catches the gleam of the morning's first beam,
In full glory reflected, now shines on the stream:

'T is the star-spangled banner: O, long may it wave
O'er the land of the free and the home of the brave!

And where is that band who so vauntingly swore
That the havoc of war and the battle's confusion,
A home and a country should leave us no more?
Their blood has wash'd out their foul footsteps' pollution.

No refuge could save the hireling and slave
From the terror of flight or the gloom of the grave:
And the star-spangled banner in triumph doth wave
O'er the land of the free and the home of the brave.

O thus be it ever when free-men shall stand
Between their lov'd home and the war's desolation;
Blest with vict'ry and peace, may the heav'n-rescued land
Praise the Pow'r that hath made and preserv'd us a nation!

Then conquer we must, when our cause it is just,
And this be our motto: "In God is our trust!"
And the star-spangled banner in triumph shall wave
O'er the land of the free and the home of the brave!

ON SEPTEMBER 13, 1814, Francis Scott Key visited the British fleet in Chesapeake Bay to secure the release of Dr. William Beanes, who had been captured after the burning of Washington, D. C. The release was secured, but Key was detained on ship overnight during the shelling of Fort McHenry, one of the forts defending Baltimore. In the morning, he was so delighted to see the American flag still flying over the fort that he began a poem to commemorate the occasion. Entitled "The Star-Spangled Banner," the poem soon attained wide popularity as sung to the tune "Anacreon in Heaven." The origin of this tune is obscure, but it may have been written by John Stafford Smith, a British composer born in 1750. "The Star-Spangled Banner" was officially made the National Anthem by Congress in 1931, although already adopted as such by the Army and Navy.

History of the Flag

Source: *Encyclopaedia Britannica.*

THE FIRST OFFICIAL AMERICAN flag, the Continental or Grand Union flag, was displayed on Prospect Hill, Jan. 1, 1776, in the American lines besieging Boston. It had thirteen alternate red and white stripes, with the British Union Jack in the upper left corner.

On June 14, 1777, the Continental Congress adopted the design for a new flag, which actually was the Continental flag with the red cross of St. George and the white cross of St. Andrew replaced on the blue field by thirteen stars, one for each state. No rule was made as to the arrangement of the stars, and while they were usually shown in a circle, there were various other designs. It is uncertain when the new flag was first flown, but its first official announcement is believed to have been on Sept. 3, 1777.

The first public assertion that Betsy Ross made the first Stars and Stripes appeared in a paper read before the Historical Society of Pennsylvania on March 14, 1870, by William J. Canby, a grandson. However, Mr. Canby on later investigation found no official documents of any action by Congress on the flag before June 14, 1777. Betsy Ross' own story, according to her daughter, was that Washington, Robert Morris and George Ross, as representatives of Congress, visited her in Philadelphia in June 1776, showing her a rough draft of the flag and asking her if she could make one. However, the only actual record of the manufacture of flags by Betsy Ross is a voucher in Harrisburg, Pa., for 14 pounds

* 11 states formally seceded, and unofficial groups in Kentucky and Missouri adopted ordinances of secession. On this basis, these two states were admitted to the Confederacy, although the official state governments remained in the Union.

and some shillings for flags for the Pennsylvania navy.

On Jan. 13, 1794, Congress voted to add two stars and two stripes to the flag in recognition of the admission of Vermont and Kentucky to the Union. By 1818, there were twenty states in the Union, and as it was obvious that the flag would soon become unwieldy, Congress voted April 18 to return to the original thirteen stripes and to indicate the admission of a new state simply by the addition of a star the following July 4. The last two stars were added July 4, 1912, for New Mexico and Arizona.

The first Confederate flag, adopted in 1861 by the Confederate convention in Montgomery, Ala., was called the Stars and Bars; but because of its similarity in color to the American flag, there was much confusion in the Battle of Bull Run. To remedy this situation, Gen. G. T. Beauregard suggested a battle flag, which was used by the Southern armies throughout the war. The flag consisted of a red field on which was placed a blue cross of St. Andrew separated from the field by a white fillet and adorned with thirteen* white stars for the Confederate states. In May 1863, at Richmond, an official flag was adopted by the Confederate Congress. This flag was white and twice as long as wide the union, two-thirds the width of the flag, contained the battle flag designed for Gen. Beauregard. A broad transverse stripe of red was added Feb. 4, 1865, so that the flag might not be mistaken for a signal of truce.

Flag Etiquette

(Public Law 829—77th Congress)

JOINT RESOLUTION

To amend Public Law Numbered 623, approved June 22, 1942, entitled "Joint resolution to codify and emphasize existing rules and customs pertaining to the display, and use of the flag of the United States of America."

Resolved by the Senate and House of Representatives of the United States of America in Congress Assembled, That Public Law Numbered 623, approved June 22, 1942, entitled "Joint resolution to codify and emphasize existing rules and customs pertaining to the display and use of the flag of the United States of America," be, and the same is hereby amended to read as follows:

That the following codification of existing rules and customs pertaining to the display and use of the flag of the United States of America be, and it is hereby, established for the use of such civilians or civilian groups or organizations as may

not be required to conform with regulations promulgated by one or more executive departments of the Government of the United States.

Sec. 2. (a) It is the universal custom to display the flag only from sunrise to sunset on buildings and on stationary flag staffs in the open. However, the flag may be displayed at night upon special occasions when it is desired to produce a patriotic effect.

(b) The flag should be hoisted briskly and lowered ceremoniously.

(c) The flag should not be displayed on days when the weather is inclement.

(d) The flag should be displayed on all days when the weather permits, especially on New Year's Day, January 1; Inauguration Day, January 20; Lincoln's Birthday, February 12; Washington's Birthday, Feb.

ruary 22; Army Day*, April 6; Easter Sunday (variable); Mother's Day, second Sunday in May; Memorial Day (half-staff until noon), May 30; Flag Day, June 14; Independence Day, July 4; Labor Day, first Monday in September; Constitution Day, September 17; Columbus Day, October 12; Navy Day*, October 27; Armistice Day, November 11†; Thanksgiving Day, fourth Thursday in November; Christmas Day, December 25; such other days as may be proclaimed by the President of the United States; the birthdays of States (dates of admission); and on State holidays.

(e) The flag should be displayed daily, weather permitting, on or near the main administration building of every public institution.

(f) The flag should be displayed in or near every polling place on election days.

(g) The flag should be displayed during school days in or near every schoolhouse.

Sec. 3. That the flag, when carried in a procession with another flag or flags, should be either on the marching right; that is, the flag's own right, or, if there is a line of other flags, in front of the center of that line.

(a) The flag should not be displayed on a float in a parade except from a staff, or as provided in subsection (i).

(b) The flag should not be draped over the hood, top, sides, or back of a vehicle or of a railroad train or a boat. When the flag is displayed on a motorcar, the staff shall be fixed firmly to the chassis or clamped to the radiator cap.

(c) No other flag or pennant should be placed above or, if on the same level, to the right of the flag of the United States of America, except during church services conducted by naval chaplains at sea, when the church pennant may be flown above the flag during church services for the personnel of the Navy. No person shall display the flag of the United Nations or any other national or international flag equal, above, or in a position of superior prominence or honor to, or in place of, the flag of the United States at any place within the United States or any Territory or possession thereof: *Provided*, That nothing in this section shall make unlawful the continuance of the practice heretofore followed of displaying the flag of the United Nations in a position of superior prominence or honor, and other national flags in positions of equal prominence or honor, with that of the flag of the United States at the headquarters of the United Nations.††

(d) The flag of the United States of America, when it is displayed with another

flag against a wall from crossed staffs, should be on the right, the flag's own right, and its staff should be in front of the staff of the other flag.

(e) The flag of the United States of America should be at the center and at the highest point of the group when a number of flags of States or localities or pennants of societies are grouped and displayed from staffs.

(f) When flags of States, cities, or localities, or pennants of societies are flown on the same halyard with the flag of the United States, the latter should always be at the peak. When the flags are flown from adjacent staffs, the flag of the United States should be hoisted first and lowered last. No such flag or pennant may be placed above the flag of the United States or to the right of the flag of the United States.

(g) When flags of two or more nations are displayed, they are to be flown from separate staffs of the same height. The flags should be of approximately equal size. International usage forbids the display of the flag of one nation above that of another nation in time of peace.

(h) When the flag of the United States is displayed from a staff projecting horizontally or at an angle from the window sill, balcony, or front of a building, the union of the flag should be placed at the peak of the staff unless the flag is at half-staff. When the flag is suspended over a sidewalk from a rope extending from a house to a pole at the edge of the sidewalk, the flag should be hoisted out, union first, from the building.

(i) When the flag is displayed otherwise than by being flown from a staff, it should be displayed flat, whether indoors or out, or so suspended that its folds fall as free as though the flag were staffed.

(j) When the flag is displayed over the middle of the street, it should be suspended vertically with the union to the north in an east and west street or to the east in a north and south street.

(k) When used on a speaker's platform, the flag, if displayed flat, should be displayed above and behind the speaker. When displayed from a staff in a church or public auditorium, if it is displayed in the chancel of a church, or on the speaker's platform in a public auditorium, the flag should occupy the position of honor and be placed at the clergyman's or speaker's right as he faces the congregation or audience. Any other flag so displayed in the chancel or on the platform should be placed at the clergyman's or speaker's left as he faces the congregation or audience. But when the flag is displayed from a staff in a church or public auditorium elsewhere than in the chancel or on the platform it shall be placed in the position of honor at the right of the congregation or audience as they face the chancel or platform. Any other flag so displayed should be placed on

* In 1949, Army Day and Navy Day were abandoned; Armed Forces Day is celebrated the 3rd Saturday of May. † In 1954, changed to Veterans Day. †† Section 3 (c) was amended by Public Law 107, approved July 9, 1953, to designate the position of the United Nations flag.

the left of the congregation or audience as they face the chancel or platform.

(l) The flag should form a distinctive feature of the ceremony of unveiling a statue or monument, but it should never be used as the covering for the statue or monument.

(m) The flag, when flown at half-staff, should be first hoisted to the peak for an instant and then lowered to the half-staff position. The flag should be again raised to the peak before it is lowered for the day. By "half-staff" is meant lowering the flag to one-half the distance between the top and bottom of the staff. Crepe streamers may be affixed to spearheads or flag-staffs in a parade only by order of the President of the United States.

(n) When the flag is used to cover a casket, it should be so placed that the union is at the head and over the left shoulder. The flag should not be lowered into the grave or allowed to touch the ground.

SEC. 4. That no disrespect should be shown to the flag of the United States of America, the flag should not be dipped to any person or thing. Regimental colors, State flags, and organization or institutional flags are to be dipped as a mark of honor.

(a) The flag should never be displayed with the union down save as a signal of dire distress.

(b) The flag should never touch anything beneath it, such as the ground, the floor, water, or merchandise.

(c) The flag should never be carried flat or horizontally, but always aloft and free.

(d) The flag should never be used as drapery of any sort whatsoever, never festooned, drawn back, nor up, in folds, but always allowed to fall free. Bunting of blue, white, and red, always arranged with the blue above, the white in the middle, and the red below, should be used for covering a speaker's desk, draping the front of a platform, and for decoration in general.

(e) The flag should never be fastened, displayed, used, or stored in such a manner as will permit it to be easily torn, soiled, or damaged in any way.

(f) The flag should never be used as a covering for a ceiling.

(g) The flag should never have placed upon it, nor on any part of it, nor attached to it any mark, insignia, letter, word, figure, design, picture, or drawing of any nature.

(h) The flag should never be used as a receptacle for receiving, holding, carrying, or delivering anything.

(i) The flag should never be used for

advertising purposes in any manner whatsoever. It should not be embroidered on such articles as cushions or handkerchiefs and the like, printed or otherwise impressed on paper napkins or boxes or anything that is designed for temporary use and discard; or used as any portion of a costume or athletic uniform. Advertising signs should not be fastened to a staff or halyard from which the flag is flown.

(j) The flag, when it is in such condition that it is no longer a fitting emblem for display, should be destroyed in a dignified way, preferably by burning.

SEC. 5. That during the ceremony of hoisting or lowering the flag or when the flag is passing in a parade or in a review, all persons present should face the flag, stand at attention, and salute. Those present in uniform should render the military salute. When not in uniform, men should remove the headdress with the right hand, holding it at the left shoulder, the hand being over the heart. Men without hats should salute in the same manner. Aliens should stand at attention. Women should salute by placing the right hand over the heart. The salute to the flag in the moving column should be rendered at the moment the flag passes.

SEC. 6. That when the national anthem is played and the flag is not displayed, all present should stand and face toward the music. Those in uniform should salute at the first note of the anthem, retaining this position until the last note. All others should stand at attention, men removing the headdress. When the flag is displayed, all present should face the flag and salute.

SEC. 7. That the pledge of allegiance* to the flag, "I pledge allegiance to the flag of the United States of America and to the Republic for which it stands, one Nation under God,† indivisible, with liberty and justice for all," be rendered by standing with the right hand over the heart. However, civilians will always show full respect to the flag when the pledge is given by merely standing at attention, men removing the headdress. Persons in uniform shall render the military salute.

SEC. 8. Any rule or custom pertaining to the display of the flag of the United States of America, set forth herein, may be altered, modified, or repealed, or additional rules with respect thereto may be prescribed, by the Commander-in-Chief of the Army and Navy of the United States whenever he deems it to be appropriate or desirable; and any such alteration or additional rule shall be set forth in a proclamation.

Approved, December 22, 1942.

* The idea originated in 1892 with James B. Upham, an editor of *Youth's Companion*. The claim that Upham was also the author is disputed by some who credit Francis Bellamy. † The phrase "under God" was added to the pledge on June 14, 1954.

AMERICAN ECONOMY

ALTHOUGH WE account for only 6.3% of the world's population, we own almost 50% of its wealth. We make, grow, build, sell, buy and use more goods and services than any other country in the world. Of our population of over 174 million persons, about 64 million are employed, and over 43 million are enrolled in our schools and colleges (1957). Each year we spend more than \$280 billion on personal goods and services, of which \$85 billion go for food, tobacco and alcohol alone. According to the American Automobile Association we spend \$12 billion on vacations every year. Our personal savings amount to over \$20 billion annually, in addition to

which 4 out of every 5 families are covered by life insurance. Of our 50 million dwelling units, 55% are occupied by their owners. The millions of acres of fertile farmland produce more food than we can eat. Our productive capacity is the largest in the world: we own 29% of the world's railroad mileage, 70% of its automobiles, 51% of its trucks, 52% of its radios, 41% of its electric power output, 38% of its steel. Our natural resources are tremendous: each year we produce 42% of the world's output of petroleum and about 30% of its coal. Our merchant fleets have outstripped Britain's, and we have the greatest volume of foreign trade.

U. S. Exports of Leading Commodities

(Value in millions of dollars)

Source: U. S. Department of Commerce.

Commodity	1956	1957
Crude materials:	2,515	3,109
Coal.....	732	829
Cotton, unmanufactured.....	719	1,048
Tobacco, unmanufactured.....	334	359
Soybeans.....	180	218
Crude petroleum.....	90	173
Foodstuffs:	2,596	2,497
Grains and preparations.....	1,342	1,368
Wheat, including flour.....	798	845
Corn.....	182	251
Fruits and vegetables.....	370	360
Meats and edible animal fats.....	180	189
Dairy products and eggs.....	153	121
Manufactures, including semimanufactures:	13,829	15,024
Excluding type I and II special category items.....	11,640	13,044
Machinery.....	3,580	3,972
Electrical machinery and apparatus.....	753	810
Industrial machinery, total.....	2,152	2,480
Construction and mining machinery.....	796	882
Engines, turbines and parts.....	208	233
Metalworking and machine tools.....	238	310
Tractors, parts and accessories.....	390	380
Automobiles, parts and accessories.....	1,359	1,306
Motor trucks and busses, commercial, new.....	441	434
Passenger automobiles, commercial, new.....	334	298
Chemicals and related products.....	1,201	1,335
Medicinal and pharmaceutical preparations.....	246	285
Chemical specialties.....	453	494
Industrial chemicals.....	196	219
Iron and steel-mill products, including scrap.....	1,060	1,319
Textile manufactures.....	630	667
Cotton cloth, including duck ¹	140	148
Broad woven fabrics of synthetic fibers ¹	90	82
Metal manufactures.....	470	516
Nonferrous metals and ferroalloys.....	378	398
Rubber manufactures.....	276	300
Paper and manufactures.....	198	221
Including type II, but excluding type I special category items ²	13,255	14,569
Machinery.....	3,843	4,183
Electrical machinery and apparatus.....	1,017	1,021
Automobiles, parts and accessories.....	1,520	1,476
Chemicals and related products.....	1,213	1,354
Aircraft.....	1,065	1,029
Petroleum products.....	676	820
Motor fuel and gasoline and jet fuel.....	178	193
Lubricating oils.....	192	193
Rubber manufactures.....	278	302
Small arms and ammunition.....	190	248

¹ Excludes tire, pile, upholstery and drapery fabrics, and remnants. ² Special category includes commodities for which detailed export statistics are restricted, for security reasons.

U. S. Imports of Leading Commodities

(Value in millions of dollars)

Source: U. S. Department of Commerce.

Commodity	1956	1957
Crude materials:	3,087	3,186
Crude petroleum.....	838	982
Nonferrous ores and concentrates ¹	470	512
Manganese ore.....	71	100
Copper ore and concentrates.....	60	66
Zinc-bearing ores.....	53	89
Lead ore and flue dust.....	52	61
Crude rubber.....	398	350
Iron ore.....	250	285
Wool, unmanufactured.....	242	211
Diamonds, rough, uncut, industrial.....	161	127
Tobacco, unmanufactured.....	90	97
Undressed furs.....	79	79
Other.....	559	543
Foodstuffs:	3,203	3,288
Coffee.....	1,439	1,376
Cane sugar.....	437	458
Fruits, edible nuts and vegetables.....	250	262
Fish, including shellfish.....	238	254
Whisky and distilled spirits.....	156	166
Cocoa or cacao beans.....	144	135
Meat products.....	145	184
Grains and preparations.....	81	85
Other.....	313	368
Semimanufactures:	3,005	2,921
Nonferrous metals ²	1,126	1,063
Copper.....	392	284
Tin.....	146	131
Aluminum.....	127	128
Nickel metal and oxide.....	184	202
Lead.....	89	94
Zinc.....	65	64
Gas oil and fuel oil.....	384	496
Sawmill products.....	306	243
Woodpulp.....	297	273
Diamonds, cut but not set.....	76	66
Iron and steel semimanufactures.....	74	57
Industrial chemicals.....	70	70
Fertilizer materials.....	60	70
Other.....	612	583
Finished manufactures:	3,221	3,527
Paper and manufactures.....	750	718
Newsprint.....	688	657
Textile manufactures.....	554	546
Burlaps.....	81	81
Cotton manufactures.....	154	136
Wool manufactures.....	145	143
Fabrics of wool and mohair.....	62	59
Machinery, total.....	355	424
Agricultural implements and tractors.....	75	80
Vehicles and parts.....	276	433
Automobiles, new ³	129	308
Aircraft.....	87	53
Steel-mill manufactures.....	165	176
Clocks, watches and parts.....	75	75
Iron and steel advanced manufactures.....	66	78
Other.....	980	1,077

¹ Includes ores of ferroalloying metals. ² Includes ferroalloys. ³ Trucks and busses excluded.

¹ As of Jan. 15, 1958. ² No fixed value. ³ Par value not yet established. ⁴ In Nov. 1949, Peru introduced a new exchange system, but no agreement on a new par value has been reached.

FEDERAL INCOME TAX

If you are a citizen or a resident of the United States, and if your gross income for the year amounts to \$600 or more, you are required to file a return. This requirement applies to minors, as well as adults, and must be met even if you do not pay a tax.

If you are more than 65 years old, you are required to file only if your gross income is \$1,200 or more.

You must pay part of your tax in installments in the year in which you earned the income. This is the "pay-as-you-go" system. You are generally required to pay the rest of your tax when you file your return. It may turn out that you don't owe any additional tax when you file your

return, or you may even be entitled to a refund, in which case the refund will be paid to you automatically after your return is filed.

The "pay-as-you-go" system works in two ways, through withholding and declaration of estimated tax. You may be subject to either or both of these requirements.

If you are married, you and your wife are allowed to report your combined income and your combined deductions on a single return. This is called a joint return. Your combined income is then taxed as though half were yours and half hers. This will usually result in a lower tax.

SOCIAL SECURITY

The Social Security Act was passed in 1935 and subsequently amended in 1939, 1950, 1952, 1954, and 1958.

The act is administered by the Department of Health, Education and Welfare, of which the Social Security Administration is a part.

Old-Age, Survivors, and Disability Insurance

WHO IS COVERED?

Almost everyone who works fairly regularly. Self-employed doctors are the only large group not covered by this social security program.

To qualify for benefits or make payments possible for your survivors you must be in work covered by the law for a certain number of "quarters of coverage" after 1936 (for self-employment, after 1950). The number of quarters needed differs for different persons and depends on the date of your birth; in general, it is related to the length of time from 1936, from 1950, or from your twenty-first birthday and the time you reach retirement age. No one needs more than 40 quarters, and no one can qualify with less than 6. Your local social security office can tell you how long you need to work in covered employment under the present law.

WHO PAYS FOR THE INSURANCE?

Both workers and employers pay for the workers' insurance. Self-employed persons pay their own tax annually along with their income tax. Tax rates are scheduled to go up gradually until 1975:

Years	Workers and Employers Each to Pay	Self-employed to Pay
1959.....	2½%	3¼%
1960-62.....	3%	4½%
1963-65.....	3½%	5¼%
1965-68.....	4%	6%
1969 and after.....	4½%	6¾%

HOW TO APPLY FOR BENEFITS

You apply for benefits by filing a claim either in person or by mail at your nearest social security office. You can get the address either from the post office or from the phone book under the listing, United States Government—Department of Health, Education and Welfare—Social Security Administration. You will need certain kinds of proof, depending upon the type of benefit you are claiming. If it is an old-age benefit, you should have proof of age. A wife claiming old-age benefits based on her husband's earnings should have both proof of age and a copy of the marriage certificate. In the case of survivors' benefits, you will need a copy of the death certificate of the deceased worker. If formal proof is not available, the social security office will tell you what kinds of information will be acceptable.

WHAT DOES SOCIAL SECURITY OFFER?

The social security tax you pay gives you three different kinds of protection: (1) retirement benefits, (2) survivors' benefits, and (3) disability benefits.

Retirement benefits. A man becomes eligible for an old-age benefit at age 65, if he has retired under the definition in the law. A woman worker also is eligible for a full old-age benefit at 65, but she may retire at 62 and get 80% of her full benefit for the rest of her life. The closer she is to age 65 when she starts collecting her benefit, the larger the fraction of her full benefit she will get.

The amount of the old-age benefit you are entitled to is the key to all other benefits under the program. The old-age benefit is based on average monthly earnings, generally those after 1950. (Amounts over \$4,800 a year are not counted.) The table on page 796 gives examples of benefits.

Using the table as a guide, you will see that average monthly earnings of \$300

would give you a benefit of \$105 a month when you retire at 65.

If your wife is also 65, then she will get a wife's benefit that is equal to half your benefit. So if your benefit is \$105 your wife gets \$52.50 (cents are rounded to the nearest dime).

If your wife is younger than you, but not under 62, she can draw a reduced benefit that depends on the number of months before she will be 65. If she draws her benefit when she is 62, she will get about ¾ of your basic benefit, or \$39.40. (She will get this amount for the rest of her life, unless you should die first; then she can start getting the full widow's benefit, described below.)

If your wife is entitled to a worker's old-age benefit on her own earnings she can draw whichever—the worker's or the wife's—is larger. No one can draw two benefits at the same time.

If you have children under 18 when you retire, they will get a benefit equal to half your benefit, and so will your wife, in that case, even if she is under 62. However, total benefits based on your earnings cannot be more than \$254.10 a month or 80% of your average monthly wage. When your children reach age 18, their benefits will stop, except a benefit that is going to a child who is permanently and totally disabled. Such a child can continue to get his benefit as long as his disability meets the definition in the law.

If you are a woman worker entitled to an old-age benefit and you have a dependent husband aged 65 or over, he may draw a benefit similar to a wife's benefit at 65.

Survivor benefits. This feature of the social security program gives you valuable life insurance protection—in some cases over \$30,000 worth. The amount of protection is again geared to what the worker would be entitled to at 65. If you can estimate from the table what your basic monthly benefit would be at 65, this is what your survivors would get:

- 1. A cash payment to cover your burial expenses. This comes to 3 times the basic monthly benefit but no more than \$255.
- 2. A benefit for each child until he reaches 18. If there is only one child eligible, he gets 75% of the basic benefit. If there are two or more children, each one gets 50% of the basic benefit and an additional 25% is split among them. (A disabled child can continue to collect benefits after age 18.)
- 3. A mother's benefit for your widow, if she has children under 18 in her care. Her benefit is 75% of the basic benefit. She can collect this until the youngest child reaches 18. Payments stop then (they

What Benefits You Get Under Social Security

Based on an average monthly wage of	Retirement benefits			Survivors' benefits		
	Worker's monthly benefit ¹	Worker with 62-year-old wife ¹	Worker with 65-year-old wife ¹	Widow and 1 child	Widow and 2 children	Widow age 62 ²
\$100.....	\$ 59.00	\$ 79.70	\$ 88.50	\$ 88.60	\$ 88.60	\$ 44.30
150.....	73.00	98.60	109.50	109.50	120.00	54.80
200.....	84.00	114.40	126.00	126.00	161.60	63.00
250.....	95.00	128.90	142.50	142.50	190.10	71.30
300.....	105.00	141.80	157.50	157.50	210.20	78.80
350.....	116.00	156.60	174.00	174.00	232.00	87.00
400.....	127.00 ³	171.50 ³	190.50 ³	190.50 ³	254.10 ³	95.30 ³

¹ Also indicates amount worker aged 50-64 or worker and wife (aged 62 or 65) would get if disabled. ² Also indicates amount that would be paid to only child or parent. ³ These are maximum benefits under the new law of 1958, but they will not be payable for several years to come; that is, to receive maximum benefits, the average salary of the worker, excluding the lowest 5 years, would have to be \$4,800, starting Jan. 1, 1959.

will start again when she is 62). If she has a disabled child in her care who is getting a benefit after 18, then her benefit continues, too.

Total family benefits cannot go over \$254.10 a month or 80% of your average monthly wage.

4. If there are no children under 18, your wife can get a widow's benefit starting at age 62. This would come to 75% of the basic benefit.

5. Dependent parents can sometimes collect survivors' benefits, if the deceased worker leaves no wife or child. They are usually eligible if: (a) they were getting at least half their support from the deceased worker when he died, (b) they have reached retirement age (65 for the father, 62 for the mother), and (c) they are not eligible for an old-age benefit based on their own earnings. Each parent would then get 75% of the basic benefit.

A woman worker can provide survivors' benefits for any of these dependents, if she has been contributing at least half their support: (1) her children under age 18, (2) her disabled child after 18, if the child is unmarried and was disabled before 18, and (3) her dependent widowed husband at age 65, if he hasn't remarried. Or, if she had no other dependents, her parents could collect benefits if they met the tests in paragraph (5) above.

Here is an example of survivors' benefits in one family situation: John Jones dies, leaving a wife and two children aged one and three. His average monthly wage was \$300. This would have given him an old-age benefit of \$105, if he had lived to 65. This is what his family gets: (1) a cash burial payment of \$255; (2) a total monthly benefit of \$131.50 for the two children; and (3) a \$78.80 monthly benefit for Mrs. Jones. Total benefits for the family come to \$210.20 a month while the two children are under 18. When the older child reaches 18 his benefits stop, but the younger child's benefit is raised

to \$78.80 a month. Mrs. Jones and the younger child then collect a total of \$157.50 a month for two years until the child reaches 18. Then all payments stop. When Mrs. Jones becomes 62 (assuming she hasn't remarried), she will again be paid \$78.80 a month.

Disability benefits. These are a new feature of the social security insurance system. Disability benefits are paid to two groups of people:

1. An insured worker with a total disability can collect his full old-age benefit at age 50, instead of waiting until 65. Under the new law of 1958, eligible dependents of disabled workers will receive the usual benefits. To be eligible for disability benefits, a person must: (a) have worked in employment (or self-employment) covered by social security for about 5 out of the 10 years before he became disabled; (b) be suffering from a physical or mental disability of indefinite duration; and (c) be so disabled that he can't work, or at least "engage in any substantial gainful activity." If he meets those tests, his benefits will start after a 6-month waiting period.

The applicant is referred to the State vocational rehabilitation agency and, if rehabilitation services are proposed and the applicant refuses them without good cause, his disability benefit is suspended. If the worker gets workmen's compensation benefit or another federal benefit based on disability, his disability benefit is reduced by the amount of such benefit—except that a benefit paid by the Veterans Administration because of service-connected disability will not result in any reduction.

2. The permanently disabled child of a deceased or retired person who was covered by social security can collect benefits after age 18 (when children's benefits are ordinarily cut off). If the child is eligible, his mother can also get a benefit. The child must: (a) have been disabled before age 18 (but he need not have been draw-

ing benefits before 18), (b) be unmarried, and (c) have been dependent on the deceased or retired worker for at least half his support. The child's benefit would be 75% of the father's basic benefit and his mother would get the same amount. A disabled child can get a benefit based on his mother's earnings, instead of his father's, if she has contributed to at least half his support and has died or is drawing an old-age benefit.

The disabled child's benefit can actually be paid to adults, if the above tests are met. For example, an unmarried person, aged 40, who was born blind and is dependent on his father for support can collect a disabled child's benefit as soon as his father starts drawing an old-age benefit or dies.

YOU CAN EARN INCOME WITHOUT LOSING BENEFITS

If you are 72 or over, you can earn any amount. If you are under 72, you can earn \$1,200 a year without losing any benefits. (Only earned income is counted, not pensions, dividends, etc.) For each \$80 (or fraction of \$80) over \$1,200, you can lose one month's benefit. For example, \$1,290 could cancel two months' benefits, and \$2,081 could mean loss of the whole year's benefits. But you will not lose the benefit for any month in which you did not work as an employee for \$100 or more and did not perform substantial services in self-employment. For example, if you earned \$3,000 in 3 months and were idle the rest of the year, you would lose only 3 months' benefits.

When a man and wife are drawing old-age benefits based on his earnings, the wife will lose her benefit in any month that the husband loses his. But if a widow with young children loses her benefits by working, the children will continue to get theirs.

If you earn over \$1,200 a year while drawing benefits (and are under 72), you must report those earnings.

HOW TO PROTECT MY SOCIAL SECURITY ACCOUNT

1. *Always show your social security card when you start a new job.* In that way you will be sure that your earnings will be credited to *your* social security account and not someone else's. If you lose your social security card, apply for a new one. When a woman marries, she should apply for a new card showing her married name.

2. *Make a periodic check of earnings credited to your social security account.* You can do this by mailing postcard Form OAR-7004 to the Social Security Adminis-

tration, Baltimore, Md. (You can get this form at any social security office.) The reply will show total wages credited to your account since 1936 or when you started working. It's a good idea to check once every three years and prevent errors.

3. *If you should become permanently disabled, have your social security credits "frozen."* Social security benefits are usually based on your average earnings up to the date of death or retirement. A long period of sickness or disability could lower your average earnings and thus cut down or even eliminate the eventual benefit you or your family might get. But you can avoid this reduction in benefits by applying for a disability determination at your local social security office. Then the period of disability will not be counted.

PUBLIC ASSISTANCE

Aid to four groups of needy persons is provided under the Social Security Act through assistance programs administered by the states with grants from the Federal government. The Federal share of the individual payment, for the aged, the blind, and the disabled is 4/5 of the first \$30 of the average monthly payment plus half the balance, up to the \$65 maximum, specified in the law. A blind person may earn up to \$50 a month and have such earnings disregarded when the state is determining whether he is needy. For aid to dependent children, the Federal government pays 14/17 of the first \$17 paid per person per month plus 1/2 the balance within the maximums (\$32 for one needy adult, \$32 for the first child, and \$23 for each additional child). To be eligible a child must be (1) under 18; (2) without parental support or care because of the death, absence from the home, or incapacity of a parent and (3) living with a parent or specified relative.

The law also permits federal sharing in the payments to doctors and others for medical care in behalf of needy persons—beyond what such persons get directly in their assistance payment.

Unemployment Insurance

Unemployment insurance is managed jointly by the states and the national government. Most states began paying benefits in 1938 and 1939.

UNDER WHAT CONDITIONS CAN THE WORKER COLLECT

The laws vary from state to state. In general, a waiting period of one week is required before collecting unemployment insurance; the worker must be able to work, must not have quit without good cause or have been discharged for misconduct; he must not be involved in a

* This will be increased for unemployed persons with dependents. NOTE: On June 4, 1958, a new law was passed giving states the option of obtaining Federal loans to finance a temporary extension of unemployment compensation for unemployed workers who had exhausted their benefits, for a period equal to 50% of what they were entitled to under state laws.

labor dispute; above all, he must be willing to take a job in his field at prevailing wage rates. Other restrictions on payments involve leaving for marriage, pregnancy or further education.

The unemployed worker must go to the local state employment service office to register his claim for unemployment benefits and must register for work. If a suitable opening is available in his field, he must accept it or lose his unemployment payments. If a worker moves out of his own state, he can still collect at his new residence; the state where he is now located will act as agent for the other state, which pays his benefits.

WHO PAYS FOR THE INSURANCE?

The cost is borne by the employer in all but two states and Alaska. Each State (Alaska excepted) has a sliding scale of rates. The standard rate is set at 2.7% of taxable payroll in most states. But employers with records of steady employment (that is, few layoffs) are rewarded with rates lower than the standard 2.7%. The average rate for employers in 1956 was 1.3%. Tax is payable on only the first \$3,000 of a worker's pay, except in Delaware, Nevada, Oregon, and Rhode Island, where the limit is set at \$3,600, and in Alaska where the limit is \$4,200. Employees as well as employers pay a tax in

Alabama (0.1%), New Jersey (¼ of 1%), and Alaska (½ of 1%).

Employers pay an additional unemployment tax to the Federal Government—0.3% of the \$3,000 paid to each employee. This money is returned to the states in the form of federal grants for administrative expenses of the program; any amounts over these costs, up to \$200 million, is put in a special loan fund on which the states may draw when their payment funds are low, and the rest of the excess is assigned to the states to supplement the grants for administrative costs.

WHO IS COVERED AND WHO IS NOT?

Requirements vary from state to state, but all states cover firms having at least 4 employees for 20 weeks or more a year. In some states, firms with only one employee are covered. Certain classes of workers are specifically exempt under some or all state laws: farm workers, domestic workers, members of the employer's family, insurance agents on commission, workers in nonprofit organizations, student nurses, internes and casual labor.

Railroad Workers

These are covered by the Railroad Retirement Act, passed in 1935 and amended in 1937 and 1946. The social security provisions of this act are administered by the Railroad Retirement Board.

THE UNITED NATIONS

Its Major Cases and Actions

IRAN

Iran presented the first case before the Security Council on Jan. 19, 1946, demanding an end to Russian "interference" in Azerbaijan province, which Russia had brought under its control through a puppet government. Iran also demanded that Russia keep her promise to withdraw all occupation troops by Mar. 2. The Council kept the matter on the agenda. Russia withdrew her troops May 6.

GREECE

On Dec. 3, 1946, Greece complained to the Security Council that Communist-led rebels in northern Greece were being aided by Albania, Bulgaria and Yugoslavia. The Council named an investigating committee, which reported May 23, 1947, that those 3 nations were guilty. A Russian veto of July 29 prevented the Council's acceptance of the report. In Sept. 1948, the U. N. Balkan Commission, which continued to watch developments, again condemned the 3 nations for continuing aid to the Greek rebels. However, 3 months previously, on June 28, 1948, Marshal Tito's Yugoslavia had broken with Moscow. Thereafter, the Greek Communist-led rebellion faded out.

ATOMIC ENERGY CONTROL

On Dec. 31, 1946, a U. N. commission of 11 nations recommended the "Baruch plan" sponsored by the U. S. for international control and inspection. Only Russia dissented. In June 1947, she submitted a vastly different control plan, limiting international inspection so greatly that the secret making of atomic bombs could not be discovered. On May 17, 1948, the U. N. commission voted (9-2) to suspend work on international atomic control, blaming Russia for the deadlock. A Russian veto of June 22 prevented the Security Council from approving the majority-approved control plan. The topic then went to the General Assembly, which, on Nov. 4, 1948, adopted (40-6) the U. S.-sponsored plan; but nothing could be done to put it into effect because of Soviet-bloc opposition.

PALESTINE

A General Assembly special session met Apr. 28, 1947, at the request of Great Britain to consider Palestine. An 11-nation investigating committee recommended Aug. 31 that Britain give up control and that an Arab and a Jewish state be established. This partition plan was approved by the

Assembly in Nov. 1947, but proved impossible to enforce.

Britain ceased to govern Palestine on May 14, 1948. Israel proclaimed her independence and was attacked by 5 neighboring Arab nations. The U. N. made 6 appeals to both sides to stop the war; the last brought about a truce from June 11 to July 9. Intermittent fighting took place thereafter. Count Folke Bernadotte, the U. N. mediator, was murdered Sept. 17 near Jerusalem. He was succeeded by Dr. Ralph J. Bunche.

Israel signed an armistice with Egypt on Feb. 24, 1949, and with Jordan on Apr. 3. On May 11, the U. N. voted (37-12) to admit Israel as the 59th member.

INDONESIA

On July 30, 1947, Australia called the Security Council's attention to the fighting between the Netherlands and the Indonesian Republic. The Council, on Aug. 1, ordered both sides to cease hostilities. A Good Offices Commission was sent to Indonesia, and it effected a truce Jan. 17, 1948. In Dec. 1948, the Dutch attacked Jakarta, then the Indonesian capital, and the Council again issued a cease-fire order. Dutch troops were withdrawn from around Jakarta in July 1949. Indonesia thereafter peacefully achieved independence from the Netherlands.

INDIA-PAKISTAN

On Jan. 2, 1948, India appealed to the U. N. to stop alleged aggression by Pakistan. Fighting had broken out over which nation should control the province of Kashmir. The Security Council sent a commission, which proposed that Kashmir's future be determined by a plebiscite. The Council agreed on Apr. 21, but both sides raised objections. Early in 1949, the U. N. commission succeeded in obtaining a truce; and, on Mar. 14, 1950, the Council substituted a mediator, who was to seek demilitarization of the areas of Kashmir held by India and Pakistan and to try for a plebiscite. Two mediators failed.

RUSSIAN BOYCOTT

Soviet Delegate Malik walked out of the Security Council on Jan. 13, 1950, because it had refused (6-3) Russia's demand that Nationalist China be replaced in the U. N. by Communist China. The boycott ended on Aug. 1. Again the Council voted (8-3) to refuse membership to Communist China.

KOREA

Russia occupied the northern half of Korea after World War II, and the U. S. occupied the southern half below the 38th parallel. The understanding was that the occupying powers would set up an independent republic to govern the entire country. Russia refused to co-operate. The U. S. then referred the problem to the U. N., and the General Assembly voted Nov. 5, 1947, to send a commission to Korea to set up a free government. Russia, however, boycotted the commission and refused to allow it to enter North Korea. The commission therefore supervised free elections in South Korea and assisted in setting up the Republic of Korea with its capital at Seoul.

HUNGARY

Sparked by student demonstrations, street riots in Hungary in Oct. 1956, took on the proportions of rebellion. The Communist government called for Soviet help, and Russian tanks rolled into Budapest on Oct. 24. The Communists sought to appease the rebellious people by putting in as Premier a man, Imre Nagy, who had been ousted from the party as a "Titoist."

Nagy promised to throw off Russian shackles, and by Nov. 1, Russian tanks and troops had withdrawn from Budapest. On Nov. 4, however, the Russian tanks returned in force, shooting freely and killing civilians. The Russians set up a new puppet government headed by János Kadar.

The General Assembly on Nov. 4, in a special session, called on Russia to get its troops out of Hungary "without delay."

In the ensuing 6 weeks, the General Assembly passed 4 more resolutions about the Soviet crushing of Hungary.

One of the resolutions (Dec. 12, 1956) was an outright condemnation of Russia for "violation of the Charter by the U.S.S.R. in depriving Hungary of its liberty and independence." The vote was 55 to 8, which constituted a world-wide indictment.

The General Assembly decided in January 1957 to name a five-man committee to investigate from outside Hungary. On it were representatives of Denmark, Tunisia, Uruguay, Ceylon and Australia.

The committee heard testimony from 111 Hungarians, mainly refugees, in Europe and America. It reported unanimously on June 20, 1957, that the Hungarian uprising had been a spontaneous revolt of the people and that the crushing of the revolt by Soviet Russian troops had cost between 2,500 and 3,000 lives.

Meanwhile, people had begun fleeing from Communist Hungary on a mass scale

almost unprecedented. By the end of April 1957, some 175,000 Hungarians had sought asylum in Austria.

SUEZ

On Oct. 29, 1956, Israeli armed forces launched a major attack into the Gaza Strip and into Egypt's Sinai Desert territory.

An emergency special session of the U. N. General Assembly adopted on the night of Nov. 1-2, by a vote of 64 in favor, 5 against, 6 abstentions, a United States resolution calling upon all parties involved in hostilities in the area to agree to an immediate cease-fire. By that time, Britain and France were involved in the fighting.

Heeding the General Assembly call, Britain and France announced on Nov. 3 that they would stop military action.

By direction of the General Assembly, a United Nations Emergency Force was established to keep the peace. The first units landed at Ismailia, midway point on the Suez Canal, on Nov. 11, 1956.

On Feb. 21, Israel agreed to pull out its last troops if the U. N. Emergency Force stationed peace-keeping troops on the Aqaba Gulf and in the Gaza Strip. The U. N. Emergency Force troops were so stationed, and they became the first uniformed peace-preserving unit in the history of the U. N.

The nations which contributed troops were Brazil, Canada, Colombia, Denmark, Finland, India, Norway, Sweden and Yugoslavia.

LEBANON

In July, 1958, the United States responded to a plea for help from the little country of Lebanon at the eastern end of the Mediterranean, which had been in the throes of insurrection allegedly aided from its neighbor Syria, lately affiliated with Egypt in the new United Arab Republic. At Lebanon's request, U. S. Marines were landed there. Almost simultaneously, nearby Jordan requested and received British troops to safeguard the pro-West regime.

The U. N. already had a team of about 130 observers in Lebanon. In the Security Council, the Soviet Union now cast its 84th and 85th vetoes to kill resolutions (supported by the West) designed to strengthen U. N. forces in the Mideast.

The General Assembly was summoned into a rare emergency session which opened Aug. 8. A unanimous resolution directed Secretary-General Dag Hammarskjöld to go to the Middle East and see what arrangements could be made to restore stability and facilitate withdrawal of U. S. and British troops.

¹ Declaration of United Nations was originally signed by 26 nations in Washington, D. C., on Jan. 1, 1942; 21 states later adhered to Declaration. ² U. N. officially came into existence Oct. 24, 1945. ³ League was formally dissolved Apr. 18, 1946. Nations withdrawing before that time did so voluntarily, except U.S.S.R., which was expelled. Other members of League were: Estonia (1921-46), Germany (1926-35), Latvia (1921-46), Lithuania (1921-46), Switzerland (1920-46). ⁴ Admission as separate nation approved at San Francisco Conference. ⁵ Tried to attend San Francisco Conference June 5, 1945, after its liberation. ⁶ Not represented at San Francisco Conference, but subsequently signed Charter as original member. ⁷ Formed by union in 1958 of Egypt and Syria, both original members of U. N. ⁸ Egypt was a member of League (1937-46); Syria was not a member.

United Nations Headquarters

The first regular session of the General Assembly held at Central Hall, Westminster, London, voted that Interim Headquarters of the Organization should be located in New York. In August 1946, an Interim Headquarters was set up at Lake Success on Long Island, in a part of the Sperry Gyroscope Co.'s plant. The New York City building at Flushing Meadow, site of the 1939 World's Fair, was converted for the use of the General Assembly. The search for a permanent home ended in December 1946, when the General Assembly accepted an offer from John

D. Rockefeller, Jr., of \$8,500,000 for the purchase of the present Headquarters site—an 18-acre tract alongside Manhattan's East River. The U. S. Government loaned the U. N. \$65,000,000 interest free, which is being repaid in annual installments.

Architectural plans drawn up by an international Board of Design were approved by the Assembly, and construction began in September 1948. By mid-1950, the 39-story Secretariat Building was ready for occupancy, and in the spring of 1951 "United Nations, New York" became the Organization's permanent address.

Principal Organs of the United Nations

(For functions, see Charter, pp. 611-23. For officers of Secretariat and member nations of councils, see pp. 608-09.)

SECRETARIAT

Secretary-General

Dag Hammarskjöld, of Sweden, Apr. 10, 1953, to the present.

Former Secretary-General

Trygve Ljé, of Norway, Feb. 1, 1946, to Apr. 10, 1953.

GENERAL ASSEMBLY

The General Assembly is composed of all member states. It does most of its work in committees, of which there are 4 types: main, procedural, standing and ad hoc.

Main Committees

First Committee (Political and Security, including the regulation of armaments).
Special Political Committee.

Second Committee (Economic and Financial).

Third Committee (Social, Humanitarian and Cultural).

Fourth Committee (Trusteeship, including Non-Self-Governing Territories).

Fifth Committee (Administrative and Budgetary).

Sixth Committee (Legal).

Presidents of the General Assembly

Paul-Henri Spaak, of Belgium, 1946, First Session.

Oswaldo Aranha, of Brazil, 1947, First Special Session and Second Regular Session.

Dr. José Arce, of Argentina, 1948, Second Special Session.

Herbert V. Evatt, of Australia, 1948, Third Session.

Carlos P. Romulo, of the Philippines, 1949, Fourth Session.

Nasrollah Entezam, of Iran, 1950, Fifth Session.

Luis Padilla Nervo, of Mexico, 1951, Sixth Session.

Lester B. Pearson, of Canada, 1952, Seventh Session.

Mrs. Vijaya Lakshmi Pandit, of India, 1953, Eighth Session.

Eelco N. van Kleffens, of the Netherlands, 1954, Ninth Session.

José Maza, of Chile, 1955, Tenth Session.

Rudecindo Ortega, of Chile, Nov., 1956, First and Second Emergency Sessions.

Prince Wan Waithayakon, of Thailand, 1956-57, Eleventh Session.

Sir Leslie Munro, of New Zealand, 1957-58, Twelfth Session and Third Emergency Special Session.

Charles Malik, of Lebanon, 1958, Thirteenth Session.

SECURITY COUNCIL

The Security Council is composed of 5 permanent members—China, France, the U.S.S.R., the United Kingdom and the

U. S. There are 6 nonpermanent members serving 2-year terms.

The Military Staff Committee is composed of the Chiefs of Staff of the 5 permanent members or their representatives; the Disarmament Commission, established by the General Assembly under the Security Council, had the following membership during 1958: Argentina, Australia, Belgium, Brazil, Burma, Canada, China, Colombia, Czechoslovakia, France, India, Iraq, Italy, Japan, Mexico, Norway, Panama, Poland, Sweden, Tunisia, the U.S.S.R., the United Arab Republic, the United Kingdom, the U. S. and Yugoslavia.

ECONOMIC AND SOCIAL COUNCIL

The Economic and Social Council is composed of 18 nonpermanent members serving 3-year terms.

Functional Commissions

Transport and Communications Commission.

Statistical Commission.

Population Commission.

Social Commission.

Commission on Human Rights.

Commission on the Status of Women.

Commission on Narcotic Drugs.

Commission on International Commodity Trade.

Regional Economic Commissions

Economic Commission for Europe.

Economic Commission for Asia and the Far East.

Economic Commission for Latin America.

Economic Commission for Africa

TRUSTEESHIP COUNCIL

The Trusteeship Council is composed of 14 members—seven members—Australia, Belgium, France, Italy, New Zealand, the United Kingdom and the U. S., which administer trust territories; China and the U.S.S.R., other permanent members of the Security Council which do not administer trust territories, and 5 other members elected by the General Assembly serving 3-year terms. This arrangement ensures that the total number of Council members is equally divided between those U. N. members which administer trust territories and those which do not.

The Trusteeship Agreements concern the following territories (the Administering Authority in each case is in italics):

Nauru—*Australia (on behalf of Australia, New Zealand and the United Kingdom).*

New Guinea—*Australia.*

Ruanda-Urundi—*Belgium.*

Cameroons—*France.*

Togoland—*France.*

Somaland—*Italy.*

Western Samoa—New Zealand.

Cameroons }
Tanganyika } *United Kingdom.*

The Territory of the Pacific Islands—composed of the former Japanese-mandated islands of the Marshalls, Marianas (with the exception of Guam) and Carolines—is a strategic Trust Territory administered by the U. S.

The General Assembly decided at its Fourth Session in 1949 that former Italian Somaliland was to be placed under the Trusteeship System for 10 years, at the end of which time (that is, in 1960) it would become independent. Italy became the Administering Authority on Apr. 1, 1950.

Agencies of the United Nations

International Atomic Energy Agency (IAEA)

Established: Statute for IAEA, approved on October 26, 1956 at a conference held at U. N. Headquarters, New York, came into force on July 29, 1957. The Agency, while not a specialized agency, is under the aegis of the U. N.

Purposes: To promote the peaceful uses of atomic energy, and to ensure that assistance provided by it or at its request or under its supervision or control is not used in such a way as to further any military purpose.

Headquarters: Vienna, Austria.

Specialized Agencies

International Labour Organisation (ILO)

Established: Apr. 11, 1919, when constitution was adopted as Part XIII of Treaty of Versailles.

Purposes: To contribute to establishment of lasting peace by promoting social justice; to improve, through international action, labor conditions and living standards; to promote economic and social stability.

Headquarters: Geneva, Switzerland.

Food and Agriculture Organization of the United Nations (FAO)

Established: Oct. 16, 1945, when constitution became effective.

Purposes: To raise nutrition levels and living standards; to secure improvements in production and distribution of food and agricultural products.

Headquarters: Viale delle Terme Di Caracalla, Rome, Italy.

United Nations Educational, Scientific and Cultural Organization (UNESCO)

Established: Nov. 4, 1946, when 20th signatory to constitution deposited instrument of acceptance with government of United Kingdom.

Purposes: To promote collaboration among nations through education, science and culture in order to further justice, rule of law and human rights and freedoms without distinction of race, sex, language or religion.

Headquarters: 19 Ave. Kléber, Paris 16, France.

World Health Organization (WHO)

Established: Apr. 7, 1948, when 26 members of the United Nations had accepted its constitution adopted July 22, 1946, by International Health Conference in New York City.

Purposes: To aid attainment by all peoples of the world of highest possible level of health.

Headquarters: Palais des Nations, Geneva, Switzerland.

International Bank for Reconstruction and Development (Bank)

Established: Dec. 27, 1945, when Articles of Agreement drawn up at Bretton Woods Conference in July, 1944, came into force. Began operations June 25, 1946.

Purposes: To assist in reconstruction and development of economies of members by making loans directly and promoting private foreign investment; to promote balanced growth of international trade.

Headquarters: 1818 H St., NW, Washington 25, D. C.

International Finance Corporation (IFC)

(Affiliate of International Bank)

Established: Charter of IFC came into force on July 20, 1956. Although IFC is affiliated with the International Bank, it is a separate legal entity and its funds are entirely separate from those of the Bank. However, membership in the Corporation is open only to Bank members.

Purposes: Its objective is to further economic development by encouraging the growth of productive private enterprise in its member countries, particularly in the less developed areas. It is empowered to invest in productive private enterprises in association with private investors, and without government guarantee of repayment in cases where sufficient private capital is not available on reasonable terms; and to serve as a clearing house to bring together investment opportunities, private capital, both foreign and domestic, and experienced management.

Headquarters: 1818 H St., NW, Washington, D. C.

International Monetary Fund (Fund)

Established: Dec. 27, 1945, when Articles of Agreement drawn up at Bretton Woods Conference in July 1944 came into force. Fund began operations on March 1, 1947.

Purposes: To promote international monetary co-operation and expansion of international trade; to promote exchange stability; to assist in establishment of multilateral system of payments in respect of current transactions between members.

Headquarters: 1818 H St., NW, Washington 25, D. C.

International Trade Organization (ITO) General Agreement on Tariffs and Trade (GATT)

Established: Although establishment of ITO and the bringing into operation of the Havana Charter, on which it was to be based, have not taken place, one of the main objectives of that Charter has been embodied in an international commercial treaty, known as the General Agreement on Tariffs and Trade (GATT). Provision has been made for a permanent Organization for Trade Cooperation (OTC) to administer GATT and to come into being when it has been accepted by countries which account for a high proportion of world trade.

Inter-Governmental Maritime Consultative Organization (IMCO)

Established: Convention establishing IMCO came into existence on March 17, 1958 when 21 nations, of which 7 each had a total tonnage of at least one million gross tons of shipping, became parties to the convention drawn up by U. N. Maritime Conference at Geneva, Feb. 19 to Mar. 6, 1948. (Preparatory Committee established by Conference will cease to exist after IMCO holds its first constituent assembly, scheduled to meet in London in January, 1959.)

Purposes: To promote co-operation among governments in technical problems of international shipping and to encourage removal of discriminatory action by governments and of unfair restrictive practices by shipping concerns.

Headquarters: To be in London.

Other Agencies are: Int'l Civil Aviation Org., Universal Postal Union, Int'l Telecommunication Union and World Meteorological Org.

Judges of the International Court of Justice

(Judges serve for a 9-year term and may be re-elected. Expiration dates of terms are shown in parentheses. All terms expire February 5 of the year designated. The seat of the Court is The Hague, Netherlands.)

President: Helge Klaestad, Norway (1961)

Vice President: Mohammad Zafrulla Khan, Pakistan (1961)

E. C. Armand-Ugon, Uruguay (1961)
Abdel Hamid Badawi, United Arab Republic (1967)
Jules Basdevant, France (1964)
Roberto Córdova, Mexico (1964)
José Gustavo Guerrero, El Salvador (1964)
Green H. Hackworth, U. S. (1961)

F. I. Kojevnikov, U.S.S.R. (1961)
Hersch Lauterpacht, U. K. (1964)
L. M. Moreno Quintana, Argentina (1964)
Sir Percy Spender, Australia (1967)
Jean Spiropoulos, Greece (1967)
V. K. Wellington Koo, China (1967)
Bohdan Winiarski, Poland (1967)

Officers of the Secretariat

Ahmed Bokhari, Under-Secretary for Public Information
Ralph J. Bunche, Under-Secretary for Special Political Affairs
Andrew W. Cordier, Executive Assistant to the Secretary-General
Anatoly Dobrynin, Under-Secretary for the Department of Political and Security Council Affairs
Victor Hoo, Under-Secretary for Conference Services
Hugh L. Keenleyside, Director General, Technical Assistance Administration
John McDiarmid, Acting Director of Personnel

David Owen, Executive Chairman, Technical Assistance Board
Maurice Pate, Executive Director, United Nations Children's Fund
Dragoslav Protitch, Under-Secretary for the Department of Trusteeship and Information from Non-Self-Governing Territories
Philippe de Seynes, Under-Secretary for Economic and Social Affairs
Constantin Stavropoulos, Legal Counsel
Sir Humphrey Trevelyan, Under-Secretary for Special Political Affairs
Bruce Turner, Controller
David B. Vaughan, Director of General Services

United Nations Costs

U. N. budget appropriations for 1958 were approved at \$55,062,850. Member states contribute on a scale determined by

the General Assembly. In 1958, the U. S. paid 32.51% of the cost, the U.S.S.R. paid 13.62% and the U. K. paid 7.62%.

Security Council

Representatives (as of March 1958)

Canada: C. S. A. Ritchie.
 China: Tingfu F. Tsiang.
 Colombia: Alfonso Araujo.
 France: Guillaume Georges-Picot.
 Iraq: Hashim Jawad.
 Japan: Koto Matsudaira.
 Panama: Jorge Illueca.
 Sweden: Gunnar V. Jarring.
 U.S.S.R.: Arkady A. Sobolev.
 United Kingdom: Sir Pierson Dixon.
 United States: Henry Cabot Lodge, Jr.

Economic and Social Council

Representatives (26th session, July 1958)

Brazil: Augusto Frederico Schmidt.
 Canada: G. F. Davidson.
 Chile: Enrique Bernstein.
 China: Cheng Paonan.
 Costa Rica: Christian Tattenbach.
 Finland: Mrs. Tynne Leivo-Larsson.
 France: Pierre Abelin.
 Greece: Costa P. Caranicas.
 Indonesia: Ali Sastroamidjojo.

Mexico: Daniel Cosío Villegas.
 Netherlands: J. M. A. H. Luns.
 Pakistan: Amir Azam Khan.
 Poland: Jerzy Michalowski.
 Sudan: Bashir El Bakri.
 U.S.S.R.: Aleksey Vasilevich Zakharov.
 United Kingdom: W. D. Ormsby-Gore.
 United States: Christopher H. Phillips.
 Yugoslavia: Dobrivoje Vidic.

Trusteeship Council

Representatives (22nd session, June-August 1958)

Australia: E. Ronald Walker.
 Belgium: Alfred Claeys Bouuaert.
 Burma: Sithu U Thant.
 China: Chiping H. C. Kiang.
 France: Jacques Kosciuszko-Morizet.
 Guatemala: Emilio Arenales Catalan.
 Haiti: Edmond Sylvaln.
 India: Arthur S. Lall.
 Italy: Eugenio Pala.
 New Zealand: Sir Leslie Munro.
 U.S.S.R.: Ivan I. Lobanov.
 United Arab Republic: Omar Loutfi.
 United Kingdom: Sir Andrew Cohen.
 United States: Mason Sears.

Elected Member States Serving Terms on U. N. Councils

Security Council

an. 1946-Dec. 1946: Egypt; Mexico; Netherlands.
 an. 1946-Dec. 1947: Australia; Brazil; Poland.

U. S. Delegation to the 13th Session of the General Assembly Representatives

Henry Cabot Lodge	Herman Phleger
Michael J. Mansfield	George McGregor
Bourke B. Hickenlooper	Harrison

Alternate Representatives

James J. Wadsworth	Watson W. Wise
Mrs. Oswald B. Lord	Irving Solomon
Miss Marian Anderson	

The Secretary of State, John Foster Dulles, served as Chairman of the U. S. Delegation, *ex officio*, during his presence at the session.

Security Council Vetoes

As of September 1958, 92 vetoes had occurred in the Security Council since the inception of the U. N. The U.S.S.R. had

cast 85 of them, France 4, the United Kingdom 2 and China 1. The United States had cast no vetoes.

CHARTER OF THE UNITED NATIONS

WE the peoples of the United Nations determined to save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind, and

To reaffirm faith in fundamental human rights, in the dignity and worth of the human person, in the equal rights of men and women and of nations large and small, and

To establish conditions under which justice and respect for the obligations arising from treaties and other sources of international law can be maintained, and

To promote social progress and better standards of life in larger freedom, and for these ends

To practice tolerance and live together in peace with one another as good neighbors, and

To unite our strength to maintain international peace and security, and

To insure, by the acceptance of principles and the institution of methods, that armed force shall not be used, save in the common interest, and

To employ international machinery for the promotion of the economic and social advancement of all peoples, have resolved to combine our efforts to accomplish these aims.

Accordingly, our respective Governments, through representatives assembled in the city of San Francisco, who have exhibited their full powers found to be in good and due form, have agreed to the present Charter of the United Nations and do hereby establish an international organization to be known as the United Nations.

CHAPTER I

Purposes and Principles

Article 1

The purposes of the United Nations are:

1. To maintain international peace and security, and to that end: to take effective collective measures for the prevention and removal of threats to the peace, and for the suppression of acts of aggression or other breaches of the peace, and to bring about by peaceful means, and in conformity with the principles of justice and international law, adjustment or settlement of international disputes or situations which might lead to a breach of the peace;

2. To develop friendly relations among nations based on respect for the principle of equal rights and self-determination of peoples, and to take other appropriate measures to strengthen universal peace;

3. To achieve international cooperation in solving international problems of an economic, social, cultural, or humanitarian

character, and in promoting and encouraging respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language, or religion; and

4. To be a center for harmonizing the actions of nations in the attainment of these common ends.

Article 2

The Organization and its Members, in pursuit of the Purposes stated in Article 1, shall act in accordance with the following Principles:

1. The Organization is based on the principle of the sovereign equality of all its Members.

2. All Members, in order to ensure to all of them the rights and benefits resulting from membership, shall fulfill in good faith the obligations assumed by them in accordance with the present Charter.

3. All Members shall settle their international disputes by peaceful means in such a manner that international peace and security, and justice, are not endangered.

4. All Members shall refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any state, or in any other manner inconsistent with the Purposes of the United Nations.

5. All Members shall give the United Nations every assistance in any action it takes in accordance with the present Charter, and shall refrain from giving assistance to any state against which the United Nations is taking preventive or enforcement action.

6. The Organization shall ensure that states which are not Members of the United Nations act in accordance with these Principles so far as may be necessary for the maintenance of international peace and security.

7. Nothing contained in the present Charter shall authorize the United Nations to intervene in matters which are essentially within the domestic jurisdiction of any state or shall require the Members to submit such matters to settlement under the present Charter; but this principle shall not prejudice the application of enforcement measures under Chapter VII.

CHAPTER II

Membership

Article 3

The original Members of the United Nations shall be the states which, having participated in the United Nations Conference on International Organization at San Francisco, or having previously signed

the Declaration by United Nations of January 1, 1942, sign the present Charter and ratify it in accordance with Article 110.

Article 4

1. Membership in the United Nations is open to all other peace-loving states which accept the obligations contained in the present Charter and, in the judgment of the Organization, are able and willing to carry out these obligations.

2. The admission of any such state to membership in the United Nations will be effected by a decision of the General Assembly upon the recommendation of the Security Council.

Article 5

A Member of the United Nations against which preventive or enforcement action has been taken by the Security Council may be suspended from the exercise of the rights and privileges of membership by the General Assembly upon the recommendation of the Security Council. The exercise of these rights and privileges may be restored by the Security Council.

Article 6

A Member of the United Nations which has persistently violated the Principles contained in the present Charter may be expelled from the Organization by the General Assembly upon the recommendation of the Security Council.

CHAPTER III

Organs

Article 7

1. There are established as the principal organs of the United Nations; a General Assembly, a Security Council, an Economic and Social Council, a Trusteeship Council, an International Court of Justice, and a Secretariat.

2. Such subsidiary organs as may be found necessary may be established in accordance with the present Charter.

Article 8

The United Nations shall place no restrictions on the eligibility of men and women to participate in any capacity and under conditions of equality in its principal and subsidiary organs.

CHAPTER IV

The General Assembly Composition

Article 9

1. The General Assembly shall consist of all the members of the United Nations.

2. Each Member shall have not more than five representatives in the General Assembly.

Functions and Powers

Article 10

The General Assembly may discuss any questions or any matters within the scope of the present Charter or relating to the powers and functions of any organs provided for in the present Charter, and except as provided in Article 12, may make recommendations to the Members of the United Nations or to the Security Council or to both on any such questions or matters.

Article 11

1. The General Assembly may consider the general principles of cooperation in the maintenance of international peace and security, including the principles governing disarmament and the regulation of armaments, and may make recommendations with regard to such principles to the Members or to the Security Council or to both.

2. The General Assembly may discuss any questions relating to the maintenance of international peace and security brought before it by any Member of the United Nations, or by the Security Council, or by a state which is not a Member of the United Nations, in accordance with Article 35, paragraph 2, and, except as provided in Article 12, may make recommendations with regard to any such question to the state or states concerned or to the Security Council or to both. Any such question on which action is necessary shall be referred to the Security Council by the General Assembly either before or after discussion.

3. The General Assembly may call the attention of the Security Council to situations which are likely to endanger international peace and security.

4. The powers of the General Assembly set forth in this Article shall not limit the general scope of Article 10.

Article 12

1. While the Security Council is exercising in respect of any dispute or situation the functions assigned to it in the present Charter, the General Assembly shall not make any recommendations with regard to that dispute or situation unless the Security Council so requests.

2. The Secretary-General, with the consent of the Security Council, shall notify the General Assembly at each session of any matters relative to the maintenance of international peace and security which are being dealt with by the Security Council and shall similarly notify the General Assembly, or the Members of the United Na-

tions if the General Assembly is not in session, immediately the Security Council ceases to deal with such matters.

Article 13

1. The General Assembly shall initiate studies and make recommendations for the purpose of:

(a) promoting international cooperation in the political field and encouraging the progressive development of international law and its codification;

(b) promoting international cooperation in the economic, social, cultural, educational, and health fields, and assisting in the realization of human rights and fundamental freedoms for all without distinction as to race, sex, language, or religion.

2. The further responsibilities, functions and powers of the General Assembly with respect to matters mentioned in paragraph 1 (b) above are set forth in Chapters IX and X.

Article 14

Subject to the provisions of Article 12, the General Assembly may recommend measures for the peaceful adjustment of any situation, regardless of origin, which it deems likely to impair the general welfare or friendly relations among nations, including situations resulting from a violation of the provisions of the present Charter setting forth the Purposes and Principles of the United Nations.

Article 15

1. The General Assembly shall receive and consider annual and special reports from the Security Council; these reports shall include an account of the measures that the Security Council has decided upon or taken to maintain international peace and security.

2. The General Assembly shall receive and consider reports from the other organs of the United Nations.

Article 16

The General Assembly shall perform such functions with respect to the international trusteeship system as are assigned to it under Chapters XII and XIII, including the approval of the trusteeship agreements for areas not designated as strategic.

Article 17

1. The General Assembly shall consider and approve the budget of the Organization.

2. The expenses of the Organization shall be borne by the Members as apportioned by the General Assembly.

3. The General Assembly shall consider and approve any financial and budgetary arrangements with specialized agencies re-

ferred to in Article 57 and shall examine the administrative budgets of such specialized agencies with a view to making recommendations to the agencies concerned.

Voting

Article 18

1. Each member of the General Assembly shall have one vote.

2. Decisions of the General Assembly on important questions shall be made by a two-thirds majority of the members present and voting. These questions shall include: recommendations with respect to the maintenance of international peace and security, the election of the non-permanent members of the Security Council, the election of the members of the Economic and Social Council, the election of members of the Trusteeship Council in accordance with paragraph 1 (c) of Article 86, the admission of new Members to the United Nations, the suspension of the rights and privileges of membership, the expulsion of Members, questions relating to the operation of the trusteeship system, and budgetary questions.

3. Decisions on other questions, including the determination of additional categories of questions to be decided by a two-thirds majority, shall be made by a majority of the members present and voting.

Article 19

A Member of the United Nations which is in arrears in the payment of its financial contributions to the Organization shall have no vote in the General Assembly if the amount of its arrears equals or exceeds the amount of the contributions due from it for the preceding two full years. The General Assembly may, nevertheless, permit such a Member to vote if it is satisfied that the failure to pay is due to conditions beyond the control of the Member.

Procedure

Article 20

The General Assembly shall meet in regular annual sessions and in such special sessions as occasion may require. Special sessions shall be convoked by the Secretary-General at the request of the Security Council or of a majority of the Members of the United Nations.

Article 21

The General Assembly shall adopt its own rules of procedure. It shall elect its President for each session.

Article 22

The General Assembly may establish such subsidiary organs as it deems necessary for the performance of its functions.

CHAPTER V

The Security Council
Composition

Article 23

1. The Security Council shall consist of eleven Members of the United Nations. The Republic of China, France, the Union of Soviet Socialist Republics, the United Kingdom of Great Britain and Northern Ireland, and the United States of America shall be permanent members of the Security Council. The General Assembly shall elect six other Members of the United Nations to be non-permanent members of the Security Council, due regard being specially paid, in the first instance to the contribution of members of the United Nations to the maintenance of international peace and security and to the other purposes of the Organization, and also to equitable geographical distribution.

2. The non-permanent members of the Security Council shall be elected for a term of two years. In the first election of the non-permanent members, however, three shall be chosen for a term of one year. A retiring member shall not be eligible for immediate re-election.

3. Each member of the Security Council shall have one representative.

Functions and Powers

Article 24

1. In order to insure prompt and effective action by the United Nations, its Members confer on the Security Council primary responsibility for the maintenance of international peace and security, and agree that in carrying out its duties under this responsibility the Security Council acts on their behalf.

2. In discharging these duties the Security Council shall act in accordance with the Purposes and Principles of the United Nations. The specific powers granted to the Security Council for the discharge of these duties are laid down in Chapters VI, VII, VIII, and XII.

3. The Security Council shall submit annual and, when necessary, special reports to the General Assembly for its consideration.

Article 25

The Members of the United Nations agree to accept and carry out the decisions of the Security Council in accordance with the present Charter.

Article 26

In order to promote the establishment and maintenance of international peace and security with the least diversion for armaments of the world's human and eco-

nomic resources, the Security Council shall be responsible for formulating, with the assistance of the Military Staff Committee referred to in Article 47, plans to be submitted to the Members of the United Nations for the establishment of a system for the regulation of armaments.

Voting

Article 27

1. Each member of the Security Council shall have one vote.

2. Decisions of the Security Council on procedural matters shall be made by an affirmative vote of seven members.

3. Decisions of the Security Council on all other matters shall be made by an affirmative vote of seven members including the concurring votes of the permanent members; provided that, in decisions under Chapter VI, and under paragraph 3 of Article 52, a party to a dispute shall abstain from voting.

Procedure

Article 28

1. The Security Council shall be so organized as to be able to function continuously. Each member of the Security Council shall for this purpose be represented at all times at the seat of the Organization.

2. The Security Council shall hold periodic meetings at which each of its members may, if it so desires, be represented by a member of the government or by some other specially designated representative.

3. The Security Council may hold meetings at such places other than the seat of the Organization as in its judgment will best facilitate its work.

Article 29

The Security Council may establish such subsidiary organs as it deems necessary for the performance of its functions.

Article 30

The Security Council shall adopt its own rules of procedure, including the method of selecting its President.

Article 31

Any Member of the United Nations which is not a member of the Security Council may participate, without vote, in the discussion of any question brought before the Security Council whenever the latter considers that the interests of that Member are specially affected.

Article 32

Any Member of the United Nations which is not a member of the Security

Council or any state which is not a Member of the United Nations, if it is a party to a dispute under consideration by the Security Council, shall be invited to participate, without vote, in the discussion relating to the dispute. The Security Council shall lay down such conditions as it deems just for the participation of a state which is not a Member of the United Nations.

CHAPTER VI

Pacific Settlement of Disputes

Article 33

1. The parties to any dispute, the continuance of which is likely to endanger the maintenance of international peace and security, shall, first of all, seek a solution by negotiation, enquiry, mediation, conciliation, arbitration, judicial settlement, resort to regional agencies or arrangements, or other peaceful means of their own choice.

2. The Security Council shall, when it deems necessary, call upon the parties to settle their dispute by such means.

Article 34

The Security Council may investigate any dispute, or any situation which might lead to international friction or give rise to a dispute, in order to determine whether the continuance of the dispute or situation is likely to endanger the maintenance of international peace and security.

Article 35

1. Any Member of the United Nations may bring any dispute, or any situation of the nature referred to in Article 34 to the attention of the Security Council or of the General Assembly.

2. A state which is not a Member of the United Nations may bring to the attention of the Security Council or of the General Assembly any dispute to which it is a party if it accepts in advance, for the purposes of the dispute, the obligations of pacific settlement provided in the present Charter.

3. The proceedings of the General Assembly in respect of matters brought to its attention under this Article will be subject to the provisions of Articles 11 and 12.

Article 36

1. The Security Council may, at any stage of a dispute of the nature referred to in Article 33 or of a situation of like nature, recommend appropriate procedures or methods of adjustment.

2. The Security Council should take into consideration any procedures for the settlement of the dispute which have already been adopted by the parties.

3. In making recommendations under this Article the Security Council should also take into consideration that legal disputes should as a general rule be referred by the parties to the International Court of Justice in accordance with the provisions of the Statute of the Court.

Article 37

1. Should the parties to a dispute of the nature referred to in Article 33 fail to settle it by the means indicated in that Article, they shall refer it to the Security Council.

2. If the Security Council deems that the continuance of the dispute is in fact likely to endanger the maintenance of international peace and security, it shall decide whether to take action under Article 36 or to recommend such terms of settlement as it may consider appropriate.

Article 38

Without prejudice to the provisions of Articles 33 to 37, the Security Council may, if all the parties to any dispute so request, make recommendations to the parties with a view to a pacific settlement of the dispute.

CHAPTER VII

Action with Respect to Threats to the Peace, Breaches of the Peace, and Acts of Aggression

Article 39

The Security Council shall determine the existence of any threat to the peace, breach of the peace, or act of aggression and shall make recommendations, or decide what measures shall be taken in accordance with Articles 41 and 42, to maintain or restore international peace and security.

Article 40

In order to prevent an aggravation of the situation, the Security Council may, before making the recommendations or deciding upon the measures provided for in Article 39, call upon the parties concerned to comply with such provisional measures as it deems necessary or desirable. Such provisional measures shall be without prejudice to the rights, claims, or position of the parties concerned. The Security Council shall duly take account of failure to comply with such provisional measures.

Article 41

The Security Council may decide what measures not involving the use of armed force are to be employed to give effect.

to its decisions, and it may call upon the Members of the United Nations to apply such measures. These may include complete or partial interruption of economic relations and of rail, sea, air, postal, telegraphic, radio, and other means of communication, and the severance of diplomatic relations.

Article 42

Should the Security Council consider that measures provided for in Article 41 would be inadequate or have proved to be inadequate, it may take such action by air, sea, or land forces as may be necessary to maintain or restore international peace and security. Such action may include demonstrations, blockade, and other operations by air, sea, or land forces of Members of the United Nations.

Article 43

1. All Members of the United Nations, in order to contribute to the maintenance of international peace and security, undertake to make available to the Security Council, on its call and in accordance with a special agreement or agreements, armed forces, assistance, and facilities, including rights of passage, necessary for the purpose of maintaining international peace and security.

2. Such agreement or agreements shall govern the numbers and types of forces, their degree of readiness and general location, and the nature of the facilities and assistance to be provided.

3. The agreement or agreements shall be negotiated as soon as possible on the initiative of the Security Council. They shall be concluded between the Security Council and Members or between the Security Council and groups of Members and shall be subject to ratification by the signatory states in accordance with their respective constitutional processes.

Article 44

When the Security Council has decided to use force it shall, before calling upon a Member not represented on it to provide armed forces in fulfillment of the obligations assumed under Article 43, invite that Member, if the Member so desires, to participate in the decisions of the Security Council concerning the employment of contingents of that Member's armed forces.

Article 45

In order to enable the United Nations to take urgent military measures, Members shall hold immediately available national air-force contingents for combined international enforcement action. The strength and degree of readiness of these contingents and plans for their combined action shall be determined, within the limits laid

down in the special agreement or agreements referred to in Article 43, by the Security Council with the assistance of the Military Staff Committee.

Article 46

Plans for the application of armed force shall be made by the Security Council with the assistance of the Military Staff Committee.

Article 47

1. There shall be established a Military Staff Committee to advise and assist the Security Council on all questions relating to the Security Council's military requirements for the maintenance of international peace and security, the employment and command of forces placed at its disposal, the regulation of armaments, and possible disarmament.

2. The Military Staff Committee shall consist of the Chiefs of Staff of the permanent members of the Security Council or their representatives. Any Member of the United Nations not permanently represented on the Committee shall be invited by the Committee to be associated with it when the efficient discharge of the Committee's responsibilities requires the participation of that Member in its work.

3. The Military Staff Committee shall be responsible under the Security Council for the strategic direction of any armed forces placed at the disposal of the Security Council. Questions relating to the command of such forces shall be worked out subsequently.

4. The Military Staff Committee, with the authorization of the Security Council and after consultation with appropriate regional agencies, may establish regional subcommittees.

Article 48

1. The action required to carry out the decisions of the Security Council for the maintenance of international peace and security shall be taken by all the Members of the United Nations or by some of them, as the Security Council may determine.

2. Such decisions shall be carried out by the Members of the United Nations directly and through their action in the appropriate international agencies of which they are members.

Article 49

The Members of the United Nations shall join in affording mutual assistance in carrying out the measures decided upon by the Security Council.

Article 50

If preventive or enforcement measures against any state are taken by the Security Council, any other state, whether a

Member of the United Nations or not, which finds itself confronted with special economic problems arising from the carrying out of those measures shall have the right to consult the Security Council with regard to a solution of those problems.

Article 51

Nothing in the present Charter shall impair the inherent right of individual or collective self-defense if an armed attack occurs against a Member of the United Nations, until the Security Council has taken measures necessary to maintain international peace and security. Measures taken by Members in the exercise of this right of self-defense shall be immediately reported to the Security Council and shall not in any way affect the authority and responsibility of the Security Council under the present Charter to take at any time such action as it deems necessary in order to maintain or restore international peace and security.

CHAPTER VIII

Regional Arrangements

Article 52

1. Nothing in the present Charter precludes the existence of regional arrangements or agencies for dealing with such matters relating to the maintenance of international peace and security as are appropriate for regional action, provided that such arrangements or agencies and their activities are consistent with the Purposes and Principles of the United Nations.

2. The Members of the United Nations entering into such arrangements or constituting such agencies shall make every effort to achieve pacific settlement of local disputes through such regional arrangements or by such regional agencies before referring them to the Security Council.

3. The Security Council shall encourage the development of pacific settlement of local disputes through such regional arrangements or by such regional agencies either on the initiative of the states concerned or by reference from the Security Council.

4. This Article in no way impairs the application of Articles 34 and 35.

Article 53

1. The Security Council shall, where appropriate, utilize such regional arrangements or agencies for enforcement action under its authority. But no enforcement action shall be taken under regional arrangements or by regional agencies without the authorization of the Security Council, with the exception of measures against any enemy state, as defined in par-

agraph 2 of this Article, provided for pursuant to Article 107 or in regional arrangements directed against renewal of aggressive policy on the part of any such state, until such time as the Organization may, on request of the Governments concerned, be charged with the responsibility for preventing further aggression by such a state.

2. The term enemy state as used in paragraph 1 of this Article applies to any state which during the Second World War has been an enemy of any signatory of the present Charter.

Article 54

The Security Council shall at all times be kept fully informed of activities undertaken or in contemplation under regional arrangements or by regional agencies for the maintenance of international peace and security.

CHAPTER IX

International Economic and Social Cooperation

Article 55

With a view to the creation of conditions of stability and well-being which are necessary for peaceful and friendly relations among nations based on respect for the principle of equal rights and self-determination of peoples, the United Nations shall promote:

(a) higher standards of living, full employment, and conditions of economic and social progress and development;

(b) solutions of international economic, social, health, and related problems; and international cultural and educational co-operation; and

(c) universal respect for, and observance of, human rights and fundamental freedoms for all without distinction as to race, sex, language, or religion.

Article 56

All Members pledge themselves to take joint and separate action in cooperation with the Organization for the achievement of the purposes set forth in Article 55.

Article 57

1. The various specialized agencies, established by intergovernmental agreement and having wide international responsibilities, as defined in their basic instruments, in economic, social, cultural, educational, health, and related fields, shall be brought into relationship with the United Nations in accordance with the provisions of Article 63.

2. Such agencies thus brought into relationship with the United Nations are

hereinafter referred to as specialized agencies.

Article 58

The Organization shall make recommendations for the coordination of the policies and activities of the specialized agencies.

Article 59

The Organization shall, where appropriate, initiate negotiations among the states concerned for the creation of any new specialized agencies required for the accomplishment of the purposes set forth in Article 55.

Article 60

Responsibility for the discharge of the functions of the Organization set forth in this Chapter shall be vested in the General Assembly and, under the authority of the General Assembly, in the Economic and Social Council, which shall have for this purpose the powers set forth in Chapter X.

CHAPTER X

Economic and Social Council Composition

Article 61

1. The Economic and Social Council shall consist of eighteen Members of the United Nations elected by the General Assembly.

2. Subject to the provisions of paragraph 3, six members of the Economic and Social Council shall be elected each year for a term of three years. A retiring member shall be eligible for immediate reelection.

3. At the first election, eighteen members of the Economic and Social Council shall be chosen. The term of office of six members so chosen shall expire at the end of one year, and of six other members at the end of two years, in accordance with arrangements made by the General Assembly.

4. Each member of the Economic and Social Council shall have one representative.

Functions and Powers

Article 62

1. The Economic and Social Council may make or initiate studies and reports with respect to international economic, social, cultural, educational, health, and related matters and may make recommendations with respect to any such matters to the General Assembly, to the Members of the United Nations, and to the specialized agencies concerned.

2. It may make recommendations for the purpose of promoting respect for, and observance of, human rights and fundamental freedoms for all.

3. It may prepare draft conventions for submission to the General Assembly, with respect to matters falling within its competence.

4. It may call, in accordance with the rules prescribed by the United Nations, international conferences on matters falling within its competence.

Article 63

1. The Economic and Social Council may enter into agreements with any of the agencies referred to in Article 57, defining the terms on which the agency concerned shall be brought into relationship with the United Nations. Such agreements shall be subject to approval by the General Assembly.

2. It may coordinate the activities of the specialized agencies through consultation with and recommendations to such agencies and through recommendations to the General Assembly and to the Members of the United Nations.

Article 64

1. The Economic and Social Council may take appropriate steps to obtain regular reports from the specialized agencies. It may make arrangements with the Members of the United Nations and with the specialized agencies to obtain reports on the steps taken to give effect to its own recommendations and to recommendations on matters falling within its competence made by the General Assembly.

2. It may communicate its observations on these reports to the General Assembly.

Article 65

The Economic and Social Council may furnish information to the Security Council and shall assist the Security Council upon its request.

Article 66

1. The Economic and Social Council shall perform such functions as fall within its competence in connection with the carrying out of the recommendations of the General Assembly.

2. It may, with the approval of the General Assembly, perform services at the request of Members of the United Nations and at the request of specialized agencies.

3. It shall perform such other functions as are specified elsewhere in the present Charter or as may be assigned to it by the General Assembly.

Voting

Article 67

1. Each member of the Economic and Social Council shall have one vote.

2. Decisions of the Economic and Social Council shall be made by a majority of the members present and voting.

Procedure

Article 68

The Economic and Social Council shall set up commissions in economic and social fields and for the promotion of human rights, and such other commissions as may be required for the performance of its functions.

Article 69

The Economic and Social Council shall invite any Member of the United Nations to participate, without vote, in its deliberations on any matter of particular concern to that Member.

Article 70

The Economic and Social Council may make arrangements for representatives of the specialized agencies to participate, without vote, in its deliberations and in those of the commissions established by it, and for its representatives to participate in the deliberations of the specialized agencies.

Article 71

The Economic and Social Council may make suitable arrangements for consultation with non-governmental organizations which are concerned with matters within its competence. Such arrangements may be made with international organizations and, where appropriate, with national organizations after consultation with the Member of the United Nations concerned.

Article 72

1. The Economic and Social Council shall adopt its own rules of procedure, including the method of selecting its President.

2. The Economic and Social Council shall meet as required in accordance with its rules, which shall include provision for the convening of meetings on the request of a majority of its members.

CHAPTER XI

Declaration Regarding Non-Self-Governing Territories

Article 73

Members of the United Nations which have or assume responsibilities for the administration of territories whose peoples have not yet attained a full measure of self-government recognize the principle that the interests of the inhabitants of these territories are paramount, and ac-

cept as a sacred trust the obligation to promote to the utmost, within the system of international peace and security established by the present Charter, the well-being of the inhabitants of these territories, and, to this end:

(a) to ensure, with due respect for the culture of the peoples concerned, their political, economic, social, and educational advancement, their just treatment, and their protection against abuses;

(b) to develop self-government, to take due account of the political aspirations of the peoples, and to assist them in the progressive development of their free political institutions, according to the particular circumstances of each territory and its peoples and their varying stages of advancement;

(c) to further international peace and security;

(d) to promote constructive measures of development, to encourage research, and to cooperate with one another and, when and where appropriate, with specialized international bodies with a view to the practical achievement of the social, economic and scientific purposes set forth in this Article; and

(e) to transmit regularly to the Secretary-General for information purposes, subject to such limitation as security and constitutional considerations may require, statistical and other information of a technical nature relating to economic, social, and educational conditions in the territories for which they are respectively responsible other than those territories to which Chapters XII and XIII apply.

Article 74

Members of the United Nations also agree that their policy in respect of the territories to which this Chapter applies, no less than in respect of their metropolitan areas, must be based on the general principle of good-neighborliness, due account being taken of the interests and well-being of the rest of the world, in social, economic, and commercial matters.

CHAPTER XII

International Trusteeship System

Article 75

The United Nations shall establish under its authority an international trusteeship system for the administration and supervision of such territories as may be placed thereunder by subsequent individual agreements. These territories are hereinafter referred to as trust territories.

Article 76

The basic objectives of the trusteeship system, in accordance with the Purposes

of the United Nations laid down in Article 1 of the present Charter, shall be:

(a) to further international peace and security;

(b) to promote the political, economic, social, and educational advancement of the inhabitants of the trust territories, and their progressive development towards self-government or independence as may be appropriate to the particular circumstances of each territory and its peoples and the freely expressed wishes of the peoples concerned, and as may be provided by the terms of each trusteeship agreement;

(c) to encourage respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language, or religion, and to encourage recognition of the interdependence of the peoples of the world; and

(d) to ensure equal treatment in social, economic, and commercial matters for all Members of the United Nations and their nationals, and also equal treatment for the latter in the administration of justice, without prejudice to the attainment of the foregoing objectives and subject to the provisions of Article 80.

Article 77

1. The trusteeship system shall apply to such territories in the following categories as may be placed thereunder by means of trusteeship agreements:

(a) territories now held under mandate;

(b) territories which may be detached from enemy states as a result of the Second World War; and

(c) territories voluntarily placed under the system by states responsible for their administration.

2. It will be a matter for subsequent agreement as to which territories in the foregoing categories will be brought under the trusteeship system and upon what terms.

Article 78

The trusteeship system shall not apply to territories which have become Members of the United Nations, relationship among which shall be based on respect for the principle of sovereign equality.

Article 79

The terms of trusteeship for each territory to be placed under the trusteeship system, including any alteration or amendment, shall be agreed upon by the states directly concerned, including the mandatory power in the case of territories held under mandate by a Member of the United Nations, and shall be approved as provided for in Articles 83 and 85.

Article 80

1. Except as may be agreed upon in individual trusteeship agreements, made under Articles 77, 79, and 81, placing each territory under the trusteeship system, and until such agreements have been concluded, nothing in this Chapter shall be construed in or of itself to alter in any manner the rights whatsoever of any states or any peoples or the terms of existing international instruments to which Members of the United Nations may respectively be parties.

2. Paragraph 1 of this Article shall not be interpreted as giving grounds for delay or postponement of the negotiation and conclusion of agreements for placing mandated and other territories under the trusteeship system as provided for in Article 77.

Article 81

The trusteeship agreement shall in each case include the terms under which the trust territory will be administered and designate the authority which will exercise the administration of the trust territory. Such authority, hereinafter called the administering authority, may be one or more states or the Organization itself.

Article 82

There may be designated, in any trusteeship agreement, a strategic area or areas which may include part or all of the trust territory to which the agreement applies, without prejudice to any special agreement or agreements made under Article 43.

Article 83

1. All functions of the United Nations relating to strategic areas, including the approval of the terms of the trusteeship agreements and of their alteration or amendment, shall be exercised by the Security Council.

2. The basic objectives set forth in Article 76 shall be applicable to the people of each strategic area.

3. The Security Council shall, subject to the provisions of the trusteeship agreements and without prejudice to security considerations, avail itself of the assistance of the Trusteeship Council to perform those functions of the United Nations under the trusteeship system relating to political, economic, social, and educational matters in the strategic areas.

Article 84

It shall be the duty of the administering authority to ensure that the trust territory shall play its part in the maintenance of international peace and security. To this end the administering authority may make use of volunteer forces, facili-

ties, and assistance from the trust territory in carrying out the obligations towards the Security Council undertaken in this regard by the administering authority, as well as for local defense and the maintenance of law and order within the trust territory.

Article 85

1. The functions of the United Nations with regard to trusteeship agreements for all areas not designated as strategic, including the approval of the terms of the trusteeship agreements and of their alteration or amendment, shall be exercised by the General Assembly.

2. The Trusteeship Council, operating under the authority of the General Assembly, shall assist the General Assembly in carrying out these functions.

CHAPTER XIII

The Trusteeship Council Composition

Article 86

1. The Trusteeship Council shall consist of the following Members of the United Nations:

(a) those Members administering trust territories;

(b) such of those Members mentioned by name in Article 23 as are not administering trust territories; and

(c) as many other Members elected for three-year terms by the General Assembly as may be necessary to ensure that the total number of members of the Trusteeship Council is equally divided between those Members of the United Nations which administer trust territories and those which do not.

2. Each member of the Trusteeship Council shall designate one specially qualified person to represent it therein.

Functions and Powers

Article 87

The General Assembly and, under its authority, the Trusteeship Council, in carrying out their functions, may:

(a) consider reports submitted by the administering authority;

(b) accept petitions and examine them in consultation with the administering authority;

(c) provide for periodic visits to the respective trust territories at times agreed upon with the administering authority; and

(d) take these and other actions in conformity with the terms of the trusteeship agreements.

Article 88

The Trusteeship Council shall formulate a questionnaire on the political, economic, social, and educational advancement of the inhabitants of each trust territory, and the administering authority for each trust territory within the competence of the General Assembly shall make an annual report to the General Assembly upon the basis of such questionnaire.

Voting

Article 89

1. Each member of the Trusteeship Council shall have one vote.

2. Decisions of the Trusteeship Council shall be made by a majority of the members present and voting.

Procedure

Article 90

1. The Trusteeship Council shall adopt its own rules of procedure, including the method of selecting its President.

2. The Trusteeship Council shall meet as required in accordance with its rules, which shall include provision for the convening of meetings on the request of a majority of its members.

Article 91

The Trusteeship Council shall, when appropriate, avail itself of the assistance of the Economic and Social Council and of the specialized agencies in regard to matters with which they are respectively concerned.

CHAPTER XIV

The International Court of Justice

Article 92

The International Court of Justice shall be the principal judicial organ of the United Nations. It shall function in accordance with the annexed Statute, which is based upon the Statute of the Permanent Court of International Justice and forms an integral part of the present Charter.

Article 93

1. All Members of the United Nations are *ipso facto* parties to the Statute of the International Court of Justice.

2. A state which is not a Member of the United Nations may become a party to the Statute of the International Court of Justice on condition to be determined in each case by the General Assembly upon the recommendation of the Security Council.

Article 94

1. Each Member of the United Nations undertakes to comply with the decision of

the International Court of Justice in any case to which it is a party.

2. If any party to a case fails to perform the obligations incumbent upon it under a judgment rendered by the Court, the other party may have recourse to the Security Council, which may, if it deems necessary, make recommendations or decide upon measures to be taken to give effect to the judgment.

Article 95

Nothing in the present Charter shall prevent Members of the United Nations from entrusting the solution of their differences to other tribunals by virtue of agreements already in existence or which may be concluded in the future.

Article 96

1. The General Assembly or the Security Council may request the International Court of Justice to give an advisory opinion on any legal question.

2. Other organs of the United Nations and specialized agencies, which may at any time be so authorized by the General Assembly, may also request advisory opinions of the Court on legal questions arising within the scope of their activities.

CHAPTER XV

The Secretariat

Article 97

The Secretariat shall comprise a Secretary-General and such staff as the Organization may require. The Secretary-General shall be appointed by the General Assembly upon the recommendation of the Security Council. He shall be the chief administrative officer of the Organization.

Article 98

The Secretary-General shall act in that capacity in all meetings of the General Assembly, of the Security Council, of the Economic and Social Council, and of the Trusteeship Council, and shall perform such other functions as are entrusted to him by these organs. The Secretary-General shall make an annual report to the General Assembly on the work of the Organization.

Article 99

The Secretary-General may bring to the attention of the Security Council any matter which in his opinion may threaten the maintenance of international peace and security.

Article 100

1. In the performance of their duties the Secretary-General and the staff shall not seek or receive instructions from any government or from any other authority external to the Organization. They shall

refrain from any action which might reflect on their position as international officials responsible only to the Organization.

2. Each Member of the United Nations undertakes to respect the exclusively international character of the responsibilities of the Secretary-General and the staff and not to seek to influence them in the discharge of their responsibilities.

Article 101

1. The staff shall be appointed by the Secretary-General under regulations established by the General Assembly.

2. Appropriate staffs shall be permanently assigned to the Economic and Social Council, the Trusteeship Council, and, as required, to other organs of the United Nations. These staffs shall form a part of the Secretariat.

3. The paramount consideration in the employment of the staff and in the determination of the conditions of service shall be the necessity of securing the highest standards of efficiency, competence, and integrity. Due regard shall be paid to the importance of recruiting the staff on as wide a geographical basis as possible.

CHAPTER XVI

Miscellaneous Provisions

Article 102

1. Every treaty and every international agreement entered into by any Member of the United Nations after the present Charter comes into force shall as soon as possible be registered with the Secretariat and published by it.

2. No party to any such treaty or international agreement which has not been registered in accordance with the provisions of paragraph 1 of this Article may invoke that treaty or agreement before any organ of the United Nations.

Article 103

In the event of a conflict between the obligations of the Members of the United Nations under the present Charter and their obligations under any other international agreement, their obligations under the present Charter shall prevail.

Article 104

The Organization shall enjoy in the territory of each of its Members such legal capacity as may be necessary for the exercise of its functions and the fulfillment of its purposes.

Article 105

1. The Organization shall enjoy in the territory of each of its Members such privileges and immunities as are necessary for the fulfillment of its purposes.

2. Representatives of the Members of the United Nations and officials of the Organization shall similarly enjoy such privileges and immunities as are necessary for the independent exercise of their functions in connection with the Organization.

3. The General Assembly may make recommendations with a view to determining the details of the application of paragraphs 1 and 2 of this Article or may propose conventions to the Members of the United Nations for this purpose.

CHAPTER XVII

Transitional Security Arrangements

Article 106

Pending the coming into force of such special agreements referred to in Article 43 as in the opinion of the Security Council enable it to begin the exercise of its responsibilities under Article 42, the parties to the Four-Nation Declaration, signed at Moscow, October 30, 1943, and France, shall, in accordance with the provisions of paragraph 5 of that Declaration, consult with one another and, as occasion requires with other Members of the United Nations with a view to such joint action on behalf of the Organization as may be necessary for the purpose of maintaining international peace and security.

Article 107

Nothing in the present Charter shall invalidate or preclude action, in relation to any state which during the Second World War has been an enemy of any signatory to the present Charter, taken or authorized as a result of that war by the Governments having responsibility for such action.

CHAPTER XVIII

Amendments

Article 108

Amendments to the present Charter shall come into force for all Members of the United Nations when they have been adopted by a vote of two-thirds of the members of the General Assembly and ratified in accordance with their respective constitutional processes by two-thirds of the Members of the United Nations, including all the permanent members of the Security Council.

Article 109

1. A General Conference of the Members of the United Nations for the purpose of reviewing the present Charter may be held at a date and place to be fixed by a two-thirds vote of the members of the General Assembly and by a vote of any seven members of the Security Council. Each Member of the United Nations shall have one vote in the conference.

2. Any alteration of the present Charter recommended by a two-thirds vote of the conference shall take effect when ratified in accordance with their respective constitutional processes by two-thirds of the Members of the United Nations including all the permanent members of the Security Council.

3. If such a conference has not been held before the tenth annual session of the General Assembly following the coming into force of the present Charter, the proposal to call such a conference shall be placed on the agenda of that session of the General Assembly, and the conference shall be held if so decided by a majority vote of the members of the General Assembly and by a vote of any seven members of the Security Council.

CHAPTER XIX

Ratification and Signature

Article 110

1. The present Charter shall be ratified by the signatory states in accordance with their respective constitutional processes.

2. The ratifications shall be deposited with the Government of the United States of America, which shall notify all the signatory states of each deposit as well as the Secretary-General of the Organization when he has been appointed.

3. The present Charter shall come into force upon the deposit of ratifications by the Republic of China, France, the Union of Soviet Socialist Republics, the United Kingdom of Great Britain and Northern Ireland, and the United States of America, and by a majority of the other signatory states. A protocol of the ratifications deposited shall thereupon be drawn up by the Government of the United States of America which shall communicate copies thereof to all the signatory states.

4. The states signatory to the present Charter which ratify it after it has come into force will become original Members of the United Nations on the date of the deposit of their respective ratifications.

Article 111

The present Charter, of which the Chinese, French, Russian, English, and Spanish texts are equally authentic, shall remain deposited in the archives of the Government of the United States of America. Duly certified copies thereof shall be transmitted by that Government to the Governments of the other signatory states.

IN FAITH WHEREOF the representatives of the Governments of the United Nations have signed the present Charter.

DONE at the city of San Francisco the twenty-sixth day of June, one thousand nine hundred and forty-five.

RELIGION

Principal Religions of the World

Sources: *Encyclopaedia Britannica*, and various religious organizations.

Statistics of the world's religions are only very rough approximations. Aside from Christianity, few religions, if any, attempt to keep statistical records; and even Protestants and Catholics employ different methods of counting members. All persons of whatever age who have received baptism in the Catholic Church are counted as members, while in most Protestant Churches only those who "join" the church are numbered. The compiling of statistics is further complicated by the fact that in China one may be at the same time a Confucian, a Taoist and a Buddhist. In Japan, one may be both a Buddhist and a Shintoist.

Baptist

American Baptist Association.—A group of Independent Missionary Baptist Churches organized into an association in 1905. Members (1957): 630,000.

American Baptist Convention.—The early historical local independency of Baptist churches in America tended to impede the formation of any general organization until in 1814 a General Missionary Convention was formed to permit Baptists to express themselves in terms of missionary activities. In 1845, the state conventions in the South withdrew to organize the Southern Baptist Convention. In 1907, the Northern Baptist Convention was organized, a delegated body under whose direction the many agencies of the Baptists in the North and West now operate. In May, 1950, the name was changed to the American Baptist Convention. Members (1957): 1,536,276.

Baptist General Conference of America.—Formerly known as the Swedish Baptist General Conference of America. It has operated as a general conference since 1879. Members (1957): 61,724.

Conservative Baptist Association of America.—Organized in 1947, it is a body

with no authority over the local churches. Adherents consider the Bible infallible. Members (1957): 275,000.

Free Will Baptists.—A body of Arminian Baptists, organized in 1787 by Benjamin Randall in New Hampshire. Members (1957): 172,683.

The General Association of Regular Baptist Churches.—Founded in 1932 in Chicago by a group of churches which had withdrawn from the Northern Baptist Convention. Members (1957): 122,038.

General Baptists.—An Arminian group of Baptists, organized in 1607 and transplanted to the Colonies in 1714. It died down in the East but was revived in the Midwest in 1823 under Rev. Benoni Stinson. Members (1957): 56,862.

National Baptist Convention, U. S. A., Inc.—The older and parent convention of Negro Baptists. This body is to be distinguished from the National Baptist Convention of America, usually referred to as the "unincorporated" body. Members (1954): 4,557,416.

National Baptist Convention of America.—This is a body usually referred to as the "unincorporated" convention, not to be confused with the "incorporated" National

Baptist Convention, U. S. A., Inc., from which this body withdrew. Organized in 1895. Members (1956): 2,668,799.

National Baptist Evangelical Life and Soul Saving Assembly of U. S. A.—Organized in 1921 by A. A. Banks, Sr., as a charitable, educational, and evangelical organization. Members (1951): 57,674.

National Primitive Baptist Convention of the U. S. A.—A group of Negro Baptists opposed to all forms of church organization. Members (1952): 80,983.

North American Baptist Association.—Organized 1950 in Little Rock, Ark., as the result of a division in the American Baptist Association. In theology these churches are militantly fundamentalist. Members (1956): 261,202.

Primitive Baptists.—A large group of Baptists, largely through the South, who are opposed to all centralization, to modern missionary societies, and to Sunday schools. They are sometimes called "anti-missionary" Baptists. Members (1950): 72,000.

Southern Baptist Convention.—In 1845, Southern Baptists withdrew from the General Missionary Convention over the question of slavery and other matters and formed the Southern Baptist Convention. Members (1957): 8,956,756.

United Baptists.—This group dates from meetings of Regular Baptists and Separate Baptists held in Richmond, Va., in 1787, and a meeting under the name United Baptists in Clark County, Ky., in 1801. Members (1955): 63,641.

The United Free Will Baptist Church.—A body which set up its organization in 1901. Though ecclesiastically distinct, they are in close relations with the Free Will Baptists. Members (1952): 100,000.

Catholic and Orthodox

Armenian Church of North America.—The American branch of the Ancient Church of Armenia. Established in the U. S. in 1889. Diocesan organization under the jurisdiction of the Holy See of Etchmiadzin, Armenia, U.S.S.R. Members (1957): 101,199.

The American Carpatho-Russian Orthodox Greek Catholic Church.—This church is a self-governing diocese in communion with the Ecumenical Patriarchate of Constantinople. On Sept. 19, 1938, the late Patriarch Benjamin I canonized the diocese in the name of the Orthodox Church of Christ. Members (1957): 100,000.

Greek Archdiocese of North and South America.—Greek-speaking Orthodox Christians have had parishes in the U. S. for the last seventy years. These were first under the jurisdiction of the Metropolitan of Athens and later under the Patriarchate of Constantinople. Political changes in Europe have been reflected in this country

and have brought difficulties in all branches of the Orthodox Church. In 1931, a general convention held in New York City under the presidency of Archbishop Athenagoras brought a large measure of unity and order. Members (1957): 1,150,000.

North American Old Roman Catholic Church.—This body is identical with the Roman Catholic Church in worship, faith, etc., but differs in discipline. It was received into union with the Eastern Orthodox Church by the Archbishop of Beirut in 1911 and by the Orthodox Patriarch of Alexandria in 1912. Members (1957): 83,435.

Polish National Catholic Church of America.—After long dissatisfaction with Roman Catholic Administration in many Polish parishes, this group was organized in 1904. Members (1957): 267,418.

The Roman Catholic Church.—The largest single group of Christians in the U. S., the Roman Catholic Church is under the spiritual leadership of Pope Pius XII. This group dates back to the priests who accompanied Columbus on his second voyage to the New World. A settlement, later discontinued, was made at St. Augustine, Fla. The continuous history of this Church in the colonies began at St. Mary's in 1634, in Maryland. Members (1957): 35,846,477.

Romanian Orthodox Episcopate of America.—This body of Eastern Orthodox Christians of Rumanian descent is under the spiritual supervision and canonical jurisdiction of the Bishop of the Romanian Orthodox Church of North and South America. Members (1957): 50,000.

The Russian Orthodox Church Outside Russia.—Organized in 1920 to unite the missions and parishes of the Russian Orthodox Church outside of Russia. Members (1955): 55,000.

The Russian Orthodox Greek Catholic Church of America.—The Russian Orthodox Catholic Church entered Alaska in 1792. In 1872, its headquarters were moved from Sitka to San Francisco and, in 1905, to New York. It administers churches in the U. S., Canada, Alaska, Aleutian Is., South America and Japan. Members (1957): 755,000.

NOTE: Compiled from figures furnished by 255 of the 267 religious bodies in the U. S.

Serbian Eastern Orthodox Church.—This body of the Eastern Orthodox Church has its own diocese and is under jurisdiction of the Serbian Patriarchate (Yugoslavia). Members (1957): 150,000.

Syrian Antiochian Orthodox Church.—This body is a division of the Orthodox Church which is under the jurisdiction of the Patriarch of Antioch. It is a member of the Federation of Orthodox Greek Catholic Churches in America. Members (1957): 110,000.

Ukrainian Orthodox Church of U.S.A.—This church was organized in the U. S. in 1919. Members (1957): 83,000.

Lutheran

American Lutheran Church.—This Church is a constituent body of the American Lutheran Conference. It is itself the result of the merger in 1930 of the Evangelical Lutheran Joint Synod of Ohio and Other States (org. 1918), the Evangelical Lutheran Synod of Iowa and Other States, (org. 1854), and the Lutheran Synod of Buffalo (org. 1845). Members (1956): 910,011.

Augustana Evangelical Lutheran Church.—This group, whose constituency originally was of Swedish extraction, is a member of the American Lutheran Conference and is also a participating body in the National Lutheran Council. Organized in 1860. Members (1957): 576,189.

Evangelical Lutheran Church.—In 1917 the United Norwegian Church, the Norwegian Synod and the Hauge Synod united under the name, Norwegian Lutheran Church of America. In 1930 this group became a constituent part of the American Lutheran Conference. The new name, The Evangelical Lutheran Church, was adopted at its General Convention in 1946. Members (1957): 1,058,722.

The Evangelical Lutheran Joint Synod of Wisconsin and Other States.—This group, a constituent part of the Synodical Conference, was organized in Wisconsin in 1850. Members (1956): 339,106.

Lutheran Church-Missouri Synod.—This group, the largest constituent part of the Synodical Conference, was organized in 1847, holds to an unwavering confessionalism and is the leader in the conservative group among the Lutherans. Members (1957): 2,150,230.

Lutheran Free Church.—This body was organized in 1897 as the result of differences of opinion in the United Norwegian Church over control of the Augsburg Seminary. It became a constituent part of the American Lutheran Conference in 1930. Members (1957): 74,219.

United Evangelical Lutheran Church.—This synod was organized in 1896 in Minneapolis by a merger of the two former

Danish Lutheran Synods in America—the Danish Ev. Luth. Church Conference (1884) and the Danish Ev. Luth. Church in North America (1893). Members (1957): 61,662.

United Lutheran Church in America.—This group dates back to the Ministerium of Pennsylvania, organized in 1748, and beyond that to early colonial days. It represents the union of the General Synod, General Council, and United Synod of the South in 1918. Members (1957): 2,235,455.

Methodist

African Methodist Episcopal Church.—This group was formed in Philadelphia in 1816 and extended throughout the South after the Civil War. Members (1951): 1,166,301.

African Methodist Episcopal Zion Church.—This group was organized in 1796, coming out of the John Street Methodist Church, New York. Members (1956): 761,000.

Christian Methodist Episcopal Church.—In 1870, the General Conference of the M.E. Church, South, approved the request of its colored membership for the formation of their conferences into a separate body. Members (1951): 392,167.

Free Methodist Church of North America.—This body, organized in 1860, grew out of a movement in the Genesee Conference of the Methodist Episcopal Church towards a more original Methodism. Members (1957): 54,673.

The Methodist Church.—In April, 1939 the Uniting Conference forming The Methodist Church was held by representatives of the Methodist Episcopal Church, the Methodist Episcopal Church, South, and the Methodist Protestant Church. The Methodist Church in the United States originated with the efforts of John and Charles Wesley, leaders of the revival movement in England in the eighteenth century. Methodist emigrants from Ireland planted Methodism in America about 1760. In 1771 Francis Asbury, one of Wesley's preachers, later a Bishop, landed in Philadelphia. The Methodist Episcopal Church was organized in 1784-85. The Methodist Episcopal Church, South, dated from 1846 the separation from the Methodist Episcopal Church having taken place over the slavery issue. The Methodist Protestant Church dated from 1830, and was organized over the issue of lay representation. Members (1957): 9,543,245.

Presbyterian

Cumberland Presbyterian Church.—In 1806, a presbytery (Cumberland) of the Presbyterian Church was dissolved by the Synod of Kentucky on account of its attitude toward revivalism. Members of the presbytery organized as an independent

body in 1810 and became the Cumberland Presbyterian Church. When this body attempted to reunite with the Presbyterian Church in 1906, a minority preferred to continue as an independent church. Members (1957): 86,340.

Presbyterian Church in the U. S.—This group is the branch of the Presbyterian Church which separated from the main body at the time of the Civil War. It is often called the "Southern" Presbyterian Church. Members (1957): 848,735.

Presbyterian Church in the United States of America.—This group appeared among the earliest colonists of America. Its first church was established about 1640. Members (1957): 2,775,464.

United Presbyterian Church of North America.—This group dates back to the Reformed Presbyterian (Covenanter) Church (1643) and the Associate Presbyterian (Seceder) Church (1733), both of Scotland. These two groups appeared in America in 1774 and 1753 respectively. They united and became the Associate Reformed Presbyterian Church in 1782. A minority, however, continued as the Associate Presbyterian Church. In 1858 the two groups united and became the United Presbyterian Church. Members (1957): 257,513.

Other Religious Bodies

Apostolic Overcoming Holy Church of God.—A Negro body incorporated in Alabama in 1919. Members (1956): 75,000.

Assemblies of God.—Independent, pentecostal, evangelical, missionary churches associated for co-operative effort in district and general councils. Organized in Arkansas in 1914. Members (1957): 482,352.

Buddhist Churches of America.—Organized in 1914 as the Buddhist Mission of North America, this group was incorporated in 1942 under the present name and represents Buddhism in this country, the faith based on "the anatman doctrine, supplemented by the idea of karma, and nirvana, the holy ease or a blissful mental state of absolute freedom from evil." Members (1957): 10,000.

The Christian and Missionary Alliance.—An evangelical, evangelistic and missionary movement organized in 1887. It stresses "the deeper Christian life and consecration to the Lord's service." Members (1957): 87,663.

Christian Churches (Disciples of Christ).—In the revival period of the early nineteenth century, a movement under Thomas Campbell and his son, Alexander, resulted in the establishment of a fellowship called Christians or Disciples. They believe that acts are unscriptural. Members (1956): 922,484.

Christian Reformed Church.—A group of Dutch Calvinists which dissented from the

Reformed Church in America in 1857 and which was strengthened by later accessions from the same source and by immigration. Members (1957): 221,969.

Church of Christ, Scientist.—Founded by Mary Baker Eddy in 1879. As defined by Mrs. Eddy, Christian Science is the scientific system of divine healing and the reinstatement of primitive Christianity.*

The Church of God.—Inaugurated by Bishop A. J. Tomlinson, who served as General Overseer 1903-43. Episcopal in administration. Members (1957): 71,777.

Church of God (Anderson, Ind.).—This group is one of the largest of the groups which have taken the name "Church of God." Its headquarters are at Anderson, Ind. It originated about 1880. Members (1957): 131,420.

Church of God (Cleveland, Tenn.).—This body, to be differentiated from the Church of God at Anderson, Ind., is a holiness group and pentecostal. It began in 1886 in Tennessee, under the name of Christian Union, reorganized in 1902 as the Holiness Church. In 1907 it adopted the name above. Members (1957): 150,227.

Church of God in Christ.—Organized in Arkansas in 1895, by C. P. Jones and C. H. Mason, who believed there was no salvation without holiness; incorporated 1897. Members (1957): 360,428.

Church of the Brethren (Conservative Dunkers).—German pietists from Crefeld, Germany, under the leadership of Peter Becker, entered the colonies in 1719, and settled at Germantown, Philadelphia, Pa. They were called Dunkers (baptizers) and were immersionists. The members are conservative as to attire, oaths or affirmations, resistance to force, temperance, and the like. Members (1957): 199,936.

Church of the Nazarene.—One of the larger holiness bodies, organized in Pilot Point, Tex., Oct. 1908. It is in general accord with the early doctrines of Methodism and emphasizes entire sanctification. Members (1957): 281,646.

Churches of Christ.—This body is made up of a large group of churches, formerly reported with the Disciples of Christ, but since the religious census of 1906, reported separately. They are strictly congregational and have no organization larger than the local congregation. Members (1957): 1,750,000.

Congregational Christian Churches.—Congregational churches date back to the Pilgrim Fathers and the early colonists of New England in 1620. The Christian churches date back to the Wesleyan and revival movements at the end of the eighteenth century. These two groups of churches were merged at Seattle, Wash., in 1931. Members (1957): 1,392,632.

*Membership figure not available. The manual of the church forbids "the numbering of people and the reporting of such statistics for publication."

Evangelical and Reformed Church.—This body was formed on June 26, 1934, at Cleveland, Ohio, by a union of the Evangelical Synod of North America and the Reformed Church in the United States. The union was unique in that it left all details to be adjusted afterwards. The constitution was declared in effect at the General Synod which met at Lancaster, Pa., in June 1940. Members (1957): 800,042.

Evangelical Covenant Church of America. A transplantation to the U. S., in 1885, of a free-church movement in the Swedish state church. Until recently the name has been the Swedish Evangelical Mission Covenant. Members (1957): 56,321.

The Evangelical United Brethren Church.—This group had its origin in Johnstown, Pa., November 16, 1946, in the consummation of organic union between the Evangelical Church and the Church of the United Brethren in Christ. Both these former communions had their beginning in Pennsylvania in the evangelistic movement of the early 19th century. Jacob Albright was the founder of the Evangelical Church, and Dr. Philip William Otterbein was the founder of the United Brethren Church in 1800. Members (1957): 746,460.

Friends, The Five Years Meeting of.—The Five Years Meeting of Friends was formed in 1902 by 13 Yearly Meetings entering into a loose confederation. Since then, two of the original Yearly Meetings have withdrawn (Kansas and Oregon) and three Yearly Meetings outside the U. S. have joined. Members (1957): 67,957.

International Church of the Foursquare Gospel.—An evangelistic missionary body organized by Aimee Semple McPherson in 1927. The parent church is Angelus Temple in Los Angeles. Members (1957): 112,706.

Jehovah's Witnesses.—A group calling themselves primitive Christians. They believe that the Kingdom under Christ will replace all earthly governments. Members (1957): 208,260.

Jewish Congregations.—Jews arrived in the colonies before 1650. The first congregation is recorded in 1656, in New York City, the Shearith Israel (Remnant of Israel). Members (1954): 5,255,600.

Latter-day Saints, Church of Jesus Christ of.—A group in which the Bible, the Book of Mormon, the Doctrine and Covenants and the Pearl of Great Price are regarded as the word of God. The primitive church organization is sought. Members (1957): 1,339,638.

Latter-day Saints, Reorganized Church of Jesus Christ of.—A division among the Latter-day Saints (Mormons) occurred on the death of Joseph Smith in 1844. His son, Joseph Smith, became presiding officer of this group, which has headquarters at Independence, Mo. Members (1957): 146,076.

Mennonite Church.—The largest group of the Mennonites who began arriving in the U. S. in 1683, settling in Germantown, Pa. They derive their name from Menno Simons, born 1496. Members (1957): 71,186.

Moravian Church (Unitas Fratrum).—In 1735, Moravian missionaries of the pre-Reformation faith of John Huss came to Georgia and, in 1740, to Pennsylvania. They established the Moravian Church. Members (1957): 55,086.

Pentecostal Assemblies of the World, Inc.—A pentecostal holiness group originating in the early part of the century and found largely in the Midwest. Members (1957): 50,000.

Pentecostal Church of God of America, Inc.—Organized in 1919 at Chicago, Ill. Members (1957): 105,000.

The Protestant Episcopal Church.—This group entered the colonies with the earliest settlers as the Church of England. It became autonomous, adopted its present name in 1789. Members (1957): 2,965,137.

Reformed Church in America.—This group was established by the earliest Dutch settlers of New York as the Reformed Protestant Dutch Church in 1628. Members (1957): 213,544.

The Salvation Army.—An evangelistic organization, with a military government first set up by General William Booth in England and introduced into the U. S. in 1880. Members (1957): 250,156.

Seventh-day Adventists.—This body developed out of the Adventist movement (1833-1844), which emphasized the imminent personal return of Jesus Christ. It emphasized the observance of the seventh-day Sabbath and in 1863 was numerous enough to organize a conference. Members (1957): 291,567.

Spiritualists, International General Assembly of.—Organized in Buffalo, N. Y., in 1936. Members (1956): 164,072.

Unitarian Churches.—The Unitarian movement in Congregationalism, beginning in the eighteenth century, produced the American Unitarian Association in 1825. In 1865 a national conference was organized. Members (1957): 104,914.

United Church of Christ.—A merger in 1957 of the *Evangelical and Reformed Church* and the *Congregational Christian Churches*. Pending the adoption of a constitution for the United Church of Christ the present structures and procedures of the two groups will continue in effect.

United Pentecostal Church, Inc.—Pentecostal Church, Inc., and Pentecostal Assemblies of Jesus Christ merged in 1945 at St. Louis. Members (1957): 135,000.

Universalist Church of America.—The philosophy of Universalism originated in the 1st century A.D. and was carried to America in the 18th century. Members (1956): 70,516.

 Gabriel Sundaram; Lucknow, India.
 Prince Albert Taylor; Monrovia, Liberia.
 Donald H. Tippet; San Francisco, Calif.
 José Valencia; Manila, Philippines.
 Edwin E. Voigt; Aberdeen, S. Dak.
 Ralph A. Ward; Hong Kong.
 William T. Watkins; Louisville, Ky.
 H. Bascom Watts; Lincoln, Nebr.
 Hazen G. Werner; Columbus, Ohio.
 Lloyd C. Wicke; Pittsburgh, Pa.
 Friedrich Wunderlich; Frankfurt, Germany.

Roman Catholic Hierarchy of the U. S.

Source: National Catholic Welfare Conference, Washington, D. C.

(Note: A—Auxiliary; C—Coadjutor. Archbishops are shown in boldface type, Bishops in lightface. An Archbishop heading a diocese is called an "Archbishop ad Personam"; i.e., he bears the personal title of Archbishop. The Apostolic Delegate to the U. S. is Archbishop Amleto Giovanni Cicognani.)

1953	Alfredo Ottaviani	Pro-Secretary of the Supreme Congregation of the Holy Office	Italian

Antipopes

Antipopes were those who falsely claimed Papal Sovereignty. The dates and, in some cases, Roman numerals after the names account for occasional discrepancies in the succession of the Popes.

Name	Birthplace	Access.	End of reign	Name	Birthplace	Access.	End of reign
St. Hippolytus	Rome	217	235	Clement III	Parma	1080	1100
Novatian	Rome	251	...	Theodoric	1100
Felix II	Rome	355	365	Albert	1102
Ursinus	366	367	Sylvester IV	Rome	1105	1117
Eulalius	418	419	Gregory VIII	France	1118	1121
Lawrence	498	501	Celestine II	Rome	1124
Dioscorus	Alexandria	530	530	Anacletus II	Rome	1130	1138
Theodore	687	Victor IV	1138	1139
Paschal	687	Victor IV*	Montecelio	1159	1164
Constantine	Nepi	767	769	Paschal III	1164	1168
Philip	768	768	Callistus III	Arezzo	1168	1178
John	844	Innocent III	Sezze	1179	1181
Anastasius	855	855	Nicholas V	Corvaro	1328	1330
Christopher	Rome	903	904	Clement VII	1378	1394
Boniface VII	Rome	974	974	Benedict XIII	Aragon	1394	1422
Boniface VII (2nd time)	984	985	Alexander V	Crete	1409	1410
John XVI	Rossano	997	998	John XXIII	Naples	1410	1415
Gregory	1012	Felix V	1439	1449
Benedict X	Rome	1058	1059	* Did not recognize his predecessor of 1138, who, only two months after claiming the Papacy, submitted to the rightful Pope, Innocent II.			
Honorius II	Verona	1061	1072				

Roman Catholic Pontiffs

Source for Catholic information: The National Catholic Almanac.

St. Peter, of Bethsaida in Galilee, Prince of the Apostles, was the first Pope. He resided first in Antioch and then for twenty-five years in Rome, where he suffered martyrdom in 64 or 67 of the modern era. He was followed by St. Linus.

Name	Birthplace	Access.	End of reign	Name	Birthplace	Access.	End of reign

* If the triple removal of Benedict IX was not valid, Sylvester III, Gregory VI and Clement II were antipopes.
 NOTE: This list of Popes, adapted from the *Annuario Pontificio*, is in accordance with the recent revisions made by Monsignor Mercati, Prefect of the Vatican's archives. All Popes before Sylvester I are listed as martyrs; other martyrs were: St. John I, St. Silverius and St. Martin I. The accession year is that during which the Pope was elected.

Religious and Secular Holidays, 1959

(Legal holidays falling on Sunday are observed on Monday)

NEW YEAR'S DAY—Thursday, Jan. 1—A legal holiday in all states and the District of Columbia, New Year's Day has its origin in Roman times, when sacrifices were offered to Janus, the two-faced Roman deity who looked back on the past and forward to the future.

EPIPHANY—Tuesday, Jan. 6—Falls the twelfth day after Christmas and commemorates the manifestation of Jesus as the Son of God, as represented by the adoration of the Magi, the baptism of Jesus, and the miracle of the wine at the marriage feast at Cana. Epiphany originally marked the beginning of the carnival season preceding Lent, and the evening (sometimes the eve) is known as Twelfth Night.

SHROVE TUESDAY—Feb. 10—Falls the day before Ash Wednesday and marks the end of the carnival season, which once began on Epiphany but is now usually celebrated the last three days before Lent. In France, the day is known as Mardi Gras (Fat Tuesday), and Mardi Gras celebrations are also held in several American cities, particularly in New Orleans. The day is sometimes called Pancake Tuesday by the English because of the need of using up fats which were prohibited during Lent.

ASH WEDNESDAY—Feb. 11—The first day of the Lenten season, which lasts forty days. Having its origin sometime before A.D. 1000, it is a day of public penance and is marked in the Roman Catholic Church by the burning of the palms blessed on the previous Palm Sunday. With his thumb, the priest then marks a cross upon the forehead of each worshipper. The Anglican Church and a few Protestant groups in the United States also celebrate the day, but generally without the use of ashes.

LINCOLN'S BIRTHDAY—Thursday, Feb. 12—A legal holiday in many states, this day was first formally observed in Washington, D. C., in 1866, when both houses of Congress gathered for a memorial address in honor of the late President.

ST. VALENTINE'S DAY—Saturday, Feb. 14—This day is the festival of two 3rd-century martyrs, both named St. Valentine. It is not known why this day is

associated with lovers. It may derive from an old pagan festival about this time of year, or it may have been inspired by the belief that birds mate on this day.

WASHINGTON'S BIRTHDAY—Sunday, Feb. 22—The birthday of George Washington is celebrated as a legal holiday in every state of the Union, the District of Columbia and all territories. The observance began in 1796.

ST. PATRICK'S DAY—Tuesday, March 17—St. Patrick, patron saint of Ireland, has been honored in America since the first days of the nation. There are many dinners and meetings and perhaps the most notable part of the observance is the annual St. Patrick's Day parade on Fifth Avenue in New York City.

PALM SUNDAY—March 22—Is observed the Sunday before Easter to commemorate the entry of Jesus into Jerusalem. The procession and the ceremonies introducing the benediction of palms probably had their origin in Jerusalem.

GOOD FRIDAY—March 27—This day commemorates the Crucifixion, which is retold during services from the Gospel according to St. John. A feature in Roman Catholic churches is the Liturgy of the Passion; there is no Consecration, the Host having been consecrated the previous day. The eating of hot cross buns on this day is said to have started in England.

EASTER SUNDAY—March 29—Observed in all Christian churches, Easter commemorates the Resurrection of Jesus. It is celebrated on the first Sunday after the full moon which occurs on or next after March 21 and is therefore celebrated between March 22 and April 25 inclusive. This date was fixed by the Council of Nicaea in 325.

FIRST DAY OF PASSOVER (Pesach)—Thursday, April 23 (Nisan 15)—The Feast of the Passover, also called the Feast of Unleavened Bread, commemorates the escape of the first-born of the Jews from the Angel of Death, who took from the Egyptians their first-born, thus fulfilling the prophecy of Moses. As the Jews fled Egypt, they ate unleavened bread, and

from that time the Jews have allowed no leavening in the houses during Passover, bread being replaced by matzoth.

ASCENSION DAY—Thursday, May 7—Took place in the presence of His apostles 40 days after the Resurrection of Jesus. It is traditionally held to have occurred on Mount Olivet in Bethany.

PENTECOST (Whitsunday)—May 17—This day commemorates the descent of the Holy Ghost upon the Apostles fifty days after the Resurrection. The sermon by the Apostle Peter, which led to the baptism of 3,000 who professed belief, originated the ceremonies that have since been followed. "Whitsunday" is believed to have come from "white Sunday" when, among the English, white robes were worn by those baptized on the day.

MEMORIAL DAY—Saturday, May 30—Also known as Decoration Day, Memorial Day is a legal holiday in most of the states and in the territories, and is also observed by the armed forces. In 1863, General John A. Logan, Commander in Chief of the Grand Army of the Republic, issued an order designating the day as one in which the graves of soldiers would be decorated. The holiday was originally devoted to honoring the memory of those who fell in the Civil War, but is now also dedicated to the memory of the dead of all wars.

FIRST DAY OF SHABUOTH (Hebrew Pentecost)—Friday, June 12 (Sivan 6)—This festival, sometimes called the Feast of Weeks, or of Harvest, or of the First Fruits, falls fifty days after Passover and originally celebrated the end of the seven-week grain harvesting season. In later tradition, it also celebrated the giving of the Law to Moses on Mt. Sinai, and both aspects have come down to the present.

FLAG DAY—Sunday, June 14—This day commemorates the adoption by the Continental Congress on June 14, 1777, of the Stars and Stripes as the U. S. flag. Although it is a legal holiday only in Pennsylvania, President Truman, on Aug. 3, 1949, signed a bill requesting the President to call for its observance each year by proclamation.

INDEPENDENCE DAY—Saturday, July 4—The day of the adoption of the Declaration of Independence in 1776, celebrated in all states and territories. The observance began in the next year in the city of Philadelphia.

LABOR DAY—Monday, Sept. 7—Observed the first Monday in September in all states and territories, Labor Day was first celebrated in New York in 1882 under the sponsorship of the Central Labor Union, following the suggestion of Peter J. McGuire, of the Knights of Labor, that the day be set aside in honor of labor.

FIRST DAY OF ROSH HASHANA (Jewish New Year)—Saturday, Oct. 3 (Tishri 1)—This day marks the beginning of the Jewish year 5720 and opens the Ten Days of Penitence closing with Yom Kippur.

YOM KIPPUR (Day of Atonement)—Monday, Oct. 12 (Tishri 10)—This day marks the end of the Ten Days of Penitence that began with Rosh Hashana and is the holiest day of the Jewish year. It is described in *Leviticus* as the "Sabbath of Sabbaths," and synagogue services begin the preceding sundown, resume the following morning, and continue through the day to sundown.

COLUMBUS DAY—Monday, Oct. 12—A legal holiday in many states, commemorating the discovery of America by Columbus in 1492. Quite likely the first celebration of Columbus Day was that organized in 1792 by the Society of St. Tammany, or Columbian Order, more widely known as Tammany Hall.

FIRST DAY OF SUKKOTH (Feast of Tabernacles)—Saturday, Oct. 17 (Tishri 15)—This festival, also known as the Feast of the Ingathering, originally celebrated the fruit harvest, and the name comes from the booths or tabernacles in which the Jews lived during the harvest, although one tradition traces it to the shelters used by the Jews in their wandering through the wilderness. During the festival, many Jews build small huts in their back yards or on the roofs of their houses.

ELECTION DAY (in certain states)—Tuesday, Nov. 3—Since 1845, by Act of Congress, the first Tuesday after the first Monday in November is the date for choosing Presidential electors. State elections are also generally held on this day.

VETERANS DAY—Wednesday, Nov. 11—Armistice Day was established in 1926 to commemorate the signing in 1918 of the Armistice ending World War I. On June 1, 1954, the name was changed to Veterans Day so as to honor all men and women who have served America in its armed forces.

THANKSGIVING—Thursday, Nov. 26—Observed nationally on the fourth Thursday in November by Act of Congress (1941), the first such national proclamation having been issued by President Lincoln in 1863, on the urging of Mrs. Sarah J. Hale, editor of *Godey's Lady's Book*. Most Americans believe that the holiday dates back to the day of thanks ordered by Governor Bradford of Plymouth Colony in New England in 1621 but scholars point out that days of thanks stem from ancient times.

FIRST SUNDAY OF ADVENT—Nov. 29—Advent is the season in which the faithful must prepare themselves for the advent of the Saviour on Christmas. The four Sun-

days before Christmas are marked by special church services.

CHRISTMAS (Feast of the Nativity)—Friday, Dec. 25—The most widely celebrated holiday of the Christian year, Christmas is observed as the anniversary of the birth of Jesus. Christmas customs are centuries old. The mistletoe, for example, comes from the Druids, who, in hanging the mistletoe, hoped for peace and good fortune. Use of such plants as holly comes from the ancient belief that such plants blossomed at Christmas. Comparatively recent is the Christmas tree, first set up in Germany in the 17th century, and the use of candles on trees developed from the

belief that candles appeared by miracle on the trees at Christmas. Colonial Manhattan Islanders introduced the name Santa Claus, a corruption of the Dutch name for the 4th-century Asia-Minor St. Nicholas.

FIRST DAY OF HANUKKAH (Festival of Lights)—Saturday, Dec. 26 (Kislev 25)—This festival was instituted by Judas Maccabaeus in 165 B.C. to celebrate the purification of the Temple of Jerusalem, which had been desecrated three years earlier by Antiochus Epiphanes, who set up a pagan altar and offered sacrifices to Zeus Olympius. In Jewish homes, a light is lighted the first night, and on each succeeding night of the eight-day festival, another is lighted.

Movable Holidays, 1959 to 1968

Length of Jewish holidays (O = Orthodox, C = Conservative, R = Reform):

Passover: O & C, 8 days (holy days: first 2 and last 2); R, 7 days (holy days: first and last).

Shabuoth: O & C, 2 days; R, 1 day.

Rosh Hashana: O & C, 2 days; R, 1 day.

Yom Kippur: All groups, 1 day.

Sukkoth: All groups, 7 days (holy days: O & C, first 2; R, first only). O & C observe two additional days: Shemini

Atzereth (Eighth Day of the Feast) and Simhath Torah (Rejoicing of the Law). R observes Shemini Atzereth but not Simhath Torah.

Hanukkah: All groups, 8 days.

NOTE: All holidays begin at sundown on the evening before the date given.

Legal Holidays in the 49 States, D. C., Hawaii and Puerto Rico

Holidays Widely Observed

January 1, New Year's Day: All states, D. C., Hawaii, Puerto Rico.

February 12, Lincoln's Birthday: Alaska, Arizona, California, Colorado, Connecticut, Delaware, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Michigan, Minnesota, Missouri, Montana, New Jersey, New Mexico, New York, North Dakota, Oregon, Pennsylvania, South Dakota, Tennessee, Utah, Vermont, Washington, West Virginia, Wisconsin, Wyoming.

February 22, Washington's Birthday: All states (except Louisiana, Nebraska, Nevada), D. C., Hawaii, Puerto Rico.

May 30, Memorial (or Decoration) Day: All states (except Alabama, Georgia, Mississippi, South Carolina, Texas), D. C., Hawaii, Puerto Rico.

July 4, Independence Day: All states, D. C., Hawaii, Puerto Rico.

September (1st Monday), Labor Day: All states, D. C., Hawaii, Puerto Rico.

October 12, Columbus Day: All states (except Alaska, Arkansas, D. C., Iowa, Kansas,* Louisiana, Maine, Mississippi, Nebraska, North Carolina, Oregon, South Carolina, South Dakota, Tennessee, Virginia, Wyoming), Puerto Rico.

November (1st Tuesday after 1st Monday), Election Day: Alaska, Arizona, California, Colorado, Delaware, Florida, Illinois, Indiana, Iowa, Louisiana, Maryland, Michigan, Missouri, Montana, New Hampshire,* New Jersey, New York, North Carolina, North Dakota, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, Wisconsin, Wyoming, Hawaii, Puerto Rico.

November 11, Veterans Day (formerly Armistice Day): All states except Nebraska, D. C., Hawaii, Puerto Rico.

November (4th Thursday), Thanksgiving Day: All states, D. C., Hawaii, Puerto Rico.

December 25, Christmas: All states, D. C., Hawaii, Puerto Rico.

Other Holidays

January 6, Three Kings' Day: Puerto Rico.

January 8, Battle of New Orleans: Louisiana.

January 11, De Hostos' Birthday: Puerto Rico.

January 19, Robert E. Lee's Birthday: Alabama, Arkansas, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Texas, Virginia.†

January 20, Inauguration Day (every 4 yrs.): D. C., Louisiana (Baton Rouge, only).

January 30, F. D. Roosevelt's Birthday: Kentucky.

February or March (1 day before Ash Wednesday), Mardi Gras (Shrove Tuesday): Alabama, Florida (in some counties), Louisiana (in some parishes and municipalities).

February 14, Statehood Day: Arizona.

March (first Tuesday), Town Meeting Day: Vermont.

March 2, Texas Independence Day.

March 15, Andrew Jackson's Birthday: Tennessee.

March 17, Evacuation Day: Massachusetts (in Suffolk Co. only).

March or April (2 days before Easter), Good Friday: California (12 M.-3 P.M.), Connecticut, Delaware, Florida, Illinois, Indiana, Louisiana, Maryland, Minnesota, New Jersey, North Dakota, Pennsylvania, Tennessee, Hawaii, Puerto Rico.

March or April (1 day after Easter), Easter Monday: North Carolina.

March 22, Emancipation Day: Puerto Rico.

March 25, Marilio Day.

March 26, Kuhio Day: Hawaii.

March 30, Seward's Day: Alaska.

April (date set by governor), Arbor Day: Utah, Wyoming.

April 12, Halifax Resolutions Anniversary: N. C.

April 13, Thomas Jefferson's Birthday: Alabama, Oklahoma.

April 16, De Diego's Birthday: Puerto Rico.

April 19, Patriots' Day: Maine, Massachusetts.

April 21, San Jacinto Day: Texas.

April 22, Oklahoma Day.

April 26, Confederate Memorial Day: Alabama, Florida, Georgia, Mississippi.

April (4th Monday), Fast Day: New Hampshire.

May (1st Friday), Arbor Day: North Dakota.

May 1, Bird Day: Oklahoma.

May 4, Rhode Island Independence Day.

May (2nd Sunday), Mother's Day: Ariz., Okl.

May 10, Confederate Memorial Day: North Carolina, South Carolina.

May 20, Mecklenburg Independence Day: N. C.

June 3, Jefferson Davis' Birthday: Alabama, Florida, Georgia, Kentucky,† Louisiana,† Mississippi, South Carolina, Tennessee,† Texas.

June 9, Senior Citizen's Day: Oklahoma.

June 11, Kamehameha Day: Hawaii.

June 14, Flag Day: Pennsylvania.

June 17, Bunker Hill Day: Massachusetts (in Suffolk Co. only).

June 20, West Virginia Day.

July 13, Nathan Bedford Forrest's Birthday: Tenn.

July 17, Muñoz Rivera's Birthday: Puerto Rico.

July 24, Pioneer Day: Utah.

July 25, Constitution Day: Puerto Rico.

July 27, Barbosa's Birthday: Puerto Rico.

August 1, Colorado Day.

August 14, World War II Memorial: Ark., R. I.

August 16, Bennington Battle Day: Vermont.

August 30, Huey P. Long Day: Louisiana.

September (1st Saturday after full moon), Indian Day: Oklahoma.

September 9, Admission Day: California.

September 12, Defenders' Day: Maryland.

September 16, Cherokee Strip Day: Oklahoma.

October (Thursday of State Fair Week): South Carolina (in counties where fair is held).

October 10, Oklahoma Historical Day.

October 18, Alaska Day.

October 31, Nevada Day.

November 1, All Saints' Day: Louisiana.

November 4, Will Rogers Day: Oklahoma.

November 11, Admission Day: Washington.

November 19, Discovery Day: Puerto Rico.

December 26, Day after Christmas: S. C.

* However, declared "public holiday." † Called Lee-Jackson Day. ‡ Called Confederate Memorial Day. § Called Victory (VJ) Day.

AWARDS

NOBEL PRIZES

The Nobel prizes are awarded under the will of Alfred Bernhard Nobel, Swedish chemist and engineer, who died in 1896. The interest of the fund is divided annually among the persons who have made the most outstanding contributions in the field of physics, chemistry, and physiology or medicine, who have produced the most distinguished literary work of an idealist tendency, and who have contributed most toward world peace.

The prizes for physics and chemistry are awarded by the Swedish Academy of Science in Stockholm, the one for physiology or medicine by the Caroline Medical Institute in Stockholm, that for literature by the academy in Stockholm, and that for peace by a committee of five elected by the Norwegian Storting. The distribution of prizes was begun on December 10, 1901, the anniversary of Nobel's death. The amount of each prize varies with the income from the fund and since 1936 has stood at approximately £8,000.

No Nobel prizes were awarded for 1940, 1941 and 1942; prizes for Literature and Peace were not awarded for 1943.

Year	Literature	Peace
1901	René F. A. Sully Prudhomme (France)	Henri Dunant (Switzerland) and Frederick Passy (France)
1902	Theodor Mommsen (Germany)	Elie Ducommun and Albert Gobat (Switzerland)
1903	Björnstjerne Björnson (Norway)	Sir William R. Cremer (England)
1904	Frédéric Mistral (France) and José Echegaray (Spain)	Institut de Droit International (Belgium)
1905	Henryk Sienkiewicz (Poland)	Bertha von Suttner (Austria)
1906	Giosuè Carducci (Italy)	Theodore Roosevelt (U. S.)
1907	Rudyard Kipling (England)	Ernesto T. Moneta (Italy) and Louis Renault (France)
1908	Rudolf Eucken (Germany)	Klas P. Arnoldson (Sweden) and Frederik Bajer (Denmark)
1909	Selma Lagerlöf (Sweden)	Auguste M. F. Beernaert (Belgium) and Baron Paul H. B. B. d'Estournelles de Constant de Rebecque (France)
1910	Paul von Heyse (Germany)	Bureau International Permanent de la Paix (Switzerland)
1911	Maurice Maeterlinck (Belgium)	Tobias M. C. Asser (Holland) and Alfred H. Fried (Austria)
1912	Gerhart Hauptmann (Germany)	Elihu Root (U. S.)
1913	Rabindranath Tagore (India)	Henri La Fontaine (Belgium)
1915	Romain Rolland (France)	No award
1916	Verner von Heidenstam (Sweden)	No award
1917	Karl Gjellerup (Denmark) and Henrik Pontoppidan (Denmark)	International Red Cross
1919	Carl Spitteler (Switzerland)	Woodrow Wilson (U. S.)
1920	Knut Hamsun (Norway)	Léon Bourgeois (France)
1921	Anatole France (France)	Karl H. Branting (Sweden) and Christian L. Lange (Norway)
1922	Jacinto Benavente (Spain)	Fridtjof Nansen (Norway)
1923	William B. Yeats (Ireland)	No award
1924	Wladyslaw Reymont (Poland)	No award
1925	George Bernard Shaw (England)	Sir Austen Chamberlain (England) and Charles G. Dawes (U. S.)
1926	Grazia Deledda (Italy)	Aristide Briand (France) and Gustav Stresemann (Germany)
1927	Henri Bergson (France)	Ferdinand Buisson (France) and Ludwig Quidde (Germany)
1928	Sigrid Undset (Norway)	No award
1929	Thomas Mann (Germany)	Frank B. Kellogg (U. S.)
1930	Sinclair Lewis (U. S.)	Lars O. J. Söderblom (Sweden)
1931	Erik A. Karlfeldt (Sweden)	Jane Addams and Nicholas M. Butler (U. S.)
1932	John Galsworthy (England)	No award
1933	Ivan G. Bunin (Russia)	Sir Norman Angell (England)
1934	Luigi Pirandello (Italy)	Arthur Henderson (England)
1935	No award	Karl von Ossietzky (Germany)
1936	Eugene O'Neill (U. S.)	Carlos de S. Lamas (Argentina)
1937	Roger Martin du Gard (France)	Lord Cecil of Chelwood (England)
1938	Pearl S. Buck (U. S.)	Office International Nansen pour les Réfugiés (Switzerland)
1939	Frans Eemil Sillanpää (Finland)	No award
1944	Johannes V. Jensen (Denmark)	International Red Cross
1945	Gabriela Mistral (Chile)	Cordell Hull (U. S.)
1946	Hermann Hesse (Switzerland)	Emily G. Balch and John R. Mott (U. S.)

Year	Literature	Peace
1947	André Gide (France)	Am. Friends Service Com. (U. S.), Brit. Soc. of Friends' Service Council (Eng.)
1948	Thomas Stearns Eliot (England)	No award
1949	William Faulkner (U. S.)	Lord John Boyd Orr (Scotland)
1950	Bertrand Russell (England)	Ralph J. Bunche (U. S.)
1951	Pär Lagerkvist (Sweden)	Léon Jouhaux (France)
1952	François Mauriac (France)	Albert Schweitzer (Fr. Eq. Af.)
1953	Sir Winston Churchill (England)	George C. Marshall (U. S.)
1954	Ernest Hemingway (U. S.)	Office of U.N. High Commissioner for Refugees
1955	Halldór Kiljan Laxness (Iceland)	No award
1956	Juan Ramón Jiménez (Spain)	No award
1957	Albert Camus (France)	Lester B. Pearson (Canada)

Year	Physics	Chemistry	Medicine
1901	Wilhelm K. Roentgen, for discovery of Roentgen rays.	Jacobus H. van't Hoff, for laws of chemical dynamics and osmotic pressure in solutions.	Emil A. von Behring, for work on serum therapy against diphtheria.
1902	Hendrik A. Lorentz and Pieter Zeeman, for work on influence of magnetism upon radiation.	Emil Fischer, for experiments in sugar and purin groups of substances.	Sir Ronald Ross, for work on malaria.
1903	A. Henri Becquerel, work on discovery of spontaneous radioactivity. Pierre and Marie Curie; study of radiation.	Svante A. Arrhenius, for his electrolytic theory of dissociation.	Niels R. Finsen, for his treatment of lupus vulgaris, with concentrated light rays.
1904	John Strutt (Lord Rayleigh) for discovery of argon in investigating gas density.	Sir William Ramsay; discovery and determination of place of inert gaseous elements in air.	Ivan P. Pavlov, for work on the physiology of digestion.
1905	Philipp Lenard, for work with cathode rays.	Adolf von Baeyer, for work on organic dyes and hydroaromatic combinations.	Robert Koch, for work on tuberculosis.
1906	Joseph J. Thomson, for investigations on passage of electricity through gases.	Henri Moissan, for isolation of fluorine, and introduction of electric furnace.	Camillo Golgi and Santiago Ramón y Cajal, for work on structure of the nervous system.
1907	Albert A. Michelson, for spectroscopic and meteorologic investigations.	Eduard Buchner; discovery of cell-less fermentation and investigations in biological chemistry.	Charles L. A. Laveran, for work with protozoa in the generation of disease.
1908	Gabriel Lippmann, for method of reproducing colors by photography.	Ernest Rutherford, for investigations into disintegration of elements and chemistry of radioactive substances.	Paul Ehrlich and Élie Metchnikoff, for work on immunity.
1909	Guglielmo Marconi and Ferdinand Braun, for development of wireless.	Wilhelm Ostwald, for work on catalysis and investigations into chemical equilibrium and reaction rates.	Theodor Kocher, for work on the thyroid gland.
1910	Johannes D. van der Waals, for work with the equation of state for gases and liquids.	Otto Wallach, for work in the field of alicyclic compounds.	Albrecht Kossel, for achievements in the chemistry of the cell.
1911	Wilhelm Wien, for his laws governing the radiation of heat.	Marie Curie, for discovery of elements radium and polonium.	Allvar Gullstrand, for work on the dioptrics of the eye.
1912	Gustaf Dalén, for discovery of automatic regulators used in lighting lighthouses and light buoys.	Victor Grignard, for reagent discovered by and named after him. Paul Sabatier, for the methods of hydrogenating organic compounds.	Alexis Carrel, for work on vascular ligature and grafting of blood vessels and organs.

Year	Physics	Chemistry	Medicine
1913	H. Kamerlingh-Onnes, for work leading to production of liquid helium.	Alfred Werner, for linking up atoms within the molecule.	Charles Richet, for work on anaphylaxis.
1914	Max von Laue, for discovery of diffraction of Roentgen rays passing through crystals.	Theodore W. Richards, for determining atomic weight of many chemical elements.	Robert Bárány, for work on physiology and pathology of the vestibular system.
1915	W. H. Bragg and W. L. Bragg, for analysis of crystal structure by means of X rays.	Richard Willstätter, for research into coloring matter of plants, especially chlorophyll.	No award.
1917	Charles G. Barkla, discovery of Roentgen radiation of the elements.	No award.	No award.
1918	Max Planck, for discoveries in connection with quantum theory.	Fritz Haber, for synthetic production of ammonia.	No award.
1919	Johannes Stark, discovery of Doppler effect in Canal rays and decomposition of spectrum lines by electric fields.	No award.	Jules Bordet, for discoveries in connection with immunity.
1920	Charles E. Guillaume, for discoveries of anomalies in nickel steel alloys.	Walther Nernst, for work in thermochemistry.	August Krogh, discovery of regulation of capillaries' motor mechanism.
1921	Albert Einstein, for discovery of the law of the photoelectric effect.	Frederick Soddy, for investigations into origin and nature of isotopes.	No award.
1922	Niels Bohr, for investigations of structure of atoms and radiations emanating from them.	Francis W. Aston, for discovery of isotopes in nonradioactive elements and for discovery of the whole number rule.	In 1923 the 1922 prize was divided between Archibald V. Hill for discovery relating to heat-production in muscles; and Otto Meyerhof, for correlation between consumption of oxygen and production of lactic acid in muscles.
1923	Robert A. Millikan, work on elementary charge of electricity and photoelectric phenomena.	Fritz Pregl, for method of microanalysis of organic substances discovered by him.	Frederick G. Banting and John J. R. Macleod, for discovery of insulin.
1924	Karl M. G. Siegbahn, for investigations in X-ray spectroscopy.	No award.	Willem Einthoven, for discovering the mechanism of the electrocardiogram.
1925	James Franck and Gustav Hertz, for discovery of laws governing impact of electrons upon atoms.	In 1926 the 1925 prize was awarded to Richard Zsigmondy, for work on the heterogeneous nature of colloid solutions.	No award.
1926	Jean B. Perrin, for works on discontinuous structure of matter and discovery of the equilibrium of sedimentation.	Theodor Svedberg, for work on disperse systems.	Johannes Fibiger, for discovery of the Spiroptera carcinoma.
1927	Arthur H. Compton, discovery of Compton phenomenon; and Charles T. R. Wilson, for method of perceiving paths taken by electrically charged particles.	In 1928 the 1927 prize was awarded to Heinrich Wieland, for investigations of bile acids and kindred substances.	Julius Wagner-Jauregg, for use of malaria inoculation in treatment of dementia paralytica.

Year	Physics	Chemistry	Medicine
1928	In 1929 the 1928 prize was awarded to Owen W. Richardson, for work on the phenomenon of thermionics and discovery of the Richardson Law.	Adolf Windaus, for investigations on constitution of the sterols and their connection with vitamins.	Charles Nicolle, for work on typhus exanthematicus.
1929	Prince Louis Victor de Broglie, for discovery of the wave character of electrons.	Arthur Harden and Hans K. A. S. von Euler-Chelpin, for research of fermentation of sugars.	Christiaan Eijkman, for discovery of the antineuritic vitamins; and Sir Frederick G. Hopkins, for discovery of growth-promoting vitamins.
1930	Sir Chandrasekhara V. Raman, for work on diffusion of light and discovery of the Raman effect.	Hans Fischer, for work on coloring matter of blood and leaves and for his synthesis of hemin.	Karl Landsteiner, for discovery of human blood groups.
1931	No award.	Karl Bosch and Friedrich Bergius, for invention and development of chemical high-pressure methods.	Otto H. Warburg, for discovery of the character and mode of action of the respiratory ferment.
1932	In 1933 the prize for 1932 was awarded to Werner Heisenberg, for creation of the quantum mechanics.	Irving Langmuir, for work in realm of surface chemistry.	Sir Charles S. Sherrington and Edgar D. Adrian, for discoveries of the function of the neuron.
1933	Erwin Schrödinger and Paul A. M. Dirac, for discovery of new fertile forms of the atomic theory.	No award.	Thomas H. Morgan, for discoveries on hereditary function of the chromosomes.
1934	No award.	Harold C. Urey, for discovery of heavy hydrogen.	George H. Whipple, George R. Minot, and William P. Murphy, for discovery of liver therapy against anemias.
1935	James Chadwick, for discovery of the neutron.	Frédéric and Irène Joliot-Curie, for synthesis of new radioactive elements.	Hans Spemann, for discovery of the organizer-effect in embryonic development.
1936	Victor F. Hess, for discovery of cosmic radiation; and Carl D. Anderson, for discovery of the positron.	Peter J. W. Debye, for investigations on dipole moments and diffraction of X rays and electrons in gases.	Sir Henry H. Dale and Otto Loewi, for discoveries on chemical transmission of nerve impulses.
1937	Clinton J. Davisson and George P. Thomson, for discovery of diffraction of electrons by crystals.	Walter N. Haworth, for research on carbohydrates and vitamin C; and Paul Karrer, for work on carotenoids, flavins and vitamins A and B.	Albert Szent-Györgyi von Nagyrápolt, for discoveries on biological combustion.
1938	Enrico Fermi, for identification of new radioactivity elements and discovery of nuclear reactions effected by slow neutrons.	Richard Kuhn, for carotinoid study and vitamin research (declined the prize).	Cornellie Heymans, for importance of sinus and aorta mechanisms in the regulation of respiration.
1939	Ernest Orlando Lawrence, for the development of the cyclotron.	Adolf Friedrich Johann Butenandt, for work on sexual hormones (declined the prize); and Leopold Růžicka, work with polymethylenes.	Gerhard Domagk, antibacterial effect of prontosil.

Year	Physics	Chemistry	Medicine
1943	Otto Stern, for detection of magnetic momentum of protons.	George Hevesy De Heves, for work on use of isotopes as indicators.	Henrik Dam, Edward A. Dolsy for the analysis of Vitamin K.
1944	Isidor Isaac Rabi, for work on magnetic movements of atomic particles.	Otto Hahn, for work on atomic fission.	Joseph Erlanger and Herbert Spencer Gasser, for work on functions of the nerve threads.
1945	Wolfgang Pauli, for work on atomic fissions.	Artturi Ilmari Virtanen, for research in the field of conservation of fodder.	Sir Alexander Fleming, Ernst Boris Chain, and Sir Howard Florey, for discovery of penicillin.
1946	Percy Williams Bridgman, studies and inventions in high-pressure physics.	James B. Sumner, crystallizing of enzymes. John H. Northrop and Wendell M. Stanley, preparing enzymes and virus proteins in pure form.	Herman J. Muller, hereditary effects of X ray on genes.
1947	Sir Edward Appleton, for discovery of layer which reflects radio short waves in the ionosphere.	Sir Robert Robinson, for research in plant substances.	Carl F. and Gerty T. Cori, for work on animal starch metabolism; Bernardo A. Houssay, for study of pituitary.
1948	Patrick M. S. Blackett, for improvement on Wilson chamber, discoveries in cosmic radiation.	Arne Tiselius, for biochemical discoveries and isolation of mouse paralytic virus.	Paul Mueller, for discovery of insect-killing properties of DDT.
1949	Hideki Yukawa, for mathematical prediction, 14 years ago, of the meson.	William Francis Giaque, for research in thermodynamics, especially effects of low temperature.	Walter Rudolf Hess, for research on brain control of body; and Antonio Caetano de Abreu Freire Egas Moniz, for development of brain operation.
1950	Cecil Frank Powell, for method of photographic study of atom nucleus, and for discoveries about mesons.	Otto Diels and Kurt Alder for discovery of diene synthesis enabling scientists to study structure of organic matter.	Philip S. Hench, Edward C. Kendall, and Tadeus Reichstein, for discoveries about hormones of adrenal cortex.
1951	Sir John Douglas Cockcroft and Ernest T. S. Walton, for work in 1932 on transmutation of atomic nuclei.	Glenn T. Seaborg and Edwin M. McMillan, for discovery of plutonium.	Max Theller, for development of anti-yellow fever vaccine.
1952	Edward Mills Purcell and Felix Bloch, for work in measurement of magnetic fields in atomic nuclei.	Archer John Porter Martin and Richard Laurence Millington Synge, for development of partition chromatography.	Selman A. Waksman, for co-discovery of streptomycin.
1953	Fritz Zernike, for development of "phase contrast" microscope.	Hermann Staudinger, for research in giant molecules.	Fritz A. Lipmann and Hans Adolph Krebs, for studies of living cells.
1954	Max Born, for work in quantum mechanics; and Walther Bothe, for work in cosmic radiation.	Linus Pauling, for study of forces holding together protein and other molecules.	John F. Enders, Thomas H. Weller and Frederick C. Robbins, for work with cultivation of polio virus.
1955	Polykarp Kusch and Willis E. Lamb, for work in atomic measurement.	Vincent du Vigneaud, for work on pituitary hormones.	Hugo Theorell, for work on oxidation enzymes.
1956	William Shockley, Walter H. Brattain and John Bardeen for developing electronic transistor.	Cyril Hinshelwood and Nikolai N. Semenov for parallel research on chemical reaction kinetics.	Dickinson W. Richards, Jr., André F. Cournand and Werner Forssmann for new techniques in heart disease.

Year	Physics	Chemistry	Medicine
1957	Tsung Dao Lee and Chen Ning Yang, for disproving principle of conservation of parity.	Sir Alexander Todd, for research with chemical compounds that are factors in heredity.	Daniel Bovet, for development of drugs to relieve allergies and relax muscles during surgery.

(For 1958 Nobel prize winners, see Nobel prizes in index.)

 Paul Lukas, *Watch on the Rhine*

- Bing Crosby, *Going My Way*
 Ray Milland, *The Lost Weekend*
 Fredric March, *The Best Years of Our Lives*
 Ronald Colman, *A Double Life*
 Sir Laurence Olivier, *Hamlet*
 Broderick Crawford, *All the King's Men*
 Jose Ferrer, *Cyrano de Bergerac*
 Humphrey Bogart, *The African Queen*

- Gary Cooper, *High Noon*
 William Holden, *Stalag 17*
 Marlon Brando, *On the Waterfront*
 Ernest Borgnine, *Marty*
 Yul Brynner, *The King and I*
 Alec Guinness, *The Bridge on the River Kwai*

ACTOR (SUPPORTING ROLE)

- Walter Brennan, *Come and Get It*
 Joseph Schildkraut, *The Life of Emile Zola*
 Walter Brennan, *Kentucky*
 Thomas Mitchell, *Stagecoach*

1940 Jane Darwell, *The Grapes of Wrath*
 1941 Mary Astor, *The Great Lie*
 1942 Teresa Wright, *Mrs. Miniver*
 1943 Katina Paxinou, *For Whom the Bell Tolls*
 1944 Ethel Barrymore, *None But the Lonely Heart*
 1945 Anne Revere, *National Velvet*
 1946 Anne Baxter, *The Razor's Edge*
 1947 Celeste Holm, *Gentleman's Agreement*
 1948 Claire Trevor, *Key Largo*
 1949 Mercedes McCambridge, *All the King's Men*
 1950 Josephine Hull, *Harvey*
 1951 Kim Hunter, *A Streetcar Named Desire*
 1952 Gloria Grahame, *The Bad and the Beautiful*
 1953 Donna Reed, *From Here to Eternity*
 1954 Eva Marie Saint, *On the Waterfront*
 1955 Jo Van Fleet, *East of Eden*
 1956 Dorothy Malone, *Written on the Wind*
 1957 Miyoshi Umeki, *Sayonara*

Walter Brennan, *The Westerner*
 Donald Crisp, *How Green Was My Valley*
 Van Heflin, *Johnny Eager*
 Charles Coburn, *The More the Merrier*

Barry Fitzgerald, *Going My Way*

James Dunn, *A Tree Grows in Brooklyn*
 Harold Russell, *The Best Years of Our Lives*
 Edmund Gwenn, *Miracle on 34th Street*
 Walter Huston, *The Treasure of Sierra Madre*
 Dean Jagger, *Twelve O'Clock High*

George Sanders, *All About Eve*
 Karl Malden, *A Streetcar Named Desire*

Anthony Quinn, *Viva Zapata!*

Frank Sinatra, *From Here to Eternity*
 Edmond O'Brien, *The Barefoot Contessa*
 Jack Lemmon, *Mister Roberts*
 Anthony Quinn, *Lust for Life*
 Red Buttons, *Sayonara*

Some Other Academy Awards for 1957

Art direction: *Sayonara*. Art direction: Ted Haworth; set decoration: Robert Priestley.
 Cinematography: Jack Hildyard, *The Bridge on the River Kwai*.

Costume design: Orry Kelly, *Les Girls*.

Documentary (feature): Albert Schweitzer, Jerome Hill, producer.

Film editing: Peter Taylor, *The Bridge on the River Kwai*.

Foreign-language film: *The Nights of Cabiria* (Italian).

Jean Hersholt Humanitarian Award: Samuel Goldwyn.

Music scoring: Malcolm Arnold, *The Bridge on the River Kwai*.

Music (song): "All the Way," from *The Joker* is *Wild*. Music by James Van Heusen; lyrics by Sammy Cahn.

Short subject (cartoon): *Birds Anonymous*, Warner Bros.

Short subject (live action): *The Wetback Hound*, Walt Disney Productions.

Sound recording: *Sayonara*, Warner Bros. Studio Sound Dept.

Special effects: Walter Rossi, *The Enemy Below*.

Writing (screenplay based on material from another medium): Pierre Boule, *The Bridge on the River Kwai*.

Writing (story and screenplay written directly for screen): George Wells, *Designing Woman*.

New York Film Critics' Awards

(1—best motion picture; 2—best male performance; 3—best feminine performance; 4—best direction; 5—best foreign film; 6—special award.)

1940 1. *The Grapes of Wrath*, 20th Century-Fox
 2. Charles Chaplin, *The Great Dictator* (refused award)
 3. Katharine Hepburn, *The Philadelphia Story*
 4. John Ford, *The Grapes of Wrath*
 5. *The Baker's Wife* (French)

1941 1. *Citizen Kane*, RKO-Mercury
 2. Gary Cooper, *Sergeant York*
 3. Joan Fontaine, *Suspicion*
 4. John Ford, *How Green Was My Valley*

1942 1. *In Which We Serve*, UA-Noel Coward
 2. James Cagney, *Yankee Doodle Dandy*

3. Agnes Moorehead, *The Magnificent Ambersons*
 4. John Farrow, *Wake Island*

1943 1. *Watch on the Rhine*, Warner Bros.
 2. Paul Lukas, *Watch on the Rhine*
 3. Ida Lupino, *The Hard Way*
 4. George Stevens, *The More the Merrier*

1944 1. *Going My Way*, Paramount
 2. Barry Fitzgerald, *Going My Way*
 3. Tallulah Bankhead, *Lifeboat*
 4. Leo McCarey, *Going My Way*

1945 1. *The Lost Weekend*, Paramount

2. Ray Milland, *The Lost Weekend*

3. Ingrid Bergman, *Spellbound* and *The Bells of St. Mary's*

4. Billy Wilder, *The Lost Weekend*

5. (None)
 6. *The True Glory* and *The Fighting Lady*

1946 1. *The Best Years of Our Lives*, Goldwyn-RKO Radio

2. Laurence Olivier, *Henry V*

3. Celia Johnson, *Brief Encounter*

4. William Wyler, *The Best Years of Our Lives*

5. *Open City* (Italian)

1947 1. *Gentleman's Agreement*, 20th Century-Fox

2. William Powell, *Life With Father*
 3. Deborah Kerr, *The Adventuress and Black Narcissus*
 4. Ella Kazan, *Gentleman's Agreement and Boomerang*
 5. *To Live in Peace* (Italian)
- 1948 1. *Treasure of Sierra Madre*, Warner Bros.
 2. Sir Laurence Olivier, *Hamlet*
 3. Olivia de Havilland, *The Snake Pit*
 4. John Huston, *Treasure of Sierra Madre*
 5. *Paizan* (Italian)
- 1949 1. *All the King's Men*, Rossen-Columbia
 2. Broderick Crawford, *All the King's Men*
 3. Olivia de Havilland, *The Heiress*
 4. Carol Reed, *The Fallen Idol*
 5. *The Bicycle Thief* (Italian)
- 1950 1. *All About Eve*, 20th Century-Fox
 2. Gregory Peck, *Twelve O'Clock High*
 3. Bette Davis, *All About Eve*
 4. Joseph L. Mankiewicz, *All About Eve*
 5. *Ways of Love* (Franco-Italian)
- 1951 1. *A Streetcar Named Desire*, Warner Bros.
 2. Arthur Kennedy, *Bright Victory*
 3. Vivien Leigh, *A Streetcar Named Desire*
 4. Ella Kazan, *A Streetcar Named Desire*
 5. *Miracle in Milan* (Italian)
- 1952 1. *High Noon*, United Artists
 2. Ralph Richardson, *Breaking the Sound Barrier*
 3. Shirley Booth, *Come Back, Little Sheba*
 4. Fred Zinnemann, *High Noon*
 5. *Forbidden Games* (French)
- 1953 1. *From Here to Eternity*, Columbia
 2. Burt Lancaster, *From Here to Eternity*
 3. Audrey Hepburn, *Roman Holiday*
 4. Fred Zinnemann, *From Here to Eternity*
 5. *Justice Is Done* (French)
 6. *A Queen Is Crowned* (JARO) and *The Conquest of Everest* (JARO)
- 1954 1. *On the Waterfront*, Columbia
 2. Marlon Brando, *On the Waterfront*
- 1955 1. *Marty*, United Artists
 2. Ernest Borgnine, *Marty*
 3. Anna Magnani, *The Rose Tattoo*
 4. David Lean, *Summer-time*
 5. *Diabolique* (French) and *Umberto D.* (Italian)
- 1956 1. *Around the World in 80 Days*, The Michael Todd Co., Inc., UA
 2. Kirk Douglas, *Lust For Life*
 3. Ingrid Bergman, *Anastasia*
 4. John Huston, *Moby Dick*
 5. *La Strada* (Italian)
- 1957 1. *The Bridge on the River Kwai*, Columbia
 2. Alec Guinness, *The Bridge on the River Kwai*
 3. Deborah Kerr, *Heaven Knows, Mr. Allison*
 4. David Lean, *The Bridge on the River Kwai*
 5. *Gervaise* (French)

New York Drama Critics' Circle Awards

- 1935-36 *Winterset*, by Maxwell Anderson
 1936-37 *High Tor*, by Maxwell Anderson
 1937-38 *Of Mice and Men*, by John Steinbeck
Shadow and Substance, by Paul Vincent Carroll¹
 1938-39 (No award)
The White Steed, by Paul Vincent Carroll¹
 1939-40 *The Time of Your Life*, by William Saroyan

		<i>The Music Man</i> , by Meredith Willson ²

¹ Citation for best foreign play. ² Citation for best musical. ³ Based on a novel by Arthur Koestler. ⁴ Based on Christopher Isherwood's *Berlin Stories*. ⁵ For "distinguished and original contribution to the theater." ⁶ Based on Sidney Howard's *They Knew What They Wanted*. ⁷ Based on a novel by Thomas Wolfe.

The Hall of Fame for Great Americans

The Hall of Fame for Great Americans, established in 1900 on the campus of New York University, is an open-air colonnade with busts and tablets for 85 of the 86 persons so far honored for national achievements. New names are voted on every five years by a College of Electors of about 100 eminent men and women from all the states. To be elected to the Hall of Fame, an individual must have been dead more than 25 years (before 1922, the stipulation was 10 years), must have been a citizen of the U. S., and must receive a majority vote. Nominations may be made by any citizen. The next election will be held in 1960. Nominations open April 1, 1959.

Names	Elected	Names	Elected
John Adams (statesman)	1900	James Kent (jurist)	1900
John Quincy Adams (statesman)	1905	Sidney Lanier (poet)	1945
Louis Agassiz (naturalist)	1915	Robert E. Lee (military officer)	1900
Susan B. Anthony (reformer)	1950	Abraham Lincoln (statesman)	1900
John James Audubon (naturalist)	1900	Henry W. Longfellow (poet)	1900
George Bancroft (historian)	1910	James Russell Lowell (poet)	1905
Henry Ward Beecher (clergyman)	1900	Mary Lyon (educator)	1905
Alexander Graham Bell (inventor)	1950	James Madison (statesman)	1905
Daniel Boone (explorer)	1915	Horace Mann (educator)	1900

John Paul Jones (naval officer)	1925	Wilbur Wright* (inventor)	1955

* Not yet represented by a bust and tablet.

AVIATION

Famous Firsts in Aviation

- 1782—First balloon flight. Jacques and Joseph Montgolfier of Annonay, Fr., sent up a small smoke-filled balloon about mid-November.
- 1783—First hydrogen-filled balloon flight. Jacques A. C. Charles, Paris physicist, supervised construction by A. J. and M. N. Robert of a 13-ft. diameter balloon which was filled with hydrogen. It got up to about 3,000 ft. and traveled about 16 mi. in a 45-min. flight (Aug. 27).
- 1783—First human balloon flights. A Frenchman, Jean Pilâtre de Rozier, made the first captive balloon ascension (Oct. 15). With the Marquis d'Arlandes, Pilâtre de Rozier made the first free flight, reaching a peak altitude of about 500 ft., and traveling about 5½ mi. in 20 min. (Nov. 21).
- 1784—First powered balloon. Gen. Jean Baptiste Marie Meusnier developed the first propeller-driven and elliptically-shaped balloon—the crew cranking three propellers on a common shaft to give the craft a speed of about 3 mi. per hr.
- 1784—First woman to fly. Mme. Thible, a French opera singer (June 4).
- 1793—First balloon flight in America. Jean Pierre Blanchard, a French pilot, made it from Philadelphia to near Woodbury, Gloucester Co., N. J., in a little over 45 min. (Jan. 9).
- 1794—First military use of the balloon. Jean Marie Coutelle, using a balloon built for the French Army, made two 4 hr. observation ascents. The military value of the ascents seems to have been in damage to the enemy's morale.
- 1797—First parachute jump. André-Jacques Garnerin dropped from about 6,500 ft. over Moneau Park in Paris in a 23-ft. diameter 'chute made of white canvas with a basket attached (Oct. 22).
- 1843—First air transport company. In London, William S. Henson and John Stringfellow filed articles of incorporation for the Aerial Transit Company (Mar. 24). It failed.
- 1852—First dirigible. Henri Giffard, a French engineer, flew in a controllable (more or less) steam engine-powered balloon, 144 ft. long and 39 ft. in diameter, inflated with 88,000 cu. ft. of coal gas. It reached 6.7 mi. per hr. on a flight from Paris to Trappe (Sept. 24).
- 1860—First aerial photographers. Samuel Archer King and William Black made two photos of Boston, still in existence.
- 1872—First gas-engine powered dirigible. Paul Hæmlein, a German engineer, flew in a semi-rigid frame dirigible, powered by a 4-cylinder internal combustion engine running on coal gas drawn from the supporting bag.
- 1873—First transatlantic attempt. *The New York Daily Graphic* sponsored the attempt with a 400,000 cu. ft. balloon carrying a lifeboat. A rip in the bag during inflation brought collapse of the balloon and the project.
- 1897—First successful metal dirigible. An all-metal dirigible, designed by David Schwarz, a Hungarian, took off from Berlin's Tempelhof Field and, powered by a 16-hp. Daimler engine, got several miles before leaking gas caused it to crash (Nov. 13).
- 1900—First Zeppelin flight. Germany's Count Ferdinand von Zeppelin flew the first of his long series of rigid-frame airships. It attained a speed of 18 mi. per hr. and got 3½ mi. before its steering gear failed (July 2).
- 1903—First successful heavier-than-air machine flight. Aviation was really born on the sand dunes at Kitty Hawk, N. C., when Orville Wright crawled to his prone position between the wings of the biplane he and his brother Wilbur had built, opened the throttle of their home-made 12-hp. engine and took to the air. He covered 120 ft. in 12 sec. Later that day, in one of four flights, Wilbur stayed up 59 sec. and covered 852 ft. (Dec. 17).
- 1904—First airplane maneuvers. Orville Wright made the first turn with an airplane (Sept. 15); 5 days later his brother Wilbur made the first complete circle.
- 1905—First airplane flight over half an hour. Orville Wright kept his craft up 33 min. 17 sec. (Oct. 4).
- 1906—First European airplane flight. Alberto Santos-Dumont, a Brazilian, flew a heavier-than-air machine at Bagatelle Field, Paris (Sept. 13).
- 1908—First airplane fatality. Lt. Thomas E. Selfridge, U. S. Army Signal Corps, was in a group of officers evaluating the Wright plane at Fort Myer, Va. He was up about 75 ft. with Orville Wright when the propeller hit a bracing wire and was broken, throwing the plane out of control, killing Selfridge and seriously injuring Wright (Sept. 17).
- 1910—First licensed woman pilot. Baroness Raymonde de la Roche of France, who

- learned to fly in 1909, received ticket No. 36 on March 8.
- 1910—First flight from shipboard. Lt. Eugene Ely, USN, took a Curtiss plane off from the deck of cruiser *Birmingham* at Hampton Roads, Va., and flew to Norfolk (Nov. 14). The following January he reversed the process, flying from Camp Selfridge to the deck of the battleship *Pennsylvania* in San Francisco Bay (Jan. 18).
- 1911—First U. S. woman pilot. Harriet Quimby, a magazine writer, who got ticket No. 37.
- 1913—First multi-engined aircraft. Built and flown by Igor Ivan Sikorsky while still in his native Russia.
- 1914—First aerial combat. In August, Allied and German pilots and observers started shooting at each other with pistols and rifles—with negligible results.
- 1915—First air raids on England. German Zeppelins started dropping bombs on four English communities (Jan. 19).
- 1918—First U. S. air squadron. The U. S. Army Air Corps made its first independent raids over enemy lines, in DH-4 planes (British-designed) powered with 400-hp. American-designed Liberty engines (Apr. 8).
- 1918—First regular airmail service. Operated for the Post Office Department by the Army, the first regular service was inaugurated with one round trip a day (except Sunday) between Washington, D. C., and New York City (May 15).
- 1919—First transatlantic flight. The NC-4, one of four Curtiss flying boats commanded by Lt. Comdr. Albert C. Read, reached Lisbon, Port. (May 27) after hops from Trepassy Bay, Nfd. to Horta, Azores (May 16-17), to Ponta Delgada (May 20). The Liberty-powered craft was piloted by Walter Hinton.
- 1919—First nonstop transatlantic flight. Capt. John Alcock and Lt. Arthur Whitten Brown, British World War I flyers, made the 1,900 mi. from St. John's, Nfd. to Clifden, Ire., in 16 hr. 12 min. in a Vickers-Vimy bomber with two 350-hp. Rolls-Royce engines (June 15-16).
- 1919—First lighter-than-air transatlantic flight. The British dirigible R-34, commanded by Maj. George H. Scott, left Firth of Forth, Scot. (July 2) and touched down at Mineola, L. I., 108 hr. later. The eastbound trip was made in 75 hr. (completed July 13).
- 1919—First scheduled passenger service (using airplanes). Aircraft Travel and Transport inaugurated London-Paris service (Aug. 25). Later the company started the first trans-channel mail service on the same route (Nov. 10).
- 1921—First naval vessel sunk by aircraft. Two battleships being scrapped by treaty were sunk by bombs dropped from Army planes in demonstration put on by Brig. Gen. William S. Mitchell (July 21).
- 1921—First helium balloon. The C-7, non-rigid Navy dirigible was first to use non-inflammable helium as lifting gas, making a flight from Hampton Roads, Va., to Washington, D. C. (Dec. 1).
- 1922—First member of Caterpillar Club. Lt. (later Maj. Gen.) Harold Harris bailed out of a crippled plane he was testing at McCook Field, Dayton, Ohio (Oct. 20), and became the first man to join the Caterpillar Club—those whose lives have been saved by parachute.
- 1923—First nonstop transcontinental flight. Lts. John A. Macready and Oakley Kelly flew a single-engine Fokker T-2 nonstop from New York to San Diego, a distance of just over 2,500 mi. in 26 hr. 50 min. (May 2-3).
- 1923—First autogyro flights. Juan de la Cierva, brilliant Spanish mathematician, made the first successful flight in a rotary wing aircraft in Madrid (June 9).
- 1924—First round-the-world flight. Four Douglas Cruiser biplanes of the U. S. Army Air Corps took off from Seattle under command of Maj. Frederick Martin (Apr. 6). 175 days later two of the planes (Lt. Lowell Smith's and Lt. Erik Nelson's) landed in Seattle after a circuitous route—one source saying 26,345 mi., another saying 27,553 mi.
- 1926—First polar flight. Then-Lt. Cmdr. Richard E. Byrd, acting as navigator, and Floyd Bennett as pilot, flew a trimotor Fokker from Kings Bay, Spitsbergen, over the North Pole and back in 15½-hr. flight (May 8-9).
- 1927—First solo transatlantic flight. Charles Augustus Lindbergh lifted his Wright-powered Ryan monoplane, *Spirit of St. Louis*, from Roosevelt Field, L. I., to stay aloft 33 hr. 39 min. and cover 3,600 mi. to Le Bourget Field outside Paris (May 20-21).
- 1927—First transatlantic passenger. Charles A. Levine was piloted by Clarence D. Chamberlin from Roosevelt Field, L. I., to Elsieben, Ger., in a Wright-powered Bellanca (June 4-5).
- 1928—First east-west transatlantic crossing. Baron Guenther von Huenefeldt, piloted by German Capt. Hermann Koehl and Irish Capt. James Fitzmaurice, left Dublin for New York City (Apr. 12) in a single-engine all-metal Junkers monoplane. Some 37 hr. later they cracked up on Greely Island, Labrador. Rescued.
- 1928—First U. S.-Australia flight. Sir Charles Kingsford-Smith and Capt. Charles T. P. Ulm, Australians, and two American navigators, Harry W. Lyon and James Warner, crossed the Pacific from Oakland to Brisbane. They went via

Hawaii and the Fiji Islands in a trimotor Fokker (May 31-June 8).

1928—First trans-Arctic flight. Sir Hubert Wilkins, Australian explorer, piloted by Carl Ben Eielson, flew from Point Barrow, Alaska, to Spitsbergen (mid-April).

1929—First of the endurance records. With Air Corps Maj. Carl Spaatz in command and Capt. Ira Eaker as chief pilot, an Army Fokker, aided by refueling in the air, remained aloft 150 hr. 40 min. at Los Angeles (Jan. 1-7).

1929—First blind flight. James H. Doolittle proved the feasibility of instrument flying when he took off and landed entirely on instruments (Sept. 24).

1929—First rocket engine flight. Fritz von Opel, German auto maker, stayed aloft in his small rocket-powered craft for 75 sec., covering nearly 2 mi. (Sept. 30).

1929—First South Pole flight. Comdr. Richard E. Byrd, with Bernt Balchen as pilot, Harold I. June, radio operator, and Capt. A. C. McKinley, photographer, flew a trimotor Fokker from the Bay of Whales, Little America, over the South Pole and back (Nov. 28-29).

1930—First Paris-New York nonstop flight. Dieudonné Coste and Maurice Bellonte, French pilots, flew a Hispano-powered Brueget biplane from Le Bourget Field to Valley Stream, L. I., in 37 hr. 18 min. (Sept. 2-3).

1931—First flight into the stratosphere. Prof. Auguste Piccard, Swiss physicist, and Charles Knipfer, ascended in a balloon from Augsburg, Ger., and reached a height of 51,793 ft. in a 17-hr. flight that terminated on a glacier near Innsbruck, Austria (May 27).

1931—First nonstop transpacific flight. Hugh Herndon and Clyde Pangborn took off from Sabishiro Beach, Japan, dropped their landing gear and flew 4,860 mi. to near Wenatchee, Wash., in 41 hr. 13 min. (Oct. 4-5).

1932—First woman's transatlantic solo. Amelia Earhart, flying a Pratt & Whitney Wasp-powered Lockheed Vega, flew alone from Harbor Grace, Nfld., to Ireland in approximately 15 hr. (May 20-21).

1932—First westbound transatlantic solo. James A. Mollison, British pilot, took a de Havilland Puss Moth from Portmarnock, Ire., to Pennfield, N. B. (Aug. 18).

1932—First woman airline pilot. Ruth Rowland Nichols, first woman to hold three international records at the same time—speed, distance, altitude—was employed by N. Y.-New England Airways.

1933—First round-the-world solo. Wiley Post took a Lockheed Vega, *Winnie Mae*, 15,596 mi. around the world in 7 days 18 hr. 49½ min. (July 15-22).

1937—First successful helicopter. Hanna Reitsch, German woman pilot, flew Dr.

Heinrich Focke's FW-61 in free, fully-controlled flight at Bremen (July 4).

1939—First turbojet flight. Just before their invasion of Poland, the Germans flew a Heinkel He-178 plane powered by a Heinkel S3B turbojet (Aug. 27).

1942—First American jet plane flight. Robert Stanley, chief pilot for Bell Aircraft Corp., flew the Bell XP-59 *Airacomet* at Muroc Army Base, Calif. (Oct. 1).

1947—First piloted supersonic flight in an airplane. Capt. Charles E. Yeager, U. S. Air Force, flew the X-1, rocket-powered research plane built by Bell Aircraft Corp., faster than the speed of sound at Muroc Air Force Base, Calif. (Oct. 14).

1949—First round-the-world nonstop flight. Capt. James Gallagher and USAF crew of 13 flew a Boeing B-50A Superfortress around the world nonstop from Ft. Worth, Tex., returning to same point; 23,452 mi. in 94 hr. 1 min., with 4 aerial refuelings enroute (Feb. 27-Mar. 2).

1950—First nonstop transatlantic jet flight. Col. David C. Schilling (USAF) flew 3,300 mi. from England to Limestone, Maine, in 10 hr. 1 min. (Sept. 22).

1950—First jet-plane battle. Four U. N. jets attacked by 8 to 12 Communist jets near Sinuiju, Korea. One enemy jet reported shot down; no U. N. losses (Nov. 8).

1951—First solo across North Pole. Charles F. Blair, Jr., flew a converted P-51 (May 29).

1952—First jetliner service. De Havilland Comet flight inaugurated by BOAC between London and Rome (Apr. 21). Round trip: 4 hr. 46 min. flying time.

1952—First transatlantic helicopter flight. Capt. Vincent H. McGovern and 1st Lt. Harold W. Moore piloted 2 Sikorsky H-19s from Westover, Mass., to Prestwick, Scot. (3,410 mi.). Trip was made in 5 steps, with flying time of 42 hr. 25 min. (July 15-31).

1952—First transatlantic round trip in same day. British Canberra twin-jet bomber flew from Aldergrove, N. Ire., to Gander, Nfld., and back in 7 hr. 59 min. flying time (Aug. 26).

1955—First trancontinental round trip in same day. Lt. John M. Conroy piloted F-86 Sabrejet across U. S. (Los Angeles-New York) and back—5,085 mi.—in 11 hr. 33 min. 27 sec. (May 21).

1957—First round-the-world, nonstop jet plane flight. Maj. Gen. Archie J. Old, Jr., USAF, led a flight of 3 Boeing B-52 bombers, powered with 8 10,000-lb.-thrust Pratt & Whitney Aircraft J57 engines around the world in 45 hrs., 19 min.; distance 24,325 mi.; average speed 525 m.p.h. (Completed Jan. 18.)

ASTRONOMY AND CALENDAR

Edited by

HUGH S. RICE, A.M., Ph.D.

Research Consultant, American Museum-Hayden Planetarium

Kinds of Time

Of the three main kinds of time (sidereal, apparent solar, and mean solar), the two kinds used in our calendar pages (local civil and standard time) are both types of mean solar time.

Sidereal time is used mostly in astronomy. It is nearly but not exactly star-time, and is measured by the diurnal rotation of the vernal equinox point in the sky. Sidereal days are shorter than solar days by about $3^m 56^s$ of mean time.

Apparent solar time is measured by the apparent diurnal rotation of the sun, and is the hour-angle of the sun $+12^h$. When the sun is at lower transit we have 0^h by apparent time; when it is on the upper meridian the apparent time is 12^h . The sun is not a good timekeeper, its eastward motion along the ecliptic being irregular, so apparent days are of unequal duration.

Mean solar time is the hour-angle of the "mean sun" $+12^h$. The mean sun is an imaginary body moving uniformly along the celestial equator. When the mean sun is on the lower meridian, the mean time is 0^h . The actual sun is sometimes ahead of and sometimes behind the mean sun, and the difference at any moment is the *equation of time*. When the sun is west of the mean sun, we have the "sun fast" situation, and the sun crosses the meridian before the mean sun; when the sun is east of the mean sun, we have the "sun slow" condition, and the sun transits after the mean sun. The equation of time helps in conversion of apparent and mean solar time. No clock runs on apparent time but ordinary clocks keep mean solar time in some form.

Local civil time (L.C.T.) is the mean solar time of a designated meridian, and its day begins with the mean sun at lower transit. This is midnight, the moment of zero hour (0^h). Ordinary clocks are not set to local civil time, because this time—

at any instant—varies with any change of longitude.

Standard time is the local civil time of a standard meridian, but used over an entire time-zone. In the U. S. the four zones (Eastern, Central, Mountain, and Pacific) are based upon the standard meridians of 75° , 90° , 105° , and 120° respectively. Ordinary clocks run on standard time, a type of mean solar time. In the summer, in certain localities, they run on advanced time (as daylight saving time) but this is only a clock-setting, and is actually standard time. Daylight saving time for a certain zone is the normal standard time of one zone to the east. While popular in certain metropolitan areas, it is not used for scientific observations. Advanced time is 1^h later on the clock-face than the normal standard time of the same zone.

Time zones. A time-zone chart of the entire world shows clearly how the world is divided into 24 time zones according to longitude. In a large proportion of countries, standard time is in use, and commonly the time on the clock-face reads 1 hour later for each zone east of a given zone, and 1 hour earlier for each zone west of a given zone. The zero time-zone of the world runs thru Greenwich, Eng., and the zones are so marked that the standard time at a particular station, added algebraically to the zone-number at the bottom gives the corresponding universal time or Greenwich civil time. For example, 3 A.M., M.S.T. $+ 7^h = 10^h$ U.T. or G.C.T.

Mexico, except for the northern part of Lower California, uses 90th-meridian time entirely. Canada uses the 4 standard-time zones of the U. S., and two others: (1) 60th-meridian or Atlantic standard time, for New Brunswick, Nova Scotia, and Quebec (east of 68° w.), 4^h earlier than Greenwich, and (2) 135th-meridian or Yukon standard time, 9^h earlier than Greenwich.

Newfoundland and the Labrador coast use Newfoundland standard time, 3^h 30^m earlier than Greenwich. Alaska uses 4 time-zones, those based on the following meridians of west longitude: 120° (Juneau), 135° or Yukon standard time (Yakutat), 150° or Alaska standard time (Fairbanks), and 165° (Nome).

The Date-line. At any moment of time, usually there are parts of two different but contiguous days going on at different places on the earth. The change of date is made at the date-line, an imaginary line that follows essentially the course of the 180° meridian in the Pacific Ocean. At points east of the date-line the calendar day is 1 day earlier than at places to the west of

the line. At a point just west of the date-line, let us suppose it is 18^h or 6 P.M., L.C.T., on Aug. 1. At the same moment it is 12^h at long. 90° e., 6^h at long. 0°, and 0^h at long. 90° w., all of the same date, Aug. 1. West of long. 90° w., it is not yet 0^h (midnight); hence between 90° w. and 180° the date must be July 31. As one crosses the date-line going eastward his watch remains the same but the date changes abruptly to 1 day earlier, so the traveler repeats part of a calendar day. As one crosses the line going westward the date changes abruptly to one day later, causing him to omit a calendar day. (According to actual practice, the change is made at night regardless of the true moment of crossing.)

On Using the Following Calendar Pages

Sun fast and sun slow. This is the equation of time, as previously discussed.

Sunrise and sunset. For accurate results, two corrections to the tabular values are necessary: (1) interpolation for latitude, and (2) reduction to standard time. When the observer is at a latitude between two given latitudes, he computes a time for sunrise or sunset that lies between the times shown for the given latitudes. (Our table of longitudes and latitudes is a guide for one's position, but a large atlas may be consulted.) For example, on May 24 the sun rises at 4:51 A.M. at lat. 35° and at 5:02 at lat. 30°, the difference being +11^m or increasing 2^m per degree going south. An observer at Ocala, Fla., lat. 29°11' n., would be less than 1° south of 30°. Hence a sunrise of 5:04 is indicated for lat. 29° or 5:04 A.M., L.C.T. Reduce the L.C.T. to standard time by the precepts. The station (long. 82°7' w.) is 77' or 7.1° west of the 75° standard meridian; $7.1(+4^m) = +28^m.4$ or 28^m; $5:04 + 28^m = 5:32$ A.M., E.S.T. for sunrise at Ocala.

In the sun and moon tables, the data has to be given in LOCAL CIVIL TIME. This is *not* standard time, but has to be reduced to standard time.

To reduce local civil time to standard time, decrease the L.C.T. by 4^m for every degree the station is east of the standard meridian, or increase the L.C.T. by 4^m for every degree the station is west of the standard meridian.

Moonrise and moonset. For accurate results at any station in the U. S., three corrections are needed: (1) interpolation for latitude, (2) correction for longitudes west of 82½°, and (3) reduction to standard time.

(1) Interpolation for latitude follows the same method as for the sun.

(2) Use of the *a-factor*. The moon tables are exact for the given latitudes and for longitude 75° w. The *a-factor* adapts them to any longitude in the U. S. For observers in the eastern states and as far west as long. 82½° [Port Huron, Mich., Mans-

field, Ohio, Huntington, W. Va., Asheville, N. C., Tampa, Fla.], no *a-factor* is used. For stations in the 90° zone, between 82½° and 97½°, use the *a-factor* in the column "90°". The "*a-factor*, moonrise" is always to be added to the time of moonrise as derived from the main tables, and the "*a-factor*, moonset" is added to the time of moonset as derived. The boundary at 97½°, between the 90° and the 105° zones, runs through Grafton, N. Dak., Webster, S. Dak., Norfolk, Nebr., Salina, Kans., Oklahoma City, Okla., Fort Worth and Corpus Christi, Tex. Observers in the 105° zone, between 97½° and 112½° long., will use the "105°" *a-factor*, and those west of 112½° will use the "120°" *a-factor*, the eastern boundary (112½°) of the 120° zone going through Butte, Mont., Pocatello, Idaho, Panguitch, Utah, and Prescott, Ariz. These zones do not correspond to the irregular divisions of the standard-time belts.

(3) Change L.C.T. to standard time.

Ex., find moonrise time on May 24 at Newport News, Va., long. 76°26' w., lat. 36°57' (= 36°.95). (a) Moonrise for lat. 35° is 9:24 P.M.; for 40°, 9:35 P.M. The increase is +11^m. The station is 1.95/5 or 0.39 the distance between 35° and 40°. $0.39(+11^m) = +4^m.3$ or +4^m. $9:24 + 4^m = 9:28$ P.M., L.C.T. (b) No *a-factor* is indicated, the longitude being close enough to 75°. (c) Reduce to standard time. $76°26' - 75° = 1°26'$, hence Newport News is 1°26' or 1.43 w. of the 75° meridian. $1.43(+4^m) = +5^m.72$ or +6^m; $9:28$ P.M. + 6^m = 9:34 P.M., E.S.T., moonrise at Newport News.

Moon's transit. This data indicates the local civil time of the moon crossing the observer's meridian. The time is the same for all latitudes. It is nearly correct for all longitudes in the U. S.; for more exact work use—for every day—a mean *a-factor* of 2^m, 4^m, 6^m. That is, for the 75° zone, use no correction; for the 90° zone add 2^m to the time in the tables; for the 105° zone add 4^m; for the 120° zone add 6^m. Afterward, reduce the L.C.T. to standard time.

Longitude, Latitude, Time and Magnetic Declination of U. S. and Canadian Cities

The last column shows the magnetic declination or angle which the magnetic meridian makes with the true (geographic) meridian. The value being marked w or e, the north end of the compass needle points west or east respectively of true north by that number of degrees.

Morning and Evening Stars and Planets in 1959

MERCURY

Morning star, Jan. 1 to Feb. 14
 Evening star, Feb. 14 to Mar. 29
 Morning star, Mar. 29 to June 3
 Evening star, June 3 to Aug. 5
 Morning star, Aug. 5 to Sept. 17
 Evening star, Sept. 17 to Nov. 24
 Morning star, Nov. 24 to Dec. 31

VENUS

Evening star, Jan. 1 to Sept. 1
 Morning star, Sept. 1 to Dec. 31

MARS

Evening star, Jan. 1 to Oct. 30
 Morning star, Oct. 30 to Dec. 31

JUPITER

Morning star, Jan. 1 to May 18
 Evening star, May 18 to Dec. 5
 Morning star, Dec. 5 to Dec. 31

SATURN

Morning star, Jan. 1 to June 26
 Evening star, June 26 to Dec. 31

Mercury may be seen over the western horizon after sunset for about 10 days before and after eastern elongations of the sun, and similarly over the eastern horizon before sunrise around western elongation times. Eastern elongations occur Mar. 12 (Mercury in southern Pisces), July 8 (in Cancer, west of the sickle of Leo), and Nov. 3 (in Scorpius, west of Antares); western elongations occur Apr. 26 (northwestern Cetus), Aug. 23 (in Cancer, southeast of the Beehive star cluster), and Dec. 12 (in Libra, northwest of Antares). On Aug. 28 Mercury is very close to and just south of Uranus.

Venus is evening star for the first 8 months and as such is observable in the west after sunset. Beginning in Sagittarius in Jan., a few degrees east of the sun, it extends farther and farther from the sun until greatest elongation east on June 23 (in Leo, west of Regulus). Greatest brilliancy occurs July 26. On Sept. 1 it becomes morning star and is seen afterward in the east before sunrise. Greatest brilliancy occurs again Oct. 8 in Leo, a few degrees southeast of Regulus; it will be found then rising earlier and earlier before the sun. On Aug. 10 Venus and Mars are in conjunction, Venus being south of Mars.

Mars is evening star for the first 10 months, setting after the sun. From Jan. 1 to early Apr. it is in Aries and Taurus, being north of Aldebaran on Mar. 4. From

Apr. to late Aug. it is in Gemini, Cancer, and Leo, being north of Regulus on July 19. In Sept. and Oct. it is in Virgo, passing north of Spica on Oct. 10. Beginning Oct. 30 it becomes morning star, rising before the sun. By mid-Dec. it is at the Scorpius-Ophiuchus border, north of Antares. On June 14, Venus and Mars are in conjunction, Venus being north of Mars.

Jupiter, as morning star for the first 4 months or more, is found in Libra. It is brightest in the latter part of May. From June to Dec. it is in the evening sky after sunset, going north of Antares in mid-Nov. On Nov. 7, Mercury is in conjunction with Jupiter and south of the latter.

Saturn, until late June, is morning star in Sagittarius, northwest of the dipper; it is in about the same position for the whole year, its color being a dull, greenish yellow.

Uranus is near the Cancer-Leo boundary during the year, between the Beehive star cluster and Regulus. It can be observed, when the sun is not too near, with low-power optical aid. On June 19 Venus passes north of Uranus in conjunction, and on June 23 Mars passes just north of Uranus. *Neptune* is at the Virgo-Libra border all the year, and visible in a small telescope. On Dec. 14, Venus is in conjunction with and just north of Neptune. *Pluto* is in Leo in 1959, a few degrees east of Gamma Leonis, but is observable only in a large telescope.

The Sun

There are countless millions of far distant, superheated, self-luminous gaseous bodies called stars and each one is in itself a sun. Our Sun—the star around which our whole solar system revolves—is at a mean distance of 93,003,000 miles from the Earth, has a diameter of 865,390 miles, a surface temperature of about 11,000° F. and an interior temperature estimated at millions of degrees. It has a surface area approximately 12,000 times that of the Earth and in volume or bulk it is about 1,306,000 times the size of the Earth. It is a star of average size and temperature.

The Sun rotates on its axis and, by observation of Sun-spots (great whirling storms in the Sun's atmosphere) and Faculae (bright streaks or areas on the Sun's surface), astronomers have discovered that the rotational speed varies from approximately 24½ days at its equator to approximately 34 days near its poles. The Sun is just one star of the great Milky Way Galaxy that is rotating on its galactic axis at a rate that gives the Sun a galactic traveling speed of 175 miles per second. Furthermore, the Sun is moving toward a point known as "the apex of the Sun's way" in the constellation Hercules at a speed of about 12 miles per second.

What we see when we look at the Sun is the glowing surface called the Photosphere. Extending above this surface is the

Sun's atmosphere consisting of two layers, one extending outward for a few hundred miles from the Sun's surface and called the Reversing Layer for spectroscopic reasons, the other an outer layer extending several thousand miles and called the Chromosphere because of its reddish color due mostly to superheated hydrogen, helium and calcium. Solar "prominences" occasionally burst out from this layer and extend hundreds of thousands of miles above the Sun's surface. Beyond these layers of solar atmosphere and extending to great height is the outermost observable solar feature, the magnificent Corona of exceedingly slight density that provides an awesome spectacle for observers during total eclipses of the Sun.

Comets

In ancient times comets were supposed to be omens of sudden death, war, revolution or other dire events in human affairs and practically nothing was known of their true nature. They still offer puzzling problems to modern astronomers and, with about 1000 listed, new ones are being discovered and charted each year. In general, comets consist of a nucleus (sometimes lacking) surrounded by a head or "coma" (from the Greek word for hair because of its hazy appearance) from which extends the great tail that makes the passage of a comet through our skies such a striking

spectacle. Comets come in varying sizes but the average diameter of the heads of a large number of observed comets is about 80,000 miles and the tail length may stretch out to more than 100,000,000 miles. The density of comets is so low, however, that we can see the stars through them and there is more actual material in one cubic inch of ordinary air than in 2000 cubic miles of the tail of a comet.

The luminous tails of comets were believed, for many centuries, to be merely clouds high in our atmosphere. Tycho Brahe, eccentric Danish astronomer, proved that the comet he observed in 1577 was a celestial object far beyond the limit of the Earth's atmosphere. But the great forward step in the study of comets came when Edmund Halley, who became England's Astronomer Royal, carefully observed a comet in 1682, checked with previous observations, calculated its orbit and pre-

dicted its return to our skies in 1758 or 1759. Halley died in 1742 but the comet now named after him, reappeared on schedule and a search through ancient records indicated that it had been observed in repeated appearances as far back as 240 B.C. Its last appearance was marked by its perihelion passage in 1910 and its next visit to our skies will occur in 1986. Halley's fulfilled prediction was the first definite proof that comets have regular orbits and time schedules or are, as the astronomer says, "periodic". The known "periods" (time intervals between appearances) of comets vary from the 3.3 years of Encke's Comet to thousands of years for wider travelers. No known great comets are scheduled for appearance in our sky this year.

A curious thing about comets is that their tails always trail from the head in direction away from the Sun, so that when a comet is moving away from the Sun, the

tail stretches out in front of the head. A comet's tail is so tenuous as to be almost a vacuum. The Earth passed through the tail of Halley's Comet in May, 1910, and on that occasion astronomers heard nothing, felt nothing and saw nothing to indicate that such passage had any observable effect on the Earth.

The Polar Auroras

It has been definitely established that Sun-spots are the direct cause of the greatest electrical show on Earth, a double feature, the Aurora Borealis (Northern Lights) and the Aurora Australis (Southern Lights). Sun-spots are magnetic storms of vast dimensions on the surface of the Sun and they shoot out electrified particles into space. Those that come toward the Earth are drawn toward the Earth's magnetic poles and consequently these magnetic poles are the radiating centers of those spectacular electromagnetic displays in the sky that we commonly call the "Northern Lights" or the "Southern Lights", depending upon whether we see them in the northern or southern hemisphere. The electrical particles from the Sun-spots strike the upper regions of our atmosphere where the component gases (nitrogen, oxygen and extremely minor amounts of argon, helium, neon, hydrogen and carbon dioxide) are very much rarefied and cause them to vibrate and glow in colors characteristic of the various elements, just as a neon sign glows when an electric charge is passed through it. The Sun-spots that cause auroral displays also cause the magnetic storms that interfere with radio reception, telephone, telegraph and cable traffic and other electromagnetic devices such as compasses and various aviation accessories.

There is an almost infinite variety to the auroral display. The lights may sweep across the sky in waves, in streamers or in folds like draped curtains. Or it may be a stationary glow. Sometimes there is little or no color in these waves, sheets or streamers of light. At other times the lights may be rich in red or green or pastel shades. Rose color and lavender and violet and purple are common. Blue is rare but has been seen. The "Northern Lights" have been seen as far south as New Orleans and the Florida peninsula and the "Southern Lights" have been seen as far north as New Zealand and Australia, but the maximum occurrence of these auroral displays is along the borders of the Arctic and Antarctic regions. Since these are atmospheric displays, our atmosphere must extend to the extreme height at which auroral lights are observed. Prof. Carl Störmer of the University of Oslo found this to be about 600 miles. He further found that no auroral lights came closer to the Earth's surface than 50 or 60 miles.

The Change of Seasons

It is enough to state that the earth is nearer to the sun in January than it is in July to convince those who live in the northern hemisphere that there must be some other explanation than that for the seasonal changes on our globe. The reason for the change in seasons is that the axis of rotation of the earth is inclined to the perpendicular of the plane of its orbit around the sun at an angle of approximately $23\frac{1}{2}^{\circ}$, so there is a proportional shifting of the angle of the sun's rays falling on different portions of the earth's surface at different times of the year.

On or about June 21, the north end of the earth's axis is inclined to its limit toward the sun. In the northern hemisphere this is our summer solstice. We then have our longest daylight period and a maximum of heat and light from the sun, whose perpendicular rays are falling on the Tropic of Cancer, $23\frac{1}{2}^{\circ}$ north of the equator. Six months later, on or about Dec. 22, the earth has reached a position in its orbit that finds the north end of its axis inclined at its maximum away from the sun. This is our winter solstice. We then have our shortest daylight period and a minimum of heat and light from the sun, which is over the Tropic of Capricorn, $23\frac{1}{2}^{\circ}$ south of the equator. Conditions are reversed in the southern hemisphere for obvious reasons. Their winter is our summer; their summer is our winter. Twice a year, at the equinoxes in March and September, the sun is on the equator, the day is of equal length all over the world and each hemisphere receives the same amount of light and heat from the rays of the sun.

If the effect in the change of the angle of the sun's rays on the earth's surface were instantaneous, our coldest period would be at the winter solstice and our warmest period at the summer solstice, but because of the blanket of atmosphere

around the earth and the cumulative effect in the heating or cooling of the earth's surface, we have "the lag of the seasons", which brings our warmest and coldest periods some 5 or 6 weeks after the sun is "farthest north" or "farthest south".

Seasons for the Northern Hemisphere, 1959

Eastern Standard Time

March 21, 3:55 A.M., sun enters sign of Aries; spring begins.
 June 21, 10:50 P.M., sun enters sign of Cancer; summer begins.
 Sept. 23, 2:09 P.M., sun enters sign of Libra; autumn begins.
 Dec. 22, 9:35 A.M., sun enters sign of Capricornus; winter begins.

* Period of revolution around the earth. † This is the rotation at the equator. ‡ Rotation of Venus is uncertain but is probably a few weeks. § The equatorial diameters of the earth, Jupiter, and Saturn are given; polar diameters are: earth, 7900.0 mi., Jupiter 82,789 mi., Saturn 67,170 mi.

SATELLITES: The number of known moons in the solar system is now as follows: for the earth 1; Mars 2; Jupiter 12; Saturn 9; Uranus 5; Neptune 2.

OTHER DATA ON THE EARTH: Equatorial circumference, 24,902.4 mi.; total area, 196,949,970 sq. mi.; mass, 6.6 sextillion tons; mean diameter, 7,917.8 mi.

The Moon

Mars has 2 small satellites or moons, Jupiter has 12, Saturn 9, Uranus 5, and Neptune 2; but the earth has one comparatively large satellite, commonly called the moon. It is a globe 2,160 mi. in diameter with a surface deeply pitted by great craters. It has no atmosphere that astronomers can detect and shines only by reflected light of the sun. Though it seems very bright to us at "full moon," it reflects only about 7% of the light from the sun.

The orbit of the moon is elliptical, with the earth at one focus. The distance of the moon from the earth varies from 221,463 mi. (perigee) to 252,710 mi. (apogee), the average being 238,857 mi. The curious thing about the moon is that it revolves around the earth in 27 days, 7 hr., 43 min., 11.47 sec., and rotates on its axis in exactly the same time, which is why we always see the same side of the moon. Because of what are known as "librations in latitude and

longitude" and also a "diurnal libration," we do see "around the edge of the moon" at different times. In this manner a total of 59% of the moon's surface has been observed, but the other 41% never has been seen by the human eye.

Although the moon revolves around the earth in approximately 27½ days, it is, on the average, a matter of 29½ days (29 days, 12 hr., 44 min., 2.78 sec.) from one new moon to the other, because the earth is moving around the sun while the moon is moving around the earth and the "new moon" depends upon the relative positions of the 3 bodies.

If the planes of orbit of the earth and the moon coincided, there would be an eclipse of the moon at every "full moon" and an eclipse of the sun at every "new moon," but the 5° angle between the planes of orbit of the earth and the moon causes the moon on most of its revolutions to miss the earth's shadow and the moon's

shadow on most trips to miss falling onto the earth.

The tidal effects of the moon are well known. The "spring tides" occur at the "full moon" and "new moon" and the "neap tides" at first quarter and last quarter.

Meteors and Meteorites

Meteorites are meteors that have come down to Earth. Meteors are masses of mineral or metal or both that plunge into the Earth's atmosphere at great speed and become incandescent from the resultant friction so that they are seen in the sky as "fireballs" (bolides) or "shooting stars". The "fireballs" are the larger, make a greater flash across the sky and sometimes explode. Meteors come in all sizes but most of them verge on the microscopic and burn up completely in the flash that makes them visible from 40 to 60 miles above the Earth's surface. Millions of them enter our atmosphere every twenty-four hours and probably not more than one or two a day survive to strike the ground as meteorites.

The largest meteorite ever found is located near Grootfontein, Southwest Africa, and its weight is estimated between 50 and 70 tons. The second largest meteorite (the Ahnighito, weight 34 tons) was found by Admiral Peary, Arctic explorer, at Cape York, Greenland, and is now on exhibition in the Hayden Planetarium, New York City. The largest meteorite found on United States soil is the Willamette (weight 15½ tons), which fell near Portland, Oreg., and is now in the American Museum of Natural History, New York City.

Craters produced by the fall of meteorites have been found in many countries. The first to be recognized and the largest known is Meteor Crater in Arizona, a depression about 4,000 feet in diameter, about 600 feet deep, and with exterior walls rising 150 feet above the surrounding plain. Me-

teor craters have been found near Odessa, Texas; Haviland, Kansas; in the Arabian Desert; in Central Australia and—a notable group of fifty or more—in the region of the Stony Tunguska River in northern Siberia.

Many meteors travel in swarms, believed in some cases to be disintegrated comets. The Perseid shower that occurs annually Aug. 10-14 is thought by some astronomers to be all that remains of Tuttle's Comet and the Leonid shower, which reaches a maximum in mid-November every 33 years, similarly is suspected of being what is left of Tempel's Comet. The Leonid shower of 1833 was the greatest meteor display of which astronomers have record.

Eclipses in 1959

(1) *Partial eclipse of the moon*, Mar. 24-25, visible in general in Asia, Australia, Africa, Europe, and Antarctica. The eclipse is a small one, only 0.3 of the moon's diameter being in the deep shadow at mid-eclipse, which occurs Mar. 25, 0:11 A.M., 60th-meridian-east standard time.

(2) *Annular eclipse of the sun*, Apr. 8 (Australian time). The path of the annular phase begins in the Indian Ocean, southwest of Australia, extends across Australia from the southwest corner (at Perth) to the northeastern region (at Cooktown), across the southern part of the Solomon Islands, and ends in the Pacific Ocean. The maximum duration of eclipse (7^m26^s) will occur in northeastern Australia. From stations along the central line, a rim of the sun equal to 0.07 of the solar radius will be seen to encircle the black silhouette of the moon. Partial phases may be visible from most of the islands of Australasia, New Zealand, and east Antarctica.

(3) *Total eclipse of the sun*, Oct. 2. The path of totality extends from central New England across the Atlantic Ocean, enters

the African coast at Rio de Oro, takes a southeasterly and eastward course, leaving the coast at the Italian Somaliland. The maximum duration of eclipse (3^m2^s) occurs in French West Africa. On our east coast mid-eclipse occurs around sunrise. Totality will be witnessed from Cambridge, Mass., and near-totality from stations north and south of that point. At New York, 0.93 of the sun's disc will be eclipsed, and the end of the eclipse will be seen from Maine to Florida.

Important Meteor Showers

Date	Meteor stream	Radiant in constellation
Jan. 1-4	Quadrantids	Boötes
Feb. 5-10	Alpha Aurigids	Auriga
Mar. 10-12	Zeta Boötids	Boötes
Apr. 19-23	Lyrids	Hercules

Aug. 21-31	Zeta Draconids	Draco
Sept. 22	Alpha Aurigids	Auriga
Oct. 2	Quadrantids	Boötes
Oct. 9	Giacobinids	Draco
Oct. 18-23	Orionids	Orion
Nov. 14-18	Leonids	Leo
Dec. 10-13	Geminids	Gemini

The Atmosphere

The atmosphere of the Earth—the blanket of air that surrounds our globe and is essential to life—is of interest to astronomers because of its effect on the light that comes to us from heavenly bodies. Air has weight and volume. It refracts (bends or changes the direction of) light rays that enter it. Due to this refraction, we are able to see the Sun and the Moon before they rise and after they set. The "twinkling" of the stars is caused by convection currents in the air that have a rapidly changing refractive effect on the light from the stars. Our twilight is produced by the diffusion in the atmosphere of light from the Sun when it is below the horizon. Meteors become visible when they are heated to incandescence by friction with the atmosphere when, from outer space, they plunge into it at terrific speed.

Prof. Carl Störmer of the University of Oslo measured the height of the atmosphere and found it to be more than 600 miles, but about half of it by weight is below 18,000 feet. Although we may remark blandly that something is "as light as air," the Earth's atmosphere in bulk is of such enormous weight that at sea level it exerts a pressure of approximately 14.7 pounds per square inch. At higher levels, of course, the pressure is less.

Chemically, the atmosphere is composed of nitrogen (approximately 78 per cent by volume), oxygen (approximately 21 per cent by volume), and extremely minor amounts (about 1 per cent in all by volume) of argon, neon, helium, hydrogen and carbon dioxide. There is also present in the air a varying amount of water vapor, which is known as humidity and is distressing when the percentage is high in warm weather.

WORLD HISTORY

A GUIDE TO MAIN HISTORICAL, POLITICAL, ECONOMIC, GEOGRAPHIC AND SOCIAL FACTS

Prepared by the Editorial Staff of the
INFORMATION PLEASE ALMANAC

In consultation with the Editorial Staff of
ENCYCLOPAEDIA BRITANNICA

For current information on all countries, see **WORLD POLITICS TODAY**.

Afghanistan (Kingdom)

Area: 250,966 square miles.*
Population (est. 1953): 12,000,000*
(Pushtu, 60.5%; Tajik, 30.7%; Uzbek, 5%;
Mongolian and others, 3.8%).
Density per square mile: 51.8.
Ruler: Mohammed Zahir Shah.
Prime Minister: Mohammed Daud Khan.
Principal cities (est. 1953): Kabul, 310,-
000 (capital); Kandahar, 195,000 (trading
center); Herat, 150,000 (farming center).
Monetary unit: Afghani.
Languages: Pushtu (official), Persian.
Religion: Mohammedan (Sunni, 90%;
Shiah, 10%).

* Unofficial estimate (no census ever taken).

HISTORY AND GOVERNMENT. Wedged between Pakistan, Iran, and the U.S.S.R. in southwestern Asia without outlet to the sea, Afghanistan did not become an independent state until 1747. Previously, it had been either a cluster of small states under nominal Arab rule, part of Mongol or Mogul empires, or dismembered among India, Persia, and the Uzbeks.

In 1880, Great Britain recognized Abdur Rahman Khan as Emir and gave him an annual subsidy of more than \$500,000 to delegate management of his foreign relations to Britain.

On Aug. 8, 1919, a treaty was signed making Afghanistan free and independent of all British control. The country maintained strict neutrality in World War II, and was admitted to the United Nations in Nov. 1946.

Under the Constitution, promulgated in 1932, authority is vested in the sovereign and Parliament, which has a Senate of fifty members, who are named for life by the

sovereign, and a National Assembly of 171 elected members. Executive power is exercised by the sovereign and Cabinet headed by the Prime Minister.

ECONOMIC CONDITIONS. Only a fifth of the soil is under cultivation, the greater part of the country being mountainous and rocky. Farming is confined to the fertile valleys and plains, sometimes with the aid of irrigation. Two crops a year are usually grown. Important ones include fruits and nuts, castor beans, cereals, madder, tobacco, cotton and vegetables. Wheat is the staple food. The fat-tailed indigenous sheep is a principal source of meat and wearing apparel.

Industry is still in a primary stage of development. Manufactures include cotton and woolen textiles and clothing, soap, leather, matches, beet sugar and furniture.

Among the leading exports are karakul skins (mostly to the U.S.), cotton, wool, rugs, carpets, spices and dried fruits. Most of the trade normally is carried on through Pakistan; wool and cotton are exported to the U.S.S.R. in return for consumers' goods.

Afghanistan has no railways or navigable streams. Camels and pack horses are still used by the natives, but motor transport is of increasing importance.

Both mineral and forest resources are largely unexploited. There are deposits of beryllium, chromite, coal, copper, gold, iron ore, lapis lazuli, oil, silver and sulfur.

NATURAL FEATURES. Afghanistan, approximately the size of Texas, is split east to west by the Hindu Kush range of the Himalayas, rising in the east to heights of 24,000 feet. Except in the southwest, most of the country is covered by high snow-capped mountains and deep valleys.

Albania (People's Republic)

(Republika Popullëre e Shqipërisë)

Area: 11,100 square miles.

Population (1956): 1,421,000 (Albanian 99.8%; others, .2%).

Density per square mile: 125.6.

Chairman of Presidium: Hadji Leshi.

Premier: Mehmet Shehu

Principal cities (est. 1949): Tirana, 80,000 (capital); Scutari, 30,000 (northern trading center); Koritsa, 28,000 (farming center).

Monetary unit: Lek.

Language: Albanian.

Religions (est. 1953): Moslem, 65%; Greek Orthodox, 23%; Roman Catholic, 11%; others, 1%.

HISTORY AND GOVERNMENT. After the fall of the Roman Empire, Albania became part of the Byzantine Empire and was successively invaded by Goths, Serbs, and Bulgarians. From 1014 to 1204 it was again under Byzantine rule. An alliance of Albanian chieftains (1444-66) under Skanderbeg failed to halt the advance of the Turks, and the country remained under at least nominal Turkish rule for more than four centuries, until it proclaimed its independence on Nov. 28, 1912.

During World War I Albania was variously occupied by Italian, Greek, French, Serb and Austro-Bulgarian forces. On Aug. 2, 1920, Italy recognized Albanian independence and evacuated the country. In 1927, after concluding pacts which placed Albania in Italy's sphere of influence, Zogu, President of the new Albanian republic since 1925, proclaimed himself King Zog I.

During the Greco-Italian war of 1940-41, the Greek armies pushed the Italians back from the Albanian border and occupied a large part of southern Albania. When Germany attacked Greece and Yugoslavia in April, 1941, however, the Greeks withdrew quickly, and the Axis occupation of Albania was complete.

Albania was free of the Axis yoke by the end of 1944, and a leftist provisional government under Colonel General Enver Hoxha was established.

Under its 1945 Constitution, Albania has a typical Soviet government. Supreme power is vested in the popularly elected National Assembly, to which the Cabinet, headed by the Premier, is responsible.

ECONOMIC CONDITIONS. Albania is still a primitive country where each family tries to provide most of its own needs. Nearly the whole population is engaged in combined farming and stock-raising. Only a small portion of the central part is fit for tilling. Corn is the chief crop. Others are wheat, tobacco, oats, barley, rye, spelt, olives, and citrus fruit. Factories produce food products, cement and textiles; a large dam and power station was completed near Tirana in 1950.

Albania's postwar trade has been limited for the most part to the Soviet bloc. Important exports include crude oil, copper and chrome ore.

Mineral wealth, thought to be considerable, is relatively unexploited. The principal mineral is petroleum. Others include asphalt, bitumen, bauxite, chromite, copper, lignite, and pyrites.

NATURAL FEATURES. Albania is a mountainous state, largely over 3,000 ft. above sea level, with a narrow marshy coastal plain crossed by several rivers. The interior mountain plateaus and basins contain the centers of population.

Arabia

POLITICAL DIVISIONS OF ARABIA

Name	Area (sq. mi.)	Population (est. 1955)
Aden colony (British)	108	138,441†
Aden protectorate*	112,000	800,000
Bahrain Islands		
(Sultanate)*	231	120,000
Kuwait (Sheikdom)*	8,000	200,000§
Oman and Masqat		
(Sultanate)*	82,000	550,000
Qatar (Sheikdom)*	8,500	35,000
Saudi Arabia		
(Kingdom)	617,760	7,000,000†
Trucial Coast (Sheikdoms)*	5,792	80,000
Yemen (Kingdom)	75,290	4,500,000

* British protectorate. † 1955 census. ‡ Estimate 1952. § Estimate 1954.

The Arabian peninsula is at the southwest extremity of Asia. Its rich oil deposits and proximity to Palestine gave it special importance after World War II. Once a political unit, today it consists of the kingdoms of Saudi Arabia and Yemen, the British colony of Aden and six British protectorates.

The peninsula, with an area more than three times that of Texas, and an extreme length of 1,400 miles, is generally a plateau sloping gently eastward from a mountain range that averages 5,000 feet in elevation and runs along its entire west side within ten or fifteen miles of the Red Sea. The range reaches a maximum of 12,336 feet in Yemen to the southwest. Arabia has no rivers and no forests and is principally a desert dotted with many oases.

Mohammed united all Arabs in the seventh century A.D., and his followers, led by the caliphs, founded a great empire with its capital at Medina. Later, the caliphate capital was transferred to Damascus and then Baghdad, but Arabia retained its importance because of the holy cities of Mecca and Medina. In the sixteenth and seventeenth centuries, the Turks established at least nominal rule over much of

Arabia, and in the middle of the eighteenth century it was divided into separate principalities.

Through agreements with local rulers, the British extended their rule over the southern and eastern coasts in the nineteenth century. At the same time, the Wahhabis, a religious sect advocating strict adherence to Mohammed's teachings, gained control over most of central and eastern Arabia, and their work was the beginning of the present Saudi Arabia.

Aden and Bahrein Islands. See
British Commonwealth: Asia

Kuwait (Sheikdom)

Kuwait, on the northwestern shore of the Persian Gulf, is an independent state ruled by Sheik Abdullah as-Salim as-Subah. British protection, first exercised in 1898, has several times prevented it from being absorbed by Saudi Arabia. The territory surrounding Al Kuwait, its port, is largely desert; its trade consists of exchanging Arab goods from the interior for textiles, rice, sugar, and other necessities. Kuwait's petroleum reserves, estimated at 9 billion barrels, are under concession to the Kuwait Oil Co. Ltd. (owned jointly by Gulf Oil Corp. and British Petroleum Co. Ltd.), which pays one-half its profits to the Sheik. Production, which began only in 1945, totaled 400,468,382 barrels in 1956. Production is concentrated at the Burgan field, from which petroleum is piped to the new port of Ahmadi for shipment.

South of Kuwait on the Persian Gulf is the Saudi Arabian-Kuwait neutral zone, which under the Treaty of Uqair (1922) belongs in undivided one-half interest to Kuwait and Saudi Arabia. It consists of about 2,000 sq. mi. of uninhabited desert. Oil was discovered in 1953 by American Independent Oil Co. Production totalled 11,724,585 barrels in 1956.

Oman and Masqat (Sultanate)

Occupying the mountainous southeastern part of the peninsula, Oman is nominally an independent state under the rule of Sultan Sayyid Sa'id bin Taimur. It has been under British protection since the nineteenth century. The state is best known for its date cultivation, and its riding camels are considered the best in the world. Trade is mainly to and from India. The capital is Masqat (population 1954: 5,500).

Qatar (Sheikdom)

Qatar occupies the whole of the Qatar peninsula in the Persian Gulf. It is ruled, under British protection, by Sheik Ali bin Abdullah al-Thani. The whole area is claimed by Saudi Arabia. Oil deposits are being exploited by a subsidiary of the Iraq Petroleum Co.; output in 1956 was about 45,147,600 barrels.

Saudi Arabia. See page 775.

Trucial Coast (Sheikdoms)

This area, extending along part of the Gulf of Oman and the southern coast of the Persian Gulf, is ruled by seven semi-independent sheiks. Treaties signed with Britain in 1853 and 1892 provided that the sheiks should not cede or sell any part of their land to any other power.

Yemen. See page 788.

Argentina (Republic)

(República Argentina)

Area: 1,084,359 square miles.

Population (est. 1957): 19,858,000 (approximately 97% of European descent, chiefly Spanish and Italian; 3% Indian and other).

Density per square mile: 18.0.

President: Arturo Frondizi.

Principal cities (est. 1955): Buenos Aires, 3,555,000 (capital and chief port); (est. 1950) Rosario, 467,937 (flour milling); Córdoba, 369,886 (northwest farming center); Avellaneda, 278,621 (industrial suburb of Buenos Aires); La Plata, 207,031 (seaport, meat packing); Lanús, 244,473 (suburb of Buenos Aires).

Monetary unit: Peso.

Languages: Spanish (official), Italian.

Religions (census 1947): Roman Catholic, 92.7%; Protestant, 1.9%; Jewish, 1.6%; others and unknown, 3.8%.

HISTORY. Discovered in 1516 by Juan Díaz de Solís, Argentina developed slowly under Spanish colonial rule. Buenos Aires was settled in 1580; the cattle industry was thriving as early as 1600.

Invading British forces were expelled in 1806-07, and when Napoleon conquered Spain, the Argentinians set up their own government in the name of the Spanish King in 1810. On July 9, 1816, independence was formally declared.

President Hipólito Irigoyen (1916-22) refused to abandon Argentinian neutrality in World War I. Re-elected in 1928, Irigoyen, a radical, was ousted two years later by a conservative revolution led by General José Uriburu. The latter's successor, General Agustín Justo (1932-38) followed a moderate policy and undertook a large public works program.

Argentina proclaimed neutrality at the outbreak of World War II, but in general co-operated in hemispheric defense programs. In the closing months of the war, the nation declared war on the Axis (March 27, 1945) and signed the Act of Chapultepec the following April 4. Diplomatic recognition and admission to the

U. N. followed. Juan D. Perón, then an army colonel, emerged as strongman and won the 1946 presidential elections. Perón was re-elected in 1951.

Long-smouldering opposition, fanned by worsening relations with the Catholic Church, finally resulted in Perón's overthrow in Sept. 1955 in a coup led by the armed forces. Perón fled to exile and his party as well as Congress was dissolved. (For an assessment of the Frondizi regime, see *World Politics* section.)

GOVERNMENT. Argentina is a federal union of 22 provinces and the federal district. Under the Constitution of 1853 (restored by decree on May 1, 1956), the President and Vice President are elected every 6 years by electors who are chosen by direct vote. The President appoints his Cabinet. The Vice President presides over the Senate but has no other powers. Neither is eligible for immediate re-election. The Congress has two houses—a 46-member Senate elected by the provincial legislatures for 9-year terms and a Chamber of Deputies popularly elected for 4-year terms.

Each province has its own constitution, elected governor, legislature and judiciary, but the President may in a crisis take over the local government.

ECONOMIC CONDITIONS.

Agriculture. A farming and stock-raising nation, Argentina devotes some 40% of its area to pasture and 10% to cultivation. Cotton, sugar cane and fruits are important, and Argentina is the world's largest producer of yerba maté (Paraguay tea), the national beverage. The 1956 wine production (preliminary) was 354,300,000 gallons (1951-55 average: 412,000,000 gallons).

Cattle raising predominates on the pampas, especially in Buenos Aires province. Sheep raising is more important in Patagonia. In 1956 there were 45,400,000 cattle, 43,866,636 sheep, 3,858,475 pigs, 4,848,785 horses. Wool production in 1955 was about 355,000,000 lb., greasy basis.

Manufacturing. Industrial expansion was accelerated during World War II by the shortage of imports, but industry is still closely allied to agriculture. The principal industry is meat packing, followed by flour milling, textiles, sugar refining, dairy products, quebracho extraction and wine. Jeep production was started in 1956 and a steel plant is under construction at San Nicolas.

Trade. Leading exports in 1956 were cereals and linseed (31%), meat (26%), wool (13%), and hides (7%); leading imports, machinery and vehicles (23%), fuel and lubricants (12%), and iron and steel and manufactures (8%). Leading customers were the United Kingdom (23%), the U. S. (12%), Germany (12%), and Italy

(6%); leading suppliers, the U. S. (20%), Germany (10%), Brazil (7%), and Venezuela (7%).

NATURAL FEATURES AND RESOURCES. Second in South America to Brazil in size and population, Argentina is a plain, rising from the Atlantic to the Chilean border and the towering Andes peaks, including Aconcagua, 22,835 feet, the highest peak in the world outside Asia. The northern area is the swampy and partly wooded Gran Chaco. South of that are the rolling, fertile pampas, rich for agriculture and grazing, and supporting most of Argentina's population. Next southward is Patagonia, a region of cool, arid steppes with some wooded and fertile sections. The eastern part of Tierra del Fuego, the island southern tip of South America, belongs to Argentina.

The three great rivers which make up the Plata system—the Paraná, Paraguay and Uruguay—are important commercial arteries in northern Argentina. Rosario and Santa Fé, 260 and 360 miles respectively above Buenos Aires on the Paraná, are accessible to ocean vessels.

Minerals. Argentina must import most of nearly every mineral it uses. Oil is produced in Patagonia (1956: 31,080,000 barrels). The government announced discovery of uranium deposits in Feb., 1947. Imports of fuels and lubricants totaled 9,993,900 metric tons in 1956.

Forests. The Gran Chaco area is the world's chief source of quebracho extract. Total exports of this tanning agent obtained from quebracho logs in 1954 were 153,000 metric tons, part of which was re-exported from Paraguay.

Austria (Republic) **(Republik Österreich)**

Area: 32,374 square miles.

Population (est. 1956): 6,983,000 (practically all Austrian).

Density per square mile: 215.7.

President: Dr. Adolf Schärf.

Chancellor: Julius Raab.

Principal cities (census 1951): Vienna, 1,766,102 (capital, industrial center); Graz, 226,453 (industrial center); Linz, 184,685 (industrial center); Salzburg, 102,927 (tourist center); Innsbruck, 95,055 (tourist center).

Monetary unit: Schilling.

Language: German.

Religions (census 1951): Roman Catholic, 89%; Protestant, 6%; others, 5%.

HISTORY AND GOVERNMENT: (See *World Politics* section.)

ECONOMIC CONDITIONS. Agriculture employs approximately one-third of the population but the country is heavily dependent on imported foodstuffs. Mixed

farming predominates. Rye and wheat are the leading cereals. Stock raising and dairy farming both in the Alpine pastures and the lowlands of the east are of importance.

Austria is primarily an industrial country, with 41% of the population engaged in industry. Most important are the metallurgical, engineering, textile and food processing industries. Medium- and small-sized firms with specialized lines predominate, although a few large enterprises exist. Nationalized plants employ about one-fifth of the industrial labor force. The major steel and aluminum plants are in Upper Austria.

Leading exports in 1956 were iron and steel and other metals (23%), timber (21%) and machinery, electrical equipment and vehicles (13%); leading imports, machinery, electrical equipment and vehicles (20%), food (15%) and mineral fuels (14%). Leading customers were Western Germany (23%), Italy (17%), Switzerland (6%), and the United Kingdom (5%); leading suppliers, Western Germany (34%), the U. S. (13%), Italy (8%), and the United Kingdom (8%).

NATURAL FEATURES AND RESOURCES. Austria covers an area about equal to that of Scotland and includes much of the mountainous territory of the eastern Alps (about 92.3 per cent of the country). The country contains many snowfields, glaciers, and snow-capped peaks. The principal river is the Danube. Forests and woodlands cover about 40%.

Austria possesses valuable mineral resources. In Styria lies one of the largest European deposits of iron ore. Copper is mined in Salzburg, Tyrol, and Lower Austria, and lead and zinc in Carinthia. Large supplies of coal and coke must be imported, but extensive water power resources are available for exploitation. Petroleum fields are in the Zistersdorf and Mühlfeld areas, both in eastern Austria.

Belgium (Kingdom)

(Royaume de Belgique—
Koninkrijk België)

Area: 11,779 square miles.*

Population (est. Dec. 31, 1956): 8,951,443 (Wallon, Flemish).

Density per square mile: 759.9.

Sovereign: Baudouin I.

Premier: Achille van Acker.

Principal cities (est. 1956, including certain suburbs): Brussels, 985,793 (capital); Antwerp, 611,035 (port and commercial center); Liège, 445,378 (iron and steel); Charleroi, 281,541 (industrial center); Ghent, 229,937 (textiles).

Monetary unit: Belgian franc.

Languages (est. 1954): Flemish, 50%; French, 34%; Flemish and French, 15%; German, 1%.

Religion: Predominantly Roman Catholic.

* Including areas taken over from Germany in 1949.

HISTORY. Perhaps the earliest mention of the Belgians in history was in 57-50 B.C., when they were conquered by Julius Caesar. In the Middle Ages the Belgian towns became wealthy and virtually autonomous as great textile centers. Belgium became part of Burgundy in 1385 and, later, part of the Spanish domains of Charles V. By the Treaty of Utrecht, in 1713 Belgium went to Austria, though retaining its autonomy, and from 1792 to 1815 it held a similar status under France. (For recent history and structure of government see *World Politics* section.)

ECONOMIC CONDITIONS. *Agriculture.* About 60% of the total area of Belgium is under cultivation, and one-half the farmed area is devoted to forage crops.

Other crops are fodder beets, flax and fruit. The pastoral industry, especially dairy farming, flourishes. On Jan. 1, 1957, Belgium had 2,254,924 cattle, 1,276,437 hogs, 175,003 horses and 37,540 sheep.

Manufacturing. Belgium is one of the most highly industrialized nations in Europe, largely because of vast, readily accessible coal reserves. Industry chiefly processes imported raw materials for re-export in semifinished or finished form. Of primary importance are iron and steel, nonferrous metals, fabricated metal products and textiles. Associated with iron and steel is a considerable engineering industry, shipbuilding in Antwerp, and machinery and railway stock in Brussels. The centuries-old textile industry produces linen (Courtrai); cotton (the southeast); and synthetic fibers. Antwerp, using the output of mines in the Congo and Angola, rivals Amsterdam in diamond cutting.

Chief customers in 1956 were the Netherlands (22%), France (11%), western Germany (10%), the U. S. (10%) and Britain (6%). Leading sources of imports were western Germany (15%), the Netherlands (13%), the U. S. (12%), France (12%) and Britain (8%). Chief exports were iron and steel and products (28%), thread and fabric (7%), coal, coke and petroleum and products (6%), copper and products (5%) and precious stones and metals (5%).

NATURAL FEATURES AND RESOURCES. The northern third of Belgium is a plain extending eastward from the coast of the North Sea. North of the Sambre-Meuse Rivers is a low plateau, varying from 250 to more than 600 feet in height, and to the south lies the Ardennes plateau,

rising to a maximum of about 2,300 feet. The shallowness of the North Sea off Belgium precludes the development of good harbors; some of the port advantages of Antwerp, on the Schelde River, are offset by the fact that the approaches to it are through Dutch territory.

The principal mineral is coal. The Ardennes coalfield, now nearly exhausted, extends southward into France. The Campine field lies in the northeast.

BELGIAN COLONIAL EMPIRE

Country	Area (sq. mi.)	Population
Belgian Congo (colony)	904,991	12,956,950*
Ruanda-Urundi (U. N. trust terr.)	20,742	4,402,577†

* Dec. 31, 1956. † Dec. 31, 1955.

BELGIAN CONGO—Status: Colony.

Capital: Léopoldville (population Dec. 31, 1954: 299,806; Europeans, 16,887).

Governor General: Léo Pétillon.

Monetary unit: Congolese franc.

Foreign trade (1956) 53% to Belgium, 14% to the U. S.; imports, 35% from Belgium, 20% from the U. S. Chief exports: copper (40%), coffee (8%), cotton (7%), palm oil (5%), diamonds (5%).

Agricultural exports: coffee and cotton. Mineral exports: copper, tin, cassiterite, diamonds (mainly industrial), gold, cobalt, zinc, and uranium.

Forest exports: palm oil, palm kernels, rubber, gum copal.

The mineral-rich Belgian Congo is in central Africa, with a narrow outlet to the Atlantic through the northwestern tip of Portuguese Angola. King Leopold II of Belgium had backed exploration of the area by the English explorer, H. M. Stanley, and in 1885 had been recognized by the great powers as personal sovereign and proprietor of the Congo Free State, as it was then called. The area is now administered by a Governor General responsible to the Cabinet minister for the colonies. The Governor General has unrestricted executive and legislative powers, and the colony has no representative institutions of its own. During World War II it furnished vital war materials to the Allies.

RUANDA-URUNDI—Status: U. N. trust territory, united administratively with the Belgian Congo.

Capital: Usumbura.

Governor General: Léo Pétillon.

Principal products: tin, coffee, gold, cotton, hides.

Ruanda-Urundi, in east Africa, was assigned to Belgium as a mandate by the League of Nations at the end of World War I, before which it was a portion of German East Africa. It is administered under the direction of the Governor General of the Belgian Congo by a Vice Governor General. The area, placed under U. N.

trusteeship in Dec. 1946, is largely mountainous, with livestock grazing the principal native activity.

Bhutan (Kingdom)

Area: 19,305 square miles.

Population (est. 1955): 623,000 (mostly Bhotiya).

Density per square mile: 32.3.

Ruler: Maharaja Jigme Dorji Wangchuk.

Capital: Punakha.

Monetary unit: Indian rupee.

Language: Tibetan dialect.

Religion: Buddhism.

HISTORY. Bhutan is a semi-independent state lying on the southeast slope of the Himalayas, bordered on the north and east by Tibet and on the south and west by the Republic of India. The area is said to have been invaded and settled by Tibetan troops in the 9th century A.D. After almost a century of conflict between the Bhutanese and the British in India, British troops invaded the country in 1865 and negotiated an agreement under which Britain undertook to pay an annual allowance to Bhutan on condition of good behavior. A treaty signed with India in Aug. 1949 increased this subsidy and placed Bhutan's foreign affairs under Indian control.

Until 1907, Bhutan's government was under the dual control of the clergy and laity, but the country is now ruled by a hereditary Maharaja.

The dominant people are the Bhotiyas, who are of Tibetan origin, speak a Tibetan dialect, and profess the same form of Buddhism as is prevalent in Tibet.

ECONOMIC CONDITIONS. The chief crops are rice, corn and millet; the fields, laid out on hillside terraces, are watered by an ingenious system of irrigation. Bhutan is famous for its small though sturdy mountain ponies. The chief industries are metal work, cloth weaving and fine basket and mat work. Trade is insignificant, and much of it is conducted by barter.

NATURAL FEATURES. The whole of Bhutan presents a succession of lofty and rugged mountains running generally from north to south and separated by deep valleys. Mountains in the north reach a height of 24,000 feet.

Bolivia (Republic)

(República Boliviana)

Area: 424,162 square miles.

Population (est. Dec. 31, 1955): 3,273,000 (1950: Indian 52.9%, mestizo 32%, white 14.8%, others .3%).

Density per square mile: 7.5.

President: Hernán Siles Zuñalez.

Principal cities (census 1950): La Paz, 321,063 (de facto capital); Cochabamba,

80,795 (commercial center); Oruro, 62,975 (tin mines); Potosí, 45,758 (mining); Sucre, 40,128 (legal capital).

Monetary unit: Boliviano.

Language: Spanish.

Religion: Roman Catholic.

HISTORY. Famous since Spanish colonial days for its mineral wealth, modern Bolivia was once a part of the ancient Incan Empire. After the Spaniards had defeated the Incas during the first part of the 16th century, Bolivia was subjected to the Spanish Viceroyalty of Peru, and its predominantly Indian population was reduced to slavery. The country finally won its independence in 1825; the new republic was named after Simón Bolívar, South America's famed liberator.

Bolivia's political history since independence has been extremely stormy. Since 1825 it has had more than 60 revolutions, 70 Presidents and 11 Constitutions. No elected President has served out his term.

Harassed by internal strife, Bolivia lost great slices of territory to three neighbor nations. Several thousand square miles and its outlet to the Pacific were taken by Chile after a disastrous war in 1879-83. In 1903 a piece of Bolivia's Acre province, rich in rubber, was ceded to Brazil. And in 1938, after a war with Paraguay, Bolivia gave up claim to nearly 100,000 square miles of the Gran Chaco.

GOVERNMENT. Under the 1938 Constitution, Bolivia is a republic, electing by popular vote a President every four years, an 18-member Senate every six years, and a 68-member Chamber of Deputies every four years. The President appoints the members of his Cabinet. The Indian majority was virtually disfranchised until July 1952, when the franchise was conferred on all those who had reached the age of 20, whether literate or illiterate.

ECONOMIC CONDITIONS. Production of such basic foodstuffs as wheat and rice is insufficient for domestic needs, and considerable quantities must be imported. Cattle are raised in the more temperate regions of the east and south, sheep in the departments of La Paz and Cochabamba, and llamas, alpacas, and vicuñas, important sources of hides, wool and, meat, are raised on the plateaus by Indians. The furbearing chinchilla, a native of the colder plateau regions, is also bred.

Tin and other minerals comprise almost the whole of Bolivia's exports. Since the country is landlocked, foreign trade must pass through free ports in Chile and river ports on the Amazon.

Chief exports in 1956 were tin (59%), tungsten (14%), lead (6%), and silver (7%). Leading customers in 1955 were the U. S. (60%) and the United Kingdom (33%); leading suppliers, the U. S. (38%), Argentina (10%), and Germany (9%).

NATURAL FEATURES AND RESOURCES. Landlocked Bolivia is a low alluvial plain throughout 60 per cent of its area toward the east, drained by the Amazon and Plata river systems. The western part, enclosed by two chains of the Andes, is a great plateau—the Altiplano with an average altitude of 12,000 feet. More than 80 per cent of the population lives on the plateau, which also contains La Paz, the highest capital city in the world. Lake Titicaca, half the size of Lake Ontario, is one of the highest large lakes in the world, at an altitude of 12,507 feet. Islands in the lake hold ruins of the ancient Incan civilization.

Mining is the backbone of the economy. Tin, accounting normally for 70 per cent of Bolivian exports, is by far the most important mineral, most of it coming from Potosí and Oruro. During World War II, Bolivia was the world's largest tin producer.

Brazil (Republic)

(Estados Unidos do Brasil)

Area: 3,287,195 square miles.

Population (est. July 1, 1956): 61,268,000 (1950: white, 61.7%; mestizo, 26.5%; Negro, 11.0%; other, 0.8%).

Density per square mile: 18.3.

President: Juscelino Kubitschek de Oliveira.

Principal cities (est. 1955): Rio de Janeiro, 2,725,274 (capital, chief port); (est. 1953) São Paulo, 2,500,000 (coffee and industrial center); Recife (Pernambuco), 560,000 (seaport); Salvador (Baía), 460,000 (seaport); Porto Alegre, 440,000 (seaport); Belo Horizonte, 430,000 (mining); Fortaleza (Ceará), 300,000 (seaport).

Monetary unit: Cruzeiro.

Language: Portuguese.

Religion: Roman Catholic, 95%.

HISTORY. Brazil, the only Latin American nation deriving its culture and language from Portugal, is the largest country in South America, covering nearly half the continent. In the world, it ranks after the U.S.S.R., China and Canada.

Brazil was discovered in 1500 by the Portuguese admiral, Pedro Álvares Cabral. Portugal began colonization in 1532 and Brazil became a royal colony in 1549.

During the Napoleonic wars, the Prince Regent of Portugal (later King John VI) fled his country in advance of the French armies, and set up his royal court at Rio de Janeiro in 1808. When John was drawn home by a revolution in 1820, the Brazilians rebelled at resuming colonial status and declared their independence in 1822 under Pedro, son of John VI. Pedro I abdicated in 1831 in favor of his five-year-

old son, who became Emperor in 1840 as Pedro II.

Although a popular monarch, Pedro II was forced to abdicate in 1889 following a military revolt, after which a republic was set up.

The President during World War I, Wenceslau Braz, co-operated with the Allies and declared war on Germany Oct. 26, 1917. Pres. Washington Luiz Pereira da Souza, 1926-30, had to cope with the world depression and was overthrown by a revolutionary group under Getúlio Vargas, who took over as provisional President.

GOVERNMENT. Under the Constitution of 1946, Brazil is a union of twenty states, five territories and one federal district. The President is popularly elected for a five-year term and may not succeed himself. The national Congress is composed of two houses—the Senate, whose members serve for eight-year terms, and the Chamber of Deputies, elected for four-year terms. Members of Congress are elected by equal, direct, compulsory, and secret suffrage under a system of proportional representation.

All educational instruction is conducted solely in the Portuguese language.

ECONOMIC CONDITIONS. *Agriculture.* Agriculture is a mainstay of Brazil's economy, but only 4 per cent of its area is under cultivation, the rest being grazing, forest, or non-productive land. Brazil leads the world in production of coffee and castor beans, and ranks second in cacao. Production and export of both coffee and cacao are government-controlled. Coffee production in the 1957-1958 season totaled 22,000,000 bags of 132 lb. each.

Livestock is raised nearly everywhere, with the great centers in the central and northern states. On Dec. 31, 1955, there were 38,606,000 hogs, 18,484,000 sheep, and 63,608,000 cattle.

Trade. Leading exports in 1956 were coffee (70%), cotton (8%) and cacao (5%).

Leading customers were the U. S. (50%), Germany (6%), Argentina (4%) and Sweden (4%); leading suppliers, the U. S. (29%), Venezuela (10%), Germany (6%) and the Netherlands Antilles (5%).

Major imports include machinery, Argentine wheat, vehicles, and petroleum products.

NATURAL FEATURES AND RESOURCES. Brazil covers about three-sevenths of South America, extends 2,965 miles north-south, 2,691 miles east-west, and borders every South American state except Chile and Ecuador. Its area would more than blanket that of the U. S.

More than a third of Brazil is drained by the Amazon and its more than 200 tributaries. The Amazon is navigable for ocean steamers to Iquitos, Peru, 2,300 miles upstream. Southern Brazil is drained by the Plata system—the Paraguay, Uruguay and Paraná Rivers. The most important stream entirely within Brazil is the São Francisco, navigable for a thousand miles but broken near its mouth by the 260-foot Paulo Affonso Falls, with estimated potential of 1,000,000 horsepower.

Mineral Resources. Brazil's vast mineral resources are among her least developed assets. The most important are coal (estimated reserves of 5,000,000,000 tons; estimated 1956 production, 2,286,000 metric tons) and iron ore (metal content 65%), found mainly in Minas Gerais (1955 output, 3,600,000 metric tons). Other important minerals are gold (1956) 122,000 troy oz.; manganese ore, (1955) 380,000 tons; petroleum, (1956) 3,885,000 barrels (over 10 times the 1950 output); diamonds; silver; quartz crystals; uranium.

Forests and Fisheries. The largest single forest commodities are timber, chiefly pine from the southern states, and the wax of the carnauba palm, used for insulation and phonograph records and produced commercially only in Brazil (exports 1955: 12,000 metric tons).

BRITISH COMMONWEALTH OF NATIONS

EUROPE

United Kingdom of Great Britain and Northern Ireland

Area: 93,599 square miles (excluding Channel Islands and Isle of Man).

Population (est. 1957): 51,455,000 (English, Scotch, Welsh, Irish).

Density per square mile: 547.1.

Ruler: Queen Elizabeth II.

Prime Minister: Harold Macmillan.

Principal cities (census 1951): London (Greater), 8,346,137 (capital); Birmingham, 1,112,340 (iron and steel); Glasgow, 1,089,555 (seaport, shipbuilding); Liverpool, 789,532 (seaport); Manchester, 793,175 (textiles); Sheffield, 512,834 (steel, cutlery); Leeds, 504,954 (clothing); Edinburgh, 466,770 (capital, Scotland).

Monetary unit: Pound sterling (£).

* Member of the British West Indies Federation, formed in January 1958.

Languages: English, Welsh, Gaelic.

Religion: Church of England (established church); Church of Wales (disestablished); Church of Scotland (established church—Presbyterian); Church of Ireland (disestablished); Roman Catholic; Methodist; Congregational; Baptist; Jewish.

HISTORY. Roman invasions of the first century B.C. brought Britain into contact with the continent. When the Roman legions withdrew in the fifth century A.D., Britain fell easy prey to the invading

hordes of Angles, Saxons, and Jutes from Scandinavia and the Low Countries. Seven large kingdoms were established, and the original Britons were forced into Wales and Scotland. It was not until the eleventh century that the country finally became united under the Danish King Canute. Following the death of Edward the Confessor (1066), a dispute about the succession arose, and William Duke of Normandy invaded England, defeating the Saxon noble, Harold II, at the Battle of Hastings (1066).

The Norman conquest was accompanied by the introduction of Norman law and feudalism, changing the customs of England.

The reign of Henry II (1154-89), first of the Plantagenets, saw an increasing centralization of royal power at the expense of the nobles, but in 1215 John (1199-1216) was forced to sign the Magna Carta, which awarded the people, especially the nobles, certain basic rights. Edward I (1272-1307) continued the conquest of Ireland, reduced Wales to subjection, and made some gains in Scotland. In 1314, however, English forces led by Edward II were ousted from Scotland after the battle of Bannockburn. The late thirteenth and early fourteenth centuries saw the development of a separate House of Commons with tax-raising powers.

Edward III's claim to the throne of France led to the Hundred Years' War (1338-1453), which ended with the loss of almost all the large English territory in France. In England the great poverty and discontent caused by the war was intensified by the Black Death, a plague which reduced the population by about one-third. The Wars of the Roses (1455-85), a struggle for the throne between the House of York and the House of Lancaster, were ended by the victory of Henry Tudor (Henry VII) at Bosworth Field (1485).

During the reign of Henry VIII (1509-47), the Church in England asserted its independence from the Roman Catholic Church. Under Edward VI and Mary, the two extremes of religious fanaticism were reached and it remained for Henry's daughter, Elizabeth I (1558-1603), to set up the Church of England on a moderate basis. In 1588 the Spanish Armada, a fleet sent out by Catholic King Philip II of Spain, was defeated by the English and destroyed during a storm. It was during Elizabeth's reign that England became a world power.

Elizabeth's heir was of the house of Stuart—James VI of Scotland—who joined the two crowns as James I (1603-25). The Stuart Kings incurred large debts and were forced either to depend on Parliament for taxes or to raise money by illegal means. In 1642 war broke out between Charles I and a large portion of the Parliament; Charles was defeated and executed in 1649, and the monarchy was then abolished. The Puritan Commonwealth endured for ten years, but after the death (1658) of Oliver Cromwell, the Lord Protector, the government fell to pieces and Charles II was restored to the throne in 1660. The struggle between the King and Parliament continued, but Charles II knew when to compromise. His brother James II (1685-88) possessed none of his ability and was ousted by the Revolution of 1688, which confirmed the predominant position of

AREA AND POPULATION OF MAJOR SUBDIVISIONS*

Subdivision	Area sq. mi.	Population, est. June 1936
England	50,871	44,667,000
Wales	7,474	
Scotland	29,795	5,145,000
Northern Ireland	5,459	1,397,000

* Not including Channel Islands and Isle of Man.

Parliament. James' daughter, Mary, and her husband, William of Orange, now ruled jointly.

The reign of Queen Anne (1702-14) was marked by the Duke of Marlborough's victories over France at Blenheim, Oudenarde, and Malplaquet in the War of the Spanish Succession. England and Scotland meanwhile were joined together by the Act of Union (1707). Upon the death of Anne, the distant claims of the elector of Hanover were recognized, and he became King of England as George I.

The eighteenth century was a period of gradual growth and change. At home the unwillingness of the Hanoverian Kings to rule resulted in the formation by the King's ministers of a Cabinet, headed by a Prime Minister, which directed all public business. Abroad the constant wars with France resulted in expansion of the British Empire all over the globe, particularly in North America and India. This imperial growth was checked by the revolt of the American colonies (1775-81).

The age-long struggle with France broke out again in 1793, and during the lengthy Napoleonic Wars, which ended at Waterloo (1815), England was pitted at one time against almost all of Europe.

The Victorian era, named after Queen Victoria (1837-1901), saw the growth of a democratic system of government which had begun with the Reform Bill of 1832. The two important wars in Victoria's reign were the Crimean War against Russia (1853-56) and the Boer War (1899-1902). The latter was accompanied by enormous extension of England's sway in Africa.

The reign of Edward VII (1901-10) was marked by increasing uneasiness at home and abroad. Within four years after the accession of George V (1910), England entered World War I when Germany invaded Belgium. The nation was led by coalition Cabinets headed first by Herbert Asquith and then (Dec., 1916) by the Welsh statesman, David Lloyd George. The years after the war were marked by labor unrest which culminated in the general strike of 1926. A Labour ministry formed early in 1924 by Ramsay MacDonald fell in October of that year. In 1929 a second Labour government was formed, but the world economic depression forced a change in 1931,

and a national government was formed composed chiefly of Conservative members, although MacDonald remained Prime Minister until 1935. King Edward VIII succeeded to the throne in 1936 on his father's death but abdicated eleven months later (in order to marry an American, Wallis Warfield Simpson, whose second divorce was then pending) in favor of his brother, who became King George VI.

The efforts of Prime Minister Neville Chamberlain to meet by peaceful means the rising threat of Nazism in Germany failed with the German invasion of Poland (Sept. 1, 1939), which was followed by England's entry into World War II (Sept. 3, 1939). Serious Allied reverses in the spring of 1940 led to Chamberlain's resignation and the formation of another coalition war Cabinet by Conservative leader Winston Churchill, who led England through most of World War II. Churchill resigned as the coalition leader shortly after V-E Day, but then formed a "caretaker" government which remained in office until after the parliamentary elections of July 5, 1945, in which the Labour party won an overwhelming victory. The government formed by Clement R. Attlee on July 26 began a moderate socialistic program.

Internationally, the Attlee government continued Britain's close co-operation with the United States through the North Atlantic Treaty and in the Korean war, at the same time solidifying its position in Western Europe in opposition to the U.S.S.R. The Labour regime, returned to office by a slight majority in the parliamentary elections of Feb., 1950, lost by a narrow margin in the Oct., 1951 elections. On Oct. 26 Winston Churchill again became Prime Minister at the head of a Conservative government. George VI died Feb. 6, 1952, and was succeeded by his daughter, Elizabeth II.

Churchill voluntarily stepped down on April 5, 1955, in favor of Sir Anthony Eden, who led the Conservatives to another victory in elections May 26, 1955. The Suez crisis and the abortive Anglo-French invasion of Egypt (Oct. 31, 1956) were followed by Eden's resignation on grounds of ill health (Jan. 9, 1957). Harold Macmillan succeeded him.

(For recent history see article on British Commonwealth in *World Politics* section).

RULER. Queen Elizabeth II, born April 21, 1926, elder daughter of King George VI and Queen Elizabeth, succeeded to the throne on the death of her father, Feb. 6, 1952; married Nov. 20, 1947, to Prince Philip, Duke of Edinburgh, born June 10, 1921; their children are Prince Charles (heir presumptive), born Nov. 14, 1948, and Princess Anne, born Aug. 15, 1950. The

Queen's sister is Princess Margaret Rose, born Aug. 21, 1930; her uncles are Prince Edward Albert, Duke of Windsor (formerly King Edward VIII), born June 23, 1894, and Prince Henry William, Duke of Gloucester, born March 31, 1900.

GOVERNMENT. The United Kingdom is a constitutional monarchy, with a Queen and a Parliament which has two houses: the House of Lords with about 830 hereditary peers, 26 spiritual peers, 16 Scottish representative peers, a number of Irish representative peers (vacancies are no longer filled), and a few life peers who hold or have held high judicial office; and the House of Commons, numbering since 1955 630 members elected by practically universal suffrage. Supreme legislative power is vested in Parliament, which holds office for five years unless sooner dissolved. The executive power of the Crown is exercised by the Cabinet, headed by the Prime Minister. The latter, normally the head of the party commanding a majority in the House of Commons, is appointed by the sovereign, with whose consent he in turn appoints the rest of the Cabinet. All ministers must be members of one or the other house of Parliament; they are individually and collectively responsible to the Crown, the Prime Minister and Parliament. The Cabinet proposes bills and arranges the business of Parliament but it depends entirely on the votes of confidence in Commons. The lords cannot hold up "money" bills, but they can delay other bills for a period of at least one year.

By the Act of Union (1707) the Scottish Parliament was assimilated with that of England, and Scotland is now represented in Commons by seventy-one members. The Secretary of State for Scotland, a member of the Cabinet, is responsible for the administration of Scottish affairs.

ECONOMIC CONDITIONS. *Agriculture.* Agriculture remains one of Britain's chief industries, employing about 800,000 persons.

Livestock (June 30, 1956) included 10,907,000 cattle, 23,594,000 sheep, 5,474,000 hogs, and 92,464,000 poultry. Cattle occupy a predominant position in British agriculture, accounting for about 40 per cent of the total farm output.

Industry. The most important British manufacture is heavy goods such as machinery, tools, bridges, and locomotives; industry is concentrated in the north and Midlands of England. Sheffield is the center of the steel industry, while the china industry is concentrated in the Midlands. The cotton industry is centered in Lancashire; Liverpool, Manchester, Oldham, Preston, and Bolton are the main manufacturing towns. The wool industry, England's

oldest large trade, is located just east of the cotton towns, at Leeds, Bradford, and Hull in Yorkshire. An important industrial region is the central Lowlands of Scotland, where woollens and other fabrics, lace, glass, paper, steel, and pig iron are produced. Important shipyards are located along the coast.

The total working population on Dec. 31, 1956, was 24,087,000.

Trade. The United Kingdom's economic prosperity is dependent on its foreign trade, and the nation made great efforts after World War II to build up its volume of exports.

Leading exports are machinery (non-electrical), road vehicles and aircraft, chemicals, electrical machinery, iron and steel.

Leading imports are meat, fruits and vegetables, cereals and cereal preparations, nonferrous base metals, wool.

Chief customers are United States, Australia, Canada, India, South Africa, and New Zealand.

Chief sources of imports are:

	1954	1955	1956
United States	282.4	419.9	408.5
Canada	272.8	343.7	347.6
Australia	235.9	263.9	236.4
New Zealand	176.0	179.9	197.0
Sweden	116.9	139.6	145.0
India	148.4	159.0	141.5

Communications. The merchant marine on June 30, 1956, represented about 18.5% of the world total and was second only to the U. S. merchant fleet.

Nationalization of the railway and canal systems in Great Britain became effective Jan. 1, 1948, and they are now operated by the government's Transport Commission.

British air services throughout the world are nationalized under the Minister of Civil Aviation. Service is supplied by two public corporations—British Overseas Airways (BOAC) and British European Airways.

NATURAL FEATURES AND RESOURCES. The United Kingdom, consisting of England, Wales, Scotland, and Northern Ireland, is a third the size of Texas. England, in the southeast part of the British Isles, is separated from Scotland on the north by the granite Cheviot Hills; from them the Pennine chain of uplands extends south through the center of England, reaching its highest point in the Lake district in the northwest. To the west along the border of Wales—a land of steep hills and valleys—are the Cambrian Mountains while the Cotswolds, a range of hills in Gloucestershire, extend into the surrounding shires. The remainder of England is plain land, though not necessarily flat, with the rocky

sand-topped moors in the southwest, the rolling downs in the south and southeast and the reclaimed marshes of the low-lying Fens in the east central districts. Scotland is divided into three physical regions—the Highlands, the Central Lowlands, containing two-thirds of the population, and the Southern Uplands. The western Highland coast is intersected throughout by long narrow sea-lochs or fiords. Scotland also includes the Outer and Inner Hebrides and other islands off the west coast, and the Orkney and Shetland Islands off the north coast.

Wales is generally hilly; the Snowdon range in the northern part culminates in Mt. Snowdon (3,557 ft.), highest in either England or Wales.

Important rivers flowing into the North Sea are the Thames, Humber, Tees, and Tyne. In the west are the Severn and the Wye, which empty into the Bristol Channel and are navigable, as are the Mersey and Ribble.

Minerals. Great Britain's most important mineral resource is coal, which was responsible to a large extent for British industrial supremacy during the late eighteenth and the nineteenth centuries. The coal mines were nationalized in 1946. Reserves have been variously estimated at from 150,000 million to 200,000 million tons. Prior to World War II, coal was exported in declining amounts to the continent, mainly to France, Sweden, Denmark and Italy. Since the war, however, Britain has been hard put to meet her own minimum domestic requirements.

Most of the British iron ore is produced in England, especially in Cumberland, Lancashire, and Staffordshire. Tin ore and copper are obtained almost exclusively from Cornwall, while lead comes mainly from Flint, Durham, and Derbyshire. Zinc occurs mainly in North Wales, the north of England, the Isle of Man, and the county of Dumfries in Scotland. The whole British supply of china clay (kaolin)—of great importance in the ceramic, paper-making, bleaching, and chemical industries—comes from Cornwall. Petroleum production is negligible, but oil shale exists in large quantities.

Water Power. The most important potential sources of water power are in the highlands of Scotland, North Wales, and Cumberland. Nationalization of the electric and gas industries became effective in 1948.

Forests and Fisheries. Great Britain was once heavily forested, but centuries of timber cutting and clearing have denuded the country of the original forests. Woodland of all types approximates 3,000,000 acres, and barely 40 per cent of Britain's surface is covered with timber. Consequently the nation is heavily dependent on imported timber.

Great Britain's sea fishing industry is among the most important in the world. The principal kinds of fish caught are herring, cod, haddock, plaice, and hake, classed as wet fish, and, among shellfish, oysters, crabs, and lobsters. The most important factor in the export trade is salted herring, which ordinarily represents about 70 per cent of the total. The principal grounds frequented by British fishermen are the North Sea; off Iceland; the Faeroes; south of Ireland; west of Scotland; west of Ireland; the Irish Sea; and the English Channel.

NORTHERN IRELAND

(Part of United Kingdom)

Area: 5,459 square miles.

Population (est. June 1956): 1,397,000.

Density per square mile: 255.9.

Governor: Lord Wakehurst.

Prime Minister: Viscount Brookeborough.

Principal cities (census 1951): Belfast, 443,671 (capital); Londonderry, 50,092 (clothing).

Monetary unit: Pound sterling.

Language: English, Gaelic.

Religions (census 1951): Roman Catholic (34.4%), Presbyterian (29.9%), Church of Ireland (25.8%), Methodist (4.9%), others (5%).

Northern Ireland comprises the six predominantly Protestant counties of Antrim, Armagh, Down, Fermanagh, Londonderry, and Tyrone (collectively known as Ulster), which form the northern part of the island of Ireland. The area is an integral part of the United Kingdom, but under the terms of the Government of Ireland Act (1920) it has a semi-autonomous government.

The government has only limited powers for local purposes, and many matters are reserved to the central government at Westminster. Executive authority is vested in the Crown-appointed Governor, who is advised by a Cabinet of eight ministers headed by the Prime Minister. The Parliament consists of the House of Commons of fifty-two members elected for 5-year terms, and the Senate of twenty-six members elected by the House of Commons. The general elections of Oct. 22, 1953, returned thirty-eight Unionists, nine Nationalists and five representatives of other groups to the House. The area is also represented by twelve members in the British Parliament at London.

Agriculture is the largest single industry; about two-thirds of the country is devoted to crops and pasture under a system of mixed farming. The leading crops include potatoes, oats, and flax. In 1955 there were 905,890 cattle, 878,480 sheep, and 696,410 hogs.

The two principal manufacturing indus-

tries are linen and shipbuilding, both centered in Belfast. The linen industry was established by Huguenot weavers who fled France after the revocation of the Edict of Nantes in 1685.

ISLE OF MAN

Lieutenant Governor: Sir Ambrose Dundas.

Located in the Irish Sea, equidistant from Scotland, Ireland, and England, the Isle of Man is administered according to its own laws by a government composed of the Lieutenant Governor, a Legislative Council, and a House of Keys, one of the most ancient legislative assemblies in the world.

CHANNEL ISLANDS

Lieutenant Governor of Jersey: Adm. Sir Randolph Nicholson.

Lieutenant Governor of Guernsey: Air Marshal Sir Thomas Elmhirst.

This group of islands, lying in the English Channel off the northwest coast of France, is the only portion of the Duchy of Normandy belonging to the English Crown, to which it has been attached since the conquest of 1066. It was the only British possession occupied by Germany during World War II.

For purposes of government the islands are divided into Jersey (45 sq. mi.) and the bailiwick of Guernsey (24 sq. mi.), including Alderney (3 sq. mi.), Sark (2 sq. mi.), Herm, and Jethou. The islands are administered according to their own laws and customs by local governments headed by Crown-appointed Lieutenant Governors. Acts of Parliament in London are not binding on the islands unless they are specifically mentioned.

French is still the official language, although English is the main language of commerce.

GIBRALTAR—Status: Colony.

Governor: Lt. Gen. Sir Harold Redman.

Gibraltar, at the south end of the Iberian Peninsula, is a rocky promontory commanding the western entrance to the Mediterranean. Aside from its strategic importance, it is also a free port, naval base, and coaling station. It was captured by the Arabs crossing from Africa into Spain in A.D. 711. In the fifteenth century it passed to the Moorish ruler of Granada and later became Spanish. It was captured by an Anglo-Dutch force in 1704 during the War of the Spanish Succession and passed to Britain by the Treaty of Utrecht in 1713. Most of the inhabitants are of Spanish, Italian and Maltese descent.

MALTA—Status: Self-governing colony.

Capital: Valletta (population 18,801).

Governor: Maj. Gen. Sir Robert Laycock.

Prime Minister: Dominic Mintoff.

Agricultural products: potatoes, onions, cereals, fruits.

The Maltese islands lie between Europe and Africa, in the central channel linking the eastern and western Mediterranean. The inhabited islands are Malta (95 sq. mi.), Gozo (26 sq. mi.) and Comino (1 sq. mi.). The Knights of St. John (Malta), who obtained the islands from Charles V in 1530, reached their highest fame when they withstood an attack by superior Turkish forces in 1565. Napoleon seized Malta in 1798, but the French forces were ousted by British troops in 1799, and British rule was confirmed by the Treaty of Paris (1814). The principal importance of Malta is its strategic location as a naval base; it was heavily attacked by German and Italian aircraft during World War II but was never invaded by the Axis. Most of the population are Maltese, speaking the Phoenician Maltese language, a tongue akin to Syriac and Arabic. The islands are densely populated (2,554 per square mile in 1956).

Under its 1947 Constitution, Malta enjoys a measure of self-government. The locally-elected Assembly has complete control over domestic affairs, but the British government keeps control over matters dealing with defense and foreign affairs.

AFRICA

BRITISH SOUTH AFRICAN TERRITORIES

High Commissioner: Sir Percivale Lieching.

The three British territories in southern Africa—Basutoland, Bechuanaland and Swaziland—are not part of the Union of South Africa, but are administered by a High Commissioner responsible to the Secretary of State for Commonwealth Relations in the British Cabinet. He also holds the office of High Commissioner for the United Kingdom in the Union of South Africa.

BASUTOLAND—Status: Colony.

Capital: Maseru (population 4,000).

Resident Commissioner: A. G. Chaplin.

Agricultural products: corn, wheat, sorghum.

Basutoland is a mountainous enclave surrounded by the Union of South Africa and bounded by the Orange Free State, Cape Province and Natal. It was constituted a native state under British protection by a treaty signed with the native chief Moshesh in 1843. It was annexed to Cape Colony in 1871, but on Mar. 13, 1884, was restored to direct control by the Crown. The Resident Commissioner is advised by a council of 100, of whom 95 are

nominated by the native chiefs who administer the affairs of their tribes.

The population is restricted almost entirely to the lowland strip in the west; the white population (1,676 by the last census, in 1946) consists solely of officials, missionaries, traders and a few labor agents for employers in the Union of South Africa. About 100,000 natives are regularly employed in the Union. Sheep raising is highly developed. Land is the common property of the nation and is held in trust by the chiefs.

BECHUANALAND—Status: Protectorate.
Administrative center: Mafeking, in Cape Province (population 4,666).

Resident Commissioner: M. O. Wray.
Agricultural products: hides and skins, cattle, butter, millet, maize.
Minerals: gold and silver.

Bechuanaland lies in south central Africa, bounded on the south and southeast by the Union of South Africa, on the west by South-West Africa, on the north by Angola and Northern Rhodesia and on the northeast by Southern Rhodesia. Its average elevation is 3,300 feet and the greater part is gently undulating. The area was placed under British protection on Sept. 30, 1885, to prevent further Boer encroachment and has since remained a British protectorate. The form of government is similar to that of Basutoland.

Most of the inhabitants are Bantu, but there were 2,325 Europeans in 1946, a few of them farmers. The country is essentially pastoral, with cattle raising and dairy farming the chief industries. Gold is mined in the Tati district near Francistown. There is also some mining of silver and copper. Timber is produced for use as fuel and pit props.

SWAZILAND—Status: Protectorate.

Capital: Mbabane (population 1,600).

Resident Commissioner: B. A. Marwick.

Agricultural products: cattle, hides and skins, butter, tobacco, corn, millet.

Minerals: asbestos, tin, gold.

Swaziland lies at the southeastern corner of the Transvaal. It is largely hilly, with an average elevation of 4,000 feet in the west. It came under the protection of the Transvaal Republic in 1894 but was made a British protectorate in 1906 under the High Commissioner for South Africa.

The natives are mostly Swazi; there were 3,204 Europeans in 1946, mostly farmers. Grazing is the principal native occupation; there is excellent pasture in the high land to the west. Tropical and subtropical crops are raised in the lower areas. Tin is mined near Mbabane.

EAST AFRICA HIGH COMMISSION

The East Africa High Commission, comprising the Governors of Kenya, Tangan-

yika and Uganda, administers the public utilities and other central services of those territories, and has power to legislate with respect thereto with the advice and consent of a Central Legislative Assembly. The governments of the three areas are otherwise independent of one another.

KENYA—Status: Colony and protectorate.

Capital: Nairobi (pop. 1948: 118,976).

Governor: Sir Evelyn Baring.

Foreign trade (1956): domestic exports, 25% to Britain; imports, 51% from Britain. Chief exports: coffee (47%), tea (9%), sisal (7%).

Agricultural products (exports 1956): coffee, tea, sisal.

Minerals: gold, sodium carbonate, silver, salt.

Forest products: wattle bark extract, timber.

Kenya extends along the Indian Ocean between Ethiopia and Tanganyika Territory and westward to Lake Victoria and Uganda. Formerly known as the East Africa Protectorate, it was held under a concession from the Sultan of Zanzibar by the Imperial British East Africa Company from 1888 to 1905. It became a Crown colony in 1920, the coastal strip leased from the Sultan becoming a protectorate.

The colony is predominantly agricultural, and a large area is cultivated by Europeans. Altitude ranges from sea level to more than 9,000 ft.; hence, the cultivation of tropical, subtropical and temperate crops is possible.

Kenya has been plagued since 1952 by serious outbreaks of native terrorism inspired by the anti-white Mau Mau secret society, which have taxed strengthened security forces, including British regular army units.

TANGANYIKA TERRITORY—Status: U. N. trust territory.

Capital: Dar es Salaam (pop. 1952: 99,140).

Governor: Sir Edward F. Twining.

Foreign trade (1956): domestic exports, 31% to Britain; imports, 41% from Britain. Chief exports: sisal (24%), coffee (21%), cotton (17%), diamonds.

Agricultural products: sisal, coffee, cotton, peanuts, sugar cane, tea.

Minerals: gold, diamonds.

Forest products: gum arabic and copal, beeswax, timber.

Tanganyika Territory, with the Belgian Ruanda and Urundi, constituted German East Africa from 1884 until 1919. It was administered under League of Nations mandate by Britain until 1946, when it was placed under United Nations trusteeship, with Great Britain as the administering power.

Tanganyika's narrow coastal plain is bordered on the west by the precipitous

eastern side of the Central African plateau. Mount Kilimanjaro (19,565 ft.) is the highest point on the African continent. The territory also includes adjacent islands in the Indian Ocean.

The territory is sparsely populated; two-thirds of it is uninhabited. It is the world's largest producer of sisal hemp.

UGANDA—Status: Protectorate.

Capital: Entebbe (pop. 1948: 7,942).

Governor: Sir Frederick Crawford.

Foreign trade (1956): exports, 28% to India; imports, 30% from Britain. Chief exports: cotton, coffee.

Agricultural products: cotton, coffee, sugar cane, rubber, tea, sisal.

Minerals: gold, tin.

Uganda lies immediately south of Anglo-Egyptian Sudan and west of Kenya, along the northwest shore of Lake Victoria. The surface is extremely diversified, with lofty plateaus, snow-capped peaks, swamps, forests and arid areas. A British protectorate over the area was proclaimed in 1894. A large measure of home rule is given the native states, notably Buganda, whose *kabaka* (king) is assisted by a ministry and native parliament.

Agriculture, including livestock, is the basis of the economy. Cotton is raised, principally by natives, and coffee, tea and rubber are grown on large plantations. Most natives possess large herds of cattle and sheep.

GAMBIA—Status: Colony and protectorate.

Capital: Bathurst (population 19,602).

Governor: Sir Percy Wyn Harris.

Foreign trade. Chief export: peanuts (90%).

Agricultural products: peanuts, hides and skins, millet, rice, palm kernels.

Gambia, smallest of the British West African dependencies, is a stretch of land 200 miles long on both sides of the lower Gambia River, surrounded on all land sides by French West Africa and fronting on the Atlantic Ocean. During the 17th century it was settled by various companies of English merchants; slavery was the chief source of revenue until it was abolished in 1807. Gambia became a Crown colony in 1843. Except for the island of St. Mary, on which the capital stands, the area is administered as a protectorate.

The inhabitants, mostly Negroes or Negroids, are predominantly Mohammedan. The principal economic activity is the cultivation of peanuts. Internal transportation is by steamer and launch.

Ghana

(Member of Commonwealth of Nations)

Area: 91,843 square miles.

Population (est. 1956): 4,691,000 (almost entirely African).

Density per square mile: 51.1.

Ruler: Queen Elizabeth II.

Governor General: Earl of Listowel.

Prime Minister: Kwame Nkrumah.

Principal cities (census 1948): Accra, 135,926 (capital); Kumasi, 59,420 (rail center); Sekondi-Takoradi, 44,557 (rail terminus and port).

Monetary unit: Gold Coast pound.

Languages: Native tongues (Twi, Fanti, Ga), English.

Religions: Pagan, Mohammedan, Christian.

HISTORY AND GOVERNMENT (see article in *World Politics* section).

ECONOMIC CONDITIONS. The mainstay of the economy is the cultivation of cacao, in the production of which Ghana leads the rest of the world. Secondary export crops include palm kernels, copra, kola nuts, coffee, and rubber.

Chief exports in 1956 were cacao (59%), wood and lumber (11%), diamonds (9%), gold (9%) and manganese ore (8%). Chief customers in 1955 were Britain (41%), the U. S. (18%) and the Netherlands (11%); leading suppliers, Britain (47%), Japan (10%), and the Netherlands (8%).

Mineral resources are abundant. Most important is gold, mined at Tarkwa, Bibiani and, Obuasi. Others include diamonds, manganese ore, and bauxite. Forest resources are extensive and large amounts of hardwoods, notably mahogany, are exported from the forest zone of the interior.

The coastal belt of the new nation, extending about 270 mi. along the Gulf of Guinea, is sandy, marshy and generally exposed. Behind it is a gradually widening grass strip. The forested plateau region to the north is broken by ridges and hills.

KENYA (See **EAST AFRICA HIGH COMMISSION**)

MAURITIUS—Status: Colony.

Capital: Port Louis (pop. 1954: 74,950).

Governor: Sir Robert Scott.

Foreign trade. Chief export: sugar (96%).

Agricultural products: sugar, tea, tobacco, copra.

Mauritius is a mountainous island of volcanic origin in the Indian Ocean, about 500 miles east of Madagascar. It was seized in 1810 from the French, who had settled it in 1715, and was formally ceded to Great Britain by the Treaty of Paris in 1814.

With over 700 persons per square mile, the island is one of the most densely populated regions in the world. The population has a large white element, chiefly French and British, but British Indians are predominant. There are many half-castes.

NIGERIA, FEDERATION OF—Status: Colony and protectorate.

Governor general: Sir James Robertson.

Principal cities (census 1952-53): Ibadan, 459,196 (native metropolis); Lagos, 267,407 (capital); Ogbomosho, 139,535 (native city); Kano, 130,173 (textiles, leather goods, cattle).

Monetary unit: Nigerian pound.

Languages: Native tongues, Arabic, English.

Religions: Mohammedan, Pagan, Christian.

Nigeria, with an area twice that of California, is situated on the Gulf of Guinea in West Africa. Between 1879 and 1914 private colonial developments by the British, with reorganizations of the Crown's interest in the region, resulted in the formation of Nigeria as it exists today. During World War I, native troops of the West African frontier force joined with French forces to defeat the German garrison in the Cameroons. The Cameroons, a narrow strip along Nigeria's eastern border, became a League mandate after World War I, divided between France and Britain. Today the British Cameroons, a U. N. trust territory, is attached to Nigeria for administrative purposes.

ECONOMIC CONDITIONS. Among the leading export crops are cacao, peanuts, palm kernels, palm oil, and rubber. Hides and skins are also important export items. Aside from small native industry, there is no manufacturing.

Chief exports in 1956 were peanuts (21%), cacao (18%), palm kernels (15%), and palm oil (9%). Leading customers were Britain (63%), the Netherlands (10%), and the U. S. (9%); leading suppliers, Britain (45%), Japan (13%), and western Germany (8%).

Nigeria is a leading tin producer from mines on the Bauchi plateau. Other minerals are coal, gold, lead, silver, and tungsten. Over half the area is forested. Mahogany is the main timber export.

FEDERATION OF RHODESIA AND NYASALAND

(For full discussion of the Federation, see *World Politics* section.)

Governor General: Earl of Dalhousie.

Prime Minister: Sir Roy Welensky.

Foreign trade (1956): exports, 58% to Britain, 10% to Union of South Africa; imports, 41% from Britain, 34% from Union of South Africa. Chief exports: copper (38%), tobacco (15%), asbestos (4%).

NORTHERN RHODESIA—Status: Protectorate.

Capital: Lusaka (pop. 1954: 64,500).

Governor: Sir Arthur Benson.

Agricultural products: tobacco, maize, wheat.

Minerals: copper, cobalt, vanadium, lead, zinc.

NYASALAND—Status: Protectorate.
Capital: Zomba (pop. 1953: 5,000).
Governor: Sir Robert Armitage.
Agricultural products: tobacco, tea, cotton.

SOUTHERN RHODESIA—Status: Self-governing colony.

Capital: Salisbury (pop. 1953: 90,000).
Governor: Vice-Adm. Sir Peveril William-Powlett.

Prime Minister: R. S. Garfield Todd.
Agricultural products: tobacco, corn, peanuts, meat, hides, and skins.
Minerals: asbestos, gold, coal, chrome ore.

ST. HELENA—Status: Colony.
Capital: Jamestown (population 1,547).
Governor: Sir James Harford.
Foreign trade (1956): exports, 71% to Britain; imports, 44% from Britain. Chief export: happen products (82%).
Agricultural products: flax, potatoes.

St. Helena is a volcanic island (47 sq. mi.) in the South Atlantic about 1,200 miles from the west coast of Africa. It is famous as the place of exile of Napoleon (1815–21). It was taken for Britain in 1651 by the British East India Company and became a Crown colony in 1833. Attached to it are Ascension Island (34 sq. mi.), 100 miles northwest, and the Tristan da Cunha group (45 sq. mi.), about 1,500 miles southwest. Most of the inhabitants are of mixed European, East Indian and African descent.

SEYCHELLES—Status: Colony.
Capital: Victoria (population 10,000).
Governor: Sir William Addis.
Foreign trade (1956): exports, 69% to India; imports, 38% from Britain. Chief export: copra (69%).
Agricultural products: cinnamon, patchouli oil, coconuts, maize, sugar cane.

This archipelago of about 92 islands in the Indian Ocean was seized from France by British troops in 1794 and was ceded to Great Britain by the Treaty of Paris in 1814. The principal island is Mahé (55 sq. mi.), about 600 miles northeast of Madagascar.

SIERRA LEONE—Status: Colony and protectorate.

Capital: Freetown (population: 64,576).
Governor: Sir Maurice Dorman.

Chief Minister: M. A. S. Margai.
Foreign trade (1956): exports, 63% to Britain; imports, 54% from Britain. Chief exports: diamonds (41%), iron ore (30%), palm kernels (11%).

Agricultural products: palm kernels, palm oil, rice, millet, cassava, rubber.
Minerals: iron ore, diamonds, gold.
Forest products: palm kernels, cassava.

Sierra Leone lies on Africa's west coast between French Guinea and Liberia. It is well-watered hilly country but has a low

swampy coastland with an extremely unhealthy climate. The coastal area (colony proper) was ceded to English settlers in 1788 as a home for Negroes discharged from the British armed forces and also for runaway slaves who had found asylum in London. The British protectorate over the hinterland was proclaimed in 1896. It was not until 1928 that slavery was totally abolished in the protectorate. Under the 1951 Constitution as amended the House of Representatives has 57 members, of whom 51 are elected directly or indirectly.

Freetown is the best harbor on the west coast. Iron ore (60% metal content) from deposits at Marampa is shipped from Pepel, northeast of Freetown.

SOMALILAND—Status: Protectorate.
Administrative center: Hargeisa (population, about 20,000 in hot season and 40,000 in cold season).

Governor: Sir Theodore Pike.
Chief export: hides and skins.
Agricultural products: cattle, hides and skins, grains.
Forest products: gums and resins.

British Somaliland extends along the Gulf of Aden for about 400 miles and inland for 80 to 220 miles. The interior is an elevated plateau falling in steep escarpments to the coastal plain. It came under Egyptian influence in 1875, but during the years 1884–86 treaties guaranteeing British protection were signed with the various Somali chiefs. Italian troops occupied the protectorate in 1940, but it was retaken by British troops in 1941. Both executive and legislative power is exercised by the Governor.

Most of the inhabitants are nomadic Somalis of Mohammedan faith. Their principal activity is stock raising.

SOUTH-WEST AFRICA (See **UNION OF SOUTH AFRICA**)

SWAZILAND (See **BRITISH SOUTH AFRICAN TERRITORIES**).

TANGANYIKA & UGANDA (See **EAST AFRICA HIGH COMMISSION**)

Union of South Africa

(Member of Commonwealth of Nations)

Area: 472,733 square miles.*

Population (est. June 30, 1957): 14,167,000* (European, 20.9%; Bantu, 66.9%; mixed, 9.2%; Asiatic, 3.0%).

Density per square mile: 30.0.*

Ruler: Queen Elizabeth II.

Governor General: Ernest G. Jansen.

Prime Minister: Hendrik Frensch Verwoerd.

Principal cities (est. 1956): Johannesburg, 1,006,500 (gold, industrial center); Capetown, 687,900 (seat of legislature, sea-

port); Durban, 591,300 (seaport); Pretoria, 327,200 (seat of administration); Port Elizabeth, 231,400 (seaport).

Monetary unit: South African pound (RSA).

Languages: English, Afrikaans.

Religions (European pop., 1946): Dutch Reformed Churches, 55%; Anglican Church, 19%; Methodist, 6%; Presbyterian, 5%; Roman Catholic, 5%; others 10%.

* Excluding South-West Africa.

HISTORY AND GOVERNMENT. (See *World Politics* section).

ECONOMIC CONDITIONS. South Africa is predominantly a pastoral country, with less than 15 per cent of its area considered arable. Sheep and cattle raising are the principal occupations, especially in the high veldt. In 1954 there were 37,141,579 sheep, 11,604,249 cattle, and 491,140 hogs.

Climate and differences in terrain combine to give a great variety of agricultural products. The staple crop is maize, grown widely. In southwest Cape Province, products of the Mediterranean type predominate, while in the coastal belt of Natal and in northern Transvaal subtropical crops, especially sugar, are grown.

Food, beverages and tobacco, and metal products are leading products. As a result of the need for armaments a wartime iron and steel industry was established, and cement, chemical, textile, and auto assembly plants were expanded.

Chief exports in 1956 (besides gold) were wool (15%) and diamonds (8%). Main customers (1956) were Britain (26%), Rhodesia and Nyasaland (13%), and the United States (7%); leading suppliers, Britain (32%), the United States (20%), and Germany (6%). Principal imports included textiles, farm and industrial machinery, motor vehicles and petroleum products.

NATURAL FEATURES AND RESOURCES. The Union has a high interior plateau, or veldt, nearly half of which averages 4,000 feet in elevation. There are no important mountain ranges, although the Great Escarpment, separating the veldt from the coastal plain, rises to over 10,000 feet. The principal river is the Orange, rising in Basutoland and flowing westward for 1,300 miles through the Union's center to the Atlantic.

Extensive mineral resources account for the economic prosperity. The Union is the world's leading gold producer. Diamond production is now surpassed in importance by coal. Uranium, gypsum, tin, and tungsten also are mined.

The whaling industry, centered at Durban on the east coast, produces considerable amounts of whale oil. The Union has extensive fishery resources along the 1,500 miles of coast line.

SOUTH-WEST AFRICA—Status: Mandate.

Administrator: Daniel du P. Viljoen.

Capital: Windhoek (population 23,359).

Agricultural products: hides and skins, butter, corn, wheat.

Minerals: diamonds, vanadium concentrates, tungsten, lead, tin, iron ore, copper.

The mandate, bounded on the north by Angola, and on the east by Bechuanaland and the Union of South Africa, was discovered by the Portuguese explorer Diaz in the late 15th century. It is for the most part a portion of the high plateau of South Africa with a general elevation of from 3,000 to 4,000 feet. It became a German colony in 1884 but was conquered by South African forces in 1915, becoming a Union mandate by the terms of the Treaty of Versailles. The Union of South Africa's application for incorporation of the territory into the Union was rejected by the United Nations assembly on Dec. 14, 1946, and the Union was invited to prepare a trusteeship agreement instead. By a law passed in April, 1949, however, the territory was brought into much closer association with the Union—including representation in the Union Parliament.

The country in general is better suited to grazing than to the raising of crops because of the light rainfall. The karakul sheep industry is particularly well-developed.

ZANZIBAR—Status: Protectorate.

Capital: Zanzibar (population 60,000).

Sultan: Seyyid Sir Khalifa bin Harub.

British Resident: Sir Henry Potter.

Foreign trade (1955): exports, 47% to Indonesia; imports, 28% from Britain. Chief export: cloves (80%).

Agricultural products: cloves, clove oil, coconut oil, copra.

The protectorate consists principally of the islands of Zanzibar (640 sq. mi.) and Pemba (380 sq. mi.), just off the East African coast. Before 1890, the sultanate's territory also included a large area on the mainland, now comprising Italian Somaliland, Kenya and Tanganyika Territory. It was proclaimed a British protectorate Nov. 4, 1890. The British Resident administers the government, but the Sultan still retains considerable authority.

The principal industry is the production of cloves—about 80 per cent of the world supply.

WESTERN HEMISPHERE

BAHAMAS—Status: Colony.

Capital: Nassau (population 36,246).

Governor: Sir Oswald Arthur.

Foreign trade (1956): exports (57% to the U. S.); imports (53% from the U. S.). Chief exports: lumber (26%), crawfish, pit props.

Agricultural products: tomatoes, citrus fruit, sisal.

Sea products: sponges, lobsters, crawfish.

The Bahamas are an archipelago of about 3,000 islands, islets (cays) and rocks, east of Florida and north of Cuba, extending from N.W. to S.E. for about 800 miles. Only about 20 of the islands are inhabited; the most important is New Providence (20 sq. mi.) on which Nassau is located. The islands were reached by Columbus in Oct., 1492, and were a favorite pirate resort in the early 18th century. They have been a Crown colony since 1717. The Constitution provides for a nominated Legislative Council and a popularly elected Assembly. The Governor is advised by an Executive Council.

Over 85 per cent of the population is Negro. The tourist trade is of paramount importance, especially at Nassau.

BARBADOS—Status: Colony.

Capital: Bridgetown (population 13,345).

Governor: Sir Robert Arundell.

Prime Minister: Sir Grantley Adams.

Foreign trade (1956): exports (53% to Britain); imports (35% from Britain). **Chief exports:** sugar (67%), molasses (12%), rum.

Agricultural products: sugar, cotton, maize, cassava.

Manufactures: rum, molasses.

Barbados, an island east of the Windward group in the West Indies, has been a British possession since 1627; it is believed to have been first visited by the Portuguese. The colony has a nominated Legislative Council and a popularly elected Assembly of 24 members. Under a ministerial system of government inaugurated Feb. 1, 1954, the Prime Minister and 4 other members of the Executive Committee (all 5 being members of the Assembly) exercise executive responsibility for most of the departments of government, except defense and foreign affairs.

The island is very densely populated (about 1,400 per sq. mi.). About 77 per cent of the inhabitants are Negro, 5 per cent white and the remainder of mixed blood. Approximately 70 per cent of the total area is cultivated and half of this is devoted to sugar, which is the staple product; there are sugar and molasses plants and several rum distilleries.

BERMUDAS—Status: Colony.

Capital: Hamilton (population 3,500).

Governor: Lt. Gen. Sir John Woodall.

Foreign trade (1956): exports, \$511,581; re-exports, \$4,154,343; imports, \$13,159,853 (53% from the U. S.). **Chief domestic exports:** pharmaceuticals (42%), concentrated essences.

Agricultural products: lily bulbs, potatoes, vegetables, arrowroot.

The Bermudas comprise an archipelago of about 360 small islands, 580 miles east

of North Carolina. The largest is (Great) Bermuda or Main Island. Discovered by Juan Bermudez, a shipwrecked Spaniard, early in the 16th century, the islands were settled in 1612 by an offshoot of the Virginia Company and became a Crown colony in 1684. The Governor is assisted by nominated Executive and Legislative Councils and a popularly elected Assembly of 36 members. In 1940, sites on the islands were leased for 99 years to the U. S. for air and navy bases. Bermuda is also the headquarters of the West Indies and Atlantic squadron of the Royal Navy. The most important factor in the colony's economy is the tourist trade. The arable land is devoted to horticulture rather than agriculture. The colony is heavily dependent on food imports.

BRITISH GUIANA—Status: Colony.

Capital: Georgetown (population 97,821).

Governor: Sir Patrick Muir.

Foreign trade (1956): exports (40% to Canada, 32% to Britain); imports (45% from Britain). **Chief exports:** sugar (44%), bauxite (31%), rice (10%).

Agricultural products: sugar, rice, copra, coffee, fruit.

Minerals: bauxite, gold, diamonds.

Forest products: balata, timber.

The only British possession in South America proper, British Guiana is on the northeastern coast between Venezuela and Surinam (Dutch Guiana). Settled by the Dutch in the 17th century, it was occupied by the British in 1796 and ceded to them at the end of the Napoleonic wars. Behind the low plain which contains the farm area is a higher area containing forest and mineral resources. A new Constitution inaugurated Apr. 1, 1953, provided for a bicameral Legislature, with a lower house largely elected under universal adult suffrage, and an Executive Council with a majority of ministers drawn from the lower house on whose advice the Crown-appointed Governor was bound to act. Following charges of Communist infiltration into the government, British military and naval reinforcements were dispatched to the colony; and on Oct. 9, 1953, the Constitution was suspended.

Forest resources, mostly unexploited, have been estimated at about 40,000,000,000 cu. ft. of merchantable timber.

BRITISH HONDURAS—Status: Colony.

Capital: Belize (population 31,221).

Governor: Sir Colin Thornley.

Chief exports (1956): mahogany (24%), pine.

Agricultural products: bananas, sugar cane, citrus fruits.

Forest products: cedar lumber and logs, mahogany lumber, logs, pine lumber, chicle.

British Honduras is bounded on the north by Mexico and on the west and south

by Guatemala. It was settled in 1662 by woodcutters from Jamaica. An irregular form of local government continued until 1871, when it became a Crown colony; it was separated from Jamaica in 1884. The Governor is assisted by an Executive Council and by a partially elected Legislative Assembly.

The colony's economy is dependent upon timber and other forest exports. Agriculture has never been adequately developed.

Canada

(Member of Commonwealth of Nations)

Area (land only): 3,619,616 square miles.*

Population (1957): 16,589,000 (1951: British 48%; French 31%; German 4%; Ukrainian 3%; others 14%).

Density per square mile: 4.5.

Ruler: Queen Elizabeth II.

Governor General: Vincent Massey.

Prime Minister: John Diefenbaker

Principal cities (census 1956): Montreal, 1,094,448 (seaport); Toronto, 662,096 (manufacturing center); Vancouver, 361,952 (Pacific seaport); Winnipeg, 256,683 (grain); Hamilton, 237,749 (iron and steel); Edmonton, 224,003 (petroleum); Ottawa, 215,113 (capital); Calgary, 177,861 (farming); Quebec, 166,996 (seaport); Windsor, 120,525 (automobiles).

Monetary unit: Canadian dollar.

Religions (census 1951): Roman Catholic 43%; United Church 20%; Anglican 15%; Presbyterian 6%; Baptist 4%; others 12%.

* Total area, including water: 3,845,774 square miles.

HISTORY. The Norse explorer Leif Ericsson probably reached the shores of Canada (Labrador or Nova Scotia) in A.D. 1000, but the history of the white man in the country actually began in 1497, when John Cabot, an Italian in the service of Henry VII of England, reached the shore of Newfoundland or Nova Scotia. Canada was taken for France in 1534 by Jacques Cartier. The actual settlement of New France, as it was then called, began in 1604 at Port Royal in what is now Nova Scotia; in 1608 Quebec was founded. France's colonization efforts were not very successful, but French explorers by the end of the seventeenth century had penetrated beyond the Great Lakes to the western prairies and south along the Mississippi to the Gulf of Mexico. Meanwhile, the English Hudson's Bay Company had been established in 1670. Because of the valuable fisheries and fur trade, a conflict developed between the French and English; in 1713, Newfoundland, Hudson Bay, and Nova Scotia (Acadia) were lost to England.

During the Seven Years' War (1756-63), England extended its conquest, and the British general, Wolfe, won his famous victory over Montcalm outside Quebec (Sept. 13, 1759). The Treaty of Paris (1763) put Canada under English control.

PROVINCES AND TERRITORIES

* Commissioner.

At that time the population of Canada was almost entirely French, but in the next few decades thousands of British colonists emigrated to Canada from the British Isles and from the American colonies. In 1849 the right of Canada to self-government was recognized. By the British North America Act of 1867, the Dominion of Canada was created through the confederation of Upper and Lower Canada, Nova Scotia, and New Brunswick. Prince Edward Island joined the Dominion in 1873. In 1869 Canada had purchased from the Hudson's Bay Company the vast middle west (Rupert's Land) from which the provinces of Manitoba (1870), Alberta, and Saskatchewan (1905) were later formed. In 1871 British Columbia joined the Dominion. The country was linked from coast to coast in 1885 by the Canadian Pacific Railway.

During the formative years between 1867 and 1896, the Conservative party led by Sir John A. Macdonald governed the country, except during the years 1873-78. In 1896 the Liberal party took over and under Sir Wilfrid Laurier, an eminent French Canadian, ruled until 1911. In World War I, more than 500,000 Canadian soldiers fought for the Allied cause. After the Treaty of Versailles, Canada, a full-fledged nation, was admitted to the League of Nations and appointed its own representatives in foreign countries. By the Statute of Westminster (1931) the British Dominions, including Canada, were formally declared to be partner nations with Britain, "equal in status, in no way subordinate to each other," and bound together only by allegiance to a common Crown.

Newfoundland became Canada's tenth province on March 31, 1949, following a plebiscite held July 22, 1948, in which the people voted by a narrow margin to unite with Canada.

GOVERNMENT. Canada, a self-governing member of the Commonwealth of Nations, is a federal union of ten provinces whose powers are laid down in the British North America Act of 1867. The executive powers nominally rest in the hands of the Governor General, who represents the Queen and is appointed by her upon the recommendation of the Canadian government.

Actually, the Governor General acts only with the advice of the Canadian Prime Minister and the members of the Cabinet, who at the same time sit in the federal Parliament. The Parliament has two houses: a Senate numbering 102 members appointed for life, and a House of Commons numbering 265 members apportioned

according to provincial population. Elections are held at least every five years or whenever the party in power is voted down in the House of Commons or considers it expedient to appeal to the people. The Prime Minister is the leader of the majority party in the House of Commons. Laws must be passed by both houses of Parliament and signed by the Governor General in the Queen's name.

The ten provincial governments are nominally headed by Lieutenant Governors appointed by the federal government, but the executive power in each actually is vested in a Cabinet headed by a Prime Minister, who is leader of the majority party. In nine of the ten provinces the legislature is composed of a one-house assembly elected by the people for four years. In Quebec there is a second chamber, the Legislative Council, composed of nominees of the Provincial Government.

Judicial System. The judicial system consists of a Supreme Court in Ottawa (established in 1875), with appellate jurisdiction, and a Supreme Court in each province as well as county courts with limited jurisdiction in most of the provinces. The Governor General in Council appoints the judges of these courts.

ECONOMIC CONDITIONS. *Agriculture.* Agriculture, including horticulture, fruit-growing, and the raising of stock and poultry, is the largest single industry. Canada is one of the world's greatest wheat-exporting countries; production is concentrated in Manitoba, Saskatchewan, and Alberta.

Stock raising and dairy farming have grown greatly since 1920. Ontario and Quebec are the most important dairying prov-

Canadian Governors General and Prime Ministers Since 1867

Term of office	Governor General	Term	Prime Minister	Party
1867-1869	Viscount Monck	1867-1873	Sir John A. Macdonald	Conservative

1926-1931	Viscount Willingdon	1921-1926	W. L. Mackenzie King	Liberal
1931-1935	Earl of Bessborough	1926(3 mos)	Arthur Meighen	Conservative
1935-1940	Baron Tweedsmuir	1926-1930	W. L. Mackenzie King	Liberal
1940-1946	Earl of Athlone	1930-1935	Richard B. Bennett	Conservative
1946-1952	Viscount Alexander	1935-1948	W. L. Mackenzie King	Liberal
1952-	Vincent Massey	1948-1957	Louis S. St. Laurent	Liberal
		1957-	John Diefenbaker	Conservative

inces. On June 1, 1957, Canada had 11,296,-000 cattle, 4,857,000 hogs, 1,661,000 sheep, and 730,000 horses.

Industry. Canadian manufactures rely mainly on domestic raw materials; growing industries which depend largely on materials imported in a raw or semi-finished state include the manufacture of automobiles, sugar, and rubber goods as well as the iron and steel industry in Nova Scotia, Quebec, and Ontario. The latter two provinces account for more than 80 per cent of all manufactures. The abundance of cheap water power is one of the chief factors in the growth of Canadian industry. In 1955 there were 38,182 plants which employed 1,298,461 persons. The most important industries by value of output were pulp and paper, nonferrous-metals smelting and refining, petroleum products, meatpacking, motor vehicles, and sawmill products.

Trade. Canada is one of the great trading nations of the world. The bulk of its foreign commerce is in raw or semi-finished products.

In 1956, Canada's principal customers were the United States (59%), Britain (17%), western Germany (2.9%), Japan (2.7%), and Union of South Africa (1.4%). Leading suppliers were the United States (73%), Britain (8.5%), Venezuela (3.6%), western Germany (1.6%), and Japan (1.1%). Leading exports were newsprint (15%), wheat (11%), planks and boards (6.8%), wood pulp (6.3%), and aluminum and products (5.0%). Leading imports in 1955 were machinery (non-farm) (9%), automobile parts (5%), crude petroleum (5%), farm implements and machinery (4%), and petroleum products (3%).

Communications. Because Canada's exports are to a large extent bulky raw materials, cheap water transportation is essential. The country's system of canals, especially those connecting the Great Lakes, forms an integral part of the inland communications system.

NATURAL FEATURES AND RESOURCES. Covering most of the northern part of the North American continent and with an area larger than that of the United States, Canada's topography is extremely diversified. The northeastern region, including most of Quebec, northern Ontario and Manitoba, and the Northwest Territories, with Hudson Bay in the center, is an important source of minerals, wood pulp, and water power. In the east the mountainous maritime provinces have an irregular coast line on the Gulf of St. Lawrence and the Atlantic. The St. Lawrence plain, covering most of southern Quebec and Ontario, and the interior continental plain, covering southern Manitoba and Saskatchewan and most of Alberta, are the

principal cultivable areas. They are separated by a forested plateau rising from Lakes Superior and Huron. Westward toward the Pacific, most of British Columbia, Yukon, and part of western Alberta are covered by parallel mountain ranges including the Rockies. The Pacific border of the coast range is ragged with fiords and channels. The highest point in Canada is Mt. Logan, 19,850 ft., located in the Yukon.

Canada has an abundance of large and small lakes. In addition to the Great Lakes on the United States border, there are nine others which are more than 100 miles long and 35 which are more than 50 miles long.

The two principal river systems are the Mackenzie and the St. Lawrence. The St. Lawrence with its tributaries is navigable for over 1,900 miles and is the commercial artery of eastern Canada.

As most of the Canadian rivers have waterfalls on their courses they are of considerable importance as sources of power.

Minerals. Canada's mineral resources are both rich and varied. Mining production in 1956 was valued at \$2,067,699,096. Metals come mainly from two widely separated regions, the mountain ranges of the Pacific coast and the province of Ontario. Copper ore also exists in Quebec, Manitoba, and Newfoundland. Production of petroleum centers in Alberta. There are important deposits of uranium in the Northwest Territories.

Forests and Fisheries. The total area of land covered by forests is estimated at 1,300,000 square miles, of which only 435,000 are productive and accessible. The manufacture of pulp and paper is one of the leading industries.

Fishing, Canada's oldest industry, is carried on along the Atlantic and Pacific coasts and on the inland lakes.

FALKLAND ISLANDS AND DEPENDENCIES—Status: Crown Colony.

Governor: Edwin P. Arrowsmith.

Capital: Stanley (population 1,135).

This sparsely inhabited Crown colony consists of a group of islands in the south Atlantic about 250 miles east of the South American mainland. Dependencies include all islands and Antarctic territory between 20° and 50° w. long., south of 50° s. lat., and between 50° and 80° w. long., south of 58° s. lat. The chief industry is sheep raising, and apart from the production of wool, hides and skins, and tallow, there are no known resources. The whaling industry is carried on from South Georgia Island.

The islands were discovered by John Davis in 1592.

JAMAICA AND DEPENDENCIES—Status: Colony.

Capital: Kingston (population 145,000).

Governor: Sir Kenneth Blackburne.

Chief Minister: Norman W. Manley.

Foreign trade (1956)*: exports (49% to Britain); imports (37% from Britain). **Chief exports:** sugar and preparations (34%), bananas (14%), bauxite (12%).

Agricultural products: sugar, rum, bananas, citrus fruits, ginger, coffee, pimento.

Mineral: bauxite.

* Excluding dependencies.

Jamaica, the largest island in the British West Indies (4,470 sq. mi.), is eighty miles south of the eastern end of Cuba. Its island dependencies include the Turks and Caicos Islands (about 600 mi. N.E.), Cayman Islands (about 300 mi. N.W.) and two uninhabited cays. It was discovered by Columbus in 1494 and remained in Spanish possession until 1655, when it was taken by the British. According to the Constitution of Nov. 20, 1944, as amended in 1953, the Governor is assisted by a House of Representatives; a Legislative Council (upper house); and an Executive Council of whom the Chief Minister is appointed by the Governor subject to approval of the House.

Sites were leased for 99 years to the United States in 1940 for naval and air bases.

The colony's economy depends on agriculture, and about 200,000 acres are under cultivation. Sugar took the place of bananas as the chief crop during World War II. Jamaica is virtually the sole source of pimento.

LEEWARD ISLANDS—Status: Group of colonies.

Seat of governor: St. John's (Antigua) (population 11,000).

Governor: Alexander T. Williams.

Chief export: sugar.

Agricultural products: sugar, cotton, coconuts, citrus fruits, tobacco.

The Leeward Islands, lying southeast of Puerto Rico, are a group of four colonies—Antigua (108 sq. mi.) and dependencies (63 sq. mi.); Virgin Islands (67 sq. mi.); St. Kitts (68 sq. mi.) and Nevis (50 sq. mi.), and dependency (34 sq. mi.); and Montserrat (33 sq. mi.). They have a common governor but their governments are otherwise separate.

In 1940, the United States acquired a 99-year lease on sites for a naval and air base on Antigua. The islands are agricultural.

TRINIDAD AND TOBAGO—Status: Colony.

Capital: Port of Spain (population 120,000).

Governor: Sir Edward Beetham.

Chief Minister: Eric Williams.

Foreign trade (1956): exports (35% to Britain); imports (35% from Britain).

Chief exports: crude petroleum and products (66%), sugar (8%), cacao (3%).

Agricultural products: raw sugar, cacao, coconuts, citrus fruit.

Manufactures: petroleum products
Minerals: crude petroleum, asphalt.

The islands of Trinidad and Tobago are sixteen and twenty-one miles, respectively, off Venezuela just north of the Orinoco delta. Both were discovered by Columbus in 1498, and remained Spanish possessions until 1797, when the British took them. They are administered by a Governor, assisted by an Executive Council and a Legislative Council, popularly elected. In 1941 the United States was granted 99-year leases on the islands for naval and air bases.

The soil is rich for the growing of tropical products; sugar and cacao are the principal crops. Trinidad is one of the leading oil producers of the Commonwealth, and the world's most notable source of asphalt, found in Pitch Lake, thirty-eight miles southeast of Port of Spain.

WEST INDIES FEDERATION: established Jan. 3, 1958, it includes Antigua, Barbados, Dominica, Grenada, Jamaica, Montserrat, Trinidad and Tobago, St. Lucia, St. Vincent, and St. Kitts-Nevis. It expects to attain Commonwealth status within five years. Prime Minister Herbert Adams was chosen April 18, 1958.

In the March, 1958, elections, Federal Labor (Socialist) party obtained twenty-three seats, Democratic Labor (Anti-Socialist) party twenty-one, Barbados National (pro-Socialist) one in the new West Indies Parliament.

WINDWARD ISLANDS—Status: Group of colonies.

Seat of governor: St. George's (Grenada) (population 5,775).

Governor: Sir Colville M. Deverell.

Agricultural products: arrowroot (St. Vincent), nutmeg (Grenada), mace (Grenada), cacao.

These islands, four in number, form the southern portion of the Lesser Antilles in the Caribbean; they extend approximately 250 miles from the French colony of Guadeloupe on the north to the British colony of Trinidad on the south. Their total area of about 820 square miles divides as follows: Dominica, 304; St. Lucia, 233; St. Vincent, 150; Grenada, 133. The four colonies are not federated and have no common legislature or laws, although they do have a common Governor.

Agriculture is the only industry. St. Vincent has a virtual monopoly on the world supply of arrowroot.

ASIA

ADEN—Status: Colony and Protectorate.

Governor: Sir William Luce.

Foreign trade: exports (16% to Britain); imports (30% from Kuwait).

Manufactures: crude petroleum refined.

COLOMBO PLAN

The Colombo Plan, started among Commonwealth countries of Southeast Asia in 1950, focuses attention on recipient rather than donor. Its objective is to improve living standards of economically underdeveloped countries by coordinating their approach to foreign economic aid. Substantial contributions have been made by the U. S., the U. K., Australia, New Zealand and the International Bank for Reconstruction and Development.

The British colony and protectorate of Aden is situated on the volcanic southern tip of the Arabian peninsula, along the Gulf of Aden. The colony (port) of Aden was annexed to Britain in 1839 and was part of the Bombay Presidency until 1932, when it became a separate province with the Chief Commissioner responsible to the Indian government. In 1937 it was transferred from Indian to Imperial control as a Crown colony. It is administered by a Governor and Commander in Chief aided by an Executive Council and a Legislative Council. The 20-odd Sultans who rule their respective territories in the protectorate are responsible to him.

Aden colony is essentially a transshipment point and bunkering station and is also the commercial center for the Yemen and the African coast opposite. Aden airport is a station on the Khartoum-Karachi air route. Agriculture is unimportant except for some coffee and tobacco, and except for the large petroleum refinery of the British Petroleum Co. Ltd. (formerly Anglo-Iranian Oil Co.), which went into operation in 1954, manufacturing activity is limited to salt, cigarettes, and dhows.

BAHREIN ISLANDS—Status: Protectorate and Sheikdom.

Capital: Manama (population 45,000).

Ruler: Sheik Sir Salman bin Hamad al Khalifah.

British Political Agent: C. A. Gault.

These islands form an archipelago off Arabia's east coast and are nominally an independent sheikdom, but are actually a protectorate of Great Britain, which is represented by a Political Agent. The islands are the center of the Persian Gulf pearl fisheries and the site of an airport on the London-Australia route. The concession for exploitation of petroleum deposits, discovered in 1932, is held by an affiliate of U. S.-owned interests. Output in 1956 was 11,013,702 barrels. Agriculture is of some importance. Most of the trade of the Saudi Arabian provinces of Nejd and Hasa pass through Bahrein.

BORNEO

COLONY OF NORTH BORNEO—Status:

Colony.

Capital: Jesselton (population 11,704).

Governor: Sir Evelyn Turnbull.

Foreign trade (1956)*: exports (23% to Britain); imports (24% from Britain). Chief exports: rubber (33%), timber (22%), copra (19%).

Agricultural products: rubber, rice, copra.

Forest products: timber, cutch, rattans.

* Excluding transit trade.

The Colony of North Borneo, constituting the extreme northern portion of the island of Borneo, consists largely of highlands and occasional open valleys and plateaus. The territory was a British protectorate administered under a royal charter by the British North Borneo Company from 1881 until July 15, 1946, when it assumed the status of a Crown colony. It was occupied by Japanese troops from 1942 until 1945. Labuan (pop. 9,000; area, 35 sq. mi.), a small island off the North Borneo coast, was transferred from the jurisdiction of the Straits Settlements to that of North Borneo in 1946.

The population is comprised largely of aboriginal tribesmen living on a very primitive level of culture and social organization. In 1951, 72.7% of the population was native, 22.3% Chinese; there were 1,213 Europeans. Mineral resources are believed to be considerable, but the colony's income is based on agricultural and jungle produce.

BRUNEI—Status: Protectorate.

Capital: Brunel (population 11,000).

Sultan: Omar Ali Saifuddin.

British Resident: J. O. Gilbert.

Foreign trade: Chief export: petroleum (99%).

Agricultural products: rice, rubber.

Mineral: petroleum.

Brunei lies on the northwestern coast of Borneo, entirely surrounded by Sarawak. It was placed under British protection in 1888, and in 1906 a treaty was concluded whereby the native Sultan yielded administration of the state to a British Resident. The Governor of Sarawak was appointed High Commissioner for Brunei in 1948. Japanese occupied Brunei in 1942-45.

Most of the inhabitants are Malays and Borneans; in 1955, 19% were Chinese and only 1.5% European. The bulk of the population lives in and around the capital situated on the Brunei River 9 miles from its mouth. The interior is largely forested and contains rich timber. All petroleum is exported to Sarawak for refining.

SARAWAK—Status: Colony.

Capital: Kuching (population 60,000).

Governor: Sir Anthony F. Abell.

Foreign trade. Chief exports: petroleum and products (73%), rubber (14%), pepper (5%).

Agricultural products: rubber, pepper, copra, rice.

Minerals: petroleum, gold, silver, coal.

Sarawak extends along the northwestern coast of Borneo for about 500 miles. In 1841 part of the present territory was granted by the Sultan of Brunei to Sir James Brooke. The state, enlarged by additional concessions made between 1861 and 1905, continued to be ruled by members of the Brooke family until the Japanese occupation in Dec. 1941. A British protectorate since 1888, Sarawak became a Crown colony July 15, 1946, through agreement between the British government and the then ruling Rajah, Sir Charles Vyner Brooke.

The colony is mountainous and well watered; inland communication is largely by water. Most of the inhabitants are Malays, Dyaks, and Chinese. The most important mineral is petroleum, which was discovered at Miri in 1909 and subsequently worked by Sarawak Oilfields, Ltd. There are also important forest resources.

Ceylon

(Member of Commonwealth of Nations)

Area: 25,332 square miles.

Population (est. July 1, 1956): 8,929,000 (1953: Sinhalese, 69%; Tamil, 21%; Moors, 6%; Burghers and Eurasians, .5%; Europeans [6,909] and others, 3.5%).

Density per square mile: 352.5.

Ruler: Queen Elizabeth II.

Governor General: Sir Oliver Goonetilleke.

Prime Minister: S.W.R.D. Bandaranaike.

Principal cities (census 1953): Colombo, 423,481 (capital); Dehiwala—Mt. Lavinia, 80,086 (suburb of Colombo); Jaffna, 77,218 (fibers, tobacco).

Monetary unit: Ceylonese rupee.

Languages: English, Sinhalese, Tamil.

Religious (est.): Buddhist, 61%; Hindu, 22%; Moslem, 7%; Christian (mainly Roman Catholic), 9%; others, 1%.

HISTORY AND GOVERNMENT. Known to the Greeks and Romans as Taprobane and to Mohammedan seamen as Serendib, Ceylon is reputed to have been invaded from India in 504 B.C. by Vijaya, the first Sinhalese King. Buddhism was introduced in the third century B.C. In subsequent centuries the island was invaded and occupied several times by Indian princes.

Ceylon became a full-fledged, self-governing dominion on Feb. 4, 1948, with Stephen Senanayake as Prime Minister. On his death, Mar. 22, 1952, his son Dudley took office. The latter resigned on account of ill health on Oct. 12, 1953, and was succeeded by Sir John Kotelawala. The leftist People's United Front won the April, 1956, elections and its leader, S.W.R.D. Bandaranaike, formed a new government on April 12.

Under the 1946 Constitution, Ceylon's government is headed by the Crown-appointed Governor-General, who is advised by a Council of Ministers headed by the Prime Minister. The bicameral Parliament consists of a House of Representatives of 101 members, and a Senate of thirty members.

ECONOMIC CONDITIONS. Ceylon is heavily dependent on food imports, particularly rice, the staple food. A large part of the cultivated land (25% of the total area) is devoted to the chief export crops—tea, rubber, and coconut products, all of which are grown for the most part on plantations. Other crops include rice, fruits, cinnamon, and citronella.

Leading exports in 1956 were tea (60%), rubber (16%), and coconut oil (6%). Leading customers were Britain (29%), China (10%), and the United States (8%); leading suppliers, Britain (21%), India (13%), and Burma (9%).

NATURAL FEATURES AND RESOURCES. Most of the island is flat, but mountains in the south rise to 8,000 feet. The island extends to a maximum of 270 miles north and south, and 140 miles east and west. There are numerous rivers, the longest of which is the Mahaweli-Ganga (206 miles).

Mineral resources include graphite (plumbago), gem stones, mica, magnesite, and vanadium; uranium deposits have been reported.

CYPRUS—Status: Colony.

Capital: Nicosia (pop. 1956: 49,000).

Governor: Sir Hugh Foot.

Foreign trade (1956): exports (34% to western Germany); imports (45% from Britain). Chief exports: cupreous concentrates (32%), pyrites (27%).

Agricultural products: barley, wheat, potatoes, wine, fruit.

Minerals: copper ore (concentrates), pyrite ore.

Cyprus, third largest island in the Mediterranean, is roughly equidistant from Asia Minor to the north and Syria to the east. The site of early Phoenician and Greek colonies, it passed in 1571 from the rule of Venice to that of the Ottoman Empire, under which it remained until 1878, when it was ceded to Great Britain for administrative purposes. On the outbreak of hostilities with Turkey in World War I (Nov. 5, 1914), the island was formally annexed to Great Britain.

The Governor is advised by a nominated Executive Council, but he alone possesses the lawmaking power.

Demands for self-determination and union with Greece, marked by terrorism, continues to be a major problem.

The people are mainly Greeks (80.8% by the last census—1946) and Turks (17.7%), although there is an Armenian colony and a small Latin colony. More than 80 per cent of the population is Christian. Agriculture is the principal industry. Sponge fishing is also important, as well as copper mining.

HONG KONG—Status: Colony.

Capital: Victoria (population 1,000,000).

Governor: Sir Robert Blank.

Foreign trade: Chief export: textiles.

Agricultural products: rice, sugar cane.

Major industries: shipbuilding, rope making, cement, sugar refining, textiles.

The colony of Hong Kong comprises the island of Hong Kong (32 sq. mi.), Stonecutters' Island, and the Kowloon peninsula and the New Territories on the adjoining mainland. The island of Hong Kong, located at the mouth of the Canton River about ninety miles southeast of Canton, was ceded to Britain in 1841.

Stonecutters' Island and Kowloon were annexed in 1860, and the New Territories, which are mainly agricultural lands, were leased from China in 1898 for ninety-nine years. Hong Kong was attacked by Japanese troops Dec. 7, 1941, and surrendered the following Christmas Day. It remained under the occupation of the Japanese until Sept., 1945.

Possessing an excellent natural harbor seventeen miles in extent, the only safe deep-sea anchorage between Shanghai and Indo-China, Hong Kong is the entrepôt for trade throughout southern China and the western Pacific.

The cities of Victoria and Kowloon contain the greater part of the population, which is overwhelmingly Chinese. Besides those Chinese engaged in agriculture or industry, a large population lives in sampans or junks either in Victoria Harbour or neighboring bays, supporting itself by fishing or by laboring on the wharves.

India (Republic)

(Member of Commonwealth of Nations)

Area: 1,269,640 square miles.*

Population (est. 1957): 392,440,000* (Hindu, 85%; Moslem, 9.9%; Christian, 2.3%; Sikh, 1.7%; others [Jain, Buddhist, Zoroastrian, Jewish, etc.], 1.1%).

Density per square mile: 301.6.

President: Rajendra Prasad.

Prime Minister: Pandit Jawaharlal Nehru.

Principal cities (census 1951): Bombay, 2,839,270 (seaport; cotton and textiles); Calcutta, 2,548,677 (chief port); Madras, 1,416,056 (seaport); Hyderabad, 1,085,722 (trade center); Delhi, 914,973 (manufacturing); Ahmedabad, 788,333 (manufacturing); Bangalore, 778,977 (manufacturing); Kanpur (Cawnpore), 705,383 (textiles); New Delhi, 276,314 (capital).

Monetary unit: Rupee.

Principal languages: Hindi (official), English†, Bengali, Assamese, Gujarati, Kannada, Kashmiri, Malayalam, Marathi, Oriya, Punjabi, Sanskrit, Tamil, Telugu, Urdu.

* Including Jammu and Kashmir; status in dispute with Pakistan. † To be used for all official purposes until 1965.

HISTORY. The Aryans or Hindus who invaded India between 2400 and 1500 B.C. from the northwest found a land already well civilized. Buddhism was founded in the sixth century B.C. and spread through northern India. The first exact date in Indian history is 327 B.C., when Alexander the Great invaded India. Meanwhile India continued to be divided into rival states.

In 1526, Mohammedan invaders founded the great Mogul empire, centered on Delhi, which lasted at least in name until 1857. Akbar the Great (1542–1605) strengthened this empire and became the ruler of a greater portion of India than had ever before acknowledged the suzerainty of one man. The long reign of his great-grandson, Aurangzeb (1658–1707) represents both the culmination of Mogul power and the beginning of its decay.

Vasco da Gama, the Portuguese explorer, visited India first in 1498, and for the next hundred years the Portuguese had a virtual monopoly on trade with the subcontinent. Meanwhile, the English founded the East India Company, which set up its first factory at Surat in 1612 and began expanding its influence, fighting against the Indian rulers and the French, Dutch, and Portuguese traders simultaneously.

Bombay, taken from the Portuguese, became the seat of English rule in 1687. The defeat of French and Moslem armies by Lord Clive in the decade ending in 1760 laid the foundation of the British Empire in India. From then until 1858, when the administration of India was formally transferred to the British Crown following the great mutiny of native troops in 1857, the East India Company was constantly occupied with the suppression of native uprisings and the extension of British rule.

After World War I, in which the Indian states sent more than 1,000,000 troops to fight beside the Allies, Indian nationalist unrest rose to new heights under the leadership of a little Hindu lawyer, Mohandas K. Gandhi, called Mahatma Gandhi. His tactics, of a politico-religious nature, called for non-violent revolt against British authority. He soon became the leading spirit of the all-India Congress Party, which was the spearhead of Indian revolt against British rule. In 1919 the British gave added responsibility to Indian officials, and by an act passed in 1935 India was given a federal form of government and a measure of self-rule.

During the 1940's the policy of both the wartime coalition government of Britain and later the Labour government envisaged an unpartitioned India as a self-governing federal dominion including both British India and the native states. In 1942, with the Japanese pressing hard on the eastern borders of India, the British war Cabinet decided to send Sir Stafford Cripps to India to try to reach a political settlement with nationalist leaders. The mission failed. Shortly thereafter the Congress Party took the position that the British must quit India. In August 1942, fearing mass civil disobedience, the government of India carried out widespread arrests of Congress leaders, including Gandhi.

Gandhi was released in May, 1944, and other leaders later. Negotiations for a settlement were resumed and they proved fruitless until the British Labour government sent a mission in 1946 which obtained the agreement of the Congress party and Mohammed Ali Jinnah's Moslem League to a long-term plan for a Constitution based on three separate groups of provinces with a minimal center. However, agreement was not reached on an interim government and the Moslem League later reverted to its position of unconditional partition. Finally, in February, 1947, the Labour government announced its determination to transfer power to "responsible Indian hands" by June, 1948, even if a Constitution had not been worked out.

With the appointment at the same time of Lord Mountbatten as Governor-General, events moved swiftly. By early June, 1947, agreement was reached on the partitioning of India along religious lines (a plan previously opposed by the predominant Hindus and by Britain) and on the splitting of the provinces of Bengal and the Punjab, which the Moslems had claimed in their entirety.

The Indian Independence Act, passed quickly by both houses of the British Parliament, received royal assent on July 18, 1947, and on Aug. 15 the Indian Empire, united under British rule for almost a century, passed into history.

GOVERNMENT. India is now a sovereign republic within the Commonwealth of Nations—a status approved by the other Commonwealth nations at London in April, 1949, on the condition that India recognize the King as head of the Commonwealth. Under the Constitution adopted by the Constituent Assembly on Nov. 26, 1949, India has a parliamentary type of government. The constitutional head of state is the president, who is elected every five years. Dr. Rajendra Prasad has held this office continuously since January 26, 1950. He is advised by a prime minister and cabinet based on a majority of the bicameral parliament, which consists of a Council of States, representing the constituent units of the Republic, and a House of the People, elected every five years by universal adult (21 years) suffrage.

Native States. Most of the 560-odd native states and subdivisions of pre-1947 India acceded to the new nation, and the central government pursued a vigorous policy of integration. This took three forms: (1) merger into adjacent provinces, (2) conversion into centrally administered areas, and (3) grouping into unions of states. Finally, under a controversial reorganization plan effective Nov. 1, 1956, the unions of states were abolished and merged into adjacent states and India became a union of fourteen states and six centrally administered areas.

The status of the large princely state of Jammu and Kashmir on the northwest frontier is in dispute with Pakistan. It is 85 per cent Moslem, but its Hindu ruling

POLITICAL SUBDIVISIONS OF REPUBLIC OF INDIA, NOVEMBER 1956

prince acceded to India, which took over administration following invasion by Moslem troops in late 1947. The U. N. Security Council voted on April 21, 1948, to hold a plebiscite in the area, but it was never held. The part occupied by India was incorporated into India in Jan. 1957.

ECONOMIC CONDITIONS.

Leading customers in 1956 were Britain (31%), the United States (15%), and Japan (5%); leading suppliers, Britain (26%), the United States (12%), and western Germany (10%). Leading exports were tea (23%), jute, and bagging (19%) and cotton manufactures. Main imports included petroleum and products, machinery, raw cotton, and rice.

NATURAL FEATURES AND RESOURCES.

The Indian republic contains a large part of the great Indo-Gangetic plain which extends from the Bay of Bengal on the east to the Afghan frontier and the Arabian Sea on the west. This plain is the richest and most densely settled part of the subcontinent. Another distinct natural region is the Deccan, a plateau of 2,000 to 3,000 feet elevation, occupying the southern or peninsular portion of the subcontinent.

Forming a part of the republic are several groups of islands—the Laccadives (fourteen islands) in the Arabian Sea; the Andamans (204 islands) and the Nicobars (nineteen islands) in the Bay of Bengal.

India's three great river systems, all rising in the Himalayas, have extensive deltas. The Ganges flows south and then east for 1,540 miles across the northern plain to the Bay of Bengal; part of its delta, which begins 220 miles from the sea, is within the republic. The Indus, starting in Tibet, flows northwest for several hundred miles in Kashmir before turning southwest toward the Arabian Sea; it is important for irrigation in Pakistan. The Brahmaputra, also rising in Tibet, flows eastward first through India and then south into Pakistan and the Bay of Bengal.

Minerals. The republic has rich mineral resources. The most valuable mineral is coal, deposited throughout most of the nation.

Assam and the Punjab produce oil. Other minerals include iron ore, monazite, diamonds, magnesite, uranium, zircon, silver, graphite, gypsum, tungsten ore, and sapphires.

Malaya, Federation of

(Member of Commonwealth of Nations)

Area: 50,690 square miles.

Population (est. June 30, 1955): 6,058,317
(1947: Malayan, 49.5%; Chinese, 38.4%;

Indian and Pakistani, 10.8%; others, 1.3%).

Density per square mile: 119.5.

Head of State: Sir Abdul Rahman.

Prime Minister: Yang Rahman Putra.

Principal cities (census 1947): George Town, 189,063 (seaport); Kuala Lumpur, 175,961 (capital); Ipoh, 80,894 (tin); Malacca, 54,507 (seaport, rubber, copra).

Monetary unit: Malayan dollar.

Languages: English, Malay, Chinese, Tamil.

Religions: Moslems (predominant), Christian, Buddhist.

The Federation of Malaya consists of the states of Johore, Kedah, Kelantan, Negri Sembilan, Pahang, Perak, Perlis, Selangor, and Trengganu, and the former British settlements (crown colonies) of Malacca and Penang. The native states were brought under British administration by a process of commercial and political exploitation in the late nineteenth and early twentieth centuries.

As the result of agreements reached with the British government in 1956 and 1957, the Federation attained full independence within the Commonwealth on August 31, 1957. Sir Abdul Rahman was elected the first head of state, and Tengku Abdul Rahman (no relation) became prime minister.

Under the 1957 constitution Malaya is a sovereign constitutional monarchy within the Commonwealth of Nations, recognizing the Queen as head of the Commonwealth. The head of state is elected by the rulers of the states from among themselves for a 5-year term. He is advised by the prime minister and his cabinet. Parliament consists of a senate and house of representatives, but pending elections scheduled for 1959 the present legislative council continues in office. Each state has a constitutional government headed by a hereditary ruler except for Malacca and Penang, the governors of which are appointed by the head of state.

About 65% of the cultivated area is devoted to rubber, of which Malaya is one of the world's largest producers. Other export crops include coconuts and coconut oil, tea, and pineapples. Production of rice, the principal subsistence crop, falls far short of meeting local requirements.

Leading customers in 1956 were Britain (17%), the United States (15%), and Japan (8%); leading suppliers, Indonesia (28%), Britain (18%), and Thailand (7%). Leading exports in 1955 were rubber (56%) and tin (10%).

Malaya is rich in minerals. Tin, the most important, occurs throughout the country but production is concentrated in Perak and Selangor. Other minerals include iron ore, coal, bauxite, tungsten, and manganese ore.

Pakistan (Republic)

(Member of Commonwealth of Nations)

Area: 364,737 square miles.

Population (est. 1956): 84,777,000

(Moslem, 86%; Hindu, 13%; others, 1%).

Density per square mile: 229.2.

President: Maj. Gen. Iskander Mirza.

Prime Minister: (vacant as of Oct. 9, 1958. See News Record of 1958.)

Principal cities (census 1951): Karachi, 1,126,417 (capital); Lahore, 849,476 (capital, west Pakistan); Dacca, 276,033 (capital, east Pakistan); Hyderabad, 241,801 (trade and rail center); Rawalpindi, 237,219 (military center).

Monetary unit: Pakistani rupee.

Principal languages: Bengali (official),

Urdu (official), English*, Hindi, Punjabi.

* To be used for official purposes until 1976.

HISTORY AND GOVERNMENT. Pakistan, a self-governing member of the Commonwealth of Nations and one of the two successor states to British India, is the world's largest and most important Moslem state.

The history of Pakistan prior to 1947 is principally that of India. (See India.) Upon the transfer of power on Aug. 15, 1947, Mohammed Ali Jinnah became the first Governor-General; he died on Sept. 11, 1948, and was succeeded by Khwaja Nazimuddin. The latter became Prime Minister upon the assassination of Liaquat Ali Khan, Oct. 16, 1951; he was replaced on Apr. 17, 1953, by Mohammed Ali. Chaudry Mohammed Ali succeeded him on Aug. 11, 1955. Pakistan was proclaimed a republic March 23, 1956, and Gov. Gen. Iskander Mirza was elected Provisional President. H. S. Suhrawardy, the first non-Moslem League prime minister, took office Sept. 12, 1956.

Under the Constitution of Feb. 29, 1956, Pakistan is a republic but continues its membership in the Commonwealth of Nations. The President is elected for five years by members of the central and provincial legislatures. The Prime Minister and his Cabinet are named by the President but are collectively responsible to the National Assembly. The Assembly has 300 members, divided equally between East and West Pakistan and directly elected for five years.

Provinces. Pakistan consists of two provinces—West and East Pakistan—approximately 1,000 miles apart, separated by the republic of India. The province of West Pakistan consists of Sind, Baluchistan, the former North-West Frontier Province, western Punjab, the princely state of Bahawalpur and a few other small native states. The province of East Pakistan consists of eastern Bengal and the Sylhet district of Assam. Pakistan contains large communal minorities of Hindus and Sikhs.

ECONOMIC CONDITIONS. Pakistan, poor in industry and natural resources, is

mainly an agricultural nation. Upwards of 45,000,000 acres are under cultivation, almost half of which are irrigated, largely in Sind and west Punjab in western Pakistan. The Punjab contains important wheat-growing areas, and eastern Pakistan is rich in jute, rice, and tea. In 1953-54 there were 6,145,000 sheep, 7,067,000 buffalo, 31,060,000 cattle, 470,000 horses, and (1952) 477,000 camels.

Pakistan is an exporter of agricultural products and an importer of manufactured commodities.

Chief exports in 1956 were jute (46%), raw cotton (23%), tea, wool, and jute manufactures. Leading customers in 1955 were Britain (15%), India (13%), Japan (12%), and the United States (8%); leading suppliers, Britain (24%), Japan (14%), and the United States (11%). Leading imports were machinery, petroleum and products, iron and steel and products, vehicles, and cotton piece goods.

Development of a unified nation is retarded by the fact that communication between east and west Pakistan is possible only through a thousand miles of Indian territory or by a long sea voyage.

Since partition, Pakistan has made much progress toward industrialization. The most important manufacturing area is in the vicinity of Lahore in the Punjab. Industries include cotton ginning, spinning and weaving, jute manufacturing, sugar refining, cement making, flour milling, railway and engineering workshops, and petroleum refining.

NATURAL FEATURES AND RESOURCES. Almost all of Sind and the west Punjab are a continuation of north-central plains leading up to rugged mountains in the north and west which traverse Baluchistan and the North-West Frontier Province. Eastern Pakistan is a low-lying, flat country with elevation averaging not more than 600 feet above sea level.

Mineral resources are limited to petroleum, coal, lignite, chromite, and gypsum. Vast quantities of natural gas were discovered at Sui, Baluchistan, in 1952.

SINGAPORE—Status: Colony.

Capital: Singapore (population 1947: 441,885).

Commissioner General in Southeast Asia: Sir Robert Scott.

Governor: W. A. C. Goode.

Chief Minister: Lim Yew Hock.

Foreign trade: see Federation of Malaya.

Singapore, founded in 1819 by Sir Stamford Raffles, comprises the island of Singapore and adjacent islets. It became a

separate Crown colony of Great Britain on Apr. 1, 1946, when the former colony of the Straits Settlements was dissolved. Penang and Malacca were transferred to the Malayan Union, and the small island of Labuan to North Borneo. The Cocos or Keeling Islands were transferred to Australian control in 1951 and Christmas Island in 1957.

Under its 1955 Constitution, Singapore has a Legislative Assembly of thirty-two, twenty-five of whom are directly elected, and a Council of Ministers responsible to the Assembly.

The Commissioner General in Southeast Asia is charged with the coordination of administration in the Malayan Federation, Singapore, Sarawak, North Borneo, and Brunei.

The basis of Singapore's prosperity is its entrepôt trade. It handles a large part of the export trade of Malaya and also conducts a large volume of trade with Indonesia. Singapore has an excellent natural harbor and is the principal British naval base in the Far East. About 78% of the population is Chinese and 12% Malayan.

OCEANIA

Australia, Commonwealth of

(Member of Commonwealth of Nations)

Area: 2,974,581 square miles.

Population (est. 1957): 9,643,000 (excluding full-blooded aborigines, estimated at 50,000).

Density per square mile: 3.2.

Ruler: Queen Elizabeth II.

Governor General: Field Marshal Sir William Slim.

Prime Minister: Robert Gordon Menzies.

Principal cities (est. June 30, 1956): Sydney, 1,935,880 (seaport, wool market); Melbourne, 1,595,300* (seaport, wool, wheat); Brisbane, 527,500 (seaport, industrial center); Adelaide, 514,000 (seaport); Perth, 369,000 (western seaport); Canberra, 32,440 (capital).

Monetary unit: Australian pound (£A).

Language: English.

Religions (census 1947): Anglican, 39.0%; Roman Catholic, 20.7%; Presbyterian, 9.8%; Methodist, 11.5%; other Christians, 7.1%; others, 11.9%.

* Estimate Dec. 31, 1955.

HISTORY AND GOVERNMENT. Australia was the last continent to be discovered. The first Europeans to land were the Dutch, who sailed into the Gulf of Carpentaria in March, 1606. Later in the same year, Luis Vas de Torres, a Spaniard, sailed through the strait subsequently named for him, and may have touched at several points on the north coast. In 1642 Abel Tasman (for whom Tasmania was named) sailed from west to east along the southern shore and proved that Australia was not a part of the Antarctic Continent.

The continent was called New Holland until about 1850.

In 1770 Captain James Cook, after visiting New Zealand, sailed to the east coast of New Holland and landed south of the present city of Sydney. His account of the country led to its being claimed and settled by Great Britain.

The first settlement, made in 1788 at Botany Bay, was founded as a penal station for criminals from England. Transportation of criminals was virtually suspended in 1839, and Australia had comparatively few white settlers until gold was discovered in Victoria in 1851, after which immigrants poured in. By 1860 all the states (then separate colonies) except Western Australia had been granted responsible government.

On January 1, 1901, the six Australian states united to form the Commonwealth of Australia.

Federal judicial power is vested in a Federal Supreme Court of 7 justices, appointed by the Governor General in Council. Each state has its own judicial system.

ECONOMIC CONDITIONS. About 55 percent of Australia's total area is suitable (mining excepted) only for pastoral pursuits. On March 31, 1956, there were 139,124,000 sheep, 16,457,000 cattle, 1,166,000 hogs and 770,000 horses.

Sugar and cotton are grown in Queensland and New South Wales, tobacco in northeast Victoria, and vines chiefly in South Australia and Victoria.

New South Wales is the leading industrial state. Power for industry is derived almost entirely from coal.

In 1955-56 the leading customers were Britain (33%), Japan (11%), France (9%) and the United States (7%); leading suppliers, Britain (43%), the United States (12%), western Germany (4%), and Arabian states (4%). Chief exports were wool (43%), meat (8%), wheat (6%), and fruit (4%). Leading imports included petroleum and products, motor vehicles, iron and steel, and cotton piece goods.

The principal ports are Sydney, Melbourne, and Adelaide.

NATURAL FEATURES AND RESOURCES. Australia is approximately equal in area to the United States and is more than three-fourths the size of Europe.

Along the east coast, ranges of mountain run from north to south, reaching the highest point in Mt. Kosciuszko (7,352 ft.). The western half of the continent is occupied by a desert plateau which rises into barren, rolling hills near the west coast. It includes the Great Victoria Desert, to the south, and the Great Sandy Desert to the north. The island of Tasmania (26,215 sq. mi.) lies off the southeastern coast.

Australia possesses considerable mineral resources. Most important is gold, followed by coal, mined near Sydney, Brisbane, and in eastern Tasmania. The Broken Hill mines in New South Wales are one of the most valuable silver-lead-zinc areas in the world. Other important minerals in 1955 included tin, copper, iron ore, and uranium. Petroleum was discovered in Western Australia in 1953.

Forest products include timber (rough sawn), eucalyptus oil, sandalwood oil, tan bark and yacca gum. Sea products include *bêche-de-mer*, oysters, pearls, pearl shell, tortoise shell, and agar-agar.

DEPENDENCIES. Norfolk Island (13 sq. mi.), under Commonwealth administration since 1914, lies about 800 miles east of New South Wales. It enjoys a delightful subtropical climate. Citrus fruits, bananas and coffee are grown.

Nauru (about 8 sq. mi.), an important source of phosphate (exports about 1,000,000 tons annually) was annexed by Germany in 1888 and was placed under joint Australian, New Zealand and British mandate after World War I. In 1947 it was placed under U. N. trusteeship, with the same three administering powers. It lies approximately 2,215 miles northeast of Sydney.

The Ashmore and Cartier Islands (.8 sq. mi.), about 200 mi. off the northeast coast, were placed under Australian authority in 1931, while the Heard and McDonald Islands (158 sq. mi.), about 2,500 mi. southwest of Fremantle, were transferred to Australian control in 1947.

The Australian Antarctic Territory (2,472,000 sq. mi.), comprising all the islands and territories other than Adélie Land situated south of 60° S. lat. and lying between 160° E. long. and 45° E. long., was placed under Australian authority by an order in council effective in 1938.

The Cocos (Keeling) Islands (5 sq. mi.; population 1,000) are a group of 27 small coral islands in the Indian Ocean about 1,160 mi. southwest of Singapore. Used as a link on the Australia-South Africa air route, they were placed under Australian administration in 1951. Christmas Island (62 sq. mi.; population 2,000), about 850 mi. southeast of Singapore, was transferred to Australian control in 1957. It has important phosphate deposits.

PAPUA AND NEW GUINEA, TERRITORY OF—Status: Australian territory and U. N. trust territory.

Capital: Port Moresby (population 13,800).

Chief exports: copra, rubber, gold.

Agricultural products: coconuts, rubber, copra, cacao.

Minerals: gold, silver, platinum.

Effective July 1, 1949, the Australian

territory of Papua and the U. N. trust territory of New Guinea were joined in an administrative union by act of the Australian Parliament. Provision is made for an executive and a legislative council.

Papua, comprising the southeastern part of the island of New Guinea, and the islands of the D'Entrecasteaux, Louisiade and nearby groups, was annexed by Queensland in 1883 and by the British Crown in 1888. It came under the control of the Australian Commonwealth in 1961 and became the Territory of Papua in 1966. Japan invaded Papua in early 1942, but in Dec. 1942, Australian control was restored.

The U. N. trust territory of New Guinea, comprising the northern section of eastern New Guinea (93,000 sq. mi.), was mandated in 1920 by the League of Nations to the government of the Commonwealth of Australia, together with the Bismarck Archipelago (New Britain, New Ireland and adjacent islands), the Admiralty Islands with several outlying groups, and the northern Solomon Islands (Bougainville and Buka). It was placed under United Nations trusteeship Dec. 13, 1946, with Australia as the administering power. Japanese troops occupied much of the territory in 1942-45. On June 30, 1954, there were 8,020 Europeans and 3,422 other nonnatives in the territory.

FIJI—Status: Colony.

Governor: Sir Ronald H. Garvey.

Capital: Suva (population 36,967).

Foreign trade (1955): exports, 38% to Britain; imports, 37% from Britain. Chief exports: sugar (49%), coconut oil (18%), gold (8%).

Agricultural products: sugar, coconut oil, copra, bananas, pineapples.

Minerals: gold.

Fiji colony consists of an archipelago of from 200 to 250 islands in the South Pacific Ocean about 1,740 miles northeast of Sydney, Australia. The larger islands, including Viti Levu (4,011 sq. mi.) and Vanua Levu (2,137 sq. mi.) are mountainous and of volcanic origin. The archipelago was ceded to Great Britain by the native ruler in 1874.

The population of the archipelago in Dec. 1955 included 9,391 Europeans, 146,842 Fijians and 166,262 Indians. Importation of the latter to work the sugar plantations has led to important social and economic changes. There has been almost no intermarriage between Fijians and Indians, and considerable ill feeling has developed between them.

During World War II, the archipelago was an important air and naval station on the route from the United States west coast and Hawaii to Australia and New Zealand.

TONGA (FRIENDLY ISLANDS)—Status: Protected state.

Ruler: Queen Salote Tupou.

Chief export: copra (86%).

This native Polynesian kingdom in the Pacific came under British protection through the Anglo-German agreement of November 14, 1899. The native Queen is advised by a British Agent; the 21-member native Legislative Council is partly elected and partly nominated. The only important products are copra and bananas.

PITCAIRN ISLAND—Status: Colony.

Located in the South Pacific, about midway between Australia and South America, Pitcairn has an area of 2 square miles. It was settled in 1790 by British mutineers from the ship *Bounty*, commanded by Capt. Bligh. Overpopulation forced removal of the settlement to Norfolk Island in 1856, but about 40 soon returned. The island is administered by the Governor of Fiji through an elected council headed by a Chief Magistrate. The population is about 150.

New Zealand

(Member of Commonwealth of Nations)

Area: 103,740 square miles (including outlying islands).

Population (est. 1957): 2,229,000.

(1951: European, 93.3%; Maori and half-caste, 5.9%; others, 8%).

Density per square mile: 21.4.

Ruler: Queen Elizabeth II.

Governor General: Viscount Cobham.

Prime Minister: Walter Nash.

Principal cities (census, Apr. 1956): Auckland (greater), 380,412 (seaport and naval base); Christchurch, 193,182 (cereals, stock raising); Wellington, 138,035 (capital); Dunedin City, 99,326 (textiles).

Monetary unit: New Zealand pound (£NZ).

Language: English.

Religions (census 1951): Church of England, 37.5%; Presbyterian, 22.3%; Roman Catholic, 13.6%; Methodist, 8.1%; Baptist, 1.6%; others, 16.9%.

HISTORY AND GOVERNMENT. New Zealand, about 1,250 miles east of Australia, consists of two main islands and a number of smaller outlying islands so scattered that they range from the tropical to the antarctic. The islands, which have approximately the area of Italy, were discovered and named New Zealand in 1642 by Abel Tasman, a Dutch navigator. Captain James Cook explored them in 1769. On Jan. 22, 1840, Britain formally annexed them.

New Zealand was granted self-government in 1852, a full parliamentary system and ministries in 1856 and dominion status on Sept. 26, 1907. Meanwhile from 1861 to 1871 there was fierce intermittent fighting with the native Maoris. Gold was first discovered in 1853.

ECONOMIC CONDITIONS. Primarily a grazing country, New Zealand is one of the world's largest exporters of mutton, lamb, wool, butter and cheese. In 1955, livestock included 39,117,300 sheep, 5,886,777 cattle and 681,359 hogs. Outside of grass, the chief crop is wheat. Other crops are oats, barley, potatoes, onions, tobacco, fruits, and vegetables.

Leading customers in 1956 were Britain (65%), the United States (7%), France (6%), and western Germany (5%); leading suppliers, Britain (54%), Australia (14%), the United States (8%), and western Germany (3%). Leading exports were wool (33%), butter (19%), and lamb and mutton (16%).

NATURAL FEATURES AND RESOURCES. New Zealand's two main components are North Island and South Island, separated by Cook Strait, which varies from sixteen to 190 miles in width. North Island (44,281 sq. mi.) is 515 miles long and volcanic in its south central part. It contains many hot springs and beautiful geysers.

South Island (58,093 sq. mi.) has the Southern Alps along its west coast, with Mt. Cook (12,349 feet) the highest point in New Zealand.

Principal minerals are coal and gold. Other minerals of importance include tungsten, pumice, silica sand, asbestos, scheelite, iron ore, and phosphate. About 30 per cent of the total area is forested.

Numerous rushing streams give New Zealand a great volume of hydroelectric power. About 95 per cent of the population has access to power.

DEPENDENCIES. The Auckland Islands (234 sq. mi.) and Campbell Island (44 sq. mi.) are the principal outlying islands which have a total area of 324 square miles. They are included within the geographical boundaries of New Zealand as proclaimed in 1847. The Aucklands and Campbell are uninhabited. Six hundred miles north of the Aucklands are the volcanic Kermadec Islands (13 sq. mi.), annexed in 1887. The Union (or Tokelau) Islands (4 sq. mi.) transferred in 1925 from the Gilbert and Ellice Islands colony, were declared part of New Zealand effective Jan. 1, 1949.

In Polynesia a number of uninhabited islands were brought under New Zealand's control in 1901. Rarotonga and Mangai in the Cook group total 84 square miles. Niue (or Savage Island) (115 sq. mi.) is the largest island outside the Cook group. New Zealand also administers the Ross Dependency (175,000 sq. mi.), an antarctic region claimed by Great Britain in 1923.

WESTERN SAMOA—Status: U. N. trust territory.

Capital: Apia (population 16,000).

Chief exports: cacao, copra, bananas.

Principal products: copra, cacao, bananas, tropical fruits.

The former German Samoan Islands were occupied by New Zealand troops in the opening weeks of World War I and were mandated to New Zealand by the League of Nations in 1920 as the Territory of Western Samoa. They came under U. N. trusteeship in 1947, with New Zealand continuing as the administering authority. The High Commissioner is assisted by an Executive Council, a Legislative Assembly which has a Samoan majority and a consultative Native Council. There are 9 islands, of which the largest and most populous are Savaii (703 sq. mi.) and Upolu (430 sq. mi.). They are largely mountainous but fertile. The inhabitants are predominantly Polynesian Christians.

There are no native states, and administration is carried on by the High Commissioner assisted by a nominated Advisory Council. The most important products are copra and kauri wood. The population is predominantly Melanesian.

Bulgaria (People's Republic) (Narodna Republika Blgariya)

Area: 42,796 square miles.

Population (census 1956): 7,601,000. (1952: Bulgarian, 91%; Turkish, 6%; Gypsy, 2%; others, 1%).

Density per square mile: 178.3.*

Chairman of Presidium: Georgi Damjanov.

Premier: Anton Yugov.

Principal cities (est. 1953): Sofia, 600,000 (capital, railroad center); Plovdiv, 150,000 (commercial center); (census 1946) Varna, 77,792 (Black Sea port); Ruschuk, 53,420 (chief Danube port); Burgas, 43,684 (Black Sea port).

Monetary unit: Lev.

Languages: Bulgarian, Turkish.

Religions: Greek Orthodox, 84.4%; Mohammedan, 13.5%; Jewish, .8%; Roman Catholic, .8%; others, .5%.

HISTORY AND GOVERNMENT. The first Bulgarians, a tribe of wild horsemen akin to the Huns, crossed the Danube from the north in A.D. 679, and subjugated the Slavonic population of Moesia. They adopted a Slav dialect and Slavic customs and twice conquered most of the Balkan peninsula between 893 and 1280. After the Serbs subjected their kingdom in 1330, the Bulgars gradually fell prey to the Turks, and from 1396 to 1878 Bulgaria was a Turkish province. In 1878, Russia forced Turkey to give the country its independence; but the European powers, fearing that Bulgaria might become a Russian dependency, intervened. By the Treaty of Berlin (July, 1878), Bulgaria became autonomous under Turkish sovereignty.

In 1887, Prince Ferdinand of Saxe-Coburg-Gotha was elected ruler; on Oct. 5, 1908, he declared Bulgaria an independent kingdom.

Bulgaria joined Germany in World War I and lost. On Oct. 3, 1918, Tsar Ferdinand abdicated in favor of his son, who became Tsar Boris III. The Treaty of Neuilly the next year disarmed Bulgaria, reduced it to its 1878 size, and levied a heavy indemnity.

Boris assumed dictatorial powers in 1934-35. When Hitler awarded Bulgaria Southern Dobruja, taken from Rumania in 1940, the weak but land-hungry Boris joined the Nazis in war the next year and occupied parts of Yugoslavia and Greece. Later, with the fortunes of war swinging inexorably against them, the Germans tried to force

PACIFIC ISLANDS (British)

High Commissioner in Western Pacific: Sir John Gutch.

Island groups in the Pacific administered by the British High Commissioner in the Western Pacific include (1) Gilbert and Ellice Islands, (2) British Solomon Islands, and (3) New Hebrides Condominium (see French Overseas Territories). The High Commissioner has headquarters at Honiara, Solomon Islands.

GILBERT AND ELLICE ISLANDS—Status: Colony.

The islands in these groups (including the Gilbert group; the Ellice group; Ocean Island [the seat of administration], Fanning, Washington and Christmas Islands; and the Phoenix group) were proclaimed a British protectorate in 1892 and annexed as a colony in 1915. The most important product is high-grade phosphate.

Ownership of Canton and Enderbury islands in the Phoenix group was long in dispute between Great Britain and the United States until 1939, when an agreement for "use in common" was reached by the two governments. Several of the Gilbert islands were occupied by Japanese forces in World War II, and Tarawa was the scene of one of the fiercest battles in U. S. Marine Corps history in Nov. 1943.

SOLOMON ISLANDS—Status: Protectorate.

This British protectorate, lying east of New Guinea, includes the islands of Guadalcanal, Malaita, San Cristobal, New Georgia, Santa Isabel, Choiseul and numerous smaller islands. Bougainville, one of the group, is under Australian mandate. The islands, which came under British protection late in the 19th century, were the scene of several important U. S. naval and military victories during World War II.

Boris to send his troops against the Russians. Boris resisted and died under mysterious circumstances on Aug. 28, 1943.

Simeon II, infant son of Boris, became nominal ruler under a regency. Three days after Russia declared war on Bulgaria on Sept. 5, 1944, Bulgaria declared war on Germany. Russian troops streamed in the next day, and under an informal armistice a coalition "Fatherland Front" Cabinet was set up under Kimon Georgiev.

ECONOMIC CONDITIONS. Most of the population is Greek Orthodox. Clergy of all faiths are paid by the state. The national language, Bulgarian, is closely related to Russian; both employ the Cyrillic alphabet.

Bulgaria is still predominantly agrarian, with most of the population engaged in agriculture. Because of the mountainous character of the country, however, less than half of the land is tilled or used for pasture. Collectivization is well-advanced. More than half the cultivated area is devoted to cereals, including wheat, corn, barley, oats, and rye. Other crops are tobacco, alfalfa, cotton, flax, potatoes, and sugar. There are extensive vineyards in the southern valleys.

Industries are of minor importance and with few exceptions—tobacco leaf, wines and liquors, fertilizers, and flour—are confined to domestic markets. Industrialization is one of the chief aims of the Communist regime, however, and all industries of any importance have been nationalized. Both the first (1948-53) and the second (1953-57) five-year plans emphasized the development of heavy industry.

Foreign trade necessarily consists of the exchange of agricultural products for cheap manufactures.

Leading customers in 1950 were the U.S.S.R. (45%), and Czechoslovakia, Hungary, Rumania, and Poland (31%). Leading suppliers were the U.S.S.R. (67%) and the four above-named satellites (31%). Tobacco is the principal export.

NATURAL FEATURES AND RESOURCES. Two mountain ranges and two great valleys mark Bulgaria's topography. The Balkan belt crosses the center of the country, almost due east-west, rising to a height of 7,800 feet. The Rhodope range breaks off from the Balkans in the west, curves and then straightens out to run nearly parallel along the southern border. Between the two ranges is the valley of the Maritsa, Bulgaria's principal river. Between the Balkan range and the Danube, which forms most of the northern boundary with Rumania, is the Danubian tableland, traversed by several short rivers. Southern Dobruja, a fertile region of 2,900

square miles below the Danube delta, is an area of low hills, fens and sandy steppes.

Soft coal is Bulgaria's principal mineral. Other minerals include chromite, gypsum, iron ore, manganese ore, rock salt, and silver.

Burma (Republic)

Area: 261,757 square miles.

Population (est. 1957): 20,054,000 (1941: Burmans, 60%; Shans, 7%; Chins, 2%; Kachins, 1%; Indians, 6%; Chinese, 1%; Indo-Burmans, 1%; others, 22%).

Density per square mile: 75.8.

President: U Win Maung.

Premier: Gen. NE Win.

Principal cities (census 1953)*: Rangoon, 711,520 (capital, chief port); Mandalay, 182,367 (river port, upper Burma); Moulmein, 101,720 (seaport); Bassein, 77,382 (rice, river port).

Monetary unit: Kyat.

Languages: Burmese (70%), English.

Religions: Buddhist, 90%; Mohammedan, 3%; Hindu, 3%; Christian, 2%; others, 2%.

* Preliminary figures.

HISTORY AND GOVERNMENT. Lying on the eastern side of the Bay of Bengal between India, China, and Thailand, the Union of Burma came into existence as an independent state on Jan. 4, 1948. In 1612 the British East India Company sent agents to Burma, and in the seventeenth and eighteenth centuries the Burmese stoutly resisted the efforts of British, Dutch, and Portuguese traders to establish posts on the Bay of Bengal. Actual British rule dated from 1826, and in 1886 British troops forced the annexation of all Burma to India. On April 1, 1937, the British separated Burma from India and set it up as a Crown colony with its own legislature and a British Governor.

For hundreds of years a battlefield of petty princes, Burma became a key battleground in World War II largely because the 800-mile Burma Road was the Allies' vital supply line to China. The Japanese invaded the country in Dec., 1941, and by May 1942, had occupied most of it, cutting the road. In Aug., 1942, the Japanese set up a puppet government.

After one of the most difficult campaigns of the war, Allied forces liberated most of Burma prior to the Japanese surrender on Aug. 14, 1945.

The Constitution of Sept. 24, 1947, provides for a government headed by the President, who is elected by the two houses of Parliament—the Chamber of Deputies and the Chamber of Nationalities. The President appoints the Premier on nomination of the Chamber of Deputies. Four frontier areas—the Shan, Kachin, and Karenni states, and the Chin special di-

vision—are constituent parts of the Union but enjoy some autonomy. The Constitution contemplates a form of state socialism, with the operation of all public utilities and the exploitation of all natural resources to come eventually under state control.

SOCIAL AND ECONOMIC CONDITIONS.

The natives in general are Mongolian; the Burmese are the most advanced. Indians, settled in the Irrawaddy delta region, supply most of the coolie labor, while the Chinese constitute the artisan and merchant class. Buddhism, the national religion, profoundly affects the national character; every village in the country has its temple.

Burma is essentially agricultural, with crop-growing concentrated in the delta and river valleys. It is a leading producer of rice, the staple food, which occupies two-thirds of the cultivated area. Crops grown in the dry zone in upper Burma include millet, cotton, peanuts, and sesame. Other crops include tobacco, fruit, vegetables, and cereals. The number of rubber plantations has increased. The principal domestic animals are water buffalo, used as a beast of burden in the delta, and small humped oxen, which predominate in other areas.

Leading industries include silk weaving and dyeing, rice husking, oil refining, and wood carving.

Chief exports in 1954-55 were rice and products (75%) and metals and ores (5%). Leading customers were India (34%), Japan (18%), and Britain (9%); leading suppliers were Britain (24%), Japan (23%), and India (17%).

(For further details on Burma's recent economic policy see Burma in *World Politics* section.)

NATURAL FEATURES AND RESOURCES.

Slightly smaller than Texas, Burma is divided into three natural regions: the Irtan Yoma, a long, narrow mountain range forming the barrier between Burma and India; the Shan Plateau in the east, extending southward into Tenasserim; and the Central Basin running down to the flat, fertile delta of the Irrawaddy in the south. This delta contains a network of intercommunicating canals and nine principal mouths.

Mineral resources are considerable but, in many cases, undeveloped.

Other minerals include lead, silver, zinc, nickel, cobalt, copper, gold, iron ore, molybdenum, coal, uranium (reported), rubies, sapphires, and jade.

More than half of Burma is forested. Oak, valuable for naval construction, is the main timber product. Its cutting is strictly controlled.

Cambodia (Kingdom)

Area: 67,568 square miles.

Population (est. 1955): 4,358,000.

Density per square mile: 64.5.

Ruler: King Norodom Suramarit.

Premier: Norodom Sihanouk.

Principal cities (est. 1955): Phnompenh, 375,000 (capital); (1941) Battambang, 23,567 (rice).

Monetary unit: Riel.

Languages: Cambodian, French, Annamese.

Religion: Buddhism.

HISTORY. Cambodia is bounded on the south and east by south Vietnam, on the north by Laos and Thailand, on the west by Thailand, and on the southwest by the Gulf of Siam. Its recorded history dates back to the beginning of the Christian era when it was known as Fou-Nan. It was absorbed in about 600 A.D. by the Khmers, under whose rule magnificent temples were built at Angkor. The arrival of the French, who were granted a protectorate in 1863, prevented the annihilation of the Khmer empire by the Vietnamese and Siamese. It was occupied by Japan during World War II.

ECONOMIC CONDITIONS. About 90% of the population is Cambodian, 5% Annamese, and 4% Chinese. The forested regions of the northeast are inhabited by various primitive peoples.

Agriculture is the basis of the economy. The chief crop is rice, grown principally in the Battambang area. Second in importance is rubber. Other crops include tobacco, kapok, cotton, pepper, and maize. Cattle breeding is of major importance. Native industries include silk and cotton weaving, rice milling, and the salting of fish obtained from Lake Tonle Sap during the low-water season.

Leading exports include rice, rubber, animal products, wool and hides, and skins. A large part of the trade is with France, the United States and Vietnam.

NATURAL FEATURES AND RESOURCES.

Cambodia consists chiefly of a large alluvial plain ringed in by mountains and on the east by the Mékong river. The plain is centered on Lake Tonle Sap, which is a natural storage basin of the Mékong.

Forests cover about 75% of the country, but most are unexploited. Deposits of iron ore, limestone and phosphate exist but also are undeveloped.

Chile (Republic)

(República de Chile)

Area: 286,396 square miles.

Population (est. 1957): 7,121,000.

Density per square mile: 24.2.

President: Jorge Alessandri.

Principal cities (census 1952): Santiago, 1,348,283 (capital); Valparaíso, 218,829 (port); Concepción, 119,887 (farming center); Viña del Mar, 85,281 (resort center); Antofagasta, 62,272 (nitrates).

Monetary unit: Peso.

Language: Spanish.

Religion: Roman Catholic.

HISTORY. Europeans first arrived in 1536, when Diego de Almagro, an associate of Pizarro, led an unsuccessful invasion from Peru. Five years later another Spaniard, Pedro de Valdivia, founded Santiago. On Sept. 18, 1810, Chile rebelled against Spanish rule, but independence was not won completely until 1818, when Bernardo O'Higgins and José de San Martín finally crushed the Spanish armies.

Chile, which has never lost a war, fought with Bolivia and Peru in 1879-83 and won the province of Antofagasta, Bolivia's only outlet to the Pacific, as well as extensive areas from Peru. In World War I, Chile was neutral.

GOVERNMENT. The nation elects a President every six years, a Senate of forty-five members every eight years (one half renewable every four years), and a Chamber of Deputies of 147 members every four years. The President is assisted by a Cabinet responsible to him but subject to impeachment by Congress, which also may override a presidential veto by two-thirds vote. All literate citizens over twenty-one may vote in elections.

ECONOMIC CONDITIONS. Chilean agriculture is mostly confined to the temperate central valley, similar to that of California. Productive land is extremely limited, and most of it must be irrigated. Wheat (1956-1957: 1,003,000 metric tons) is the leading crop. Grapes, next to wheat in acreage, produced an estimated 118,800,000 gallons of wine in 1956. Feudal-type estates, averaging 2,500 acres, predominate. Cattle in 1955 totaled 2,596,000 and sheep 6,540,000. Wool production (1956) was about 10,000 metric tons (clean).

Trade. In 1956 the leading customers were the U. S. (51%), Britain (20%), Germany (13%) and Argentina (10%); leading suppliers, the U. S. (43%), Germany (13%), Argentina (6%). Chief exports were copper (72%) and nitrate of soda (9%). Leading imports were machinery (20%), transportation equipment (18%), and petroleum (9%).

Except for mineral processing, most manufacturing is of low-priced consumer's goods, particularly textiles. A steel industry was established in 1946.

NATURAL FEATURES AND RESOURCES. A narrow, mountainous land, Chile has one-third of its area covered by the towering ranges of the Andes. In the north is the mineral-rich Atacama Desert, between the coast mountains and the Andes. In

the center is a 700-mile-long valley, thickly populated, between the Andes and the coastal plateau. In the south, the Andes border on the ocean.

At the southern tip of Chile's mainland is Punta Arenas, the southernmost city in the world, and beyond that lies the Strait of Magellan and Tierra del Fuego, an island divided between Chile and Argentina. The Juan Fernández Islands, in the South Pacific about 400 miles west of the mainland, and Easter Island, about 2,000 miles west, are Chilean possessions.

The basis of the country's economy is its mineral resources in the northern desert provinces of Atacama, Antofagasta and Tarapacá, where the only natural nitrate in the world is found. Some 60 per cent of the world's iodine is obtained as a by-product of nitrate processing. Chile's world monopoly in nitrate, however, declined in importance with development of the synthetic product.

The world's largest copper reserve, estimated at 134 billion pounds, is in Chile, and also more than 900 million tons of high grade iron ore. The reserve of Chilean coal, noted for quantity rather than quality, exceeds two billion tons.

China (Republic)

(Chung-Hua Min-Kuo)

Area: 3,911,209 square miles.*

Population (census 1953): 590,194,715.*

Density per square mile: 150.9.

President, Nationalist China: Generalissimo Chiang Kai-shek.

Premier: O. K. Yui.

Chairman, Communist China: Mao Tse-tung.

Premier: Chou En-lai.

Principal cities (census 1953): Shanghai, 6,204,417 (chief port, industrial and financial center); Peking (Peiping), 2,768,149 (capital, Communist China); Tientsin, 2,693,831 (commercial center); (est. 1952) Chungking, 2,000,000 (river port, trade center); Mukden, 1,790,000 (Manchurian industrial center); Canton, 1,210,000 (southern commercial center); Wuhan, 1,090,000 (river port); Nanking, 1,020,000 (former Nationalist capital).

Monetary unit: Chinese dollar (yuan).

Language: Chinese.

Religions: Principally Confucian, Buddhist and Taoist.

* Including Province of Formosa (Taiwan), Manchuria and Tibet. Census not taken in Formosa (population estimated at 7,591,208); population total excludes an estimated 11,743,320 Chinese resident abroad. The total population figure is regarded with considerable reserve.

HISTORY AND GOVERNMENT. By 2000 B.C., the Chinese were living in the Hwang Ho basin, and they had achieved an advanced stage of civilization by 1200 B.C. The great philosophers, Lao-tse, Confucius, Mo Ti, and Mencius lived during the Chou dynasty (about 1122 to 249 B.C.). The warring feudal states were first united under Emperor Ch'in Shih Huang Ti, during

whose reign (246-210 B.C.) work was begun on the Great Wall. Under the Han dynasty (206 B.C. to A.D. 220) China prospered and traded with the West.

The T'ang dynasty (618-907) has often been called the golden age of Chinese history. Painting, sculpture, and poetry flourished under royal patronage, and printing made its earliest known appearance.

The Mings, last of the native rulers (1368-1644), overthrew the Mongol or Yuan dynasty (1280-1368) established by Kublai Khan, whose dominions extended into eastern Europe. The weakening Mings in turn were overthrown in 1644 by invaders from the north, the Manchus.

The Chinese closely restricted foreign activities, and by the end of the 18th century only Canton (and the Portuguese port of Macao) were open to European merchants. Following the Anglo-Chinese War of 1839-42, however, several treaty ports were opened and Hong Kong was ceded to Britain. Treaties signed after further hostilities (1856-60) weakened Chinese sovereignty and removed foreigners from Chinese jurisdiction. The disastrous Chinese-Japanese War of 1894-95 was followed by a scramble for Chinese leases and concessions by European powers, which resulted in the Boxer Rebellion (1900), suppressed by an international force.

The death of the Empress Dowager Tzu Hsi in 1908 and the accession of the infant Emperor Hsüan T'ung (Pu-Yi) were followed by a nation-wide rebellion led by Dr. Sun Yat-sen, who became first President of the Provisional Chinese Republic in 1911. The Manchus abdicated on Feb. 12, 1912. Dr. Sun resigned in favor of Yuan Shih-k'ai, who suppressed the republicans but was forced by a serious rising in 1915-16 to abandon his intention of declaring himself Emperor. Yuan's death in June, 1916, was followed by years of civil war between rival militarists and Dr. Sun's republicans. The death in 1925 of Dr. Sun, who had controlled only the Canton area in opposition to the recognized regime, was followed by a revival of the Kuomintang party, which practically deified him. Nationalist forces, led by Gen. Chiang Kai-shek and advised originally by Communist experts, soon occupied most of China, setting up a Kuomintang regime in 1928. Internal strife continued, however, and Chiang broke with the Communists.

An alleged explosion on the South Manchurian Railway on Sept. 18, 1931, brought invasion of Manchuria by Japanese forces, who installed the last Manchu Emperor, Henry Pu-Yi, as nominal ruler of the puppet state of "Manchukuo." Japanese efforts to take China's northern provinces in July, 1937, were resisted by Chiang Kai-shek, who meanwhile had succeeded in uniting

most of China behind him. Within two years, however, Japan seized most of the ports and railways. The Kuomintang government retreated first to Hankow and then to Chungking, while the Japanese set up a puppet government at Nanking headed by Wang Ching-wei.

When the Japanese surrendered in 1945, China signed a treaty with the Soviet Union providing for Soviet withdrawal from Manchuria, joint Chinese-Soviet control of Manchurian railways for 30 years, a joint Chinese-Soviet naval base at Port Arthur, and a free port at Dairen.

The surrender of Japan also touched off a civil war between Nationalist and Communist forces for control of China. By the end of 1949, all of the republic except the island of Formosa was under Communist control. Barricaded on Formosa, the Nationalist regime had little means at its disposal to make any effective counter-attack upon the mainland. The United States, however, after the outbreak of the Korean war in June, 1950, promised naval and air aid to repel any invasion of Formosa.

The Communists meanwhile set up, in September, 1949, a soviet-type government. After prolonged negotiations, the People's government and the Soviet Union signed a 30-year treaty of friendship and mutual aid on Feb. 14, 1950; its published terms provided for return of the Changchun railroad to China and the eventual return of Port Arthur and Dairen.

The communist regime subsequently was recognized as the legal government of China by many nations but was unsuccessful in its efforts to secure a place in the U. N. It threw several hundred thousand men into the Korean war of 1950-53 in a futile effort to drive U. N. forces from Korea. (For an assessment of the current policies and international stature of the Communist Regime, see *World Politics* section.)

ECONOMIC CONDITIONS.

Agriculture. In China, nearly 80 per cent of the population depends on the land for livelihood. Subsistence crops are necessarily emphasized, but China is still not self-sufficient in food. Cultivation is intensive, holdings are small, and irrigation is widely practiced. The three most important food crops are rice, wheat, and maize.

In northern China, wheat, barley, corn, sorghum, millet and other cereals, and beans and peas predominate, whereas in the south, rice, sugar, and indigo are most important. The Yangtze basin, one of the most favored agricultural regions in the world, is China's premier granary. Tea, the chief beverage, is grown mainly in the central uplands, coastal ranges and Szechwan.

Silkworm culture is practiced widely, es-

pecially in the lower Yangtze valley. Soybeans and cotton are of ever-increasing importance. Other crops include fibers, tobacco, vegetable oils, cane sugar, and many medicinal plants and spices.

The urgent need for subsistence crops has confined grazing grounds for sheep and cattle to the dry northwest and to mountain pastures. However, such animals as goats, poultry, and especially pigs are raised everywhere. According to unofficial estimates, Communist China had in 1953 28,812,000 cattle, 17,190,000 sheep, 77,376,000 hogs, 34,110,000 goats, and 11,885,000 buffalo.

Industry. Industrially, China is still in its infancy. Development has been mainly in the erection of textile mills, silk and flour mills, match factories, tanneries, and a few steel and cement mills. The production of consumer's goods far exceeds that of producer's goods, which must still be imported.

The communist regime is reported to be concentrating upon Manchuria as China's industrial center and to be shifting some industries to the northwest.

Trade. According to official reports, the U.S.S.R. and its satellites accounted for 80% of Communist China's total trade in 1956. Major exports include textiles and products, tung oil, and pig bristles.

NATURAL FEATURES AND RESOURCES. China has about $1\frac{1}{4}$ times the area of the continental United States. Its coast line is roughly a semi-circle, about 2,150 miles long. The greater part of the country is mountainous, and only in the lower reaches of the Hwang Ho (Yellow) and Yangtze Kiang rivers are there extensive low plains.

The principal mountain ranges are the Tien Shan, to the northwest; the Kunlun chain, which attains a maximum height of 23,890 feet, running south of the Takla Makan and Gobi deserts; and the Trans-Himalaya, connecting the Kunlun with the borders of China and Tibet. Manchuria is largely an undulating plain connected with the north China plain by a narrow lowland corridor. Inner Mongolia contains the relatively fertile southern and eastern portions of the Gobi. The large island of Hainan (13,500 sq. mi.) lies off the southern coast.

Hydrographically, China proper consists of three great river systems. The northern part of the country is drained by the Hwang Ho river, 2,700 miles long and mostly unnavigable. The central part is drained by the Yangtze Kiang, the fifth longest river in the world (3,100 mi.). The Si Kiang in the south is about 1,650 miles long and navigable for a considerable distance. In addition, the Amur forms part of the northeastern boundary.

Minerals. Mineral resources are considerable. Iron ore, far less plentiful than coal, is mined principally in the lower Yangtze valley and in north China. Tin, mined in Yunnan and southwest Szechwan, has been a major mineral export. Of some rarer minerals, notably antimony and tungsten, China is sometimes the world's leading producer. Lead, zinc, silver, mercury, and gold are also mined. The discovery of uranium has been reported in recent years.

Forests and Fisheries. China urgently needs reforestation. Most remaining forests are on inaccessible mountain slopes. Bamboo is cultivated in groves throughout the country south of the Tsinling mountains.

FORMOSA (TAIWAN)—Status: Province (Part of Republic of Nationalist China).

Area: 13,885 square miles.

Population (census 1956, excluding troops and militia): 9,310,158.

Principal cities (est. 1955): Taipei, 677,159 (capital); Kaohsiung, 341,740 (seaport, industrial center); Tainan, 268,243 (agricultural products).

Foreign trade (1956): exports, U. S. \$130,060,000 (35% to Japan); imports, U. S. \$114,360,000* (56% from Japan). Chief exports: sugar (59%), rice (10%), canned pineapple (5%).

Agricultural products (est. 1956, in metric tons): sugar, 795,000; rice (paddy), 1,787,000; tea, 14,500; bananas, pineapples, sweet potatoes.

Manufactures (1956): cement, 573,917 metric tons; cotton cloth, 130,000,000 sq. yd.; paper, 42,000 tons; aluminum, 8,700 tons; steel bars, 67,900 tons.

Minerals: coal (1956: 2,550,000 metric tons), gold, petroleum, silver, sulfur.

* Excludes U. S. aid imports (\$95,374,000) and those with self-provided exchange (\$16,580,000).

Formosa is a large island in the western Pacific, separated from China to the west by the Taiwan straits (narrowest point, 90 mi.). The Pescadores (Bokoto) and other outlying islands (about 78 sq. mi.) became administratively a part of Formosa under Japanese rule. Formosa, ceded to Japan in 1895 after the Chinese-Japanese War, remained Japanese until it was restored to China in 1945, in accordance with the Cairo conference of 1943. It was the only territory under the control of the Nationalist regime after 1949. Under a 1955 mutual defense treaty the United States is committed to defend Formosa and the Pescadores.

Formosa's internal affairs are administered by the provincial government headed by the Governor appointed by the Nationalist government. The provincial assembly is elected by direct popular vote.

Most of the inhabitants are of Chinese stock. There are also about 180,000 aboriginal tribesmen in the interior.

Formosa is essentially an agricultural country with the greater part of the population dependent on farming. It is self-sufficient in most basic foodstuffs and produces surpluses of a number of others, notably rice and sugar. Farms are generally small (average 3 ac.). Cattle and water buffalo are the chief livestock.

Food processing is the island's major industry; it engaged over 6,000 plants in 1955. The textile industry is expanding, and industrial potential was increased by the first four-year program (1953-56).

The island is one of the world's chief sources of camphor, and government monopolies of camphor, salt, opium, and tobacco have been established. Forest resources are enormous.

Formosa is divided by a central mountain range running from north to south, which rises sharply on the east coast and declines gradually to the broad western plain, where cultivation is concentrated.

(For an analysis of recent political developments in this region see *World Politics* section.)

TIBET—Status: Nominally independent; under Chinese Communist control.

Area: 469,413 square miles.

Population (census 1953): 1,273,969.

Capital: Lhasa (about 20,000).

Ruler: The 14th Dalai Lama (Lingerh Pamo Töntrup).

Monetary unit: Sang.

Exports: wool, live animals, salt, hides, borax, tea, musk.

Agricultural products: barley, fruits, pulse, vegetables.

Minerals: borax, salt, coal, gold.

Tibet, north and northeast of the Himalayas, is the highest country in the world, averaging 16,000 feet in elevation and having many peaks ranging up to more than 25,000 feet. Chinese suzerainty over Tibet was established in the 18th century. The area was invaded by a British expeditionary force in 1904, but the Anglo-Russian Convention of 1907 recognized China's influence and stipulated that neither Russia nor Britain should interfere in Tibet's affairs.

Chinese Communist troops invaded the area in October, 1950. An agreement signed with Communist China in May, 1951, recognized the Dalai Lama as spiritual and temporal ruler but made Tibet virtually a Chinese province.

The religion and predominant factor in Tibet's social system is Lamaism, a late form of Buddhism modified by animism and primitive magic. Education is in the control of the many monasteries, some of which have more than 1,000 monks. A large number of the population are lamas, mostly celibates. Both polyandry and polygyny are practiced.

Colombia (Republic) (República de Colombia)

Area: 439,519 square miles.

Population (est. 1957): 13,227,000 (mestizo 68%; white, 20%; Indian, 7%; Negro, 5%).

Density per square mile: 29.4.

President: Maj. Gen. Gabriel Paris (chairman of ruling junta).

Principal cities (est. 1954): Bogotá, 765,360 (capital); Medellín, 431,380 (mining); Cali, 365,800 (coffee, mining); Barranquilla, 324,700 (seaport); Cartagena, 142,800 (seaport); Bucaramanga, 136,170 (industrial center).

Monetary unit: Peso.

Language: Spanish.

Religion: Roman Catholic.

HISTORY. Colombia, nearly nine times the size of New York state, is the only country in South America with frontage on both the Pacific and the Caribbean. Its northern coast was one of the first parts of the Americas to be visited by Spanish explorers. Darien, the first permanent European settlement on the American mainland, was founded in 1510.

New Granada, as Colombia was called until 1861, was comparatively neglected during the Spanish colonial era. After winning independence from Spain during a fourteen-year struggle ending in 1824, the country established a republic in 1831, including the area that now is Panamá. Intermittent civil war plagued Colombia until 1903, when Panamá, with United States backing, seceded from the republic.

The century-old boundary dispute with Peru over Leticia almost led to war in 1931, but a settlement was arranged through the League of Nations in 1934-35.

GOVERNMENT. Colombia's President, who appoints his own Cabinet, is elected every four years and is not eligible for immediate reelection. The Senate—upper house of Congress—has 63 members elected for four years by direct vote. The House of Representatives of 123 members is directly elected for two years. Congress was superseded temporarily by a national constituent assembly in 1954. All citizens over 21 are entitled to vote.

ECONOMIC CONDITIONS. Most of the people live by farming and cattle herding, but only a small part of the land is cultivated, and that by primitive means. Colombia's coffee, the nation's principal crop, is a mild variety that does not compete with Brazilian types. Cattle numbered 12,100,000 in Dec., 1956, according to U. S. government estimates.

The leading manufacturing industries are foodstuff processing, textiles and beverages. A new steel plant went into operation late in 1954; production in 1955 was 92,939 metric tons.

Leading exports in 1956 were coffee (77%), petroleum (13%) and bananas (5%). Leading customers were the U. S. (71%), Germany (7%), Netherlands Antilles (5%) and Sweden (3%); leading suppliers, the U. S. (62%), Germany (12%), Britain (3%) and France (3%).

NATURAL FEATURES AND RESOURCES. Through the western half of the country, three Andean ranges run north and south, merging into one at the Ecuadorean border. The eastern half is a low, jungle-covered plain, drained by spurs of the Amazon and Orinoco, inhabited mostly by uncivilized Indians. The fertile plateau and valley of the eastern range is the most densely populated part of the country.

Rich in minerals, Colombia has the third largest oil industry in Latin America (70 per cent controlled by U. S. interests). The country is also rich in platinum and has world-famous emerald mines at Muzo in the eastern Andes.

Forest products include vanilla, quinine, ipecac, sarsaparilla, gums and balsams, tanning agents, and dyewoods.

Costa Rica (Republic)

(República de Costa Rica)

Area: 19,695 square miles.

Population (est. 1957): 1,035,000 (1950: white and mestizo, 97.6%; Negro, 1.9%; Indian, .4%; Asiatic, .1%).

Density per square mile: 51.5.

President: José Figueres Ferrer.

Principal city (est. Dec. 31, 1956): San José, 99,747 (capital and only large city).

Monetary unit: Colón.

Language: Spanish.

Religion: Roman Catholic (state).

HISTORY AND GOVERNMENT. Costa Rica, discovered and probably named by Columbus in 1502, proclaimed its independence in 1821. Aside from boundary disputes with Panamá and Nicaragua, Costa Rica's modern history was comparatively tranquil until the spring of 1948.

Under the 1949 Constitution the President and one-house Congress of 45 members are popularly elected for terms of four years.

The army was abolished in 1950. There is a police force of 1,000 and 700 coast guardsmen.

ECONOMIC CONDITIONS. Coffee, bananas, abacá fiber, and cacao are the basic products of Costa Rican agriculture.

Leading customers in 1956 were the U. S. (48%), Germany (32%) and Canada (5%); leading suppliers, the U. S. (54%), Germany (9%) and Britain (6%). Leading exports were coffee (52%), bananas (34%), and cacao (5%); imports included tex-

tiles, machinery, vehicles, and petroleum products.

NATURAL FEATURES AND RESOURCES. Most of Costa Rica is tableland, from 3,000 to 6,000 feet above sea level. Cocos Island (10 sq. mi.), about 300 miles off the Pacific Coast, is under Costa Rican sovereignty; although it is mostly tropical jungle, it is of potential strategic importance in the defenses of the Panama Canal.

The mountain slopes yield such forest products as balsa, cedar, dyewood, mahogany and rosewood.

Cuba (Republic)

(República de Cuba)

Area: 44,217 square miles.

Population (est. 1957): 6,410,000 (white, 72.8%; mulatto, 14.5%; Negro, 12.4%; Asiatic, .3%).

Density per square mile: 131.8.

President: Fulgencio Batista y Zaldívar.

Principal cities (census 1953): Havana, 785,455 (capital, industrial center); Mariño, 219,378 (Havana suburb); Santiago de Cuba, 163,237 (seaport, mining); Camagüey, 110,388 (cattle, sugar); Santa Clara, 77,398 (tobacco).

Monetary unit: Peso.

Language: Spanish.

Religion: Roman Catholic.

HISTORY. The history of Cuba, largest of the many Caribbean islands, began for white men with discovery by Columbus on his first voyage in 1492. It was a Spanish colony until 1898, except for brief British occupancy in 1762-63. Open war raged between Cuban rebels and Spanish troops from 1867 to 1878. Fighting broke out again in 1895, and when the United States threatened to intervene, Spain felt its national dignity had been wounded. Strained relations between Spain and the U. S. led to war when the U. S. battleship *Maine* was blown up in Havana harbor in Feb. 1898. At the end of the brief Spanish-American War, Spain gave up Cuba.

Until creation of the Cuban republic in 1902, the island was ruled by United States military authorities. For the first thirty-two years of the republic's life, the United States held the right to intervene in any crisis—a right which was invoked during insurrections which occurred in 1906, 1912 and 1917.

GOVERNMENT. Cuba's President is elected for a 4-year term by direct popular vote, in which women take part. The Cabinet, though named by the President, is responsible to the Congress—a 54-member Senate and a 130-member House, both elected for four years. Much Cuban lawmaking is done through presidential decree, reviewable by the Supreme Court.

ECONOMIC CONDITIONS. Half of the employed are engaged in agriculture, which normally accounts for more than 90 per cent of the exports. About two-thirds of the cultivated area is devoted to sugar cane. Other important crops are tobacco, coffee, cacao, fruits, vegetables, henequen, corn, pineapples, and rice.

Manufactured products include sugar, molasses, syrup, brandy, rum, alcohol, cigars, cigarettes, cigar boxes, sponges, cement, cordage, salt, dressed hides, dairy products, and canned goods. The leading industry is the processing of sugar cane and its products.

Leading exports in 1956 were sugar (74%), tobacco and products (6%) and molasses (5%). Leading customers were the U. S. (65%), Japan (6%) and Britain (4%); leading suppliers, the U. S. (75%), Netherlands Antilles (3%), western Germany (3%) and Britain (3%).

NATURAL FEATURES AND RESOURCES. Long, narrow Cuba has mountainous areas in the southeast, central area, and west, but the rest is flat or rolling. The coastline is indented by many large bays.

Rich mineral beds, mostly in the eastern province of Oriente, include iron, copper, manganese, chromium and nickel. Iron ore reserves are 90 per cent held by U. S. steel interests. Virtually all mineral exports go to the United States; they include nickel, copper ore, and manganese ore.

Czechoslovakia (Republic)

(Československá Republika)

Area: 49,354 square miles.

Population (est. 1957): 13,353,000 (1949: Czech, 67.0%; Slovak, 23.7% German, 3.2%; Magyar, 3.2%; Polish, Jewish and others, 2.9%).

Density per square mile: 267.9.

President: Antonín Novotný.

Premier: Viliam Široký.

Principal cities (est. 1948): Prague (Praha), 932,024 (capital, industrial center); Brunn (Brno), 277,196 (textiles); Ostrava (Moravská Ostrava), 183,794 (iron and steel products); (1947): Bratislava, 172,664 (Danube port); Pilsen (Plzeň), 118,152 (Skoda steel works).

Monetary unit: Koruna.

Languages: Czech (67%), Slovak (25%), German (4%), Hungarian, Ukrainian, Polish.

Religions (est. 1947): Roman Catholic, 77%; Czechoslovak Church, 8%; Protestant, 7%; Greek Orthodox, .5%; Jewish, .5%; others and no confession, 7%.

HISTORY AND GOVERNMENT. It was probably about the fifth century A.D. that the ancestors of the Czechs and Slovaks settled in the region of modern Czechoslovakia. Slovakia passed under Magyar

domination, but the Czechs founded the kingdom of Bohemia, which was among the most powerful in Europe for centuries. German encroachment began in the twelfth century and was furthered by the election in 1526 of a Hapsburg as Bohemian King. After the Czechs rebelled in 1618 and were defeated at the Battle of White Mountain in 1620, they were ruled for the next 300 years by the Hapsburgs as part of the Austro-Hungarian Empire. In World War I, Czech and Slovak patriots, notably Thomas G. Masaryk and Milan Stefanik, went abroad to promote support for Czech-Slovak independence, while Czechoslovak legions fought against the Central Powers. On Oct. 28, 1918, Czechoslovakia proclaimed itself a republic; shortly thereafter Masaryk was unanimously elected first President.

Between World Wars I and II, Czechoslovakia supported the League of Nations, formed the Little Entente with Yugoslavia and Rumania, and co-operated closely with France. President Masaryk was succeeded by Dr. Eduard Beneš in 1935.

Meanwhile, Czechoslovakia's German minority, led by Konrad Henlein, began demanding autonomy.

At the Munich conference on Sept. 30, 1938, France and Britain agreed that the Nazis could take the Czech Sudetenland on the German border. Dr. Beneš resigned on October 5, and Czechoslovakia became a federal union in the German orbit. The Poles, meantime, seized Czechoslovakia's Teschen area, and Hungary had taken areas in Slovakia and Ruthenia. In March, 1939, the Nazis set up Slovakia as a puppet state, declared Bohemia and Moravia to be Nazi protectorates, and gave Hungary the remainder of Ruthenia. Both Slovakia and Bohemia-Moravia were occupied by German troops. Beneš organized a government-in-exile in London in 1940.

Soon after the government returned to Czechoslovakia in April 1945, Ruthenia, the easternmost province, was ceded to Russia. On July 3, 1946, Communist Klement Gottwald formed a six-party coalition Cabinet. Amid increasing pressure from Moscow, Gottwald's Cabinet remained in office until a bloodless coup d'état of Feb. 23-25, 1948, when the Communists seized complete control. President Beneš resigned June 7 following parliamentary elections in which the Communists and their allies were unopposed. Parliament then elected Gottwald to the presidency.

Czechoslovakia's Soviet-type Constitution makes the 300-member unicameral Parliament the supreme organ of the state. The government is headed by the President, elected by Parliament for a seven-year term. The Prime Minister and his

Cabinet are appointed by the President but responsible to Parliament.

ECONOMIC CONDITIONS. Nationalization of all enterprises with more than fifty employees as well as concerns of any size operating in key industries was completed between 1945 and 1948. Distribution of large estates had already been accomplished by the 1919 Land Reform Law. Total collectivization of agriculture was the professed aim of the Communist regime.

Sugar beets, wheat, corn, and high-grade barley and hops for beer brewing are cultivated in the low-lying areas. In more elevated regions, the cultivation of potatoes, rye, and oats predominates. Higher lands are also used for growing fodder crops or for grazing. In 1956 there were 4,220,000 cattle, 1,000,000 sheep and (Dec. 1954) 4,771,000 hogs.

Abundance of coal and presence of iron ore give the country a big metallurgical industry. The Skoda steel works at Pilsen are among the largest in Europe.

Other industries are glass, porcelain, and pottery making, while large forest areas provide raw material for the timber, paper, and cellulose industries. Also highly developed are the textile industries, including cotton, wool, flax, and jute production, and the shoe industry. The famous Bat'a shoe factories are at Zlin.

Foreign trade is a state monopoly managed by government corporations.

NATURAL FEATURES AND RESOURCES. Czechoslovakia lies athwart the great central European watershed between the Baltic, Black, and North Seas. Mountains form several of its boundaries. Many of the valleys are made fertile by the Danube, Elbe, and Vltava (Moldau) rivers and their tributaries.

Most important of Czechoslovakia's varied minerals are pit coal and lignite, with the principal coal fields in the Ostrava-Karviná area, connected with the Polish fields of Upper Silesia.

Production of iron ore in 1956 was about 2,100,000 tons; much ore is imported to meet the demands of Czechoslovakia's flourishing iron and steel industry. Excellent porcelain raw materials, particularly kaolin, are obtained in western Bohemia and southern Moravia. Other minerals are antimony, gold, magnesite, oil, uranium, silver, and zinc.

Denmark (Kingdom)

(Kongeriget Danmark)

Area: 16,577 square miles.
Population (est. Jan. 1, 1957): 4,475,000 (almost entirely Danish).
Density per square mile: 270.0.

Sovereign: King Frederick IX.

Prime Minister: H. C. Hansen.

Principal cities (est. 1957): Copenhagen, including suburbs, 950,700 (capital); Århus, 118,700 (shipbuilding); Odense, 107,400 (meat, dairy products); Ålborg, 84,200 (seaport).

Monetary unit: Krone.

Language: Danish.

Religion: Evangelical Lutheran (state).

HISTORY AND GOVERNMENT: (See *World Politics* section).

RULER. Frederick IX, of the house of Schleswig-Holstein-Sonderburg-Glücksburg, born March 11, 1899, became King April 20, 1947. In 1935 he married Princess Ingrid of Sweden, by whom he has three daughters: Margrethe (heiress apparent, born April 16, 1940), Benedikte (born 1944), Anne-Marie (b. 1946).

ECONOMIC CONDITIONS. Livestock in July, 1956 included 3,167,000 cattle, 4,630,000 hogs, 24,475,000 poultry.

The largest industries are food-processing and iron and metal. Others include chemicals and pharmaceuticals, wood and paper, clothing, textiles, machinery, beverages, and leather.

Leading suppliers in 1956 were Great Britain (24%), western Germany (20%), and the U. S. (8%). Chief customers were Great Britain (31%), western Germany (20%), the U. S. (7%). Leading exports were meat and meat products (27%), dairy products, largely butter and eggs (24%), machinery (12%) and live meat animals (6%). Leading imports: coal, coke, petroleum and petroleum products, machinery, vehicles, and textiles.

NATURAL FEATURES AND RESOURCES. Denmark, only three miles from Sweden at the closest point, consists of the Jutland peninsula and the islands in the Baltic. The largest islands are Zealand, the site of Copenhagen; Fünen; and far to the east, Bornholm. The narrow waters to the north are called Skagerrak; and to the east, Kattegat.

The terrain of the whole kingdom is low but not flat. Its highest point is about 500 feet, and there are many lakes, ponds and short rivers. Sand dunes line the western Jutland coast almost without a break.

Mineral resources are negligible. Large quantities of coal and coke must be imported. Peat bogs supply an important source of fuel.

The fishing industry, centered at Copenhagen but carried on also in the shallow fiords and in the deeper waters of the Baltic, North Sea and Skagerrak, is a basic part of the Danish economy.

Outlying Territories

FAEROE ISLANDS—Status: Autonomous part of Denmark.

Area: 540 square miles.
 Population (est. 1955): 34,000.
 Capital: Thorshavn (pop. 1950: 5,607).
 Governor general: C. A. Vagn-Hansen.
 Principal products: cod, whale oil, cod liver oil, wool, fertilizers, skins and leather.

This group of 21 islands, lying in the North Atlantic about 200 miles northwest of the Shetland Islands, joined Denmark in 1386 and has since been part of the Danish kingdom. The islands were occupied by British troops during World War II, after the German occupation of Denmark. The principal pursuits are fishing and sheep grazing. The Faeroes have home rule under a bill enacted in 1948; they also have two representatives in the Danish Folketing.

GREENLAND—Status: Integral part of Kingdom of Denmark.

Area: 839,782 square miles (almost 85 per cent glacier).

Population (census 1951): 24,159 (native except for 1,269 Europeans).

Capital: Godthaab (second governor's seat, Godhavn).

Governor general: Poul Hugo Lundsteen.
 Foreign trade (1955): exports, 49,370,000 kr. (75% to Denmark); imports, 78,256,000 kr. (83% from Denmark). Chief exports: cryolite (41,792 metric tons), fish and products, hides and skins.

Greenland, the world's largest island, was colonized in 985-86 by Eric the Red. Danish sovereignty, which covered only the west coast, was extended over the whole island in 1917. In 1941 the United States signed an agreement with the Danish minister in Washington, placing it under U. S. protection during World War II but maintaining Danish sovereignty. A definitive agreement for the joint defense of Greenland within the framework of NATO was signed on April 27, 1951. A large U. S. air base at Thule in the far north was completed in 1953.

Under 1953 amendments to the Danish Constitution, Greenland is part of Denmark and has two representatives in the Danish Folketing. There is a popularly elected council.

Greenland is the world's only source of natural cryolite, important in the manufacture of aluminum. Large deposits of lead, zinc and wolfram were found on the eastern coast of Greenland after World War II.

Dominican Republic (República Dominicana)

Area: 18,703 square miles.
 Population (est. 1957): 2,698,000 (1950: mestizo and mulatto, 60%; white, 23%; Negro, 12%).

Density per square mile: 139.4.
 President: Héctor Trujillo y Molina.

Principal cities (census 1950): Ciudad Trujillo, 181,553 (capital; sugar); Santiago de los Caballeros, 56,558 (tobacco); San Pedro de Macoris, 19,876 (sugar port); Puerto Plata, 14,843 (seaport).

Monetary unit: Dominican peso.

Language: Spanish.

Religion: Roman Catholic.

HISTORY. The Dominican Republic (formerly San Domingo) occupies the eastern two-thirds of the island which Columbus named La Española (now Hispaniola) when he discovered it on his first voyage in 1492. The other third is occupied by the republic of Haiti. The capital, Ciudad Trujillo, founded in 1496, is the oldest white settlement in the Western Hemisphere.

The Dominican Republic was variously under Spanish, French and Haitian domination until it established its independence in 1865 and then plunged into an unstable political history. U. S. Marines occupied it from 1916 to 1924, when a new Constitution was adopted. In 1930, Rafael Leónidas Trujillo y Molina, an army general, was elected President.

ECONOMIC CONDITIONS. Primarily agricultural, the country produces sugar, coffee, cacao, tobacco, bananas, rice, corn, cassava, beans, and sweet potatoes. Cattle raising is of growing importance.

Sugar refining is the only important industry, although several new industries have been established in recent years.

Leading exports in 1956 were sugar (43%), coffee (26%), and cacao (7%). Chief customers were the U. S. (47%) and Britain (25%); leading suppliers, the U. S. (65%) and Western Germany (6%). The main imports are cotton goods, iron and steel products, chemicals and machinery.

NATURAL FEATURES. Crossed from northwest to southeast by a mountain range with maximum elevations exceeding 10,000 feet, the country has fertile, well-watered land on the northeast side, where nearly two-thirds of the population lives. The southwest part is arid and with poor soil except around Ciudad Trujillo. The country has many good harbors.

Ecuador (Republic) (República del Ecuador)

Area: 105,743 square miles.
 Population (est. 1957): 3,890,000 (1942: mestizo, 41%; Indian, 39%; white, 10%; Negro, 5%; others, 5%).

Density per square mile: 35.7.

President: Camillo Ponce Enriquez.

Principal cities (census 1950): Guayaquil, 258,966 (chief port); Quito, 209,932 (capital); Cuenca, 39,983 (trading center); Ambato, 31,312 (commercial center).

Monetary unit: Sucre.

Languages: Spanish, Quéchuá.

Religion: Roman Catholic.

HISTORY. Mostly forested and mountainous and a little larger than Colorado, Ecuador has a long history replete with the forceful rule of dictators. The Spanish under Francisco Pizarro conquered the land in 1532 by defeating the Inca Atahualpa. The first revolt against Spain occurred in 1809, but the victory was not complete until the Battle of Pichincha on May 24, 1822. Ecuador then joined Venezuela and Colombia in a confederacy founded by Simón Bolívar and known as Colombia, but withdrew amicably and became independent in 1830. The country's subsequent history has been largely one of dictatorships.

For more than a hundred years, Ecuador disputed its boundary with Peru, frequently resorting to arms. After hostilities started again in 1941, both nations submitted to mediation, and in 1944 Ecuador lost most of the disputed area. The dispute broke out anew in 1951.

GOVERNMENT. Under the 1948 (16th) Constitution, Ecuador elects a President for four years by direct vote, and he is ineligible for further service until at least one term intervenes. The Congress is bicameral, with a Senate and Chamber of Deputies.

ECONOMIC CONDITIONS. Although agriculture is the basis of Ecuador's economy, less than 12,000,000 acres are devoted to it. Cacao, the chief crop, is grown in coastal regions and lower river valleys. The plateaus and mountain valleys are used for grazing and dairying, and raising cereals and potatoes. After textiles, one of Ecuador's main industries is the manufacture of Panama hats, made of Toquilla straw.

Leading exports in 1956 were bananas (39%), coffee (31%), and cacao (19%). Leading customers were the U. S. (60%), Germany (12%), and Colombia (5%); leading suppliers, the U. S. (52%), Germany (12%), and Belgium (7%).

NATURAL FEATURES AND RESOURCES. Two high and parallel ranges of the Andes, traversing Ecuador from north to south, are topped by tall volcanic peaks.

Ecuador produces gold, silver, copper, lead, and petroleum. The country is the world's chief source of light, strong balsa wood.

Egyptian, 95.4%; Arabian, 1.7%; Greek, .6%; others, 2.3%).

Density per square mile: 60.6.

President: Gamal Abdel Nasser.

Principal cities (est. 1952): Cairo, 2,367,900 (capital); Alexandria, 1,070,000 (chief port); Port Said, 186,300 (Suez Canal terminus); Tanta, 147,800 (railroad center, Nile delta).

Monetary unit: Egyptian pound (£E).

Language: Arabic.

Religions: Moslem, 91%; Christian (mostly Copt and Greek Orthodox), 8%, others, 1 %.

HISTORY AND GOVERNMENT. Egyptian history dates back to about 4000 B.C. when the kingdoms of upper and lower Egypt, already highly civilized, were united. Egypt's "Golden Age" coincided with the eighteenth and nineteenth dynasties (sixteenth to thirteenth centuries B.C.), during which the empire was established. Persia conquered Egypt in 525 B.C.; Alexander the Great subdued it in 332 B.C., and then the dynasty of the Ptolemies ruled the land until 30 B.C., when Cleopatra, last of the line, committed suicide and Egypt became a Roman province. From 641 to 1517 the Arab Caliphs ruled Egypt, and then the Turks took it and made it part of their Ottoman Empire. Napoleon's armies occupied the country from 1798 to 1801. In 1805, Mohammed Ali, leader of a band of Albanian soldiers, became Pasha of Egypt. After completion of the Suez Canal in 1869, both the French and British took increasing interest in Egypt.

British troops occupied Egypt in 1882, and British resident agents became its actual administrators, though it remained under nominal Turkish sovereignty. On Dec. 18, 1914, this fiction was ended and Egypt became a British protectorate.

Pressure by Egyptian nationalists forced Britain to declare Egypt an independent, sovereign state on Feb. 28, 1922, although the British reserved rights for the protection of the Suez Canal and the defense of Egypt. On Aug. 26, 1936, by an Anglo-Egyptian treaty of alliance, all British troops and officials were to be withdrawn, except from the Suez Canal zone. When World War II started, Egypt remained neutral. British imperial troops finally ended the Nazi threat to Suez in 1942 in the battle of El Alamein, which took place west of Alexandria.

In Oct., 1951, Egypt abrogated the 1936 treaty and the 1899 Anglo-Egyptian condominium of the Sudan. (See Sudan.) Rioting and attacks on British troops in the Suez Canal zone followed, reaching a climax in Jan., 1952. The army, led by Gen. Mohammed Naguib, seized power on July 23, 1952. On July 26, King Farouk abdicated in favor of his infant son. Naguib took over the premiership on Sept. 7, 1952, and promised far-reaching reforms. The

Egypt (Republic)

(Misr)

Egypt and Syria united in February, 1958, to form the United Arab Republic.

Area: 386,100 square miles.

Population (est. 1957): 24,020,000 (1944:

monarchy was abolished and a republic proclaimed on June 18, 1953, with Naguib holding the posts of both provisional President and Premier. He relinquished the latter post on April 18, 1954, to Gamal Abdel Nasser, leader of the ruling military junta. Naguib was deposed by the Cabinet and junta on Nov. 14, 1954.

Nasser was confirmed as President in a popular referendum on June 23, 1956. For Suez Canal seizure and subsequent events, see below and *World Politics* section.)

The 1956 Constitution provides for a presidential type of republican government. Legislative power is vested in the National Assembly, elected for five years. Executive power is vested in the President, who serves for six years and is nominated by the Assembly and confirmed (or disapproved) by the people in a referendum. He is assisted by a Cabinet of ministers. Political parties are suspended until such time as a law is passed authorizing them. All persons over the age of eighteen have the right to vote.

SOCIAL AND ECONOMIC CONDITIONS.

The majority of the people are Sunni Moslems. The Christians are mainly Copts with an admixture of Armenian, Syrian, and Maronite sects. The population divides generally into fellahin (peasantry) and townspeople of the same blood, the Beduin or nomad Arabs of the desert, and the Berbers, who occupy the Nile valley between Aswan and Dongola. The foreigners are chiefly Greeks (whose main center is Alexandria), French, British and Italians. The density of population in the small inhabited area in the Nile valley and delta (about 13,600 sq. mi.) is far greater than that of either the Netherlands or Belgium.

Agriculture is the chief industry, engaging more than half the population. Only about 3.5 per cent of the total area is arable, and only about 6,000,000 acres are actually under cultivation, almost entirely in the Nile valley and delta. More than half the cultivated area comprises farms of less than 20 acres. Irrigation is indispensable to agriculture; the Aswan reservoir above the first cataract of the Nile holds up to 5,500,000,000 cubic meters of water and the reservoir of Gebel Aulla, in the Sudan, 2,000,000,000 cubic meters. In the delta and in middle Egypt, where perennial or canal irrigation is possible, two or three crops a year can be grown. The chief cash crop is cotton, of which Egypt is one of the world's leading producers.

Industry includes sugar refining, cotton spinning, cement manufacture, milling and battery, soap and perfume making. The sugar Company of Egypt holds a monopoly in the sugar refining industry.

In 1956, Egypt's chief customers were Czechoslovakia (15%), Japan (7%), western Germany (7%), and the Sudan (6%); leading suppliers, the United States (13%), Britain (12%), western Germany (11%), and Italy (6%). Leading exports were raw cotton (70%) and rice (6%).

Imports included wheat, petroleum, fertilizers, iron and steel products, textiles, and machinery and vehicles.

Navigable throughout its course in Egypt, the Nile is used largely as a means of cheap transport for heavy goods. The principal port is Alexandria.

NATURAL FEATURES AND RESOURCES.

Egypt, at the northeast corner of Africa, is a very rough square, with the historic Nile flowing northward through its eastern third. On either side of the Nile valley are desert plateaus, spotted with oases. In the north, toward the Mediterranean, plateaus are low, while south of Cairo they rise to a maximum of 1,015 feet above sea level. At the head of the Red Sea, at the northeast corner of Egypt, is the triangular Sinai peninsula, between the Suez Canal and Israel.

The Nile delta starts 100 miles south of the Mediterranean and fans out to a sea front of 155 miles between Alexandria and Port Said. From Cairo north, the Nile branches into many streams, the principal of which are the Damietta and the Rosetta, joined by a network of canals.

The most important minerals are manganese ore, phosphate, and petroleum. Gold, iron ochres, nickel, sodium carbonate, sulfate talc, and tungsten also are mined.

Except for a narrow belt on the Mediterranean, Egypt lies in an almost rainless area, in which high daytime temperatures fall quickly at night.

SUEZ CANAL. The Suez Canal, in Egyptian territory between the Arabian Desert and the Sinai peninsula, is an artificial waterway about 100 miles long between Port Said on the Mediterranean and Suez on the Red Sea. Construction work, directed by the French engineer Ferdinand de Lesseps, was begun April 25, 1859, and the canal was opened Nov. 17, 1869. The cost was 432,807,882 francs. The concession is held by an Egyptian joint stock company, *Compagnie Universelle du Canal Maritime de Suez*, in which the British government holds 353,504 out of a total of 800,000 shares. The concession was to expire Nov. 17, 1968, but the company was nationalized July 26, 1956, by unilateral action of the Egyptian government. As a result of hostilities the canal was blocked between Nov., 1956, and March, 1957. In July, 1958, an agreement was finally signed in Geneva between the United Arab Republic and the shareholders of the former Suez Canal Company. Compensation was arranged for

the period of twelve years which was still to have elapsed between 1956 and the end of the Company's 99-year concession in 1968.

Estonia

Area: 17,400 square miles.

Population (est. 1956): 1,100,000 (1940: Estonians, 88%; Russians, 9%; Germans [Balts], 1%; others, 2%).

Density per square mile: 63.2.

Principal cities (est. 1938): Tallinn, 146,-400 (capital); Tartu, 60,100 (university town); Narva, 24,200 (seaport).

Language: Estonian (Finno-Ugrian).

Religions: Lutheran, 78%; Greek Orthodox, 19%; others, 3%.

Born out of World War I, this small Baltic state enjoyed two short decades of independence before it was absorbed again by its powerful neighbor, Russia. In the thirteenth century, the Estonians had been conquered by the Teutonic Knights of Germany, who reduced them to serfdom. In 1521, the Swedes took over, and the power of the German (Balt) landowning class was curbed somewhat. But after 1721, when Russia succeeded Sweden as the ruling power, the Estonians were subjected to a double bondage—the Balts and the tsarist officials. The oppression lasted until the closing months of World War I, when Estonia finally achieved independence.

Shortly after the start of World War II, the nation was occupied by Russian troops and was incorporated as the sixteenth republic of the U.S.S.R. in 1940. Germany occupied the nation from 1941 to 1944, when it was retaken by the Russians. Most of the nations of the world, including the United States and Great Britain, have not recognized the Soviet incorporation of Estonia.

Ethiopia (Kingdom)

(Abyssinia)

Area: 457,142 square miles.*

Population (est. 1956): 20,000,000* (Abyssinian [Amhara], 20%; Galla, 50%; others, 30%).

Density per square mile: 35.0.*

Ruler: Emperor Haile Selassie I.

Prime Minister: Bitwoded Makonnen Endalkatchau.

Principal cities (est. 1951): Addis Ababa, 401,915 (capital); Asmara, 117,000 (capital, Eritrea); Harar, 45,000 (coffee); Dessie, 35,000 (grain center); Dire Dawa, 30,000 (railway workshops).

Monetary unit: Ethiopian paper dollar.

Languages: Amharic, Arabic.

Religions: Copt (Christian), Moslem.

* Including Eritrea.

HISTORY AND GOVERNMENT. (See *World Politics* section.)

ECONOMIC CONDITIONS. Ethiopia is generally fertile, predominantly agricultural and pastoral, with many regions yielding two crops a year. The chief crops are maize, wheat, barley, rye, cotton, sugarcane, millet, hemp, vegetables, coffee, and teff (the common bread grain). The country's inadequate transport system, however, makes crop growing largely a local industry.

The country grazes several million cattle, and many goats and sheep. Horses and mules are bred extensively as pack animals and mounts. There is little manufacturing except for small native industry, although the Italians built some industrial plants during their five-year occupation.

Chief exports in 1954-55 were coffee (56%), hides and skins (10%), and oil seeds (11%). Leading customers were the United States (25%), Aden (21%), and Italy (19%); leading suppliers, Italy (15%), India (14%), and the United States (13%). Major imports were cotton piece goods, machinery, sugar, and salt.

NATURAL FEATURES AND RESOURCES. Over its main plateau-land, Ethiopia has several high mountains. The Blue Nile, or Abbai, rises in the northwest and flows in a great semicircle east, south, and north west before entering Sudan. Its chief reservoir, Lake Tana, lies in the northwestern part of the plateau.

Gold, produced from placer mines worked by natives in the south and west, is Ethiopia's main mineral. Platinum also is mined in fair commercial quantities. Other minerals are rock salt, cinnabar, copper, iron, mercury, mica, potash, and sulfur. Oil deposits are believed to exist, and all drilling rights have been sold to the Sinclair Refining Company of the United States.

ERITREA—Status: Federated with Ethiopia.

Area: 47,875 sq. mi.

Population (est. 1955): 1,104,000.

Capital: Asmara (population: 117,000).

Sovereign: Haile Selassie I.

Chief Executive: Fitaurari Asfaha Wolde mikel.

Agricultural products: coffee, barley, tobacco, sesame, hides, skins.

Minerals: gold, salt, potassium salts.

Sea product: pearls.

The first Italian inroad into Eritrea came in 1870 when the port of Assab and adjacent territory were bought from a native sultan; with British approval, Italian troops occupied Massaua in 1885. By a decree of Jan. 1, 1890, Italian possessions along the Red Sea were united into the colony of Eritrea.

As an autonomous, self-governing area Eritrea has its own elected assembly which selects the chief executive. It is also represented in the Ethiopian Parliament.

Matters reserved to the Ethiopian government include defense, foreign affairs, foreign trade, finance, and communications.

The principal native elements are the Ethiopians and Tigrés, who have close ethnic, linguistic, and religious ties with peoples in neighboring Ethiopia. Irrigation is essential in the coastal plains, and agriculture is practiced largely on the interior plateau (average elevation: 6,500 ft.).

Finland (Republic)

(Suomen Tasavalta)

Area: 130,119 square miles.

Population (est. 1957): 4,333,000 (Finnish, 90%; Swedish, 10%).

Density per square mile: 33.2.

President: Urho Kekkonen.

Premier: Veino J. Sukselainen.

Principal cities (est. Jan. 1, 1957): Helsinki, 428,000 (capital); Tampere, 115,700 (textiles, paper); Turku (Åbo), 114,400 (seaport, shipbuilding); Lahti, 60,500 (glass, lumber); Oulu, 49,300 (seaport, shipbuilding).

Monetary unit: Markka (FM).

Languages: Finnish, Swedish.

Religions (1949): Evangelical Lutheran, 97%, Greek Orthodox, 2%; others, 1%.

HISTORY AND GOVERNMENT: (See *World Politics* section).

ECONOMIC CONDITIONS. The chief crops are oats, barley, rye, and potatoes. Grazing lands are extensive. In 1956, there were 1,827,070 cattle, 565,738 sheep, 434,584 hogs and 151,701 reindeer.

The leading Finnish manufactures are wood and paper (about one-third the total value), food, luxury items, machinery and textiles. With the cession of the Karelian isthmus and the city of Viipuri to the U.S.S.R., Finland lost valuable manufacturing areas. Helsinki is the principal industrial center.

Chief exports in 1956 were wood and wood products (32%), paper (25%) and wood pulp (21%). Leading customers were Britain (21%), U.S.S.R. (19%), western Germany (9%) and the U. S. (7%); leading suppliers, Britain (17%), U.S.S.R. (12%), western Germany (12%), and the U. S. (7%).

NATURAL FEATURES AND RESOURCES. Finland stretches 700 miles from the Gulf of Finland on the south to Soviet Petsamo, north of the Arctic Circle. Off the southwest coast are the Åland Islands (approximately 300), controlling the entrance to the Gulf of Bothnia. Finland has more than 60,000 lakes. Of the few rivers, only the Oulu (Uleå) is navigable to any important extent.

Finland has no coal or oil, and many of its ore deposits are remote from transportation. Finland's sulfide ore is 4 per-

cent copper, 26 per cent sulfur and 27 per cent iron, with some zinc, cobalt, gold, and silver. Limestone, soapstone and red granite deposits are extensive, and uranium deposits are believed to exist. Wood and peat are the only natural fuels.

More than a third of Finland is covered with high quality timber, the nation's richest natural resource.

The Swedish-populated Åland islands (581 sq. mi.) have an autonomous status under a law passed in 1951.

France (Republic)

(République Française)

Area: 212,736 square miles.

Population (est. 1957): 44,000,000 (1954: French, 96.6%; others, 3.4%).

Density per square mile: 205.8.

President: René Coty.

Premier: Charles de Gaulle.

Principal cities (census 1954): Paris, 2,850,189 (capital); Marseilles, 661,492 (chief port); Lyons, 471,270 (silk, metal manufacture); Toulouse, 268,863 (tobacco; commercial center); Bordeaux, 257,946 (wine; seaport); Nice, 244,360 (resort center); Nantes, 222,790 (manufacturing).

Monetary unit: Franc.

Religion (est.): Roman Catholic, 97.5%; Protestant and others, 2.5%.

HISTORY AND GOVERNMENT: (See *World Politics* section).

Religion. The predominant faith is Roman Catholicism, but Church and State were separated in 1905. Diplomatic relations with the Vatican were resumed in 1921, and lesser church property was returned to diocesan associations in 1924.

Population. The people are not homogeneous, varying from section to section. During the inter-bellum period, the population remained almost static, with an increase of only 72,133 from 1931 to 1936 and a decrease of 3.3 per cent from 1936 to 1946. The period between 1946 and 1954 showed an increase of 5.6 per cent. France normally is almost self-sufficient in basic foodstuffs and leads the world in wine production.

Silk culture once thrived in the lower Rhône valley, but production fell sharply between wars. Milk, butter, and cheese are important as exports. Livestock in Oct. 1956 included 17,572,000 cattle, 8,216,000 sheep, and 2,161,000 hogs.

Industry. Principal industrial areas are Paris, Artois, Lower Seine and Lyon; the textile industry is concentrated in the north. Leading manufactures are iron, steel, chemicals, textiles, automobiles, machinery, and beet sugar.

Principal suppliers in 1956 were the U. S. (12%), western Germany (10%), Algeria (7%), Britain (5%), and Belgium

FRANCE AND THE FRENCH UNION

* Voted in Sept. 1958 not to remain in the French Union.

(5%); leading customers, Algeria (13%), western Germany (10%), Belgium (8%), Switzerland (7%), and Britain (6%). Leading exports were metals and manufactures, textiles and agricultural and food products.

NATURAL FEATURES AND RESOURCES.

France is second in size to Russia among Europe's nations. In the Alps near the Italian and Swiss borders is France's highest point—Mont Blanc, 15,781 feet. The forest-covered Vosges Mountains are in the northeast and the Pyrenees are along the Spanish border. Except for extreme northern France, which is part of the Flanders plain, the country may be described as four river basins and a plateau. Three of the streams flow west—the Seine into the English Channel, the Loire into the Atlantic, and the Garonne into the Bay of Biscay. The Rhône flows south into the Mediterranean. For about a hundred miles, the Rhine is France's eastern border. West of the Rhône and northeast of the Garonne lies the Central Plateau, covering about 15 per cent of France's area, and rising to a maximum elevation of 6,188 feet. In the Mediterranean, 115 miles east-southeast of Nice, is Corsica, the island of Napoleon's birth, with an area of 3,367 square miles.

Minerals. French coalfields, most extensive in the northeast, ordinarily supply about 70 per cent of domestic needs. Lorraine, Anjou and Normandy have valuable iron ore deposits. Provence has bauxite. Alsace has potash and oil. Limousin has kaolin, zinc, lead and tar.

Forests and Fisheries. France produces forest products, including resin, turpentine, timber, and nuts. The annual fish catch is among the largest in Europe.

Andorra

This 191-square mile autonomous and semi-independent state on the Franco-Spanish border has been under the joint suzerainty of the French State and the Spanish bishops of Urgel since 1278. It is a cluster of mountain valleys inhabited by about 6,500 hardy and traditionally independent people whose principal pursuit is the tending of flocks. Catalán is the language spoken. A Council General of 24 members, elected for four years by the heads of families, choose the First Syndic, the supreme executive authority.

FRENCH UNION

AFRICA

Algeria (Part of Metropolitan France)

(L'Algérie)

Principal cities (census 1954): Algiers, 355,040 (capital); Oran, 291,812 (seaport); Constantine, 143,334 (trading center); Bône, 112,010 (seaport, phosphates).

Monetary unit: French franc.
Languages: Arabic, French.

Religions: Moslem (natives), Roman Catholic, Jewish.

HISTORY. (See *World Politics* section.)

ECONOMIC CONDITIONS. Approximately 86 per cent of the population is native, 12 per cent French, and 2 per cent other European. The native population is Berber, with Arab admixture physically assimilated.

The area under cultivation is about 15,000,000 acres, more than 30 per cent of which is owned by European farmers, chiefly in the fertile coastlands. The principal crops are wheat, barley and oats. Algeria is a leading wine producer, with almost 7 per cent of the cultivated area devoted to vines. Tobacco, corn, vegetables, flax, silk, figs, and dates are also produced. Much of the area is more adapted to grazing than to agriculture. In 1954 there were 6,008,000 sheep, 893,000 cattle; (1953) 3,231,000 goats and 183,000 camels.

European industries include those dependent on crops, such as distilling and oil and flour milling, as well as the making of leather, tobacco and matches. There are also small native industries, particularly the traditional carpet weaving.

In 1956 chief exports were wine (38%), iron ore (6%), and citrus fruits (6%); chief imports, petroleum and products (6%), machinery and apparatus (6%), and motor vehicles (5%). France took 76% of the exports and supplied 80% of the imports.

NATURAL FEATURES AND RESOURCES. Low plains cover small areas near the coast, but 68 per cent of Algeria is a plateau between 2,625 and 5,250 feet above sea level. The region between the Sahara and the Mediterranean reaches a high point of 7,641 feet.

Algeria is a leading producer of phosphates. Iron ore (55% metal content) is found near the Tunisian frontier and on the Oran coast. Zinc, lead, and salt are also important minerals; and small amounts of oil and coal are produced.

CAMEROON (FRENCH CAMEROONS)—Status: U. N. trust territory.

Capital: Yaoundé (population 30,000).

High commissioner: Pierre Mesmer.

Premier: André-Marie M'Bida.

Foreign trade (1956): exports, 13,150,000,000 fr. C.F.A.*; imports, 16,669,000,000 fr. C.F.A. Chief exports: cacao (35%), coffee, bananas, timber, cotton.

Agricultural products: cacao (exports 1956: 30,893 metric tons), coffee, bananas, cotton, rubber, millet, sweet potatoes.

Minerals: tin, gold, rutile.

Forest product: timber.

* Colonies Françaises d'Afrique, equal to 2 metropolitan francs.

In 1884 the Cameroons became a German colony (Kamerun), and after the

conclusion of World War I the region was divided as a League mandate between Britain and France, four-fifths of the area going to France. Placed under French trusteeship by the United Nations in 1946, the area has political and financial autonomy under a French High Commissioner, who under the 1957 self-government statute is assisted by a cabinet headed by the premier and responsible to the popularly elected territorial assembly. The chief port is Douala; the administrative center, Yaoundé.

FRENCH EQUATORIAL AFRICA—Status: Group of overseas territories.

High commissioner: Paul Chauvet.

Capital: Brazzaville (pop. 1950: 84,090).

Foreign trade (1956): exports, 14,135,000,000 fr. C.F.A. (64% to France); imports, 20,527,000,000 fr. C.F.A. (57% from France). Chief exports: timber (36%), cotton (33%), coffee, diamonds, peanuts.

Agricultural products: cotton (1956 exports: 37,472 metric tons), coffee, peanuts, cacao, palm kernels and oil.

Minerals: gold, diamonds, lead, iron ore.

Forest products: timber, rubber, copal gum, wax.

This area, an early slaving center, was first settled by France in 1839; French hegemony was subsequently extended by exploration and conquest of the native tribes. The territories declared for Free France following the armistice of June 1940, and Brazzaville became capital of De Gaulle's Free French movement.

The high commissioner co-ordinates the administration of the area with the aid of an elected Grand Council. Each of the four territories (Gabon, Middle Congo, Ubangi-Shari, Chad) has a governor, an executive council and a popularly elected territorial assembly. There were, in 1951, 23,403 Europeans; most of the Africans are Negroes. There are Arab and Fulani settlements in the Chad region, and several Moslem sultanates. Natural resources, both forest and mineral, are vast but relatively unexploited. Once economically dependent on forest products, the country developed after World War II as a producer of cotton, diamonds and gold. The area is capable of exporting large quantities of hard okoumé wood.

FRENCH SOMALILAND—Status: Overseas territory.

Capital: Djibouti (population 31,855).

Governor: René Petitbon.

Foreign trade (1955): domestic exports, 253,000,000 Djibouti fr.*; ship stores, 2,727,000,000 Djibouti fr.; imports (excluding ship stores), 2,324,000,000 Djibouti fr. Chief exports: salt, hides.

Mineral: salt.

* 1 Djibouti franc = 1.64 metropolitan francs.

French Somaliland, at the southern entrance to the Red Sea, was acquired by

France between 1883 and 1887 by treaties with the Somali sultans, although posts on the coast had been acquired in 1856. This small, largely arid and sparsely populated region is important chiefly because of the port of Djibouti, the main artery of Ethiopia's trade via the Djibouti-Addis Ababa railway. The area is administered by a Governor, responsible to the French government and assisted by a representative council. In 1955 there were an estimated 3,132 Europeans, 28,000 Somalis, 25,000 Danakils and 6,000 Arabs.

French West Africa (Group of Overseas Territories) (L'Afrique Occidentale Française)

High Commissioner: Gaston Custin.

Principal cities (est. 1951): Dakar, 229,200 (capital, chief port); (est. 1953) Abidjan, 160,000 (export center); (est. 1952) Bamako, 100,000 (Niger river port).

Monetary unit: Franc C.F.A. (Colonies Françaises d'Afrique, equal to 2 metropolitan francs).

Languages: French, native tongues.

Religions: Animist (53.4%); Moslem (44.2%); Christian (2.4%).

HISTORY AND GOVERNMENT. The St. Louis Colony, founded in 1626 at the mouth of the Sénégal River, was probably the first permanent white settlement in French West Africa in which the French established themselves, largely for the purpose of pursuing the slave trade. After 1876 the coast settlements were extended steadily into the interior through a series of missionary and economic campaigns. In 1895 the colony of French West Africa was formed under one Governor General by the unification of its various components.

Under 1957 legislation the high commissioner, with the aid of an indirectly elected Grand Council, co-ordinates the administration of the eight constituent territories—Sénégal, French Guinea, Ivory Coast, Dahomey, Haute Volta (re-established in 1947), French Sudan, Mauritania and Niger. Each territory is administered by a governor assisted by an executive council which is responsible to a popularly elected territorial assembly whose powers are deliberative rather than legislative.

In September 1958, French Guinea voted not to remain in the French Union.

ECONOMIC CONDITIONS. Agriculture has expanded rapidly in recent years. Millet, rice, and maize are the principal food crops, and vegetable oils are a leading commercial product. Peanuts, the chief export crop (1955-56: 938,000 metric tons) are cultivated in Sénégal, and palm kernels and oil are produced in Dahomey and the

Ivory Coast. Other products are coffee, cotton, cacao, and bananas. Stock raising is important in French Sudan and Mauritania, relatively dry districts in the northern part of the area. Manufacturing is undeveloped except for small native industries.

Leading exports in 1956 were coffee (28%), peanuts (20%), peanut oil (14%), and cacao (14%). France took 66% of the exports and supplied 65% of the imports.

NATURAL FEATURES AND RESOURCES.

The area, comprising a sixth of Africa, is half as big as Europe; it is generally a plateau broken by two mountain ranges. The Futa Jallon, from 2,300 to 4,900 feet in elevation, parallels the coast for about 430 miles, and Mount Nimba, on the Liberian border, rises 5,250 feet. There are also mountainous regions in the Saharan districts to the north. The Niger, 2,600 miles long, is the principal river.

Important minerals include diamonds, gold, iron ore and bauxite; production of gold has dropped sharply in recent years but large-scale exploitation of iron ore and bauxite deposits is in progress. Iron ore production totaled 847,000 metric tons in 1956; bauxite, 452,000 tons. Timber and precious woods are important, especially in the Ivory Coast.

MADAGASCAR AND DEPENDENCIES—

Status: Overseas territory.

Capital: Tananarive (Antananarivo) (census 1951: 182,982).

High Commissioner: André Soucadaux.

Foreign trade (1956): exports, 16,300,000,000 fr. C.F.A. (62% to France); imports, 23,094,000,000 fr. C.F.A. (72% from France). Chief exports: coffee (43%), rice (8%), tobacco (6%).

Agricultural products (exports 1956): coffee (52,486 metric tons), rice (36,172 tons), tobacco (3,783 tons), cloves, sugar, vanilla, manioc, bananas, maize, coconuts.

Minerals: graphite (exports 1956: 15,401 metric tons), mica, phosphates, gold.

Forest products: gum, medicinal plants, rubber, tannins, dyewoods.

Madagascar, lying off the southeast coast of Africa, is the fourth largest island in the world, with a length of 995 miles and an average width of 250 miles. It remained independent under native rulers until 1885, when it came under French protection. French troops conquered the island in 1895 and it became a French colony the following year. The last native ruler, Queen Ranaivalona III, was exiled. Serious native nationalist outbreaks occurred in 1947.

Under 1957 legislation the high commissioner administers the area with the aid of an Executive Council, which is responsible to the indirectly elected Representative Assembly. The powers of the latter are

deliberative rather than legislative. Each of the six provinces has a popularly elected Assembly.

The chief occupations are cattle raising (1955: 6,100,000 cattle) and agriculture; there are several food-processing and textile plants. The chief port is Tamatave on the east coast; the capital, Tananarive, is located on the central plateau.

Dependencies include the islands of Europa, Juan da Nova, Bassas da India, Glorieuses and various scattered subantarctic islands known as Iles Australes. Under a 1955 law, they and French Antarctica were to be a separate overseas territory.

The Comoro Islands (832 sq. mi.), formerly a dependency, became an autonomous overseas territory effective Jan. 1, 1947, and are represented in the French parliament, although still partly under the authority of French officials in Madagascar. They are located in the Indian ocean at the north entrance of the Mozambique channel, about 300 mi. north of Madagascar. The Comoros consist of four main islands and several islets. The French Administrator is assisted by a Privy Council and an elected General Council. The population is largely Moslem. Exports include essential oils, sisal, vanilla, copra, cacao and cloves.

RÉUNION (Bourbon)—Status: Département of Metropolitan France.

Capital: St. Denis (population 41,163).
Prefect: Porreau Pradier.

Foreign trade (1956): exports, 6,286,000,-000 fr. C.F.A. (73% to France); imports, 8,082,000,000 fr. C.F.A. (68% from France). Chief exports: sugar (83%), essential oils. Agricultural products: sugar (exports 1956: 185,086 metric tons), vanilla, coffee, maize.

Discovered by Portuguese navigators in the 16th century, the island, then uninhabited, was taken as a French possession in 1638. It is located about 450 miles east of Madagascar, in the Indian Ocean.

There is no indigenous population. About three-quarters of the inhabitants are of European origin; the remainder are Creoles, mulattoes, Negroes, Indians and other Asiatics. Tropical cyclones of hurricane variety are frequent during the change of seasons. Occasionally a *raz de marée* (tidal wave) does great damage.

TOGO—Status: Autonomous republic.

Capital: Lomé (population 35,000).
High commissioner: Jean Béard.
Premier: Nicholas Grunitzky.
Foreign trade (1956): exports, 2,336,000,-000 fr. C.F.A. (77% to France); imports, 2,673,000,000 fr. C.F.A. (44% from France). Chief exports: coffee (35%), cacao (21%), palm kernels and oil, cotton, copra. Agricultural products (exports 1956):

coffee (6,406 metric tons), cacao (4,555 tons), palm kernels and oil, cotton, copra.

Mineral: iron ore.

Forest products: dyewoods, oil palms.

Togo, a part of the former Slave Coast, lies between the British Gold Coast colony and French West Africa. Established as a German colony in 1884, the area was divided as a League mandate by France and Britain at the end of World War I, with France obtaining two-thirds of the total area. It was placed under U. N. trusteeship in 1946. Its status as an autonomous, self-governing republic within the French Union was approved by a popular referendum in Oct. 1956 but the U. N. withheld recognition.

Under the 1956 constitution France through its high commissioner is responsible for foreign affairs, defense and fiscal matters. The high commissioner names the premier, who with his cabinet is responsible to the popularly elected Legislative Assembly.

The southern half is populated principally by the Ewe and Mina tribes; in the north the population is descended largely from Hamitic tribes. There were 1,300 Europeans in 1954. Agriculture and grazing are the chief industries.

The coastline, only 32 miles long, is low, sandy and without harbors. The Togo Hills traverse the central section.

Tunisia. See Tunisia

WESTERN HEMISPHERE

FRENCH GUIANA (including ININI)—Status: Département of Metropolitan France.

Capital: Cayenne (population 12,934).
Prefect: Pierre Maloy.
Foreign trade (1956): exports, 293,000,-000 fr. (43% to France); imports, 2,815,-000,000 fr. (69% from France). Chief exports: rum (27%), timber, gold. Agricultural products: bananas, cacao, corn, manioc, rice, sugar cane. Mineral: gold (exports 1956: 1,075 troy oz.).

French Guiana, lying north of Brazil and east of Surinam (Dutch Guiana) on the northeast coast of South America, was first settled in 1626. Penal settlements, embracing the area around the mouth of the Maroni River and the Iles du Salut (including Devil's Island), were founded in 1852; they were replaced by refugee camps in the 1940's.

During World War II French Guiana at first adhered to the Vichy government, but the Free French took over in March 1943.

GUADELOUPE—Status: Département of Metropolitan France.

Capital: Basse-Terre (population 11,430).
 Prefect: Guy Malines.

Foreign trade (1956): exports, 10,181,-000,000 fr. (66% to France); imports, 12,-695,000,000 fr. (76% from France). Chief exports: sugar (61%), bananas, rum.

Agricultural products: sugar (exports 1956: 123,287 metric tons), bananas, coffee, cacao, manioc, vanilla.

Manufactures: rum, sugar.

Guadeloupe, lying in the West Indies about 300 miles southeast of Puerto Rico, was discovered by Columbus in 1493. French colonization began in 1635. The largest city and chief port is Pointe-à-Pitre (population 30,465). About half the cultivated area is devoted to sugar cane. The manufacturing of rum and spirits is the principal industry.

MARTINIQUE—Status: Département of Metropolitan France.

Capital: Fort-de-France (population 58,-763).

Prefect: Gaston Villéger.

Foreign trade (1956): exports, 9,893,000,-000 fr. (86% to France); imports, 13,179,-000,000 fr. (77% from France). Chief exports: sugar (42%), bananas, rum.

Agricultural products: sugar (exports 1956: 72,138 metric tons), bananas, pineapples, cacao, coffee.

Manufactures: rum, sugar.

Martinique, lying in the Lesser Antilles about 300 miles northeast of Venezuela, was probably discovered by Columbus in 1502 and was taken for France in 1635. Following the Franco-German armistice of 1940 it had a semi-autonomous status under the High Commissioner, Admiral Georges Robert, until 1943, when he relinquished his authority to the Free French. The area, administered by a Prefect assisted by an elected council, is represented in the French legislature. The population is mainly Negro and mulatto. Most of the arable land is devoted to sugar cultivation. Fort-de-France, the capital and chief commercial center, has an excellent harbor.

ST. PIERRE AND MIQUELON—Status: Overseas territory.

Capital: St. Pierre (population 3,997).

Administrator: Pierre Sicaut.

Foreign trade (1956): exports, 195,000,-000 fr. C.F.A. (46% to the U. S.); imports, 644,000,000 fr. C.F.A. (51% from Canada). Chief export: fish and products.

The sole remnant of the French colonial empire in North America, these islands were first occupied by the French in 1660. Their only importance arises from proximity to the Grand Banks, located ten miles south of Newfoundland, making them the center of the French Atlantic cod fisheries.

ASIA

Indo-China. (See World Politics section and articles on Vietnam, Cambodia and Laos).

OCEANIA**FRENCH PACIFIC SETTLEMENTS—Status: Overseas territory.**

Governor: Jean Toby.

Capital: Papeete, on Tahiti (population 1951: 15,214).

Foreign trade (1956): exports, 659,000,-000 fr. C.F.P.* (52% to France); imports, 676,000,000 fr. C.F.P. (30% from the U. S., 30% from France). Chief exports: phosphate (33%), copra, vanilla.

Agricultural products: copra (exports 1956: 20,000 metric tons), sugar, vanilla, tobacco.

Mineral: phosphate (1956 exports: 264,-926 metric tons).

* Colonies Françaises du Pacifique, equal to 5½ metropolitan France.

The term French Pacific Settlements is applied to the scattered French possessions in the eastern Pacific—Mangareva (Gam-bier), Makatea, Marquesas Islands, Rapa, Rurutu, Rimatara, Society Islands, Tuamotu Archipelago, Tubuai and Raivavae—which were organized into a single colony in 1903. The appointed Governor is assisted by a Privy Council and a popularly elected Representative Assembly. The principal and most populous island—Tahiti, in the Society group (pop. 1951: 30,500)—was claimed as French in 1768. The natives are mostly Polynesians.

NEW CALEDONIA AND DEPENDENCIES—Status: Overseas territory.

Capital: Nouméa (population 20,000).

Governor: Aimé Grimald (also French High Commissioner in the Pacific).

Foreign trade (1956): exports, 1,982,000,-000 fr. C.F.P. (67% to France); imports, 2,105,000,000 fr. C.F.P. (45% from France). Chief exports: nickel (87%), chromite, coffee.

Agricultural products: coffee, copra, corn, cotton, manioc, rice, tobacco.

Minerals (1956): nickel (6,920 metric tons, matte), chromite (49,190 tons), iron ore.

Sea product: mother-of-pearl.

New Caledonia (6,533 sq. mi.), lying about 1,070 miles northeast of Sydney, Australia, was discovered by Captain James Cook in 1774 and annexed by France in 1853. The government, in the hands of an appointed Governor and an elective Council, also administers the Isle of Pines, the Wallis Archipelago, the Loyalty Islands, the Chesterfield Islands, Walpole, the Huon Islands, Futuna and Alofi, with a total area of 1,121 square miles. The area—taken over in the summer of 1940 by the Free French after a bloodless revolution—is one of the richest of the Pacific Islands in mineral resources, particularly nickel and

chrome ore. The natives are Melanesians; about one-third of the population is white and one-fifth Indo-Chinese and Javanese. A French penal colony was established in the 19th century.

NEW HEBRIDES—Status: Anglo-French condominium.

Capital: Vila (population 1,200).

Foreign trade (1956): exports, 268,117,000 fr. C.F.P.; imports, 195,332,000 fr. C.F.P. Chief exports: copra (80%), cacao.

Agricultural products: coconuts, cacao, coffee.

Sea products: trochus and burghaus shell.

The New Hebrides, under joint Anglo-French administration since 1914, lie northeast of New Caledonia. The islands, about 40 in number, joined the Free French movement after a plebiscite in July 1940. Most of the natives are Melanesians of mixed blood; there were 350 British and 1,300 French in 1952. The largest island is Espiritu Santo (875 sq. mi.). The French and British high commissioners in the Pacific are represented by resident commissioners.

GERMANY

HISTORY. In Caesar's time, the territory that is now Germany was inhabited by barbarous tribes that came originally perhaps from Central Asia. One of these Germanic tribes, the Franks, attained supremacy in western Europe under Charlemagne, who was crowned Holy Roman Emperor in A.D. 800. By the Treaty of Verdun (843), Charlemagne's lands east of the Rhine were ceded to the German Prince Louis. Additional territory acquired by the Treaty of Mersen (870) gave Germany approximately the area she maintained throughout the Middle Ages. For several centuries after Otto the Great was crowned King in 936, the German rulers were also usually heads of the Holy Roman Empire.

Relations between State and Church were changed by the Reformation, which began with Martin Luther's 95 theses, and came to a head in 1547, when Charles V scattered the forces of the Protestant League at Mühlberg. Freedom of worship was obtained by the Peace of Augsburg (1555), but a Counter Reformation took place later, and a dispute over the succession to the Bohemian throne brought on the Thirty Years' War (1618-48) which devastated Germany and left the empire divided into hundreds of small principalities virtually independent of the Emperor. Meanwhile, Prussia was developing into a province of considerable strength. Frederick the Great (1740-86) reorganized the Prussian army and defeated Maria

Theresa of Austria in a struggle over Silesia. The conflict with revolutionary France hastened the disintegration of the empire, and in 1806 Francis II of Austria laid down the Imperial German crown. After the defeat of Napoleon at Waterloo (1815), the struggle between Austria and Prussia for supremacy in Germany continued, reaching its climax in the defeat of Austria in the Seven Weeks' War (1866) and the formation of the Prussian-dominated North German Confederation (1867).

(For recent history, see *World Politics* section).

Adolf Hitler. With the death of President von Hindenburg in 1934, Hitler became complete master of Germany. He repudiated the Treaty of Versailles and began full-scale rearmament. In 1935 he withdrew from the League of Nations, and in 1936 he reoccupied the Rhineland and signed the anti-Comintern pact with Japan, at the same time strengthening relations with Italy. Austria was annexed in March, 1938. By the Munich agreement (Sept., 1938) he gained the Czech Sudetenland, and in violation of this agreement he completed the dismemberment of Czechoslovakia in March, 1939. But his invasion of Poland on Sept. 1, 1939, precipitated British and French declarations of war.

On May 8, 1945, Germany surrendered unconditionally to Allied and Soviet military commanders, and on June 5 the four-nation Allied Control Council became the *de facto* government of Germany.

At the Berlin (or Potsdam) Conference (July 17-Aug. 2, 1945) President Truman, Stalin and Prime Minister Attlee set forth the principles by which the Allied Control Council was to be guided. They were: Germany's complete disarmament and demilitarization; destruction of its war potential; rigid control of industry; decentralization of the political and economic structure. Pending final determination of territorial questions at a peace conference, the three victors agreed in principle to the ultimate transfer of the city of Königsberg (now Kaliningrad) and its adjacent area to the Soviet Union and to the administration by Poland of former German territories lying generally east of the Oder-Neisse line.

For purposes of control, Germany was divided in 1945 into four national occupation zones, each headed by a Military Governor, assisted by appropriate supervisory and operating staffs.

Efforts to unify Germany were totally unsuccessful, and the western powers were unable to agree with the U.S.S.R. on any fundamental issue. Work of the Allied Control Council was hamstrung by repeated Soviet vetoes; and finally, on March 20, 1948, the U.S.S.R. walked out of the Council. Meanwhile, the U. S. and Britain

had taken steps to merge their zones economically (Bizone); and on May 31, 1948, the U. S., Britain, France and the Benelux countries agreed to set up a German state comprising the three western zones. At the same time the western powers introduced a new German currency.

The Soviet Union replied to these measures by clamping a blockade on all ground communications between the western zones and Berlin. The western Allies, refusing to be driven out of the capital, immediately organized a gigantic airlift to fly supplies into the beleaguered city. Before the Russians were finally forced to lift the blockade on May 12, 1949, 60,000 men were engaged in the airlift.

In return for lifting the blockade, the U.S.S.R. asked only that the Big Four Foreign Ministers meet again to discuss German unification. The conference, meeting in Paris from May 23 to June 20, 1949, ended as usual in a deadlock.

The Big Four Foreign Ministers met once more at Berlin from Jan. 25 to Feb. 18, 1954, again without success. No progress toward German reunification was made thereafter.

German Federal Republic

Area: 94,719 square miles.*

Population (est. 1957): 51,469,000 (predominantly German).

Density per square mile: 534.2.

President: Theodor Heuss.

Chancellor: Konrad Adenauer.

Principal cities (est. 1953): Hamburg, 1,658,000 (chief port); Munich, 870,000 (Bavarian capital); Cologne, 629,200 (transportation center); Essen, 624,100 (steel center); Frankfurt am Main, 564,400 (manufacturing); Bonn, 130,000 (capital).

Monetary unit: Deutsche Mark (Dm.).

Language: German.

Religions (census 1950): Protestant, 52.2%; Roman Catholic, 43.8%; others, 4.0%.

* Excluding west Berlin.

HISTORY AND GOVERNMENT: (See *World Politics* section).

ECONOMIC CONDITIONS. *Agriculture.*

Agriculture is characterized by mixed farming, the climate and the soil permitting cultivation of a variety of crops and most types of livestock. Rye and potatoes are staple crops in the north; grains and sugar beets in the central regions. The northwestern and southern areas are noted for dairying, while the west is the chief fruit- and wine-producing region. The soil is generally poor, and high crop yields are dependent upon large-scale use of fertilizers.

In Dec. 1956, western Germany (excluding the Saar) had 11,814,610 cattle, 1,024,898 horses, 14,407,465 hogs, and 1,145,465 sheep.

Western Germany is not self-sustaining in food. Difficulties stem to a considerable extent from the fact that Poland now con-

trols the area east of the Oder-Neisse, which contained 28 per cent of prewar Germany's arable land and produced about 25 per cent of its food.

Industry. Western Germany's industry is well-developed and highly diversified. It accounted for about two-thirds of Germany's prewar industrial production and for a large part of iron and steel production.

Shipbuilding has regained its former prominence. Industrial production in 1956 was 140% of the 1953 level.

Western Germany is a member of the European Coal and Steel Community, which commenced activities on Aug. 10, 1952. It has jurisdiction over the production and allocation of coal and steel by its member nations.

Trade. Leading customers in 1956 were the Netherlands (9%), France (8%), Belgium (7%), the U. S. (7%), and Sweden (7%); leading suppliers, the U. S. (14%), France (7%), the Netherlands (7%), Belgium (4%), and Sweden (4%). Leading exports included machines (18%), vehicles (9%), electrical machinery and apparatus (8%), iron and steel products (5%), and coal (3%); leading imports, coal (5%), copper (4%), iron ore (4%), cotton (4%), and wheat (3%).

Shipping on the Rhine is controlled by the Central Commission of the Rhine—an international body composed provisionally of U. S., British, French, Swiss, Dutch and Belgian representatives—which was reconvened in October 1945.

NATURAL FEATURES AND RESOURCES.

The northern plain, the central hill country and the southern mountain district constitute the main physical divisions of western Germany. The Bavarian plateau in the southwest averages 1,600 feet above sea level, but it reaches 9,721 feet in the Zugspitze, the highest point in Germany.

There are several important navigable rivers. In the south the Danube, rising in the Black Forest, flows east across Bavaria into Austria. The other important rivers flow north. The Rhine, which rises in Switzerland and flows across the Netherlands in two channels to the North Sea, is navigable by smaller vessels as far as Cologne. The Rhine and the Elbe, which also empties into the North Sea, are navigable within Germany for ships of 400 tons. The Weser, flowing into the North Sea, and the Main and Mosel (Moselle), both tributaries of the Rhine, are also important.

Minerals and Forests. Aside from rich deposits of coal and potash, western Germany's mineral wealth is not considerable. The Ruhr, Krefeld and Aachen districts constitute one of the world's greatest coal mining regions.

About 23 per cent of the total area of western Germany is covered by commercial forests, which yield timber as well as material for paper, wood fiber, cellulose and other products.

German Democratic Republic

Area: 41,380 square miles.*
Population (est. 1955): 16,587,000* (predominantly German).

Density per square mile: 398.7.

Soviet High Commissioner: G. M. Pushkin.

President: Wilhelm Pieck.

Premier: Otto Grotewohl.

Principal cities (est. 1953): Leipzig, 607,700 (trading, publishing center); Dresden 510,100 (railway center, Elbe port); Karl-Marxstadt (Chemnitz), 298,500 (textiles); Halle am der Saale, 278,400 (railway center); Magdeburg, 252,300 (iron and steel products).

Monetary unit: Ostmark.

Religions (census 1946): Protestant, 81.3%; Roman Catholic, 12.1%; others, 6.6%.

* Excluding east Berlin.

HISTORY AND GOVERNMENT. The so-called German Democratic Republic comprises the Soviet zone of occupation of eastern Germany. It was proclaimed on Oct. 7, 1949, with its seat at Berlin, on the basis of a Constitution adopted May 30, 1949, by a People's Congress chosen under a plebiscite arrangement in elections held in the Soviet zone and eastern Berlin on May 15 and 16, 1949. The Congress elected a People's Council (*Volksrat*) which was transformed on Oct. 7 into a provisional People's Chamber (*Volkskammer*). A Chamber of the States (*Länderkammer*) was nominated on Oct. 10, and on Oct. 11 both chambers elected Communist-leader Wilhelm Pieck as President of the republic and Otto Grotewohl as Minister-President or Premier. The Constitution is soviet in nature and the government is under complete Communist domination. Soviet government supervision is exercised by the Soviet High Commissioner.

The republic lies largely between the Elbe and Oder rivers, including most of Brandenburg, Mecklenburg and the industrial Saxon and Thuringian lands.

ECONOMIC CONDITIONS. About 22 per cent of the population is engaged in agricultural pursuits and the area is almost self-sufficient in foodstuffs. Postwar yields have, however, suffered from droughts and shortages of fertilizers.

Most of the industrial establishments, particularly in heavy industry, have been nationalized. The area accounted for 26 per cent of prewar Germany's industrial production, ranking first in textiles, paper and pulp and ceramics and glass (especially

optical glass produced by the famous Jena works). A Two-Year Plan inaugurated in 1949 had the object of raising the volume of production to 81 per cent of the 1936 level by the end of 1950, while a Five-Year Plan initiated in 1951 aimed at doubling the 1936 level by 1955. Unofficial production data for 1955 are as follows: pig iron (1,520,000 metric tons); raw steel (2,500,000 tons), cement (2,950,000 tons).

Foreign trade is carried on through government-owned trading companies. Trade is confined largely to Europe. Important imports include foodstuffs, minerals and textiles; exports include machinery, engineering equipment and chemicals.

NATURAL RESOURCES. The area is not rich in minerals. It has only minor deposits of coal. It does have important deposits of lignite and crude potash.

Berlin

Area: 341.2 square miles.

Population (est. 1955): 3,300,000.

Berlin, the capital of prewar Germany, is surrounded by the German Democratic Republic. It is occupied by the forces of the U. S., the U. K., France and the U.S.S.R., each having its own sector of occupation. The three western sectors contain 55% of the area and about two-thirds of the population.

The supreme authority in western Berlin is a tripartite *Kommandatura* which has responsibility for the exercise of the powers reserved to the occupation forces under the Berlin Charter, a document analogous to the former west German Occupation Statute. With the termination of the Allied occupation of western Germany, Allied controls were substantially relaxed.

Other powers of government are exercised by a City Assembly elected by popular vote and a *Magistrat* (city council) chosen by the Assembly.

Supreme authority in the eastern sector of Berlin is exercised by the Soviet High Commissioner. Powers not exercised by him or by the German Democratic Republic are vested in a "rump" city government, which proclaimed itself in power Nov. 30, 1948. Major anti-Communist riots broke out in east Berlin in June 1953.

The Saar

Area: 991 square miles.

Population (est. 1955): 996,000.

Density per square mile: 1,005.0.

Premier: Egon Reinert.

Principal city: Saarbrücken (est. pop. 116,395).

Monetary unit: French franc.

The Saar is an industrial and mining region lying on Germany's western frontier north of Lorraine. Under the Treaty of Versailles it was detached from Ger-

many and placed under the administration of the League of Nations, its coal mines being transferred to France. It voted in Jan. 1935 for reunion with Germany.

Part of the French zone of occupation after World War II, the Saar was politically united with western Germany as one of its constituents on Jan. 1, 1957, under a Franco-German agreement of June 4, 1956, and was to be economically integrated into western Germany by 1960. One of the 1954 Paris agreements provided for the so-called Europeanization of the Saar, but this proposal was rejected by the people in a referendum Oct. 23, 1955. Subsequent Diet elections returned a pro-German majority. Under the Saar's Constitution it had a popularly elected Diet of 50 members, to which the Cabinet headed by the Premier was responsible. There was no head of state as such.

Coal mines are under French management with some Saar participation, an annual royalty being paid to the Saar by France.

Greece (Kingdom)

(Hellas)

Area: 51,182 square miles.*

Population (est. 1956): 8,031,000.* (1940, excluding the Dodecanese Greek, 92.8%; Turkish, 3.8%; Macedonian, 1.3%; Spanish, 1%; others, 1.1%.)

Density per square mile: 156.9.*

Sovereign: King Paul I.

Premier: Konstantinos Karamanlis.

Principal cities (census 1951, municipal areas only): Athens, 565,084 (capital); Salonika, 217,049 (seaport); Piraeus, 186,014 (port of Athens); Patras, 79,014 (seaport); Volos, 51,144 (seaport).

Monetary unit: Drachma.

Languages: Greek, Turkish.

Religions: Greek Orthodox, 96%; Mohammedan, 2%; Jewish, 1.1%; others, .9%.

* Including the Dodecanese.

HISTORY AND GOVERNMENT. Greece, with a recorded history going back to 766 B.C., reached the peak of its glory in the 5th century B.C., and by the middle of the 2nd century B.C., it had declined to the status of a Roman province. It remained within the Eastern Roman Empire until Constantinople fell to the Crusaders in 1204. In 1453, the Turks took Constantinople, and by 1460 Greece was a Turkish province. The insurrection made famous by the poet Lord Byron broke out in 1821, and in 1827 Greece was set up an independent nation, with sovereignty guaranteed by Britain, France and Russia. Prince Otto of Bavaria was recognized as King five years later, but he was ousted by a revolution in 1862. Prince William of Denmark, as George I, succeeded him.

(For recent history, see *World Politics* section.)

Greece is a constitutional hereditary monarchy. Nominal executive power is vested in the King.

ECONOMIC CONDITIONS About three-quarters of the population engages in agricultural pursuits, although only one-fifth of the land is arable. Most of the cultivated area is devoted to cereals: wheat, barley, and maize. There are also olive trees, vines, tobacco, and currants. The principal fruits are oranges, lemons, figs, mandarins, apples, and pears. In Dec., 1955, there were 957,000 cattle, 8,970,000 sheep, and 621,000 hogs.

Development of large-scale Greek manufacturing is blocked by lack of coal resources and of capital. The most valuable products are textiles, chemicals and food items. Among other processed or manufactured products are olive oil, wine, spirits, flour, carpets, leather, cigarettes and building materials.

Leading customers in 1956 were western Germany (20%), France (13%) and the U. S. (12%); leading suppliers, the U. S. (17%), western Germany (16%) and Britain (14%). Leading exports were tobacco (34%) and currants and raisins (16%).

The merchant marine plays a vital part in the national economy.

Reconstruction of the Greek transport system, financed by U. S. aid, was completed in 1949; it included extensive work on highways, port and dry-dock facilities, railways and bridges.

NATURAL FEATURES AND RESOURCES. North central Greece, Epirus and western Macedonia all are mountainous. The main chain of the Pindus Mountains rises to 9,000 feet in places, separating Epirus from the plains of Thessaly. Greek Thrace is mostly a lowland region separated from European Turkey by the lower Maritsa River.

Among the many islands are the Ionian group off the west coast; the Cyclades group to the southeast; other islands in the eastern Aegean, including Lesbos, Samos and Khios; and Crete, the fourth largest Mediterranean island.

The Dodecanese, a group of thirteen islands in the Aegean Sea near the coast of Asia Minor, were ceded to Greece by the 1947 Italian peace treaty and were formally transferred on March 7, 1948.

Greek minerals are varied but are exploited only moderately. Principal ones are lignite, iron ore, iron pyrites, magnesite, chromite, lead, bauxite, molybdenum, emery, marine salt and the country's famous marble.

A fifth of the country is forested, largely with pine, fir and oak. Resin and turpentine are main forest products. The principal sea product is sponges.

Guatemala (Republic)

(República de Guatemala)

Area: 42,042 square miles.
 Population (est. 1957): 3,450,000 (1950: Indian, 53.5%; mixed and other, 46.5%).
 Density per square mile: 79.7.
 President: Luis A. Gonzalez Lopez.
 Principal cities (est. 1953): Guatemala, 319,000 (capital); Quezaltenango, 31,000 (coffee, sugar); Puerto Barrios, 18,000 (port); Mazatenango, 13,000 (coffee).
 Monetary unit: Quetzal.
 Language: Spanish.
 Religion: Roman Catholic.

HISTORY AND GOVERNMENT. Once the site of the ancient Mayan civilization, Guatemala, conquered by Spain in 1524, set itself up as a republic in 1839. From 1898 to 1920, the dictator Manuel Estrada Cabrera ran the country, and from 1931 to 1944 General Jorge Ubico Castañeda was the "strong man." In July, 1944, the National Assembly elected General Federico Ponce President, but he was overthrown in October, and in December Dr. Juan José Arévalo was elected as the head of a leftist regime which continued to press its reform program in the face of conservative resistance. He took office on March 15, 1945. Jacobo Arbenz Guzmán, administration candidate with pro-Communist leanings, won the Nov. 1950 elections and took office March 15, 1951.

(For recent history see *World Politics* section.)

A new Constitution has been adopted to take the place of that of 1945, which provided that a President be elected every six years by direct vote and could not succeed himself immediately. Legislative power was vested in a unicameral National Assembly whose members are popularly elected for four-year terms, half the members being elected every two years.

ECONOMIC CONDITIONS. Agriculture engages 90 per cent of Guatemalans. Coffee accounts for a fifth of the cultivated land.

In 1956 the U. S. took 72% of the exports and supplied 67% of the imports. The chief exports were coffee (79%) and bananas (8%). Imports included flour, petroleum products, drugs, and textiles.

NATURAL FEATURES AND RESOURCES. Most of Guatemala is mountainous, with many volcanic peaks. The northern part is the great plain of Petén, largely uncultivated and sparsely populated. The narrow Pacific slope, well watered and fertile, is the most densely populated and the most productive part.

The country's vast forests, mostly in the Petén region, yield chicle for chewing gum, cinchona bark, a small amount of rubber, and dyewoods and cabinet woods.

Haiti (Republic)

(République d'Haïti)

Area: 10,748 square miles.
 Population (est. 1957): 3,384,000 (Negro, 95%; mulatto, 5%).
 Density per square mile: 311.7.
 President: François Duvalier.
 Principal cities (census 1950)*: Port-au-Prince, 142,840 (capital, chief port); Cap-Haïtien, 24,957 (seaport); Gonaïves, 13,534 (farming district); Les Cayes, 11,835 (seaport; coffee).
 Monetary unit: Gourde.
 Language: French.
 Religion: Roman Catholic.

* Cities proper, excluding surrounding communes.

HISTORY AND GOVERNMENT: (See *World Politics* section). Normally the President is elected for six years by two-thirds vote of the National Assembly. That body consists of a 37-member Chamber of Deputies, elected for four years by popular vote, and a 21-member Senate elected for six years.

ECONOMIC CONDITIONS. Haiti is predominantly agricultural. Coffee, which makes up more than 50 per cent of Haitian exports, is the principal crop, followed by sisal, sugar cane, cotton, bananas, and cacao. Manufacturing is almost entirely for local consumption.

Leading exports in 1956 were coffee (72%), sisal (14%) and sugar (5%). Leading customers were the U. S. (34%), Belgium (20%) and Italy (18%); leading suppliers, the U. S. (62%), Canada (7%) and Germany (4%).

NATURAL FEATURES AND RESOURCES. Haiti, about the size of Maryland, is two-thirds mountainous, with the rest marked by great valleys, extensive plateaus and small plains. The most densely populated and productive region is the Cul de Sac plain, near Port-au-Prince.

Honduras (Republic)

(República de Honduras)

Area: 43,277 square miles.
 Population (est. 1956): 1,711,000 (1945: mestizo, 89.9%; Indian, 6.7%; Negro, 2.1%; white, 1.3%).
 Density per square mile: 39.5.
 Executive: Military junta.
 Principal cities (census 1950): Tegucigalpa (including twin city of Comayagua), 72,385 (capital); San Pedro Sula, 21,139 (bananas); La Ceiba, 16,645 (seaport, bananas); Tela, 12,614 (seaport).
 Monetary unit: Lempira.
 Language: Spanish.
 Religion: Roman Catholic.

HISTORY AND GOVERNMENT. Columbus discovered Honduras on his last voyage in 1502. Honduras declared its independence from Spain in 1838, and has been troubled

by revolution and war ever since. American Marines intervened in 1903 and 1923. In 1931, 1932, and 1937 major revolutions were crushed by force. The Nicaraguan-Honduras boundary dispute of 1937 almost caused war, and in April, 1945, the country was invaded from Guatemala by a group of Honduran exiles, who were suppressed.

ECONOMIC CONDITIONS.

In 1956 the U. S. took 68% of the exports and supplied 66% of the imports. Leading exports were bananas (46%), coffee (22%) and silver (7%).

NATURAL FEATURES AND RESOURCES. Honduras, in the north central part of Central America, has a 400-mile Caribbean coast-line and a 40-mile Pacific frontage. Generally mountainous, it has fertile plateaus and river valleys and narrow coastal plains.

Gold and silver are the most important mineral products of Honduras.

Hungary (Republic)

Area: 35,905 square miles.

Population (estimated 1957): 9,812,000 (Magyar, German, Slovak).

Density per square mile: 275.9.

Chairman of Presidium: István Dobi.

Prime Minister: Janos Kadar.

Principal cities (est. 1954): Budapest, 1,781,085 (capital, Danube port); Miskolc, 135,780 (industrial center); Debrecen, 113,248 (livestock); Szeged, 88,590 (textiles, wheat); Pécs, 87,140 (farming).

Monetary unit: Forint.

Languages (census 1949): Hungarian, 98.7%; Slovak, .3%; German, .2%; Rumanian, .2%; others, .6%.

Religions (est. 1949): Roman Catholic, 70.6%; Calvinist, 22.8%; Lutheran, 3.3%; Jewish, 1.9%; Greek Orthodox, .4%; others, 1%.

HISTORY AND GOVERNMENT. About 2,000 years ago, Hungary was part of the Roman provinces of Pannonia and Dacia on the empire's borders. In A.D. 894 it was invaded by the Magyars, who founded a kingdom. Christianity was accepted during the reign of Stephen I (St. Stephen) from 997 to 1083. The peak of Hungary's great period of medieval power came in 1342-82 under King Louis the Great (Louis I) of Anjou, whose dominions touched the Baltic, Black, and Mediterranean seas. When the Turks smashed a Hungarian army in 1526, western and northern Hungary accepted Hapsburg rule to escape Turkish occupation. Transylvania became independent under Hungarian princes. Intermitent war with the Turks was waged thereafter for some years.

After the suppression of the 1848 revolt against Hapsburg rule led by Louis Kossuth, the dual monarchy of Austria-Hungary was set up in 1867.

The dual monarchy was defeated with the other Central Powers in World War I, and the new Hungary underwent hard times. First there was a short-lived Socialist republic in 1918. The chaotic Communist rule of 1919 under Béla Kun ended with the Rumanians occupying Budapest on Aug. 4, 1919. When the Rumanians left, Admiral Nicholas Horthy entered the capital with a national army. The Treaty of Trianon of June 4, 1920, cost Hungary 75 per cent of its land and more than 50 per cent of its population. Meanwhile, the National Assembly had restored the legal continuity of the old monarchy; and on March 1, 1920, Horthy was elected Regent.

Following the German invasion of Russia on June 22, 1941, Hungary joined the attack against the U.S.S.R., but the war was not popular and Hungarian troops were almost entirely withdrawn from the eastern front by May 1943. German occupation troops set up a puppet government after Admiral Horthy's appeal for an armistice with advancing Soviet troops had resulted in his overthrow on Oct. 16. The German regime soon fled the capital, however, and on Dec. 23 a provisional government was formed in Soviet-occupied eastern Hungary. On Jan. 20, 1945, it signed an armistice in Moscow. On Feb. 1, 1946, the National Assembly approved a constitutional law abolishing the 1,000-year-old monarchy and establishing a republic.

ECONOMIC CONDITIONS. Agriculture is the basis of Hungarian economic life, engaging more than half the population. The Land Reform Act issued in March, 1945, provided for the confiscation of all estates over 1,500 acres; about 8,000,000 acres were divided among some 500,000 families. Cereals grown in the fertile Danubian plains are the chief crops. Leading crops in 1956 were wheat, potatoes, barley, rye, oats, maize, and sugar beets.

In addition, cultivation of vines, fruit and garden produce is important; the famous Tokay wine is produced on the southern slopes of the Hegyalja in the northeast.

Horse-breeding is a traditionally important branch of agriculture. Hungarians have a great love for horses, and their excellent breeds were exported in large numbers before World War II. Livestock in 1956 included 1,930,000 sheep, 6,056,000 hogs, (1955) 1,983,000 cattle, 550,000 horses.

The dominant industries are all based on agriculture, with flour milling in first place, followed by sugar refining, brewing and canning. The second group of industries make hardware and machinery. Most of the machine industry is concentrated in Budapest and Győr. Cotton leads the textile industry, especially in Budapest, which is also a center of woolen manufactures.

Hemp and flax weaving are important. An estimated 885,000 persons were employed in industry in 1954. Almost all industrial facilities were nationalized under laws passed in 1946, 1948 and 1949. In addition, the Soviet Union took over all German-owned plants as reparations, and in 1946 Soviet-Hungarian companies were formed to exploit bauxite, petroleum, and air and river navigation; the Soviet shares in these companies were sold to Hungary in Nov. 1954.

Leading exports ordinarily include grain, textiles, live animals and animal products, and machinery.

NATURAL FEATURES AND RESOURCES. Most of Hungary is a fertile, rolling plain lying east of the Danube, and drained by the Danube and the Tisza Rivers. In the extreme northwest is the Little Hungarian Plain. South of that area is Lake Balaton, 250 square miles, the largest lake of western and central Europe.

While Hungary generally is mineral-poor, it has about 20% of the world's known reserves of bauxite. The coal is of low quality and is insufficient to meet domestic needs. Other minerals include iron ore, manganese, and gold.

Iceland (Republic)

(Ísland)

Area: 39,768 square miles.*
Population (est. 1957): 164,000 (almost entirely Icelandic).

Density per square mile: 4.1.
President: Asgeir Asgeirsson.
Prime Minister: Hermann Jonasson.
Principal city (est. 1955): Reykjavik, 63,666 (capital and only large city).
Monetary unit: Króna.
Languages: Icelandic, Danish.
Religion: Evangelical Lutheran.

* Including several off-shore islands.

HISTORY AND GOVERNMENT. Iceland was first settled shortly before 900, mainly by Norse. A Constitution drawn up about 930 created a form of democracy and provided for an Althing, or General Assembly, now the oldest legislative body in the world. In 1262-64, Iceland came under Norwegian rule and passed to ultimate Danish control through the formation of the Union of Kalmar in 1483. In 1874 Icelanders obtained their own Constitution. In 1918 Denmark recognized Iceland as a separate state with unlimited sovereignty, but still nominally under the Danish King. On June 17, 1944, after a popular referendum, the Althing proclaimed Iceland a completely independent republic.

The British occupied Iceland in 1940, immediately after the German invasion of Denmark. In 1942, the United States took over the burden of protection. Iceland refused to abandon its neutrality in World War II, and thus forfeited charter member-

ship in the United Nations, but it was co-operative with the Allies throughout. Iceland joined the North Atlantic Treaty Organization in 1949, and in May 1951, U. S. troops again landed at Iceland's request to aid in its defense preparations. Withdrawal of an Icelandic request for evacuation of U. S. troops was announced Dec. 6, 1956.

Constitutionally, the President of Iceland is elected for four years by popular vote. Executive power of the state resides in the Prime Minister and his Cabinet. The Althing is composed of two houses, one with seventeen members and the other with thirty-five; each has equal constitutional power. Iceland has no army or navy.

ECONOMIC CONDITIONS. Approximately six-sevenths of Iceland is unproductive, and only one-fourth of one per cent is under cultivation. With about 30 per cent of the population engaged in farming, sheep raising is the most important branch of this industry. Hay, potatoes, and turnips are the principal crops.

Fish and fish products accounted for 93% of the exports in 1956. Leading customers were the U.S.S.R. (20%), the United States (12%), Britain (9%), and western Germany (9%); leading suppliers, the United States (17%), the U.S.S.R. (17%), and western Germany (10%).

NATURAL FEATURES AND RESOURCES. Iceland, a bleak, volcanic island about the size of Kentucky, has maximum dimensions of 298 by 194 miles; it is mostly tableland, high, rugged, and barren. It is one of the world's most volcanic regions.

Small fresh-water lakes are found throughout the island, and there are many natural oddities, including hot springs, geysers, sulfur beds, canyons, waterfalls, and swift rivers. More than 13 per cent of the area is covered by snowfields and glaciers, and most of the people live in the 7 per cent of the island comprising fertile coastlands. Vegetation is of the Arctic type, mostly stunted. Except for peat and fisheries, Iceland has no natural resources.

About one-sixth of the people are engaged in fishing, and fish and fish products make up the bulk of Iceland's exports. The annual catch averages approximately 350,000 metric tons. Many European fishing craft visit Iceland's fisheries, which lead the world in cod and are important for herring, plaice and halibut.

Indonesia (Republic)

(Republik Indonesia)

Area: 575,893 square miles.*
Population (est. 1957): 85,500,000*
 (Indonesian, except for an estimated 1,500,000 Chinese and 100,000 Europeans in 1951).

Density per square mile: 147.0.*

President: Achmed Sukarno.

Premier: Djuanda Kartawidjaja.

Principal cities (est. Dec. 31, 1956): Jakarta, 1,927,785 (capital); Surabaya, 980,905 (industrial center); Bandung, 870,346 (commercial center, west Java); Semarang, 389,970 (seaport, central Java); Surakarta, 380,843 (industrial center); Makassar, 346,080 (coffee, teak); Medan, 303,261 (rail center, Sumatra).

Monetary unit: Rupiah.

Languages: Bahasa Indonesia (Malay) (official), Dutch, Javanese, Sundanese, Madurese.

Religions: Moslem (predominant), Christian (about 2,500,000), Brahmin, Buddhist.

* Excluding Netherlands New Guinea.

HISTORY. The sovereign state of Indonesia, a group of islands with a total area more than twice that of Texas, constitutes one of the world's richest natural areas. These islands—Sumatra, Java, Madura, central and southern Borneo, Celebes, and the Moluccas—would reach from San Francisco to Honolulu if their extent was transposed to the eastern Pacific. They have great wealth in tin, rubber, spices, oil, quinine, and copra.

During the first few centuries of the Christian era, most of the islands came under the influence of Hindu priests and traders who spread their culture and religion. Moslem invasions began in the thirteenth century, and most of the area was Moslem by the fifteenth century. Portuguese traders arrived early in the sixteenth century but were ousted by the Dutch about 1595. After Napoleon subjugated the Netherlands homeland in 1811, the British seized the islands but returned them to the Dutch in 1816. In 1922 the islands were made an integral part of the Netherlands kingdom.

In World War II, the Japanese military occupation with nominal native self-government continued until Aug. 1945, except in outlying parts of New Guinea and Borneo. About the time of the Japanese surrender, a self-styled Indonesian Republic headed by Achmed Sukarno sprang up and took over effective control of parts of Sumatra and Java. Allied forces, mostly British Indian troops, moved in, and fighting between them and the nationalists continued until Nov. 15, 1946, when Dutch-Indonesian parleys resulted in a draft agreement that contemplated the formation by Jan. 1, 1949, of a Netherlands-Indonesian Union, consisting on the one hand of the Netherlands, the Netherlands Antilles and Surinam and on the other of the United States of Indonesia, which was to be a sovereign nation composed of three equal states—the Republic of Indonesia, East Indonesia, and Borneo. Differences of interpretation ensued, and the Dutch resorted to force on July 20, 1947. Both sides

issued cease-fire orders on Aug. 4, 1947, in response to a call from the U. N. Security Council.

After the Dutch and the Republic signed another truce on Jan. 17, 1948 a provisional federal government for the whole area was installed on Mar. 9, 1948, but difficulties between the Dutch and the Republic continued. On Dec. 18, 1948, Dutch forces instituted "police" action against Republican areas and seized the Republican leaders. Hostilities ceased Jan. 1, 1949, following U. N. intervention. On May 7, the Dutch agreed to return the exiled Republican regime to central Java.

On Nov. 2, 1949, Dutch and Indonesian leaders agreed upon the terms of union between the Netherlands and Indonesia. Dr. Sukarno was elected President of the federation on Dec. 16 by representatives of the Indonesian states, and the first all-Indonesian Cabinet was formed with Mohammed Hatta as Premier. The transfer of sovereignty took place at Amsterdam on Dec. 27, 1949.

ECONOMIC CONDITIONS. The islands of Java and Madura, with only 9 per cent of the area, have more than two-thirds of the population, and are among the most densely settled areas in the world (more than 1,000 per sq. mi.). The people, including about 137 races and tribes, are mainly of Malayan stock, with the Javanese the most advanced.

Agriculture engages about 70 per cent of the adult males. Rich in a variety of crops, the islands prior to World War II produced about 31 per cent of the world's copra, 37 per cent of its rubber, 83 per cent of its pepper, and nearly all of its quinine. The big-estate agriculture on Java and Sumatra is devoted mainly to export. The rest is subsistence agriculture. Rice is the staple food and chief crop. Major plantation crops are rubber, tea, coffee, cinchona bark, palm kernels, and sugar. Others are copra, cacao, spices, agava fiber, and kapok. In addition to rice, the chief food crops of the Republic are maize, cassava, sweet potatoes, peanuts, and soybeans.

In 1956 there were an estimated 4,073,000 cattle, 2,807,000 sheep, 1,378,000 hogs, 634,000 horses, and 2,962,000 buffalo.

Industry, especially in Java, developed rapidly after 1930. In addition to industries connected with the processing of the rich natural products, there were established chemical works, textile and paper mills, soap factories, breweries, shipyards, a Goodyear tire and rubber plant, and a General Motors assembly plant.

Indonesia is primarily an importer of consumer and capital goods and an exporter of mineral and plantation products.

Chief exports in 1956 were rubber (40%), petroleum and products (25%), tin (7%),

copra (4%), and tea (3%). Leading customers were Singapore (21%), the Netherlands (19%), the United States (16%), Britain (10%), and Malaya (3%); leading suppliers, the United States (16%), Japan (16%), the Netherlands (11%), western Germany (9%), and Britain (6%).

NATURAL FEATURES AND RESOURCES. A backbone of high mountain ranges with many snow-capped peaks extends throughout the main islands of the archipelago. Earthquakes are frequent, and there are many active volcanoes, ninety of them in Sumatra. Borneo is heavily forested.

Petroleum is the principal mineral product of modern Indonesia. The tin industry attained prewar levels more rapidly than others after World War II. Other important minerals include bauxite, coal, salt, nickel, and manganese.

Most valuable timber is teak, found mostly in east Java. Ebony, sandalwood, and ironwood also are cut.

Iran (Kingdom)

Area: 636,293 square miles.

Population (est. 1955)*: 21,794,000 (Iranian, Kurdish, Azerbaijani).

Density per square mile: 33.2.

Ruler: Mohammed Riza Pahlavi.

Premier: Manouchehr Eghbal.

Principal cities (est. 1950): Teheran, 618,976 (capital); Tabriz, 279,168 (manufacturing center); Isfahan, 196,134 (cotton, tobacco); Meshed, 191,794 (Moslem shrine); Hamadan, 123,931 (western trading center).

Monetary unit: Rial.

Languages: Iranian (Persian), Kurdish, Azerbaijani.

Religions: Moslem (Shiah), about 90%; Moslem (Sunni), about 5%; Armenian; Jewish; Nestorian; Parsi.

* U.N. estimate; no census ever taken.

HISTORY. Oil-rich Iran, was called Persia before 1935. Its key location blocks the lower land gate to Asia, and also stands in the way of traditional Russian ambitions for access to the Indian Ocean. After periods of Assyrian, Median, and Achaemenidian rule, Persia became a powerful empire under Cyrus the Great, reaching from the Indus to the Nile at its zenith in 525 B.C. It fell to Alexander in 331-30 B.C., to the Selucidae in 312-02 B.C., and to the Parthians about 130 B.C. A native Persian regime arose about A.D. 224, was weakened fighting the Turks, and fell to the Arabs in 637. In the twelfth century the Mongols took their turn ruling Persia, and in the early eighteenth century the Turks and Russians occupied it.

An Anglo-Russian convention of 1907 divided Iran into two spheres of influence. British attempts to impose a protectorate over all of Iran were defeated in 1919. On

Feb. 26, 1921, General Riza Pahlavi seized the government and was elected hereditary Shah in 1925. Subsequently he did much to modernize the country and abolished all foreign extraterritorial rights.

Increased pro-Axis activity led to Anglo-Russian occupation of Iran in August, 1941, and deposition of the Shah in favor of his son, Mohammed Riza Pahlavi.

In November, 1945, a Soviet-inspired autonomist movement won control of Azerbaijan, Iran's northwest province. To protect their advantage, the Russians kept troops in that area past the treaty evacuation date of March 2, 1946. The Iranians promptly protested this breach of agreement to the United Nations. The Russians evacuated their troops on May 6.

Ali Razmara became Premier June 26, 1950, and pledged to restore efficient and honest government, but he was assassinated Mar. 7, 1951. Mohammed Mossadeh took over April 29. Parliament completed action on a bill nationalized the oil industry over strong British protests, but Britain evacuated the oil refineries Oct. 3, 1951.

Mossadeh was ousted Aug. 19, 1953, in a coup d'état led by Fazollah Zahedi, whom the Shah had named Premier. The oil dispute was settled in Aug. 1954. Hussein Ala succeeded Zahedi as Premier on Apr. 7, 1955; Ala was succeeded by Manouchehr Eghbal April 3, 1957.

GOVERNMENT. Iran is a constitutional monarchy, and the Shah has the usual powers of the head of a parliamentary state. Executive power is exercised by a Cabinet headed by the Prime Minister, who is appointed by the Shah and is responsible to Parliament, the lower house of which (Majlis) has 136 popularly elected members and the upper house of which (Senate) has sixty members, half of whom are appointed by the Shah.

ECONOMIC CONDITIONS. Iran is predominantly agricultural. Large estates are numerous, and irrigation is common, especially on the central plateau. The principal crops are wheat and barley.

Other crops include rice, grapes, dates, apricots, tobacco, tea, cotton, sugar beets, and corn. There are extensive grazing lands. In 1955 there were an estimated 21,650,000 sheep.

Iran must still import many manufactured necessities, but several new factories were established by the government after 1925, including sugar plants, rice and oil mills, textile factories, a cement factory, copper smelter, glycerine factory, and small arms factory. Both sugar and tobacco are government monopolies. The manufacture of carpets, for which Iran is famous, is a valuable industry.

In 1953-54 the leading customers were the United States and Canada (23%), Germany (21%), and other continental European Payments Union countries (16%); leading suppliers, Germany (21%), other continental EPU countries (25%), and the United States and Canada (18%). The principal exports in 1952-53 were cotton (17%) and rugs (16%).

NATURAL FEATURES AND RESOURCES. Iran is, in general, a plateau averaging 4,000 feet elevation. In addition, there are maritime lowlands along the Persian Gulf and the Caspian Sea. The Elburz Mountains in the north rise to 18,603 feet at Mt. Demavend. From northwest to southeast, the country is crossed by a desert 800 miles long.

Considerable mineral wealth exists, but only oil is exploited commercially. The principal field, near Shushar in the southwest, was worked until 1951 by the Anglo-Iranian Oil Company. The latter's concession began in 1901 and was to run until 1993, but its properties were nationalized by the Iranian government in April, 1951. Production under Iranian control was negligible. Under an agreement signed Sept. 19, 1954, Iran's oil is being produced, refined and marketed by a consortium of eight western oil companies, with 50% of the profits going to Iran. The consortium began production Oct. 29, 1954.

The main forest belt on the northern Elburz slope supplies railroad ties, charcoal and firewood.

Iraq (Republic)

Area: 171,599 square miles.*

Population (est. 1957): 6,538,000 (Arab, 75%; Kurdish, 15%; Iranian, 3.75%; others, 6.25%).

Density per square mile: 30.3.

Premier: Abdel Karim Al-Kassim.

Principal cities (census 1947, cities proper): Baghdad, 364,049 (capital); Mosul, 203,273 (oil); Karbala, 122,719 (religious center); Basra, 94,000 (chief port).

Monetary unit: Dinar.

Languages: Arabic, Kurdish.

Religions (census 1947): Moslem, 93.6%; Christian, 3.1%; Jewish, 2.5%; others, .8%.

* Includes desert area of 80,583 square miles.

HISTORY. Iraq, a triangle of mountains, desert, and fertile river valley is bounded east by Iran, north by Turkey, west by Syria and Jordan, and south by Saudi Arabia. From earliest times it has been known as Mesopotamia—the land between the rivers—for it embraces a large part of the alluvial plains of the Tigris and Euphrates.

An advanced civilization existed in Mesopotamia by 4000 B.C. Sometime after 2000 B.C. it became the center of the ancient Babylonian and Assyrian empires. It was conquered by Cyrus the Great of Persia in

538 B.C., and by Alexander in 331 B.C. After an Arab conquest in A.D. 637-40, Baghdad became capital of the ruling caliphate. The country was cruelly pillaged by the Mongols in 1258, and during the sixteenth, seventeenth, and eighteenth centuries was the object of repeated Turkish-Persian competition.

Nominal Turkish suzerainty imposed in 1638 was replaced by direct Turkish rule in 1831. In World War I an Anglo-Indian force occupied most of the country, and Britain was given a mandate over the area in 1920. The British recognized Iraq as a kingdom in 1922 and terminated the mandate in 1932, when Iraq was admitted to the League of Nations. In World War II, Iraq generally adhered to its 1930 treaty of alliance with Britain, but in 1941 British troops were compelled to put down a pro-Axis revolt led by Prime Minister Rashid Ali. Iraq became a charter member of the Arab League in March, 1945, and Iraqi troops took part in the Arab invasion of Palestine in 1948. The 1930 treaty of alliance with Britain was terminated in April, 1955, and replaced by a defense co-operation agreement.

King Faisal II, born on May 2, 1935, succeeded his father, Ghazi I, who was killed in an automobile accident on April 4, 1939. King Faisal and his uncle, Crown Prince Abdul-Ilah, were assassinated in August, 1958, in a swift revolutionary coup which brought to power a military junta more sympathetic to the United Arab Republic and its President, Gamal Abdel Nasser. The short-lived "Arab Union" formed by the federation of Iraq and Jordan in February, 1958, came abruptly to an end with the recognition by the U.A.R. of the rebel government of Iraq.

(For other developments see article on the Middle East in *World Politics* section.)

ECONOMIC CONDITIONS. The chief economic activity is agriculture, dependent upon irrigation and confined to the valleys of the Tigris and Euphrates. Iraq supplies about 80 per cent of the world's dates. Chief among the cereal products of Iraq are barley, wheat, rice, sorghum, maize, and millet. Many fruits and some tobacco and cotton are grown. Grazing is the principal occupation of the many nomadic and seminomadic tribes.

Industry is still embryonic. Of some 100 firms, the most important are those making brick, tile, woolen textiles, vegetable oils, soap, glass, and cigarettes.

Chief exports in 1956 were petroleum (92%), barley (3%), and dates (1%). Leading suppliers in 1955 were Britain (28%), the United States (15%), and Japan (8%); leading customers, France (23%), Italy (19%), and Britain (12%).

The only port for seagoing vessels is that of Basra, located on the Shatt al-'Arab River near the head of the Persian Gulf. **NATURAL FEATURES AND RESOURCES.** Iraq has arid desertland west of the Euphrates, a broad central valley between the Euphrates and Tigris, and mountains in the northeast. The fertile lower valley is formed by the delta of the two rivers, which join about 120 miles from the head of the Persian Gulf. The gulf coast line is 26 miles.

Oil production is concentrated at the Baba Gurgur fields near Kirkuk, which are operated on behalf of an international group by the British-managed Iraq Petroleum Company. Associated companies operate fields at Zubair and Rumaila near Basra and at Ain Zalah and Butmah. The Khanaqin Oil Company, a British Petroleum subsidiary, operates another field which produces only for local consumption.

Oil is piped to Tripoli in Lebanon, Banjyas in Syria, Fao on the Persian Gulf, and Haifa in Israel (suspended in 1948). The Iraqi government received \$206,500,000 in oil revenues in 1955.

Ireland (Republic)

Area: 26,601 square miles (not including larger water bodies).*

Population (census 1957): 2,885,000 (almost entirely Irish).

Density per square mile: 108.8.

President: Séan T. O'Kelly.

Prime Minister: Éamon de Valera.

Principal cities (census 1956)†: Dublin (Baile Atha Cliath), 537,878 (capital); Cork, 79,945 (seaport); Limerick (Luimneach), 50,869 (seaport); Dun Laoghaire (Kingstown), 47,335 (seaport).

Monetary unit: Irish pound.

Languages: Gaelic, English.

Religions (census 1946): Roman Catholic, 94.3%; Protestant Episcopal, 4.2%; Presbyterian, .8%; others, .7%.

* Total area: 27,136 square miles.

HISTORY. About the beginning of the Christian Era, Ireland was divided into five kingdoms, each with its own ruler, but each subject to the overlord of all Ireland who dwelt at Tara. St. Patrick introduced Christianity in A.D. 432.

Norse depredations along the coasts, starting in 795, ended in 1014 with Norse defeat at the Battle of Clontarf by forces under Brian. In the middle of the 12th century, the Pope gave all Ireland to the English Crown as a papal fief. In 1171 Henry II of England was acknowledged "Lord of Ireland," but local sectional rule continued for centuries, and English control over the whole island was not reasonably absolute until the 17th century. By the Act of Union (1800), England and

Ireland became the "United Kingdom of Great Britain and Ireland."

The great potato famine of 1846-48 took many lives and drove millions to emigrate to America.

GOVERNMENT. Ireland is a sovereign, independent republic. The President, directly elected for seven years, names the Prime Minister on the nomination of the Chamber of Deputies. Parliament (Oireachtas) has two houses. The Chamber of Deputies (Dáil Eireann) has 147 members elected by proportional representation for a five-year term. The Senate (Seanad Eireann) has 60 members, of whom 11 are named by the Prime Minister, 6 by the universities, and 43 from vocational panels. Its powers, however, are limited.

ECONOMIC CONDITIONS. The majority of the people are English speaking, although the government has attempted to promote the traditional Gaelic language, which is an essential part of the curriculum for all state schools.

Principal crops are wheat, oats, potatoes, sugar beets. Other staple crops are rye, flax, turnips, cabbage and hay. Livestock in June 1956 included 4,536,500 cattle, 3,439,300 sheep and 747,100 hogs.

Leading manufactures are ordinarily beverages, tobacco, wood, paper, clothing, textiles and metals. The hydroelectric plant erected on the Shannon River in County Limerick provides cheap electricity for homes and factories.

The United Kingdom (including Northern Ireland) was the leading customer in 1956 (81%). The United Kingdom was also the chief supplier (57%), followed by the U. S. (8%) and western Germany (4%). Major exports were live animals (42%), beef and veal (6%), beer (5%) and chocolate crumb (5%). Major imports were oils, fats, resins and gums, textiles, machinery and vehicles.

NATURAL FEATURES AND RESOURCES. Occupying the entire island except for the six northern countries of Ulster, Ireland resembles a basin—a central plain rimmed with mountains, except in the Dublin region. The mountains are low, with the highest peak, Carrantuohill located in Kerry County, rising to a height of 3,415 feet.

The principal river is the Shannon, which begins in the north central area, flows south and southwest for about 240 miles and empties into the Atlantic. About 20 per cent of the country is covered by bogs. Among the many lakes are the famous Lakes of Killarney in the southwest county of Kerry.

Ireland mines coal and gypsum.

Israel (Republic)

Area: 7,984 square miles.

Population (est. 1957): 1,924,000 (1953: Jewish, 88.9%; Moslem, 7.6%; Christian, 2.5%; others, 1.0%).

Density per square mile: 234.5.

President: Itzhak Ben-Zvi.

Premier: David Ben-Gurion.

Principal cities (est. Dec. 31, 1956): Tel Aviv-Jaffa, 371,000 (industrial center); Haifa, 160,000 (chief port); Jerusalem (Israeli sector), 149,440 (capital).

Monetary unit: Israeli pound (£I).

HISTORY. The history of Palestine, cradle of two of the great religions of the world, and homeland of the modern state of Israel, is mostly a chronicle of invasion, conquest, and confusing divisions. To the ancient Hebrews it was known as the "Land of Canaan"; the name Palestine is derived from that part of the country inhabited by the Philistines of Biblical times. About 1000 B.C. the Hebrews succeeded in establishing a single monarchy, which later splitting up into two kingdoms—Judah and Israel. The country was subsequently invaded and overcome by many peoples, including the Assyrians, Babylonians, Egyptians, Persians, Macedonians, Romans, and Byzantines. In A.D. 634–36, Palestine was wrested from the Byzantine Empire by the Arabs. Frankish Crusaders captured Jerusalem in 1099 and set up a feudal kingdom which endured until the defeat of the Franks by Saladin (1187) and the restoration of Moslem rule. In 1516 suzerainty over the area was transferred from the Mamelukes of Egypt to the Turks. It remained part of the Ottoman Empire until World War I, when British forces under General Allenby defeated the Turks and captured Jerusalem (Dec. 9, 1917). The League of Nations mandate awarded to Great Britain was put in force on Sept. 29, 1923.

Meanwhile, a movement had been founded in 1897 by Theodor Herzl to create a Jewish homeland in Palestine, and a considerable number of Jewish immigrants had entered the country prior to World War I. On Nov. 2, 1917, British recognition was given both to the growing Arab nationalist movement and to Zionist aspirations by the Balfour Declaration.

A British royal commission report July 7, 1937, recommended partition of Palestine into an Arab and a Jewish state separated by a mandated area in the vicinity of Jerusalem and at Nazareth. The Arabs opposed the proposal, advocating instead the establishment of an independent Palestine with full minority rights for the Jews. In May, 1939, the British government issued a White Paper declaring the establishment of a Jewish state contrary to British obligations to the Arabs and promising, after a transitory period of ten years, the establishment of an independ-

ent Palestine in which Arabs and Jews would share authority in government. During the next five years, 75,000 Jews were to be allowed to enter Palestine. These proposals did not satisfy either party, but the outbreak of World War II overshadowed all other issues.

End of European hostilities in 1945 brought a renewal of friction and the formation of the Arab League. Attempts to bring Jewish immigrants into Palestine illegally were intensified thereafter, and terrorism grew apace.

Termination of the British mandate May 14, 1948, and withdrawal of British forces brought new violence. An independent state of Israel was immediately proclaimed by the Jewish National Council, and Arab forces converged on Palestine from the south, north, and east, spearheaded by the crack British-trained Arab Legion of King Abdullah of Jordan. Within a few hours Arab-Jewish hostilities were in full swing. On June 11, however, there went into effect a four-week truce supervised by Count Folke Bernadotte, Swedish U. N. mediator in Palestine. Fighting resumed on July 9, with Israeli forces gaining on all fronts except in Jerusalem, part of which had been taken by Jordanian troops prior to the truce. On July 17 a second truce was effected on order of the U. N. Security Council. Bernadotte was assassinated on Sept. 17 by unidentified Jewish terrorists and his duties were taken over by Dr. Ralph Bunche of the United States. A final cease-fire took effect on Jan. 7, 1949, and an armistice agreement was concluded with Egypt on Feb. 24 and with Jordan on April 3.

During the hostilities Israel lost none of the territory allotted to it under the partition plan and increased that territory by about 50% by gaining western Galilee, a broad corridor to Jerusalem through central Palestine and part of modern Jerusalem. In April, 1950, Jordan incorporated eastern and central Palestine, including the Old City of Jerusalem.

Israel's governmental structure took shape rapidly. The provisional leaders, Chaim Weizmann and David Ben-Gurion, were confirmed as President and Premier, respectively. Recognized by most non-Arab countries, the new nation was admitted to the U. N. on May 11, 1949.

Despite many Cabinet crises, Ben-Gurion's government met with increasing success the problems arising out of an unfavorable trade balance, large numbers of immigrants and need for foreign capital investment and additional industries.

Dr. Weizmann died Nov. 9, 1952, and Itzhak Ben-Zvi was elected to succeed him as President on Dec. 8.

Israeli troops invaded Egypt on Oct. 29, 1956, and quickly took the Gaza strip and

almost all the Sinai peninsula up to the Suez canal. Following U. N. intervention they were gradually withdrawn.

(For recent history see article on the Middle East in *World Politics* section.)

GOVERNMENT. The Israeli Constitution adopted by the Constituent Assembly in 1949 provides a republican form of government headed by a President elected for a 5-year term by the Chamber of Deputies. Legislative power is vested in the Chamber of Deputies, the members of which are elected by the vote of all citizens who have reached the age of 21. The government is administered by the Cabinet, which is headed by the Premier and is responsible to the Chamber of Deputies.

The Constitution characterizes Israel as the national home of the Jewish people and directs the admission of every Jew who desires to settle within its borders, subject to control of the Chamber of Deputies.

ECONOMIC CONDITIONS. Agriculture is the chief economic activity. The maritime plain, the plain of Esdraelon and the northern Jordan valley are the principal agricultural areas. Citrus growing, confined largely to the maritime plain, normally furnishes the major export crop. Others include olives, rice, fruits and vegetables, figs, tobacco, wheat, barley, corn, sesame, and potatoes. There are many collective rural settlements.

Industry is developing rapidly, especially the food-processing, textile, metalworking, and chemical groups. Diamond cutting, although dependent on rough diamond imports, is of major importance; and there are oil refineries and storage tanks at Haifa, a terminus of the pipeline from the Iraqi oil fields (suspended since 1948).

Chief exports in 1956 were citrus fruits (41%) and polished diamonds (23%). Leading customers were Britain (21%), the United States (17%), and Belgium (6%); leading suppliers, the United States (31%), western Germany (18%), and Britain (10%). Leading imports were wheat (7%), rough diamonds (6%), and iron and steel bars (3%).

NATURAL FEATURES AND RESOURCES. Northern Israel is largely a plateau traversed from north to south by mountains and broken by great depressions, also running from north to south.

The maritime plain of Israel is remarkably fertile, but the southern Negeb region, which comprises almost half the total area, is largely a wide desert steppe area. The Jordan, the only important river, rises in Syria and flows along the Jordan border through the Hule marshes and lake and the Sea of Tiberias (Galilee) into Jordanian Palestine and thence into the Dead Sea, 1,290 feet below sea level.

Mineral resources are limited. They include gypsum, sulfur, limestone, and rock salt, together with potash and bromine from the Dead Sea.

Italy (Republic) (Repubblica Italiana)

Area: 116,316 square miles.

Population (est. Dec. 1, 1956): 48,353,000 (predominantly Italian).

Density per square mile: 415.5.

President: Giovanni Gronchi.

Premier: Amintore Fanfani.

Principal cities (census 1951): Rome, 1,606,739 (capital); Milan, 1,264,402 (leading financial, industrial center); Naples, 1,003,815 (seaport); Turin, 711,492 (auto works); Genoa, 678,200 (seaport); Palermo, 482,594 (Sicilian seaport).

Monetary unit: Lira.

Religions: Roman Catholic, 99.6%; others (Protestant, Orthodox, Jewish), 4%.

HISTORY AND GOVERNMENT: Until A.D. 476, when the German Odoacer became head of the Roman Empire in the west, the history of Italy was largely the history of Rome. From A.D. 800 on, the Holy Roman Emperors, the Popes, Normans and Saracens all vied for control over various segments of the Italian peninsula. Numerous city states, such as Venice and Genoa, and many small principalities flourished in the late Middle Ages.

In 1713, after the War of the Spanish Succession, Milan, Naples, and Sardinia were handed over to Austria, but the Hapsburg influence on the peninsula was interrupted for a short time after 1800 when Italy was unified by Napoleon, who crowned himself King of Italy on May 26, 1805. After the Congress of Vienna in 1815, Austria continued to be the dominant power in Italy. (For recent history, see *World Politics* section.)

PEACE TREATY OF 1947. The peace treaty which took effect Sept. 15, 1947, required Italian renunciation of all claims in Ethiopia and Greece, and the cession of the Dodecanese to Greece and of five small Alpine areas to France. In addition, the major part of the Istrian peninsula, including Fiume and Pola, went to Yugoslavia. The Free Territory of Trieste was carved out of the area to the west of the new Yugoslav frontier.

Italy was to pay reparations of \$100,000,000 in kind over a seven-year period to the Soviet Union, \$125,000,000 to Yugoslavia, \$105,000,000 to Greece, \$25,000,000 to Ethiopia and \$5,000,000 to Albania; also to make two-thirds restitution for war-time damage to Allied property in Italy.

Zone A of Trieste (90 sq. mi.), including the city of Trieste, was transferred to

Italy in Oct., 1954, and the remainder to Yugoslavia.

RELIGION. Although the country is predominantly Roman Catholic, religious freedom is permitted. Catholic religious teaching is given in all elementary and intermediate schools. Relations with the Church are regulated by the treaty with the Holy See of Feb. 11, 1929, which established the temporal power of the Pope over Vatican City.

ECONOMIC CONDITIONS.

Agriculture. Agriculture engages more than a third of the population. It is extremely diversified; differences of altitude, soil, and climate allow the production of all European crops from rye to rice, from apples to oranges, and from hemp to cotton. Italy ranks next to France in wine production, and next to Spain in olive oil production.

Livestock and dairy farming are important in Italy. Of the 50-odd varieties of Italian cheese, the best known are the hard parmesan and pecorino (the latter made from ewe's milk) and the soft *bel paese* and *gorgonzola*. In 1956 Italy had 8,670,000 cattle, 9,042,000 sheep, and 3,746,000 hogs.

Industry. Industrial production is centered in the north. The nature of the fascist corporate state had a tendency to foster industrial concentration prior to World War II. The textile industry is the largest and most important and supplies the home market as well as furnishing a large proportion of Italy's exports. The metal industries are handicapped by lack of coal, which must be imported in large quantities, and by insufficient iron ore reserves. The chemical, clothing and food industries are also important. Italy is a member of the European Coal and Steel Community.

Production includes cotton yarn, woven cotton fabrics, rayon yarn, pig iron and ferroalloys, raw steel, cement, automobiles, and trucks.

Trade. Italy's leading customers by value in 1956 were western Germany (13%), the U. S. (10%), Switzerland (7%), and France (7%). Main suppliers were the U. S. (16%), western Germany (12%), Britain (5%), Iraq (5%) and France (5%). Leading exports were machinery and vehicles, fruits and vegetables, synthetic fibers and manufactures and cotton and manufactures. Leading imports included cotton, coal and coke, wool, grain and petroleum and products.

NATURAL FEATURES AND RESOURCES.

Approximately 600 of boot-shaped Italy's 708 miles of length are in the long peninsula that projects into the Mediterranean from the fertile basin of the Po River. The Apennines, branching off from the Alps between Nice and Genoa, form the penin-

sula's backbone, and rise to a maximum height of 9,560 feet at the Gran Sasso d'Italia (Corno). The Alps are Italy's northern boundary.

Several islands form part of Italy. Sicily, 9,926 square miles, lies off the toe of the boot, across the Strait of Messina, with a steep and rock-bound northern coast and gentler slopes to the sea in the west and south. Mt. Etna, an active volcano, rises to 10,741 feet, and most of Sicily is more than 500 feet in elevation. Sixty-two miles southwest of Sicily lies Pantelleria, 45 square miles, and south of that are Lampedusa and Linosa. Sardinia, 9,301 square miles, just south of Corsica and about 125 miles west of the mainland, is mountainous, stony, and unproductive.

Italy has many northern lakes, lying below the snow-covered peaks of the Alps. The largest are Garda (143 sq. mi.), Maggiore (83 sq. mi.), and Como (55 sq. mi.). The Po, the principal river, flows from the Alps on Italy's western border and crosses the Lombard plain to the Adriatic.

Natural Resources. Italy is ordinarily the world's largest producer of mercury; it is also an important producer of sulfur. The nation lacks, however, the staple minerals of coal, oil and iron, and is forced to import them. Building stone, particularly marble, is plentiful.

In the south Tirol and in the central Apennines, abundant hydroelectric power resources and deposits of natural gas are being increasingly exploited.

Japan (Empire)

(Nippon)

Area: 142,801 square miles.

Population (est. 1957): 90,900,000.

Density per square mile: 630.4.

Ruler: Emperor Hirohito.

Premier: Nobusuke Kishi.

Principal cities (census 1955): Tokyo, 6,966,499 (capital; financial, manufacturing center); Osaka, 2,547,321 (chief industrial center); Nagoya, 1,336,779 (machinery, textiles); Kyoto, 1,204,017 (manufacturing); Yokohama, 1,143,287 (seaport); (census 1950) Kobe, 765,435 (seaport, shipbuilding); Fukuoka, 392,649 (seaport, textiles); Sendai, 341,685 (manufacturing, educational center).

Monetary unit: Yen.

Language: Japanese.

Religions (1938): Buddhism, 60%; Shintoism, 21%; Protestant (215,166); Roman Catholic (118,856).

HISTORY AND GOVERNMENT. A series of legends attributes creation of Japan to the sun goddess, from whom the later emperors were allegedly descended. The first of them was Jimmu Tennō, supposed to have ascended the throne on Feb. 11, 660 B.C.

Recorded Japanese history begins with the first contact with China in the 5th century A.D. Japan was then divided into strong feudal states, all nominally under the Emperor, but with real power often held by a court minister or clan. In 1185 Yoritomo, chief of the Minamoto clan, was designated Shogun (Generalissimo) with the actual administration of the islands under his control. A dual government system—Shogun and Emperor—persisted till 1867.

First contact with the West came about 1542, when a Portuguese ship off course arrived in Japanese waters. Portuguese traders, Jesuit missionaries, and Spanish, Dutch, and English traders followed. Suspicious of Christianity and of Portuguese support of a local Japanese revolt, the shoguns restricted all foreigners in 1636-38 except the Dutch, who were confined to Nagasaki. Western attempts to renew trading relations failed until 1853, when Commodore Matthew Perry sailed an American fleet into Tokyo Bay.

Japan now quickly made the transition from a medieval to a modern power. Feudalism was abolished and industrialization was speeded. An imperial army was established with conscription. The shogun system was abolished in 1867 by Emperor Meiji, and parliamentary government was established in 1889. After a brief war with China in 1894-95, Japan acquired Formosa (Taiwan), the Pescadores islands, and part of southern Manchuria. China also recognized the independence of Korea (Chosen), which Japan later annexed (1910).

In 1904-05 Japan defeated Russia in the Russo-Japanese War, gaining the territory of southern Sakhalin (Karafuto) and Russia's port and rail rights in Manchuria. In World War I, Japan, which took a negligible part in military operations, seized Germany's Pacific islands and leased areas in China. The Treaty of Versailles then awarded her a mandate over the islands.

At the Washington Conference of 1921-22, Japan agreed to respect Chinese national integrity. The series of Japanese aggressions which was to lead to the nation's downfall began in 1931 with the invasion of Manchuria. The following year, Japan set up this area as a puppet state, "Manchukuo," under Emperor Henry Pu-Yi, last of China's Manchu dynasty. On Nov. 25, 1936, Japan joined the Axis by signing the anti-Comintern pact. The invasion of China came the next year, and the Pearl Harbor attack on Dec. 7, 1941.

For many months after Pearl Harbor, the Japanese army and navy enjoyed spectacular success, but by the end of 1942 the tide had begun to turn. Three years later the dropping of the world's first atomic bomb in combat on Hiroshima, followed by

a second one on Nagasaki, knocked Japan swiftly into surrender.

The formal surrender took place Sept. 2, 1945, aboard the battleship *Missouri* in Tokyo Bay. Southern Sakhalin and the Kurile Islands reverted to Russia, and Formosa (Taiwan) and Manchuria to China. The Pacific islands remained under U. S. occupation.

General of the Army Douglas MacArthur was appointed Supreme Commander for the Allied Powers (SCAP) Aug. 14, 1945. An 11-power (later 13-power) Far Eastern Commission was created to lay down occupation policies, while the 4-power Allied council advised and consulted with SCAP in carrying them out.

Ruler. Emperor Hirohito, born April 29, 1901, succeeded his father, Yoshihito, on Dec. 25, 1926. He was married on Jan. 26, 1924, to Princess Nagako, born in 1903. To them were born two sons, Crown Prince Akihito (Dec. 23, 1933) and Prince Masahito (Nov. 28, 1935), and 5 daughters. Succession to the Japanese throne is in the male line only.

ECONOMIC CONDITIONS.

Agriculture. Japan is traditionally a land of small farms and, except in Hokkaido, the northernmost island, there is almost no large-scale farming and animal husbandry. The average holding is less than three acres. Double cropping makes self-sufficiency possible, but on a low level of subsistence.

In 1956 there were 3,202,000 cattle, 1,160,000 hogs, and 893,000 sheep.

Industry. Prewar Japan was one of the world's leading industrial nations and the only country in the Far East with highly developed textile, steel, machinery, chemical, and electrical industries. The textile industry was dominant, but after 1931 considerable expansion took place in the heavy industries—metal, machinery-building, and chemical—which were adaptable to war purposes.

Postwar industrial rehabilitation proceeded slowly at first, but by the end of 1956 average industrial output was more than twice the 1934-36 level. Japan led the world in shipbuilding in 1956, completing vessels aggregating 1,538,000 gross tons, many of them super tankers.

The huge interlocking monopolies (*Zai-batsu*), controlling prewar business and finance, were dissolved in 1945, and reconcentration was prohibited by postwar legislation.

Trade. Before World War II, Japan ranked fifth in world trade. Private trade was resumed in 1947; by the mid-1950s, Japan had regained its place in world trade.

Leading customers in 1956 were the United States (22%), Hong Kong (5%), India (4%), and Malaya (3%); leading suppliers, the United States (33%), Australia (8%), Canada (4%), and Malaya (4%). Leading exports were textiles (35%), machinery (19%), iron and steel and manufactures (9%), and chemicals (4%). Imports included raw cotton (15%), petroleum and products (10%), wool (7%), wheat (5%), and iron ore (5%).

Communications. Before World War II the merchant marine carried almost 80 per cent of the foreign trade and was surpassed only by those of the United States and Britain. Wartime losses were enormous, but recovery was fairly steady. By June 30, 1956, there were 1,891 vessels (100 tons and over) with a gross tonnage of 4,075,481, according to *Lloyd's Register*.

NATURAL FEATURES AND RESOURCES. Japan's four main islands are Honshu, Hokkaido, Kyushu, and Shikoku. The Ryukyu chain to the southwest is U. S.-occupied and the Kuriles to the northeast are Russian-occupied. The surface of the main islands consists largely of mountains separated by narrow valleys. There are about fifty more or less active volcanoes, including famous Fujiyama near Tokyo (12,385 ft.).

Minerals. Japan is relatively poor in minerals, and large imports of coal, petroleum, and iron ore are necessary. Other minerals include lead, silver, gold, and copper.

Jordan (Hashemite Kingdom of)

Area: 37,264 square miles.*

Population (est. 1956): 1,471,000.*

Density per square mile: 39.5*

Ruler: King Hussein I.

Prime Minister: Samir El-Rifal.

Principal cities (est.): Amman, 202,000 (capital); Jerusalem (Jordanian sector), 75,000 (religious center).

Monetary unit: Jordanian dinar.

Language: Arabic.

Religions: Moslem (Sunni), 92%; Christian, 8%.

* Including Arab Palestine (area: 2,125 sq. ml.; population 1953, 745,786).

HISTORY AND GOVERNMENT. An ancient land, Jordan was known in the time of Moses as Edom and Moab. It passed to the Amorites of Damascus and in A.D. 106 became part of the Roman province of Arabia. In 633-36 it was conquered by the Arabs.

Conquered from the Turks by the British in World War I, Jordan was separated from the Palestine mandate in 1920, and placed in 1921 under the rule of Abdullah ibn Hussein.

In 1923 Britain recognized Jordan's independence, subject to the mandate. In 1946, Britain abolished the mandate and recognized the independence of Jordan. That part of Palestine occupied by Jordanian troops was formally incorporated by action of the Jordanian Parliament on Apr. 24, 1950. Jordan's rejection of the Baghdad pact in Dec., 1955, set off a period of instability and tension.

Abdullah was assassinated June 20, 1951. His son Talal was deposed as mentally ill Aug. 11, 1952. Talal's son Hussein, born May 2, 1935, succeeded him. Jordan is a constitutional monarchy.

Defense of the country is entrusted to the British-trained Arab Legion of about 20,000 men, the most effective force among all Arab armies. The Anglo-Jordanian treaty of Mar. 20, 1948, was terminated Mar. 13, 1957. Jordan had ousted the Legion's British commander on March 2, 1956, and Britain recalled most of its remaining military officers. In Jan. 1957 Egypt, Saudi Arabia, and Syria agreed to provide the equivalent of the former British defense subsidy. In February, 1958, Jordan and Iraq united to form the "Arab Federation," subsequently called the "Arab Union," but this federation came abruptly to an end with the revolutionary coup in Iraq in August, 1958.

(For recent history see article on the Middle East in *World Politics* section.)

ECONOMIC CONDITIONS. Life in Jordan is primitive; there are estimated to be 50,000 nomads and 120,000 seminomads. At least 95 per cent of the total area is desert.

Most of the country is suitable only for pasturing sheep, goats, and camels. Cultivated land is limited to a relatively small area west of the Hejaz Railway. In the drier cultivated areas of the plateau, the inhabitants retain tribal organization and still live in tents. Foreign trade is limited to the exchange of wheat, fresh fruit, wool, and live animals for sugar, tea, and other necessities.

Korea (Chosen; Chosŏn)

Area: 85,266 square miles.

Population (est. 1955): 28,600,000 (almost entirely Korean).

Density per square mile: 335.4.

President, South Korea: Syngman Rhee.

Premier, North Korea: Kim Il-sung.

Principal cities (est. 1955): Seoul, 1,300,000 (capital, south Korea); Pusan, 840,000 (chief port); (est. 1952) Pyongyang, 500,000 (capital, north Korea); (est. 1949) Taegu, 313,705 (silk center); Inchon, 265,767 (seaport).

Monetary unit: Hwan.

Languages: Korean, Chinese, Japanese.

Religions: Buddhist, Confucianist, Taoist, Christian (500,300 Christians in 1938).

HISTORY. According to myth, Korea, a peninsula about 600 miles long, was founded in 2,333 B.C. by Tangun. His dynasty is said to have ruled until 1122 B.C. when a Chinese sage, Kija, established a dynasty supposed to have ruled until 193 B.C. Later, three kingdoms were established, one of which (Silla) absorbed the other two in 666-668 A.D. In 1627, the Manchus seized Korea and placed it again under Chinese sovereignty.

In the Chinese-Japanese War of 1894-95, Japan won predominant influence in Korea, and in 1910 Japan formally annexed it. A Korean bid for independence was crushed ruthlessly in 1919.

In Aug., 1945, at the end of World War II, Korea was occupied by Soviet and U. S. troops. The United States and the U.S.S.R. were unable to agree on the formation of an all-Korean provisional government, and in Nov., 1947 the U. N. General Assembly set up a commission, boycotted by the U.S.S.R., to arrange for elections. Elections were held in the U. S. zone on May 10, 1948, for a national assembly, which on July 12 adopted a republican Constitution and on July 20 elected Syngman Rhee President. The new republic was proclaimed on Aug. 15 and was recognized as the legal government of Korea by the U. N. General Assembly on Dec. 12, 1948. Meanwhile, a North Korean "People's Republic" had been formed in the Soviet zone north of the 38th parallel on May 1, 1948. It claimed jurisdiction over all of Korea.

On June 25, 1950, South Korea was attacked by North Korean communist forces. U. S. armed intervention was ordered on June 27 by Pres. Truman and on the same day the U. N. invoked military sanctions against North Korea. Gen. Douglas MacArthur was named commander of U. N. forces on July 7. U. S. and South Korean troops fought a heroic holding action, but by the first week of August, they had been forced back to a 4,000 sq. mi. beachhead in southeast Korea. There they stood off superior North Korean forces until Sept. 15, when a major U. N. amphibious attack was launched far behind the communist lines at Inchon, port of Seoul. By Sept. 30, U. N. forces were in complete control of South Korea; they then invaded North Korea and were nearing the Manchurian and Siberian borders when several hundred thousand Chinese communist troops entered the conflict in late October. U. N. forces then retreated successfully below the 38th parallel, where they repulsed several major attacks.

On May 24, 1951, U. N. forces recrossed the parallel and had made important new inroads into North Korea when truce negotiations began on July 10. An armistice was finally signed at Panmunjom on July 27, 1953, leaving a devastated Korea in need

of large-scale rehabilitation. The armistice contemplated an international political conference on the status of Korea, but negotiations for arranging it broke down. The question was discussed without result at the Geneva conference on Far Eastern problems (April 26-June 19, 1954).

The U. S. and South Korea signed a mutual defense treaty on Oct. 1, 1953, and in Aug. 1953 the U. S. Congress authorized up to \$200,000,000 for rehabilitation and economic support of South Korea.

ECONOMIC CONDITIONS. The Korean population is more or less homogeneous and successfully withstood Japanese efforts to assimilate it. South Korea has 43 per cent of the peninsula's area and over two-thirds of its population. Korea is predominantly agricultural.

Industrial development was speeded in the last years of Japanese rule. The leading industries by value of output ordinarily are chemical, textile, food, beverage, and tobacco. Korea north of the 38th parallel has by far the larger portion of the country's industry and abundant hydroelectric resources.

Korea's prewar foreign trade was closely linked with that of Japan. South Korea's postwar trade has been financed to a large extent by U. S. funds. Most of the trade is with the United States, Japan, and Hong Kong. Chief imports were foods and manufactured goods; chief exports, raw materials, including tungsten, graphite, and raw silk. North Korea's trade is chiefly with Communist China and the U.S.S.R.

South Korea is insolvent and dependent on U. S. and other contributions.

NATURAL FEATURES AND RESOURCES. Korea's coast, with a rugged mountain range along the east, is fringed with more than a thousand islands. Several rivers are navigable for more than a hundred miles, including the Nakdong in the south, the Han in the central region, and the Yalu in the northwest, on the Manchurian border.

Korea's best mining regions are in the north. Leading products are coal, gold, silver, copper, tungsten ore, iron ore, graphite, lead, alum stone, and pyrite ore.

Laos (Kingdom)

Area: 91,500 square miles.
Population (est. 1955): 1,425,000.
Density per square mile: 15.6.
Ruler: King Sisavang Vong.
Premier: Prince Savanna Phuma.
Principal cities (est. 1953): Vientiane, 20,000 (administrative capital); Luangprabang, 15,000 (royal capital).
Monetary unit: Kip.
Language: Laotian.
Religion: Buddhist.

HISTORY AND GOVERNMENT. Sparsely settled Laos occupies the northwestern portion of Indo-China. In the fourteenth century, a unified Lao kingdom of Lanxang was constituted on both sides of the Mékong river. It was divided in the seventeenth century into the two kingdoms of Vientiane, which was annexed by Siam in 1827, and Luangprabang, which recognized Siamese suzerainty shortly thereafter. In 1893 both kingdoms passed to France.

Laos was reunited in 1947 as a constitutional monarchy under the Luangprabang dynasty. In 1950 it became an associated state in the French Union. The transfer of sovereignty was completed by the Paris agreements of Dec. 29, 1954.

SOCIAL AND ECONOMIC CONDITIONS. About half the people are Laotians who live mainly in the Mékong valley, and half are mountain tribes of Chinese and Indonesian extraction. There are sizable Chinese and Vietnamese minorities.

About 95% of the people are farmers. The chief food crop is rice; others are maize, vegetables, cotton, cardamons, and tobacco. The leading exports are benzoin, coffee, opium, and lac; cattle and teak are also exported. Laos is the least developed of the former Indo-Chinese states and has little modern industry. Tin is the only mineral of importance. The northern forests are rich in valuable timber, notably teak; the logs are floated down the Mékong. The latter, in spite of rapids, is the chief transportation route.

Latvia

Area: 24,600 square miles.

Population (est. 1956): 2,000,000 (1940: Lettish, 75.5% [1950: 58%]; Russian, 12%; German, 3.2%; Polish, 2.5%; others, 6.8%).

Density per square mile: 81.3.

Principal cities (est. 1956): Riga, 565,000 (capital); Liepaja, 80,000 (seaport).

Language: Latvian.

Religions (census 1930): Lutheran, 56.6%; Roman Catholic, 23.7%; Greek Orthodox, 8.9%; others, 10.8%.

Descended from ancient Aryan stock, the Latvians were early tribesmen who settled along the Baltic Sea and, lacking a central government, fell an easy prey to more powerful peoples. The German Teutonic Knights first conquered them in 1158 and ruled the area as two states—Livonia and Courland. Poland conquered the territory in 1562 and ruled until 1795 in Courland; control of Livonia was disputed between Sweden and Poland from 1562 to 1629. Sweden controlled Livonia from 1629 to 1721. Russia took over Livonia in the latter year, and Courland after the third partition of Poland in 1795. From that time

until 1918, the Latvians remained Russian subjects, although they preserved their language, customs, and folklore. The Russian Revolution of 1917 gave them their opportunity for freedom, and the Latvian republic was proclaimed on Nov. 18, 1918.

The republic lasted little more than twenty years. It was occupied by Russian troops in 1939 and incorporated into the U.S.S.R. in 1940. German armies occupied the nation from 1941 to 1943-44, when they were driven out by the Russians. Most countries, including the United States, have refused to recognize the Soviet annexation of Latvia.

Lebanon (Republic)

Area: 4,015 square miles.

Population (est. 1957): 1,525,000 (Arabic, Armenian, Circassian, Turk).

Density per square mile: 361.1.

President: Fouad Chehab.

Premier: Rashid Karami.

Principal cities (est. 1954): Beirut, 375,000 (capital, chief port); Tripoli, 120,000 (oil pipe-line terminus).

Monetary unit: Lebanese pound (£L).

Languages: Arabic, French.

Religions (est. 1954): Christian, 54%; Moslem, 44%; others, 2%.

HISTORY AND GOVERNMENT. In ancient times Lebanon was the mountainous hinterland of the Phoenician coast towns. From the seventh to the eleventh centuries there infiltrated into southern Lebanon the heretics of Islam who finally coalesced into the Druse community.

In the nineteenth century the Turkish Sultanate encouraged the Druses to wage civil war against the Christian Maronites. After a massacre of 2,500 Christians in 1860, Lebanon was occupied by the French for a year. From 1864 to 1914, a Christian military government ruled the area under nominal Turkish sovereignty. After World War I, France received a League of Nations mandate over Syria and Lebanon. The French drew a Lebanese border in 1920 to offset predominantly Moslem Syria and proclaimed the area a republic under French control on May 23, 1926. Complete independence came on Nov. 26, 1941. Lebanon joined the Arab League and took part in the invasion of Palestine on May 15, 1948.

(For landing of U. S. marines in summer 1958 and other events, see article on the Middle East in *World Politics* section.)

GOVERNMENT. The modern Lebanese republic is governed by a President elected by Parliament, for a six-year term, and a Cabinet of Ministers appointed by the President, but responsible to Parliament, which has sixty-six members.

ECONOMIC CONDITIONS. Lebanon produces tobacco, olives, grapes and other

fruits, wheat, and silk. Manufacturing is confined mainly to local consumers' goods. The silk industry is important in Beirut and Tripoli. Tobacco manufacturing is a government monopoly. An oil refinery was opened at Tripoli in 1950 and its facilities are being currently expanded.

Leading customers in 1956 were Saudi Arabia (13%), Syria (12%), and France (8%); leading suppliers, Syria (21%), Britain (13%) and the United States (12%). The leading exports were wool, fruits, vegetables, barley, and cotton.

One of the oil pipelines from the Kirkuk field in Iraq terminates at Tripoli; the trans-Arabian pipeline from Saudi Arabia ends at Sidon.

Liberia (Republic)

Area: c. 43,000 square miles.
Population (est. 1955): 1,250,000 (native Negro, 99%; American Negro, .8%; white, .1%; others, .1%).

Density per square mile: c. 29.1.
President: William V. S. Tubman.
Principal city (census 1956): Monrovia, 41,829 (capital and chief port).

Monetary unit: U. S. dollar.
Languages: English (official), native tongues.

Religion: Protestant Christian (official); Moslem, Catholic, Pagan.

HISTORY AND GOVERNMENT (see *World Politics* section).

The government is modeled after that of the United States. The President and Vice President are popularly elected for eight years. The 31-member House of Representatives is elected for four years and the ten-member Senate for six years. Suffrage is extended only to landowners over 21 who are of Negro blood, but a 1946 constitutional amendment provided for the seating in the House of an aborigine from each province in the hinterland. Liberia's army of about 4,000 men is organized on a militia basis.

SOCIAL AND ECONOMIC CONDITIONS.

The English-speaking descendants of U. S. Negroes, known as Americo-Liberians, are the intellectual and ruling class. The aborigines, virtually all uncivilized, are divided into some twenty-eight tribes speaking different dialects. Some are Moslems or pagans. The Christian population includes Anglicans, Methodists, Catholics, Baptists, and Presbyterians.

Chief exports in 1956 were rubber (68%), iron ore (18%), and diamonds (5%). Leading customers were the United States (80%), the Netherlands (5%), and western Germany (5%); leading suppliers, the United States (62%), Britain (11%), and western Germany (10%).

Libya (Kingdom)

Area: 679,358 square miles.

Population (census 1954): 1,091,830 (Berber, with Arab admixture, 93%; Italian, 5%; Jewish, 2%).

Density per square mile: 1.6.

Ruler: King Idris I.

Prime Minister: Abdul Majid Kobar.

Principal cities (census 1954):* Tripoli, 130,238 (joint capital); Bengasi, 70,533 (joint capital).

Monetary unit: Libyan pound (£L).

Languages: Arabic, Italian.

Religions: Moslem (93%), Christian (5%), Jewish (2%).

HISTORY AND GOVERNMENT. Libya, stretching along the northern coast of Africa between Tunisia and Egypt, was a part of the Turkish dominions from the sixteenth century until 1911. Following the outbreak of hostilities between Italy and Turkey in the latter year, Italian troops occupied Tripoli; Italian sovereignty was recognized the next year by the Treaty of Ouchy.

Libya was the scene of much desert fighting during World War II. After the fall of Tripoli on Jan. 23, 1943, it came under Allied administration. The U. N. General Assembly voted on Nov. 21, 1949, that Libya should become independent by 1952.

Following the adoption by the constituent assembly of a Constitution, the independence of the country was proclaimed by King Idris I on Dec. 24, 1951.

Under the Constitution, Libya is a hereditary monarchy with a federal form of government. Tripolitania, Cyrenaica, and the Fezzan are the constituent provinces. It has a bicameral Parliament consisting of a Senate of twenty-four members, half named by the King and half by the three provincial legislatures, and a House of Representatives elected on a proportional representation basis according to population. The Cabinet, headed by the Prime Minister, is responsible to the federal Parliament.

The ruler, King Idris I, hereditary head of the powerful Senussi sect in Cyrenaica, was born in 1890.

SOCIAL AND ECONOMIC CONDITIONS.

Tripolitania, with one-sixth the area, has 68% of the population; Cyrenaica has 27% and the Fezzan 5%. About 75% of the population is rural and about 45% of that is nomadic or seminomadic.

Animal husbandry is the basic economic activity, and there are considerable numbers of cattle, sheep, camels, and goats. Agriculture is possible only in the Mediterranean coastal region, where dates, olives, citrus fruit, wheat, and barley are grown, and in oases in the Fezzan and elsewhere; here the principal product is dates. Sponge and tunny fisheries are carried on off the coast.

Chief exports (1956) were peanuts (22%), scrap iron (13%), and esparto (11%). Italy was the leading customer (38%) and supplier (30%).

Liechtenstein (Principality)

Area: 61 square miles.
Population (census 1955): 14,861 (mostly German).

Density per square mile: 243.6.
Ruler: Prince Franz Joseph II.
Chief of Government: Alexander Frick.
Principal city (census 1955): Vaduz, 3,031 (capital).

Monetary unit: Swiss franc.
Language: German.
Religion: Roman Catholic.

Tiny Liechtenstein lies on the east bank of the Rhine, just south of Lake Constance, between Austria and Switzerland. It abolished its army in 1868 and has managed to stay neutral and undamaged in all European wars which have occurred since that date.

Founded in 1719, Liechtenstein became independent in 1866. Franz Joseph II, the reigning Prince, was born in 1906, and succeeded his great uncle, Franz I, in 1938. In 1943 he married Countess Gina Wilczek of Austria.

The Constitution of 1921 provided for a legislature, the *Landtag*, of fifteen members elected by direct, universal suffrage. Liechtenstein adopted Swiss currency in 1921, and has been part of the Swiss Customs Union since 1924. Its foreign trade statistics are included in those of Switzerland, which also administers the country's telegraph and postal service.

Wheat, wine, and fruit are the chief products. There are small manufactures of cotton, leather, and pottery.

Liechtenstein's area includes low valley land and upland peaks—Falkals at 8,401 feet, and Naafkopf, 8,432 feet. The chief mineral product is marble.

Lithuania

Area: 31,200 square miles.
Population (1956): 2,700,000 (1940: Lithuanian, 81% [1950: 55%]; German, 4%; Polish, 3%; Russian, 2%; others, 10%).

Density per square mile: 86.5.
Principal cities (1956): Vilnius (Wilno), 200,000 (capital); Kaunas, 195,000 (river port).

Language: Lithuanian.
Religions: Roman Catholic, 80%; Lutheran, 5.5%; others, 14.5%.

Southernmost of the three Baltic states, Lithuania in the middle ages was a grand duchy joined to Poland through royal marriage. Poles and Lithuanians merged forces to defeat the Teutonic Knights of Ger-

many at Tannenberg in 1410 and extended their power far into Russian territory. In 1795, however, following the third partition of Poland, Lithuania fell into Russian hands and did not gain its independence until 1918, toward the end of World War I.

The republic was occupied by the U.S.S.R. in 1939 and annexed outright the following year. From 1940 to 1944 it was occupied by German troops and then was retaken by the Soviet Union. Western countries, including the United States have not recognized the Russian annexation.

Luxemburg (Grand Duchy)

Area: 999 square miles.
Population (est. Dec. 31, 1956): 312,500 (Luxemburgian, French, German).

Density per square mile: 312.9.
Ruler: Grand Duchess Charlotte.
Premier: Joseph Bech.
Principal city (est. 1953): Luxembourg, 66,382 (capital, iron and steel).

Monetary unit: Luxembourg franc.
Languages: Luxemburgian, French, German.

Religion: Mainly Roman Catholic.

HISTORY. Sigefrol, Count of Ardennes, an offspring of Charlemagne, was Luxemburg's first sovereign ruler. In 1060 the country came under the rule of the House of Luxemburg. From the 15th to the 18th centuries, Spain and Austria held it in turn. The Congress of Vienna in 1815 made it a Grand Duchy and gave it to William I, King of the Netherlands. In 1839 the Treaty of London ceded the western part of Luxemburg to Belgium.

ECONOMIC CONDITIONS. Although the soil is not very fertile, agriculture is prosperous. Principal crops are potatoes, oats, wheat, rye, and grapes.

The mining and metallurgical industries, based on iron ore found in the south, are the most important.

By a customs union between Belgium and Luxemburg which came into force on May 1, 1922, to last for 50 years, customs frontiers between the two countries were abolished. On Jan. 1, 1948, an economic union with Belgium and the Netherlands (Benelux) came into existence. Luxemburg's foreign trade figures are included in those of Belgium and no separate statistics are available; exports consist chiefly of iron and steel products.

Luxemburg's prosperity depends largely on its large iron ore deposits.

Maldiv Islands (Sultanate)

Area: c. 115 square miles.
Population (est. 1955): 89,000.
Density per square mile: c. 773.9.
Sultan: Amir Mohammed Farid Didi.

Prime Minister: Ibrahim Ali Didi.
Principal city (est.): Malé, 8,000 (capital).
Monetary unit: Rupee.
Languages: Sinhalese (dialect), Arabic.
Religion: Moslem.

The Maldives Islands, about 400 miles to the southwest of Ceylon in the Indian Ocean, were first visited by the Portuguese in the sixteenth century. They came under British protection in 1887 and were a dependency of the colony of Ceylon until 1948, when relations with Britain were formalized in a treaty which left domestic affairs in the hands of the islanders. Re-activation of a British airfield was announced Jan. 3, 1957.

For centuries a sultanate, the islands adopted a republican form of government in 1952, but the sultanate was restored in Feb., 1954. There is a bicameral legislature which is popularly elected.

The people are great traders and fishermen. Besides fishing, coir making is the chief local industry. Exports include coir, coconuts, copra, millet, and fruit.

The islands consist of 12 coral atolls with about 2,000 small islands, of which about 300 are inhabited.

Mexico (Republic)

(Estados Unidos Mexicanos)

Area: 760,373 square miles.
Population (est. 1957): 31,426,000 (mestizo, 55%; Indian, 29%; white, 15%; others, 1%).

Density per square mile: 40.2.
President: Adolfo López Mateos.
Principal cities (census 1950): Mexico City, 2,234,795 (capital); Guadalajara, 377,016 (manufacturing); Monterrey, 333,422 (metallic industries); Puebla, 223,667 (cotton textiles); Mérida, 142,858 (sisal); San Luis Potosí, 125,662 (mineral smelting).

Monetary unit: Peso.
Languages (1940): Spanish, 94%; Indian, 6%.
Religion: Predominantly Roman Cath.

HISTORY. Mexico's early history is shrouded in mystery. At least two civilized races—the Mayas and later the Toltecs—preceded the wealthy Aztec empire conquered in 1519–21 by the Spanish under Hernando Cortez. Spain ruled for the next 300 years until 1810 (the date was Sept. 16 and is now celebrated as Independence Day), when the Mexicans first revolted. They continued the struggle and finally won independence in 1821.

Turbulent years followed. From 1821 to 1877, there were two Emperors, several dictators and enough Presidents and provisional executives to make a new government on the average of every nine months. Mexico lost Texas (1836), and after defeat in the war with the United States (1846–48) it lost the area comprising the present states of California, Nevada, and Utah,

most of Arizona and New Mexico, and parts of Wyoming and Colorado.

In 1855 the Indian patriot Benito Juárez began a series of liberal reforms, including the disestablishment of the Catholic Church, which had acquired vast property. A subsequent civil war was interrupted by the French invasion of Mexico (1861), the crowning of Maximilian of Austria as Emperor (1864), and then his overthrow and execution by forces under Juárez, who again became President in 1867.

The years after the fall of the dictator Porfirio Díaz (1877–80 and 1884–1911) were marked by bloody political-military strife and trouble with the United States culminating in the punitive expedition into northern Mexico (1916–17) in unsuccessful pursuit of the bandit-politician Pancho Villa.

GOVERNMENT. The President, popularly elected for six years and ineligible to succeed himself, governs with a Cabinet of ministers. The Federal Congress has two houses—the 162-member Chamber of Deputies, elected for three years (one for each 150,000 population) and the 60-member Senate, elected for six years. All married male citizens at least 18, and all single male citizens at least 21 are eligible to vote. Women received the right to vote in 1953.

Each of the twenty-nine states has considerable autonomy, with a popularly-elected Governor, legislature and local judiciary. The President appoints the Governors of the two Federal territories, and the governing body of the Federal District.

ECONOMIC CONDITIONS. *Agriculture.* Primitive agricultural methods are steadily giving way to modern practices. More than 17,000,000 acres are under cultivation. The Yucatán peninsula, at the southern end of the Gulf of Mexico, raises more than half of the world supply of sisal hemp.

Stockraising is important on non-arable land. Mexico's inventory of livestock in 1957 included an estimated 16,700,000 cattle, 5,350,000 sheep, and 8,220,000 hogs.

Industry. The leading industrial products are cotton cloth and thread, beer, sugar, iron, and steel.

Chief exports in 1956 were cotton (28%), coffee (12%), copper (8%), lead (7%), and zinc (5%). The U. S. took 73% of the exports and supplied 78% of the imports. Other leading customers were Japan, Britain, and western Germany. Leading imports included machinery, vehicles and iron and steel products.

NATURAL FEATURES AND RESOURCES. Mexico is a great, high plateau, open to the north, with mountain chains on east and west and with ocean-front lowlands lying outside of them. It has two big spears—

the peninsula of Lower California, which is mountainous, and the Yucatán peninsula, which is mostly a low plain. The eastern mountains are marked by high volcanoes.

Minerals. Mexico is one of the richest mineral countries in the world. It outranks all other countries in silver production. Other minerals are gold, lead, copper, zinc, antimony, tin, coal, and iron ore.

Most of the Mexican mining properties are foreign-owned, and the industry is declining in relative importance. The oilfields, lying along the east coast, were seized by the government in 1938, but later the foreign owners were indemnified.

Forests. Mexico's forests are of considerable importance; they include pine, oak, fir, mahogany, red and white cedar, and primavera. Resins, turpentine, and vegetable wax are also produced. Yucatán produces nearly all of the world's chicle, the juice of the sapodilla tree, used as the base of chewing gum.

Monaco (Principality)

Area: .59 square mile (375 acres).

Population (census 1956): 20,422.

Density per square mile: 34,613.6.

Ruler: Prince Rainier III.

Principal and only cities (census 1951): Monaco, 1,860; La Condamine, 9,858; Monte Carlo, 8,484.

Monetary unit: French franc.

Language: French.

Religion: Roman Catholic.

A tiny, hilly wedge driven into the French Mediterranean coast nine miles east of Nice, Monaco is a little land of pleasure with a tourist business that runs as high as 1,500,000 visitors a year. Monaco had popular gaming tables as early as 1856. Five years later, a 50-year concession to operate the games was granted to François Blanc, of Bad Homburg. This concession passed into the hands of a private company in 1898.

The Phoenicians, and after them the Greeks, had a temple on the Monacan headland honoring Hercules. From *Monoi-kos*, the Greek surname for this mythological strong man, the principality took its name. After being independent for 800 years, Monaco was annexed to France in 1793 by the French Revolutionists, and was placed under Sardinia's protection in 1815. In 1861, it went under French guardianship but continued to be an independent country.

Prince Albert of Monaco gave the principality a Constitution in 1911, creating a National Council of eighteen members popularly elected for four years. The government is under a ministry, acting on the Prince's authority. The ruler, Prince Rainier III, born May 31, 1923, succeeded his grandfather, Louis II, on the latter's death, May 9, 1949. Rainier was married April 19,

1956, to Grace Kelly, U. S. actress. A daughter, Princess Caroline Louise Marguerite, was born Jan. 23, 1957, and a son, Prince Albert Louis Pierre on March 14, 1958.

Mongolian People's Republic (Outer Mongolia) (Republic)

Area: 614,350 square miles.

Population (est. 1956): 1,000,000 (Mongol, except for about 100,000 Russians and 50,000 Chinese).

Density per square mile: 1.6.

Chairman of Presidium: Zh. Sambu.

Prime Minister: Y. Tse Den-bal.

Principal city (est. 1954): Ulan Bator, 100,000 (capital).

Monetary unit: Tugherik.

Languages: Mongolian, Russian.

Religion: Lama-Buddhist.

HISTORY AND GOVERNMENT. The Mongolian People's Republic, known also as Outer Mongolia, is a Russian satellite that measures more than twice the area of Texas. It contains the original homeland of the historic Mongols, whose power reached its zenith during the thirteenth century under Kublai Khan. The area accepted Manchu rule in 1689, but after the Chinese Revolution of 1911 and the fall of the Manchus in 1912, the northern Mongol princes expelled the Chinese officials and declared independence under the Khutukhtu or "Living Buddha." In 1921, Soviet troops entered the country and facilitated the establishment of a republic by Mongolian revolutionaries in 1924 after the death of the last Living Buddha. China, meanwhile, continued to claim Outer Mongolia but was unable to back the claim with any strength. Under the Chinese-Russian Treaty of 1945, China agreed to give up Outer Mongolia, which after a rigged plebiscite, became nominally independent.

The government of the republic is strikingly similar to the Soviet system. The Great Hural or Huruldan (parliament) is elected by universal suffrage, meets at least once in three years and picks thirty members to act as an executive committee—the Little Hural—which in turn selects a presidium of seven members as an interim body. A Cabinet of ten ministers appointed by the Little Hural governs the country.

ECONOMIC CONDITIONS. The country is largely pastoral. There are few areas suitable for crop growing, but some millet, rye, and wheat are produced. Most of the people are essentially nomadic or semi-nomadic; flocks and herds remain the chief source of wealth.

There are a few industrial enterprises. All land, natural resources, factories, mine, hay-making stations and public utilities are nationalized.

Foreign trade, a state monopoly, is carried on mainly with the Soviet Union, but also with Communist China. The leading exports are livestock, wool, hides, animal hair, meats, and furs.

NATURAL FEATURES AND RESOURCES. The productive regions of Outer Mongolia—a tableland ranging from 3,000 to 5,000 feet in elevation—are in the north, which is well drained by numerous rivers, including the Kerulen, Tola, Orkhon, and Selenga.

Reserves of 500,000,000 tons of coal are said to exist in the Nalaikha field near Ulan Bator. Some gold is mined. Deposits of antimony, copper, iron ore, lead, graphite, mercury, sulfur, and silver exist.

Morocco (Kingdom)

(Maroc)

Area: 174,553 square miles.

Population (est. 1956): 8,500,000.

Density per square mile: 55.6.

Ruler: King Mohammed V.

Prime Minister: Ahmed Balafrej.

Principal cities (census 1951-52): Casablanca, 682,388 (chief seaport); Marrakesh, 215,312 (trading center); Fez, 179,372 (commercial center); Rabat, 156,209 (French administrative center); Tetuán (census 1950), 80,732 (Spanish administrative center).

Monetary units: French franc, Spanish peseta.

Languages: Arabic, French, Spanish.

Religions: Chiefly Moslem.

HISTORY. Morocco, about the size of California, is just south of Spain across the Strait of Gibraltar and looks out on the Atlantic from the northwest shoulder of Africa. It was once the home of the Berbers, who helped the Arabs invade Spain in A.D. 711 and then revolted against them and gradually won control of large areas of Spain for a time after 739.

The country was ruled successively by various native dynasties and maintained regular commercial relations with Europe, even during the 17th and 18th centuries when it was the headquarters of the famous Sallí pirates. In the 19th century, clashes with the French and Spanish became frequent. Finally, in 1904, France and Spain divided Morocco into zones of French and Spanish influence, and these were established as formal protectorates in 1912.

Meanwhile, Morocco had become the object of big-power rivalry, which almost led to a European war in 1905 when Germany attempted to gain a foothold in the rich mineral country. By terms of the Algeiras Conference (1906), Morocco was internationalized economically and France's privileges were limited. War again seemed imminent in 1911, when Germany dispatched a warship to Agadir in an evident attempt to intimidate France. Again the dispute

was settled, however, and this time Germany recognized France's right to establish a protectorate over Morocco.

The Tangier Statute, concluded by Britain, France and Spain in 1923, created an international zone at the port of Tangier, permanently neutralized and demilitarized. In World War II, Spain occupied the zone, ostensibly to insure order, but was forced to withdraw in 1945, and the international rule was re-established.

Sultan Mohammed V was deposed by the French in Aug. 1953 and replaced by his uncle, but nationalist agitation forced his return in Nov. 1955.

France recognized the independence and sovereignty of Morocco on March 2, 1956. Spain followed on April 7, 1956. The Tangier international zone was abolished by a declaration signed Oct. 29, 1956. Morocco was admitted to the U. N. Nov. 12, 1956.

GOVERNMENT. Morocco is an absolute monarchy under the King. He is advised by a Cabinet of Moroccan ministers headed by the Prime Minister.

(For Morocco's relationship with France see *World Politics* section).

ECONOMIC CONDITIONS. The natives are Berbers, roughly divided by customs and way of life into three groups—the Rif group along the coast, the central or Berber group in the mid-Atlas Mountains, and the southern or Cleuh in the high Atlas and the Sus. There is a large Jewish population. Most of the Europeans live in the cities.

Morocco is essentially agricultural. Corn, beans, peas, hemp, wheat, barley, sorghum, citrus fruits, olives, and dates also are raised. In 1955 there were 15,400,000 sheep and 2,466,000 cattle.

In the former Spanish zone, agriculture is largely undeveloped, but it has potential importance. Barley, wheat, maize and sorghum crops are the most important.

Manufacturing industries introduced by Europeans, mostly small, produce chemicals, flour, leather, stone, beverages and textiles. Native industries include carpet weaving and making Turkish slippers.

In 1956 chief exports were phosphate (20%), barley (7%), olive oil (7%), and citrus fruit (6%). France took 53% of the exports and supplied 48% of the imports, which included sugar, vehicles, petroleum products, cotton cloth, and tea. A large proportion of the trade was carried on with Spain. Major exports are iron ore, fish and, grain; imports include flour, sugar, tea, wine and, textiles.

Casablanca, which handles 80 per cent of the French zone trade, has perhaps the world's largest artificial port.

Exploitation of French Morocco's almost

inexhaustible deposits of phosphate is a state monopoly. Other major minerals are coal, cobalt, iron ore, manganese ore, molybdenum, tin, zinc, and lead. Iron ore is the chief mineral of the Spanish zone; others are antimony and manganese.

NATURAL FEATURES. On the Atlantic coast there is a fertile plain; the Mediterranean coast is mountainous, making most of the Spanish zone a rugged area. The Atlas Mountains, running northeastward from the south to the Algerian frontier, average 11,000 feet in elevation.

Nepal (Kingdom)

Area: 54,510 square miles.

Population (census 1954): 8,431,537 (Gurkha [predominant], Magar, Gurung, Bhotia [Tibetan], Newar).

Density per square mile: 154.7.

Ruler: Mahendra Bir Bikram.

Prime Minister: Kunwar Inderjit Singh.

Principal city and capital: Katmandu (estimated population, 108,800).

Monetary unit: Nepalese rupee.

Languages: Parbatia, Gubhajius, Tibetan.

Religions: Hinduist, Buddhist.

HISTORY AND GOVERNMENT. A landlocked country about the size of Iowa, lying between the Republic of India and Tibet, Nepal contains Mt. Everest, 29,028 feet high, the tallest measured mountain in the world.

The Gurkhas invaded Nepal from India in 1768 and conquered it. A commercial treaty was signed with Britain in 1792, and in 1816, after more than a year's hostilities, the Nepalese agreed to allow British residents to live in Katmandu, the capital. In 1923 Britain recognized the absolute independence of Nepal. King Tribhubana was deposed on Nov. 7, 1950, but was returned to the throne with Indian assistance on Feb. 15, 1951. On his death Mar. 13, 1955, his son Mahendra became ruler. Nepal was admitted to the U. N. in 1955.

ECONOMIC CONDITIONS. Cultivated and irrigated where possible, the main valley of Nepal grows rice, wheat, pulse, fruits, vegetables, spices, sugar cane, and potatoes. A few sheep and cattle are grazed. Manufacturing is limited to native handicraft, but jute and textile mills are being established. Trade with India and Pakistan passes through frontier stations; there are two mountain trade routes to Tibet.

Main exports include hides, skins, opium, gums, resins, dyes, jute, wheat, pulse, rice, spices, and timber. Two railroads enter Nepal for short distances—one from Raxaul, India, to Amlekhganj, the other from Jayauagar to Bijulpura.

NATURAL FEATURES AND RESOURCES. Along its southern border, Nepal has a strip of level land which is partly forested, partly cultivated. North of that is the slope of the Himalayan Range, including Mt. Everest (29,028 ft.), which was climbed for the first time in 1953, and many peaks higher than 20,000 feet. Mineral resources, nearly all unexploited, include lignite, copper, zinc, lead, sulfur, marble, and iron. Southern Nepal has valuable forests which yield gum, timber, resin, and dye. Hemp plants grow wild.

Netherlands (Kingdom)

(Koninkrijk der Nederlanden)

Area: 12,482 square miles.*

Population (est. 1957): 11,009,000 (practically all Dutch).

Density per square mile: 877.8.

Sovereign: Queen Juliana.

Prime Minister: Willem Drees.

Principal cities (est. 1957): Amsterdam, 871,188 (capital, financial center); Rotterdam, 722,718 (chief port); The Hague, 606,728 (seat of government); Utrecht, 247,816 (railway center); Haarlem, 167,264 (tulip center); Eindhoven, 157,621 (industrial center).

Monetary unit: Guilder.

Language: Dutch.

Religions (census 1947): Roman Catholic, 38.5%; Dutch Reformed, 31.0%; other Protestant, 13.3%; Jewish, 0.2%; others and no creed, 17.0%.

* Excluding waterways and bodies of water larger than 185 acres.

HISTORY. Julius Caesar found the low-lying Netherlands inhabited by Germanic tribes, the Nervii, Frisii and Batavi. The Batavi on the Roman frontier did not submit to Rome's rule until 13 B.C., and then only as allies. A part of Charlemagne's empire in the 8th and 9th centuries A.D., the area later passed into the hands of Burgundy and the Austrian Hapsburgs, and finally in the 16th century came under Spanish rule. When Philip II of Spain suppressed political liberties and the growing Protestant movement in the Netherlands, a revolt led by William of Orange broke out in 1568. Under the Union of Utrecht in 1579, the seven northern provinces became the Republic of the United Netherlands.

The Dutch East India Company was established in 1602, and by the end of the 17th century Holland was one of the great sea and colonial powers of Europe.

(For recent history, see *World Politics* section).

RULER. Queen Juliana, who was born April 30, 1909, was married on Jan. 7, 1937, to Prince Bernhard of Lippe-Biesterfeld (born in 1911). They have four daughters: Beatrix, heiress apparent (born Jan. 31, 1938); Irene (born 1939); Margriet Francisca

1943); and Maria Christina (born

ECONOMIC CONDITIONS. *Agriculture*—The farms are characteristically small, with only a few larger than 250 acres. Dairying is more important than crop growing; production of cheese milk, butter and eggs is under state control.

In 1956 there were 2,962,000 cattle, 2,332,000 hogs, 433,000 sheep, and 210,000 horses. Large quantities of vegetables and fruits are raised for export.

Almost as important as the dairy industry is the raising of tulip, hyacinth, and other flower bulbs in the area around Haarlem.

Industry. The Netherlands is a highly industrialized nation, utilizing both overseas raw materials and domestic agricultural products. Leading industries are textiles, clothing, shipbuilding, shoes, food, and building materials.

The Netherlands ranks high among the world's shipbuilding nations; also pig iron and steel are important. Amsterdam is one of the world's diamond-cutting centers.

Trade. Principal customers in 1956 were western Germany (18%), Belgium (14%), Britain (12%), the U. S. (6%), and France (5%). Leading suppliers were Belgium (19%), western Germany (18%), the U. S. (14%), Britain (8%), and France (3%). The chief exports were petroleum and coal-tar products (10%), dairy products and eggs (10%), electrical machinery and apparatus (6%), and fabrics and clothing (6%). Leading imports were machinery, iron and steel and manufactures, petroleum and products, cereals and flour and wood and manufactures.

Communications. The Dutch merchant marine is the seventh largest fleet in the world. An extensive network of rivers expanded by many canals has led to extensive development of inland shipping.

NATURAL FEATURES AND RESOURCES.

Part of the great plain of north and west Europe, the Netherlands has maximum dimensions of 190 by 160 miles and is low and flat except in Limburg in the south-east, where some hills rise to 300 feet. About half the country's area is below sea level, making the famous Dutch dikes a requisite to the use of much land. Reclamation of land from the sea through dike-building has continued through recent times.

All drainage reaches the North Sea, and the principal rivers—Rhine, Maas (Meuse), and Schelde—have their sources outside the country. The Rhine is the most heavily used waterway in Europe.

Netherlands minerals are few. The only

important ones are coal, crude petroleum, and salt. There also are peat swamps and about 600,000 acres of forest.

NETHERLANDS OVERSEAS TERRITORIES

NETHERLANDS ANTILLES—Status: Part of the United Kingdom of the Netherlands.

Area: 366 square miles.
Population (est. Dec. 31, 1955): 187,473.
Capital: Willemstad (est. 1953: 44,062).
Governor: F. E. J. van der Valk (acting).
Prime Minister: Ephraim Jonckheer.
Foreign trade (1956), exports, 1,585,000,000 florins; imports, 1,656,000,000 florins.
Chief export: petroleum products (more than 95 per cent).

Agricultural products: aloes, beans, corn.
Manufactures: refined petroleum, straw hats.

Mineral products: lime phosphate, salt.

This comprises two groups of Caribbean islands 500 miles apart; one, about 40 miles off the Venezuelan coast, consists of Curaçao (173 sq. mi.), Bonaire (95 sq. mi.), and Aruba (69 sq. mi.); the other, lying to the northeast, consists of 3 small islands with a total area of 29 square miles. The Dutch acquired the island of Curaçao from Spain in 1634.

The Governor is assisted by a local Legislature and Cabinet. The area has complete autonomy in domestic affairs.

The economy of the Netherlands Antilles is based almost entirely on the refining at Curaçao and Aruba of crude petroleum, which comes chiefly from the adjacent Maracaibo fields in Venezuela.

SURINAM (Dutch Guiana)—Status: Part of the United Kingdom of the Netherlands.

Area: 55,143 square miles.
Population (est. 1956): 240,000.*
Capital: Paramaribo (pop. 1956: 95,000).
Governor: J. van Tilburg.
Prime Minister: J. H. E. Ferrier.
Foreign trade (1955): exports, 49,684,000 florins (70% to the U. S.); imports, 51,610,000 florins (33% from the U. S.). Chief export: bauxite (over 80%).

Agricultural products: rice (1955: 64,526 metric tons), sugar, coffee.

Minerals (1955): bauxite, 3,060,000 metric tons; gold, 7,235 troy oz.

Forest products: balata (1955: 183 metric tons), timber.

* Including aborigines, numbering about 26,000.

Surinam lies in northeastern South America between British and French Guiana. It was received by the Dutch from England at the Peace of Breda (1667) in exchange for New York and at that time included British Guiana, which was seized by England in 1803 and formally ceded to her after the Napoleonic Wars.

The Governor of Surinam (appointed by the Crown) is assisted by a local Legislature and Cabinet, which have sole responsibility in domestic affairs.

Mining is the most important activity, and only about 65,000 acres are devoted to agriculture. The largest bauxite mines are owned by Aluminum Company of America subsidiaries.

From its settled coastal plain, Surinam runs back to a virtually unexplored mountain and jungle area.

NETHERLANDS NEW GUINEA—Status: Part of the United Kingdom of the Netherlands.

Area: 160,618 square miles.

Population (est. 1955): 700,000.

Capital: Hollandia (pop. 1954: 11,322).

Governor: Jan van Baal.

Agricultural products: sago, coconuts, sugar cane, sweet potatoes.

Minerals: petroleum (1956: 2,618,430 barrels), nickel, chrome.

The western part of New Guinea, second largest island of the world, with smaller adjacent islands, forms part of the Kingdom of the Netherlands. The area remained Dutch upon the transfer of sovereignty in Indonesia in Dec., 1949, with the understanding that its status would be determined within one year by negotiation between the Netherlands and Indonesia. Subsequent negotiations did not lead to any agreement.

Dutch influence dates back to the activities of the Dutch East India Company in the 17th century.

The Papuans are the dominant stock; there are also Melanesian and Negrito elements. Commerce and industry are almost unknown, except for oil production, and life is primitive, with head-hunting and cannibalism not unknown even today.

Nicaragua (Republic)

(República de Nicaragua)

Area: 57,143 square miles.*

Population (est. 1957): 1,331,000 (1943: mestizo, 69%; white, 17%; Negro, 9%; Indian, 5%).

Density per square mile (land only): 22.4.

President: Luis Somoza Debayle.

Principal cities (census 1950†): Managua, 109,352 (capital); León, 30,544 (trading center); Granada, 21,035 (trading center); Chinandega, 13,146 (sugar).

Monetary unit: Córdoba.

Language: Spanish.

Religion: Roman Catholic.

* Including inland water area of 3,475 square miles.

† Urban population of municipalities.

HISTORY. Nicaragua, which established independence in 1838, was first visited by the Spaniards in 1522. The chief of the country's leading Indian tribe at that time was called Nicaragua, from whom the nation derived its name. A United States naval force intervened in 1909 after two American citizens had been executed, and a few U. S. Marines were kept in the coun-

try from 1912 to 1925. The Bryan-Chamorro Treaty of 1916 gave the United States option on a canal route through Nicaragua, and naval bases. Disorder after 1924 elections brought in U. S. Marines again, but they were withdrawn after the U. S.-supervised elections of 1928.

GOVERNMENT. The Constitution of 1950 provides for a President popularly elected for six years, and a two-house Congress—a 42-member Chamber of Deputies and a 16-member Senate—both elected for six years. Former Presidents of the republic automatically become Senators.

ECONOMIC CONDITIONS. More than half of Nicaragua is jungle-covered; agriculture, the leading industry, utilizes only 10 per cent of the total land.

Chief exports in 1956 were cotton (36%), coffee (36%), and gold (12%). Leading customers were the U. S. (39%), Germany (23%), and the Netherlands (11%); leading suppliers were the U. S. (63%), Germany (7%), and the Netherlands Antilles (7%).

NATURAL FEATURES AND RESOURCES. Largest but most sparsely populated of the Central American nations, Nicaragua is mountainous in the west, with fertile valleys. A plateau slopes eastward toward the Caribbean.

Two big lakes—Nicaragua, about 100 miles long, and Managua, about 38 miles long—are connected by the Tipitapa River. The Pacific coast is bald and rocky; the Caribbean coast, swampy and indented, is aptly called the "Mosquito Coast."

Gold and silver are the most important minerals. One-third wooded, Nicaragua produces mahogany, rosewood, cedar, rubber, and ipecac root.

Norway (Kingdom)

(Norge)

Area: 125,064 square miles.

Population (est. 1957): 3,496,000 (Norwegian, 98.7%; Swedish, .8%; others, .5%).

Density per square mile: 27.7.

Sovereign: King Olaf V.

Prime Minister: Einar Gerhardsen.

Principal cities (est. 1956): Oslo, 455,000 (capital, chief port); (census 1950) Bergen, 112,845 (seaport, shipbuilding); Trondheim, 56,669 (seaport, timber, fish); Stavanger, 50,647 (seaport, fisheries).

Monetary unit: Krone.

Language: Norwegian.

Religions: Evangelical Lutheran (state), 96.8%; others, 3.2%.

HISTORY AND GOVERNMENT: (See *World Politics* section).

RULER. Olaf V, born July 2, 1903, only son of Haakon VII and Princess Maud (1869-1938), third daughter of Edward VII of

England, succeeded to the throne on the death of his father Sept. 20, 1957. He married Princess Märtha of Sweden (1901-1954) on March 21, 1929. Their children are Princess Ragnhild Alexandria (born 1930), Princess Astrid (born 1932), and Prince Harald (born 1937).

ECONOMIC CONDITIONS. Land suitable for cultivation, estimated at less than 5 per cent of the total area, consists of strips in the deep narrow valleys and around floods and lakes. Foodstuff production is insufficient to meet domestic needs. Leading crops, with 1956 production in metric tons, are wheat, 56,000; barley, 288,000; oats, 167,000; potatoes, 1,406,000; hay and fodder. The country is more adapted to stock raising than to crop growing; in 1956, there were 1,111,812 cattle, 1,825,908 sheep, 506,597 hogs, and 110,378 goats.

Raw materials produced in Norway form the basis of most of the manufactures. Leading industries are food, machinery, metals, wood, paper, and electro-chemicals.

In 1956 the leading customers were Britain (19%), western Germany (12%), Sweden (10%), and the U. S. (9%). Leading suppliers were Britain (19%), western Germany (18%), Sweden (14%), and the U. S. (10%). Chief exports were base metals (25%), fish and fish preparations (14%), pulp and waste paper (10%), and paper and manufactures (9%).

The normally adverse trade balance is offset to some extent by invisible exports, particularly the earnings of the large merchant marine.

NATURAL FEATURES AND RESOURCES. Nearly 70 per cent of Norway is uninhabitable and covered by mountains, glaciers, moors, and rivers. The hundreds of deep floods that cut into Norway's coast line give it an over-all ocean front of more than 12,000 miles. Islands off the coast, numbering almost 150,000, form a breakwater and make a safe coastal shipping channel.

Mineral resources are extensive, but coal deposits are entirely lacking except in Spitsbergen. Important minerals are iron ore, aluminum, pyrite ore, zinc, copper ore, molybdenum ore, tungsten, antimony ore, tin, and silver.

Cheap electric power, produced mainly by hydroelectric plants, makes possible the extraction of nitrogen from the air and manufacture of potassium nitrate, an important fertilizer.

The forests, largely in the south and southeast, are one of the chief natural resources. About 25% of the total area is covered with forests, of which 70% is pine.

Fishing is one of the principal industries, engaging as many as 100,000 persons annually.

Outer Mongolia. See Mongolian People's Republic

Palestine. See Israel; Jordan

Panamá (Republic)

(República de Panamá)

Area: 28,753 square miles.

Population (est. 1957): 960,000 (1940: mestizo, 65.34%; Negro, 13.31%; white, 11.07%; Indian, 9.53%; others, .75%).

Density per square mile: 32.5.

President: Ernesto de la Guardia, Jr.

Principal cities (census 1950): Panamá City, 127,874 (capital and chief port); Colón, 52,204 (chief Caribbean port); Ciudad David, 14,847 (bananas).

Monetary unit: Balboa.

Language: Spanish (official).

Religion: Roman Catholic, 93%; Protestant, 6%; others, 1%.

HISTORY. Visited by Columbus in 1502 on his fourth voyage and explored by Balboa in 1513, Panamá was the principal transshipment point for Spanish treasure and supplies to and from South and Central America in colonial days. In 1821, when Central America revolted against Spain, Panamá joined Colombia, which already had declared its independence. For the next 82 years, Panamá attempted unsuccessfully to break away from Colombia. After U. S. proposals for canal rights over the narrow isthmus had been rejected by the Colombian Senate, Panamá proclaimed its independence with U. S. backing in 1903.

For canal rights in perpetuity, the United States paid Panamá \$10,000,000, and agreed to pay \$250,000 each year, increased to \$430,000 after devaluation of the U. S. dollar in 1933 and to \$1,930,000 under a revised treaty signed Jan. 25, 1955. In exchange, the United States got the Canal Zone, a ten-mile-wide strip across the isthmus, and a considerable degree of influence in Panamá's affairs.

GOVERNMENT. Under the 1946 Constitution, the Assembly and the President are elected for 4-year terms, with the President ineligible to succeed himself. Panamá has no army or navy, but has a national police corps numbering 2,000.

ECONOMIC CONDITIONS. About five-eighths of the nation is unoccupied. A fourth of the population is in Colón and in Panamá City, the oldest white settlement on the Pacific coast of the Americas. In the cities, the lower classes are Negro and Negroid, descendants of British West Indian laborers on the canal.

Bananas are the main agricultural crop. Chief exports in 1956 were bananas (63%)

and fresh shrimp (26%). The United States was the leading customer (96%) and supplier (60%).

The Panama Canal is the country's biggest economic asset. The main railway is the U. S. Government-owned Panamá Railroad, 47.64 miles long, bridging the isthmus from Panamá City to Colón. In recent years many foreign ships have been registered in Panamá to escape high labor costs and governmental regulations in other nations.

NATURAL FEATURES. Panamá is roughly the size of South Carolina. At the narrowest and lowest point, the canal bisects the country. Outlying islands number about 630 in the Caribbean and 116 in the Pacific.

Paraguay (Republic) (República del Paraguay)

Area: 157,047 square miles.

Population (est. 1957): 1,638,000 (1950: mestizo, 94.9%; white, 3.0%; Indian, 2.1%).

Density per square mile: 10.2.

President: Gen. Alfredo Stroessner.

Principal cities (census 1950): Asunción, 201,340 (capital); Villarrica, 14,680 (sugar, tobacco); Concepción, 14,640 (port, Paraguay river); Encarnación, 13,321 (rail terminus).

Monetary unit: Guaraní.

Languages: Spanish (official), Guaraní.

Religion: Roman Catholic (official).

HISTORY. In 1526 and again in 1529, Sebastian Cabot explored Paraguay when he sailed up the Paraná and Paraguay Rivers. From 1608 until their expulsion from the Spanish dominions in 1767, the Jesuits maintained an extensive establishment in the south and east of Paraguay. In 1811 Paraguay revolted against Spanish rule and became a nominal republic under two Consuls.

ECONOMIC CONDITIONS. The Paraguayans are a homogeneous blend of Spanish, Portuguese, and Italian, with considerable Guaraní Indian blood. There are almost no Negroes; the 35,000 to 50,000 uncivilized Indians live mainly in the Chaco. The country is 90 per cent bilingual, with Guaraní dominating over Spanish (the official language) in rural areas.

A well-favored land, Paraguay is predominantly a cattle country, keeping about 3,500,000 head. The soil is fertile and the climate suitable for subtropical crops. The chief cash crop is cotton.

Chief exports in 1956 were timber (32%), quebracho extract (18%), and cotton (15%). Principal customers and suppliers in 1955 were Argentina, the United States, and Britain.

NATURAL FEATURES AND RESOURCES. Eastern Paraguay, between the Paraná and Paraguay Rivers, is upland country with the thickest population settled on the grassy slope that inclines toward the Paraguay River. The greater part of the Chaco region, to the west, is covered with marshes, lagoons, dense tropical forest, and jungle.

Forest resources are considerable, especially in the Chaco. Quebracho—the "Axe-breaker," a wood so heavy that it will not float—is the principal commercial tree. The wood has many uses, from paving blocks to ox-cart wheels. Quebracho tannic extract is the chief product.

Peru (Republic) (República del Peru)

Area: 482,253 square miles.

Population (est. 1957): 9,923,000 (white and mestizo, 53%; Indian, 46%; Asiatic, Negro and others, 1%).

Density per square mile: 20.0.

President: Manuel Prado y Ugarteche.

Principal cities (est. Dec. 31, 1952): Lima, 926,400 (capital); Callao, 104,500 (port of Lima); Arequipa, 100,900 (commercial center); Cuzco, 58,200 (ancient Incan capital); Trujillo, 49,600 (mining).

Monetary unit: Sol.

Languages: Spanish, Quéchua, Aymará (Indian).

Religion: Roman Catholic.

HISTORY. Peru, once part of the great Incan empire and later the major viceroyalty of Spanish South America, is more than three times the size of California. It was conquered in 1531-33 by Francisco Pizarro. On July 28, 1821, Peru proclaimed its independence, but the Spanish were not finally defeated until the Battle of Ayacucho on Dec. 9, 1824. For a hundred years thereafter the Peruvian course was rough. Revolutions were frequent, and a new war was fought with Spain in 1864-66. The dispute with Chile over Tacna and Arica was not finally settled until 1929.

GOVERNMENT. Under the 1933 Constitution, Peru elects by popular vote every six years a President, two Vice Presidents and a bicameral Congress—a Senate of 52 members and a Chamber of 183 members. The President is ineligible to succeed himself. The Cabinet, headed by the Prime Minister, is presidentially appointed.

ECONOMIC CONDITIONS. Most Peruvians are of mixed Spanish and Indian blood. The Indians come from three main stocks—Quéchua, Aymará (Colla), and Chuncho. There is a relatively large Asiatic population.

Land under cultivation is estimated at only slightly more than 10 per cent of the total area, with more than 80 per cent of the population being dependent upon agri-

culture. About one-eighth of the cultivated area in the irrigated coastal valleys of the central region is devoted to cotton, the most important crop. Stock raising supplies most of the country's meat needs, as well as wool, hides, and skins for export. Llamas, used as beasts of burden, and vicuñas and alpacas, noted for their wool, are native to Peru. Livestock estimates in Dec., 1955, showed 3,439,000 cattle, 16,505,000 sheep, 1,341,000 hogs, and 3,380,000 alpacas and llamas (1952).

Chief exports in 1956 were cotton (28%), sugar (11%), copper (11%), and lead (10%). Chief suppliers were the United States (50%), western Germany (10%), and Britain (9%); chief customers, the United States (37%), Britain (11%), and Chile (9%). Principal Peruvian imports are machinery and motor vehicles, foodstuffs (especially wheat), iron and steel manufactures, electrical goods, and chemicals.

NATURAL FEATURES AND RESOURCES. The Andes Mountains divide Peru into three sharply differentiated zones. To the west is the coastline, much of it arid, extending for 50 to 100 miles inland.

The mountain area, with peaks over 20,000 feet high, lofty plateaus and deep valleys, lies centrally. Beyond the mountains to the east is the heavily forested slope leading to the Amazonian plains.

Peru has vast mineral resources. It ranks fifth in world silver production and mines about 25 per cent of the world's vanadium. But mining is second to agriculture, and nearly all of it is in the hands of foreign capital. Petroleum and copper are the most important, with the latter controlled by the American-owned Cerro de Pasco Corporation, which also accounts for much of the gold and silver output.

An important industry on the outlying islands is the gathering of guano (bird excrement), a valuable fertilizer.

The Philippines (Republic)

Area: 114,830 square miles.

Population (est. 1957): 22,690,000 (Filipino, except [1948] 121,702 Chinese, 6,955 Americans, 1,886 Spanish and 3,319 others).

Density per square mile: 192.1.

President: Carlos P. Garcia.

Principal cities (est. 1952): Manila, 1,158,260 (seat of government, chief port); Cebu, 175,950 (seaport); Quezon City, 159,730 (legal, future capital); Basilan, 141,640 (lumber); Bacolod 126,200 (sugar); Zamboanga, 124,710 (seaport).

Monetary unit: Peso.

Languages: English, Tagalog, Bisayan, Spanish, Ilocano, Bicol.

Religions (census 1948): Roman Catholic, 82.9%; Aglipayan (Independent Philippine Catholic), 7.6%; Moslem, 4.1%; Protestant, 2.3%; others, 3.1%.

HISTORY AND GOVERNMENT. Fernando Magellan, the Portuguese navigator in the service of Spain, discovered the Philippines on March 16, 1521, and twenty-one years later a Spanish exploration party named the group of islands in honor of Prince Philip, later Philip II of Spain. Spain retained possession of the islands for the next 350 years.

The Philippines were ceded to the United States in 1899 by the Treaty of Paris after the Spanish-American War. Meanwhile the Filipinos, led by Emilio Aguinaldo, had declared their independence. They continued guerrilla warfare against U. S. troops until the capture of Aguinaldo in March, 1901. By July, 1902, peace was established except among the Moros.

The first U. S. civilian Governor-General was William Howard Taft (1901-04). The Jones Law (1916) provided for the establishment of a Philippine Legislature composed of an elective Senate and House of Representatives. The Tydings-McDuffie Act (1934) provided for complete Philippine independence in 1946. Under a Constitution approved by the people of the Philippines May 14, 1935, the Commonwealth of the Philippines was inaugurated on Nov. 15 under the presidency of Manuel Quezon y Molina, who was re-elected in 1941.

The Philippines were invaded by Japanese troops on Dec. 8, 1941 (Philippine time), and after the fall of Bataan and Corregidor, President Quezon and his government fled to Washington, D.C. U. S. forces led by Gen. Douglas MacArthur re-invaded the islands in Oct., 1944, and after the liberation of Manila (Feb., 1945), Sergio Osmeña, who had succeeded to the presidency on the death of Quezon (Aug. 1, 1944), re-established the government.

Brig. Gen. Manuel A. Roxas y Acuña, who defeated Osmeña in the elections of April, 1948, became first head of the new independent republic. He died April 15, 1948, and was succeeded by the Vice President, Elpidio Quirino. The latter was re-elected on Nov. 8, 1949, but lost a second bid for re-election to Ramón Magsaysay, who took office on Dec. 30, 1953. On his death in a plane crash March 17, 1957, Magsaysay was succeeded by Vice Pres. Carlos P. Garcia.

ECONOMIC CONDITIONS. *Agriculture and Industry.* Agriculture is the chief industry. Average size of the farms is ten acres, but there are many large plantations. Rice (palay) is the staple native food cereal, but production is insufficient to meet home consumption. The Philippines normally produce about half the world copra supply and a large proportion of the abacá (Manila hemp) supply; they are also a leading source of sugar and sugar products, normally the chief export. Other

crops include sisal, kapok, cotton, corn, tobacco, coffee, rubber cacao, citrus fruits, and bananas. Livestock on March 31, 1956, included 3,590,580 carabao, the farmers' all-purpose animal, 836,080 cattle, 214,140 horses, and 5,765,370 hogs.

There are no large industrial establishments and activity is limited primarily to the processing of agricultural and forest products, such as sugar cane, coconuts, tobacco, abaca, and timber. Preparation of fine embroideries is an important industry.

In 1956, the chief exports were copra and other coconut products (39%), sugar (22%), wood (11%), and abaca (8%). Leading customers were the United States (54%), Japan (18%), and the Netherlands (9%); leading suppliers, the United States (59%), Japan (10%), and Indonesia (4%). Leading imports were machinery and vehicles, cotton and manufactures, iron and steel, and petroleum and products.

NATURAL FEATURES AND RESOURCES. The Philippines are an archipelago of approximately 7,083 islands lying about 500 miles off the southeast coast of Asia. The northernmost island, Y'AmI, is sixty-five miles from Formosa, while the southernmost, Saluag, is thirty miles east of Borneo. Only 466 of the islands have an area of more than one square mile, and only 2,441 have names. The largest islands are Luzon in the north (40,814 sq. mi.), Mindanao in the south (36,537 sq. mi.), Samar (5,124 sq. mi.), Negros (4,903 sq. mi.), and Palawan (4,550 sq. mi.).

Minerals, Forests and Fisheries. The Philippines possess large but relatively undeveloped mineral resources. Most important are gold, silver, iron ore, copper ore, chromite, manganese ore, lead, and zinc.

Poland (People's Republic)

(Polska Rzeczpospolita Ludowa)

Area: 120,442 square miles.

Population (est. 1957): 23,180,000.

Density per square mile: 229.8.

Chairman of State Council: Aleksander Zawadski.

Premier: Josef Cyrankiewicz.

Principal cities (est. 1955): Warsaw, 965,000 (capital); Łódź, 670,000 (industrial center); Wrocław (Breslau), 490,000 (former German industrial center); Kraków, 430,000 (commercial center); Poznań, 370,000 (farm products).

Monetary unit: Złoty.

Language: Polish (more than 90%).

Religions: Roman Catholic, Jewish, Protestant.

HISTORY. Little of certainty is known about Polish history before the eleventh century when King Boleslaus I (the Brave) ruled over Bohemia, Saxony, and Moravia. Mongol invasions in 1241 and 1259 were repelled. Meanwhile, the Teutonic Knights

were erecting in Prussia a state which included part of Poland and barred the latter's access to the Baltic. The Knights were defeated by Wladislaus II at Tannenberg in 1410 and became Polish vassals and Poland regained a Baltic shoreline.

Poland reached the peak of its power between the fourteenth and sixteenth centuries. Poles scored military successes against the Russians and Turks. In 1683, King John Sobieski turned back the Turkish tide near Vienna.

These successes did not halt the process of decline which resulted from the lack of strong central authority, and Prussia, Russia, and Austria were able to carry out a first partition of the country in 1772, a second in 1792 and a third in 1795-96. For more than a century thereafter, there was no Polish state, but the Poles never ceased their efforts to regain their independence. World War I found them fighting unhappily on both sides.

The independence of Poland was formally proclaimed in Nov., 1918, and Marshal Josef Pilsudski was confirmed in office as President. In 1919, Ignace Paderewski, famous pianist and patriot, became the first Premier. Russia attacked Poland in 1920 but the Poles, under Marshal Pilsudski aided by the French, defeated the invaders. On May 12, 1926, Marshal Pilsudski seized complete power in a coup d'état and ruled the country dictatorially until his death on May 12, 1935, when he was succeeded by Marshal Edward Smigly-Rydz.

Despite a 10-year nonaggression pact signed with Germany in 1934, Hitler attacked Poland on Sept. 1, 1939. Russian troops invaded from the east Sept. 17, 1939, and on Sept. 28 a German-Russian agreement was signed dividing Poland between Russia and Germany. W. Raczekiewicz formed a government-in-exile in France with Gen. Wladyslaw Sikorski as Premier; this government moved to London after France's defeat in 1940.

All of Poland was occupied by German after the Nazi attack on the Soviet Union in June, 1941. On July 30, 1941, Poland concluded an agreement with the U.S.S.R. voiding all German-Soviet agreements effected after Sept. 1, 1939.

The legal Polish government soon fell out with the Russians, however, and in July, 1944, a Communist-dominated Polish Committee of National Liberation received Soviet recognition. Moving to Lublin after that city's liberation, it proclaimed itself the Provisional Government of Poland on Dec. 31, 1944. Some former members of the Polish Government in London joined with the Lublin government to form the Polish Government of National Unity on June 28, 1945. Great Britain and the United States recognized this government on July 5, 1945.

On Aug. 2, 1945, in Berlin, Prime Minister Attlee, President Truman and Generalissimo Stalin established a new *de facto* western frontier for Poland, along the rivers Oder and Lausitzer Neisse, pending a final peace treaty. On Aug. 16 the Soviet Union and Poland signed a treaty delimiting the Soviet-Polish frontier. Under these agreements Poland was shifted westward. In the east it lost 69,860 square miles with 10,772,000 inhabitants; in the west it gained (subject to final peace conference approval) 38,986 square miles with a pre-war population of 8,621,000.

GOVERNMENT AND DEFENSE. The 1952 Constitution is based on that of the U.S.S.R. The supreme organ of state authority is the Sejm, composed of 425 members elected for four years by all citizens over eighteen.

ECONOMIC CONDITIONS. *Agriculture.* Poland remains essentially an agricultural country: the areas now under *de facto* Polish administration in the west accounted for 25 per cent of Germany's pre-war food production. Farm lands lost to the Soviet Union were considerably larger in area than those gained from Germany.

Industry. Industrial facilities, although severely damaged during World War II, were not greatly affected by territorial concessions to the U.S.S.R., with the exception of the Lwów area. On the other hand, important German industrial areas, especially Silesia and the city of Stettin, are located in the territories under *de facto* Polish administration. As a result, post-war Poland has a much larger industrial potential. Almost all industries have been nationalized or placed under state control, and a planned economy has been introduced as part of the government's drive to make Poland an industrial nation.

Trade. Foreign trade is largely conducted by government bodies under the terms of numerous trade agreements with other nations. Major exports in 1954 were coal and coke, other raw materials, and semi-manufactures and agricultural products (mainly bacon and ham). Major imports were machinery, textiles, chemicals, and mineral products.

NATURAL FEATURES AND RESOURCES. Most of Poland is a plain with no natural boundaries except the Carpathian Mountains on the south and the Oder and Neisse Rivers on the west.

The acquisition of large coal deposits in German Silesia combined with much larger reserves in the southwestern region, makes Poland one of the world's leading coal producers. Iron ore deposits are located in the Kielce and Radom districts and in German Silesia (metal content 34%). Zinc and lead ores are located chiefly in Upper Silesia and the voivod-

ships of Kielce and Kraków. Pre-war Poland's principal oil-producing areas, Boryslaw-Drohobycz, are in the territory ceded to the Soviet Union; Among other deposits, Poland possesses copper, sulfur, chalk, clay, kaolin, marble, and granite.

Portugal (Republic) (República Portuguesa)

Area: 35,358 square miles.

Population (est. 1957): 8,909,000 (practically all Portuguese).

Density per square mile: 249.9.

President: Gen. Francisco Higinio Cra-veiro Lopes.

Premier: António de Oliveira Salazar.

Principal cities (census 1950): Lisbon, 783,226 (capital, seaport); Oporto, 281,406 (seaport, port wine); Setúbal, 44,235 (seaport, sardines); Coimbra, 41,977 (university); Funchal (in Madeira Islands), 37,035 (Madeira wine).

Monetary unit: Escudo.

Language: Portuguese.

Religion: Roman Catholic.

HISTORY AND GOVERNMENT: (See *World Politics* section.)

ECONOMIC CONDITIONS.

Portugal's corporate state has a planned economy in which each producing unit regulates itself in the interest of the nation. Corporate units have been established in agriculture, industry, and finance.

Sixty per cent of Portugal's people are engaged in agriculture. Although wheat is the leading crop, it is insufficient to meet domestic needs, and grain must be imported. One of the world's leading wine-makers, Portugal produces two famous kinds—Port in the vicinity of Oporto, and Madeira in the islands of the same name. In olive oil production, Portugal usually ranks third in the world.

Leading crops are wheat, barley, and oats.

In 1956 the principal customers were the Portuguese overseas territories (24%), Britain (14%), and the U. S. (10%); chief suppliers, Germany (16%), the Portuguese overseas territories (12%), and Britain (14%). The chief exports were cork (19%), fish, mainly sardines (12%), and wine (8%). Main imports included wheat and flour, ships, industrial machinery, raw cotton, and iron and steel.

NATURAL FEATURES AND RESOURCES. Portugal is crossed by many small rivers, and also by three large ones which rise in Spain, flow into the Atlantic, and divide the country into three geographic areas. The Minho (Miño in Spain) River, part of the northern boundary, cuts through a mountainous area that extends south to the vicinity of the Douro (Duero) River. South of the Douro the mountains slope to

the plains about the Tagus (Tejo) River. The remaining division is the southern one of Alentejo.

The Azores, stretching over a distance of 400 miles in the Atlantic, consist of 9 islands divided into three groups, with total area of 888 square miles. The nearest continental land is Cape da Roca, Portugal, which lies 800 miles to the east. The Azores are an important station on Atlantic air routes, and both Britain and the United States established air bases there during World War II. Madeira, consisting of two inhabited islands, Madeira and Porto Santo, and two groups of uninhabited islands, lies in the Atlantic about 535 miles southwest of Lisbon.

Mineral resources have not been fully developed, but wolfram, coal, iron ore, copper, manganese, iron pyrites, lead, tin, and other ores are found.

Portugal is one of the world's leading producers of cork.

The fishing industry is a basic part of the national economy. Of special importance is the sardine industry centered at Setúbal. The total fishing catch in 1955 was 390,600 metric tons.

PORTUGUESE OVERSEAS TERRITORIES

	Area, sq. mi.	Population, est. 1955
AFRICA		
Angola	481,351	4,362,264
Cape Verde Islands	1,557	172,000
Mozambique	297,731	6,040,000
Portuguese Guinea	13,948	541,000
São Tomé and Príncipe	372	58,000
ASIA		
Macao	6	200,000
Portuguese India	1,538	644,000
Timor	7,332	478,688

The status of the Portuguese overseas territories is fixed by the Colonial Act of July, 1930, included in the Constitution approved March 19, 1933, and revised in 1951. Each territory has a Governor or Governor General, appointed by the Council of Ministers for an initial 4-year term and responsible to the Minister of Overseas Territories at Lisbon. Each territory has financial and administrative autonomy.

ANGOLA (Portuguese West Africa)—Status: Overseas territory.

Capital: Loanda (pop. 1955: 189,590).

Governor General: José Agapito da Silva Carvalho.

Chief exports (1956): coffee (49%), diamonds (10%), fish meal (6%).

Agricultural exports (1956): coffee, 89,880 metric tons; sisal, 37,283 tons; cotton, 5,908 tons; sugar, maize, palm kernels and oil, peanuts, rice.

Minerals: diamonds (1956: 743,930 carats), lignite, copper.

Forest products: beeswax, timber.

Manufactures: sugar, palm oil, whale oil, fish oil.

Angola stretches along the west African coast for about 1,000 miles from Belgian Congo to the Cunene River. Outside of a coastal plain varying in width from thirty to 100 miles, the area is part of the great African plateau. The Angola coast and the Congo River were explored by the Portuguese in 1482-85, and Loanda was founded in 1576. A legislative council with an elected majority was established in Angola in 1955.

Angola is primarily an agricultural country. Its varied altitude enables it to produce both tropical and temperate crops. Excellent grazing land exists in many parts of the colony. The chief ports are Loanda and Lobito. The great majority of the population are of Bantu-Negro stock, mixed in the Congo district with pure Negro.

CAPE VERDE ISLANDS—Status: Overseas territory.

Capital: Praia (population 9,980).

Governor: Manuel Marques Abrantes Amaral.

Foreign trade (1956): exports, 288,453,000 escudos; imports, 308,242,000 escudos. Chief exports: ships stores (92%), preserved fish.

Agricultural products: coffee, millet, castor oil, oranges, hides.

This group of fourteen volcanic islands lying off the west African coast was discovered in 1456 by the Venetian captain Alvise Cadamosto, in the service of Prince Henry the Navigator. The island of São Vicente is an important fueling station on the South American route. The vast majority of the inhabitants are mulattoes and Negroes—descendants of slaves brought to the islands from Africa by early settlers. Public slavery was abolished in 1854, and private slavery in 1876.

MOZAMBIQUE (Portuguese East Africa)—Status: Overseas territory.

Capital: Lourenço Marques (population 93,265).

Governor General: Gabriel Maurício Teixeira.

Foreign trade (1956): exports, 1,515,400,000 escudos; imports, 2,736,322,000 escudos. Chief exports: cotton (20%), sugar (16%), copra, sisal, cashew nuts.

Agricultural exports (1956): cotton, 22,677 metric tons; sugar, 98,176 tons; copra, 41,377 tons; sisal, 27,940 tons; cashew nuts, 37,974 tons; tea, 6,276 tons.

Minerals: gold, coal, graphite, mica.

Forest products: mangrove bark, timber.

Mozambique, stretching for about 1,430 miles along Africa's southeast coast, was discovered by Vasco da Gama in 1497, although the Arabs had penetrated into the area as early as the 10th century A.D. It was first colonized in 1505, and by 1510 the Portuguese were masters of the former Arab sultanates on the east

African coast. The boundaries with British Central and South Africa were delimited in 1891, and with Tanganyika Territory in 1886 and 1890.

Agriculture is the chief industry. There are many large plantations, some of which are partially mechanized.

Ninety-nine per cent of the inhabitants are native Africans of the Bantu Tribes. The chief ports are Lourenço Marques and Beira, which is also the port for Rhodesia.

PORTUGUESE GUINEA—Status: Overseas territory.

Capital: Bissau (population 18,309).

Governor: Silva Tavares.

Foreign trade (1956): exports, 203,208,-366 escudos; imports (1954), 171,922,324 escudos. Chief exports: peanuts (53%), coconuts.

Agricultural products: peanuts (exports 1956: 34,027 metric tons), coconuts, copra, rice, palm oil.

Forest products: timber, wax, rubber.

This area, lying on the west African coast and almost surrounded by French West Africa, was discovered in 1446 by the Portuguese Nuno Tristão and was separated from the colony of the Cape Verde Islands in 1879. It consists of a low-lying coastal region and sixty islands off the coast. The country is undeveloped economically, and most of the natives are farmers. There are no railways, but navigable rivers totaling over 1,000 miles are important trade arteries.

SÃO TOMÉ AND PRÍNCIPE—Status: Overseas territory.

Capital: São Tomé (population 7,813).

Governor: Antônio Pires Barata.

Foreign trade (1955): exports, 161,703,-231 escudos; imports, 125,221,828 escudos. Chief exports: cacao (70%), copra (11%), coconuts, coffee.

Agricultural products: cacao, coffee, coconuts, copra, palm oil.

These volcanic islands, lying in the Gulf of Guinea about 150-175 miles off the west African coast, were discovered by the Portuguese in 1471. Most of the early inhabitants were convicts and Jews from Portugal and slaves from Brazil and the mainland, but the bulk of the present inhabitants are Negro contract laborers from the mainland and Cape Verde, engaged to work cacao plantations.

MACAO—Status: Overseas territory.

Capital: Macao (population 166,544).

Governor: Joaquim Marques Esparteiro.

Chief exports: fish, cement, preserves.

Manufactures: cement, preserves, firecrackers, vegetable oils, metal products.

Macao comprises the peninsula of Macao and the two small islands of Taipa and Colôane on the South China coast, about thirty-five miles from Hong Kong. Established by the Portuguese in 1557, it is the oldest European outpost in the China trade, but Portugal's sovereign rights to

the port were not recognized by China until 1887, and its boundaries are still not delimited. The port has been eclipsed in importance by Hong Kong, but it is still a busy distribution center, and also has an important fishing industry employing over 40,000 people. It is notorious for its opium trade and gambling houses. Most of the population is Chinese.

PORTUGUESE INDIA—Status: Metropolitan province.

Capital: Panjim (Nova Gôa) (population 31,950).

Governor General: Paulo Bénard Guedes. Foreign trade (1956): exports, 82,741,-364 rupias* (40% to Japan); imports, 114,051,886 rupias (19% from Britain). Chief exports: iron ore (71%), manganese ore (25%), cashew nuts.

Agricultural products: cashew nuts, coconuts, spices.

Minerals (exports 1956): iron ore, 2,046,-770 metric tons; manganese ore, 162,347 tons.

* 1 rupee = 5.97 escudos.

The area consists of Gôa and 3 islands on the Malabar coast of India; Damão and the territories of Dadará and Nagar-Aveli, on the Gulf of Cambay; and Diu, with the continental territories of Gocola and Simbor, on the coast of Gujarat. Gôa, captured in 1510 by the Portuguese, later became capital of the whole Portuguese empire in the east. The native population is largely Hindu.

TIMOR—Status: Overseas territory.

Capital: Dili (population 7,000).

Governor: Cesar Maria de Serpa Rosa.

Foreign trade (1956): exports, 38,687,000 escudos (34% to the Netherlands); imports, 56,598,000 escudos (28% from Portugal). Chief exports: coffee (80%), rubber.

Agricultural exports (1956): coffee (1,120 metric tons), rubber (231 tons), copra (1,114 tons).

Forest products: sandalwood, wax.

Portuguese Timor consists of the eastern half of the island of Timor in the Malay Archipelago, with the territory of Ambeno and two neighboring islands. It was first settled by the Portuguese early in the 16th century. In 1859 the island was divided between Portugal and the Netherlands; later boundary adjustments were made in 1904. Fishing and copra manufacture are important; trade is mostly in the hands of Chinese, Malaysians, and Arabs. Timor was occupied by Dutch and Australian troops in Dec., 1941, and by the Japanese in Feb., 1942.

Rumania (People's Republic)

(Republica Populara Româna)

Area: 91,654 square miles.

Population (census 1956): 17,579,000 (1948: Rumanian, 85.7%; Magyar, 9.4%; German, 2.2%; Jews, 0.9%; others [Turk-

ish, Ruthenian, Bulgarian, Gypsy, Ukrainian] 1.8%).

Density per square mile: 190.8.

Chairman of Presidium: Petru Groza.

Premier: Chivu Stoica.

Principal cities (census 1956): Bucharest, 1,236,906 (capital); Cluj, 154,752; (Transylvanian industrial center); Timisoara, 142,251 (western commercial center); Stalin (Brasov), 123,882 (industrial center); Ploesti, 114,560 (oil).

Monetary unit: Leu.

Languages: Rumanian, Hungarian, German, Turkish.

Religions (est. 1947): Eastern Orthodox, 81%; Greek Catholic, 9%; Roman Catholic, 7%; others, 3%.

HISTORY AND GOVERNMENT. Most of Rumania was the Roman province of Dacia from about A.D. 100 to 275. From the sixth to the twelfth centuries, wave after wave of barbarian conquerors—Vlachs, Bulgars, and others—passed over the area. It became a kingdom in 1881.

The gains of World War I, making Rumania the largest Balkan state, included Bessarabia, northern Transylvania, and Bukovina. The Banat, a Hungarian area, was divided with Yugoslavia.

In 1926 Crown Prince Carol renounced his rights to the throne, and when King Ferdinand died on July 20, 1927, Carol's son, Michael (Mihai) became King under a regency. However, Carol returned from exile in 1930, was crowned King Carol II, and gradually became a powerful political force in the country. On Feb. 10, 1938, he abolished the democratic Constitution of 1923. On June 21, 1940, the country was reorganized along Fascist lines, and the Fascist Iron Guard became the nucleus of the new totalitarian party. On June 27, the Soviet Union occupied Bessarabia and northern Bukovina. By the Axis-dictated Vienna Award of 1940, two-fifths of Transylvania went to Hungary, after which the King dissolved Parliament and granted the new Premier, Ion Antonescu, full power. Carol then abdicated and went into exile. Rumania subsequently signed the Axis Pact on Nov. 23, 1940, and the following June joined in Germany's attack on the U.S.S.R., reoccupying Bessarabia. Following the invasion of Rumania by the Red Army in Aug. 1944, King Michael led a coup d'état which ousted the Antonescu government. An armistice with the U.S.S.R. was signed Sept. 12 in Moscow.

Elections held Nov. 19, 1946, resulted in a victory for the Communist-dominated government bloc. Michael abdicated on Dec. 30, 1947, and thereafter the nation was declared a "people's republic."

ECONOMIC CONDITIONS. Rumania is predominantly agricultural, with about 80 per cent of the population engaged on the soil. In wheat, rye and other grains, it is one of the richest countries of southeastern Eu-

rope. The largest acreage is usually devoted to corn and wheat. Other crops are flax, hemp, fruit, vegetables, potatoes, sugar beets, sunflower seeds, tobacco, and grapes. Stock raising is also important.

Agrarian reform measures effected in 1945 provided for the distribution of estates over fifty hectares (123.6 acres) in lots of 12½ hectares to each peasant.

Industrialization made considerable progress under a 5-year plan covering the years 1951-55, which emphasized the iron, steel, metal, machinery, and other heavy industries. The Soviet half-share in Soviet-Rumanian joint companies, which control the major industries, was sold to Rumania in 1954. Industries directly connected with agriculture, such as flour milling, distilling, and brewing, are still of basic importance. Probably the most important industries are food processing, textiles, metals, chemicals, wood, and paper. All but small business enterprises are nationalized.

Foreign trade is under complete government control. Principal exports are petroleum products, cereals and cereal products, wood and wood products. Leading imports are iron and manufactures, machinery and motors, vegetable fibers and products.

NATURAL FEATURES AND RESOURCES. The Carpathian Mountains divide Rumania's upper half from north to south and connect near the center of the country with the Transylvanian Alps, running east and west.

North and west of these ranges lies the Transylvanian plateau, and to the south and east are the plains of Moldavia and Walachia. In its last 190 miles, the Danube River flows through Rumania only. It enters the Black Sea in northern Dobruja, just south of the border of the Soviet Union.

By far the most valuable of Rumanian minerals is oil, produced chiefly in the Ploesti region about thirty-five miles north of Bucharest.

Natural gas from Transylvania is the second most important mineral. Other important minerals are iron ore, lignite, copper, gold, and silver. Uranium deposits have been reported.

El Salvador (Republic) (República de El Salvador)

Area: 8,260 square miles.*

Population (est. July 1, 1956): 2,268,464 (mestizo, 78%; Indian, 11%; white, 11%).

Density per square mile: 274.6.

President: José María Lemus.

Principal cities (est. 1953): San Salvador, 180,713 (capital); Santa Ana, 56,952 (coffee); San Miguel, 28,730 (coffee henequén).

Monetary unit: Colón.
Language: Spanish.
Religion: Roman Catholic.

* Land area: 8,165 square miles.

HISTORY AND GOVERNMENT. Pedro de Alvarado, a lieutenant of Cortez, conquered El Salvador in 1525. El Salvador struck out as an independent republic in 1839 after the dissolution of the Central American Union.

In Jan., 1931, the first free election in 20 years brought in Arturo Araujo as President. He was overthrown before the year was over. General Maximiliano Hernández Martínez, his successor, remained in power until May, 1944, when a general strike forced his resignation. The next regime, also militarist-led, lasted only five months, and was succeeded March 1, 1945, by a regime headed by Salvador Castañeda Castro, who was ousted Dec. 14, 1948, by a revolutionary junta. Major Oscar Osorio, one of the junta's members, was named President in the March, 1950, elections. Col. José María Lemus was elected to succeed him in the March 1956 elections.

The Constitution provides for a President, popularly elected for six years and normally ineligible to succeed himself; also, a one-house legislature of 54 members.

ECONOMIC CONDITIONS. Mestizos (mixed white and Indian) are the predominant racial group. There are no tribal Indians.

El Salvador is one of the most intensively cultivated countries in Latin America. Coffee, which accounts for 85 per cent of the total exports, is controlled in volume by a commission of officials and planters. Cotton is second in importance.

El Salvador's largest national enterprise, the Lempa river hydroelectric project, began partial operation in 1953.

NATURAL FEATURES AND RESOURCES. Most of El Salvador is a fertile volcanic plateau about 2,000 feet high. There are several volcanoes, some still active, and many lovely crater lakes. It is the only Central American country without an Atlantic coastline.

Gold, silver, coal, copper, iron, zinc, mercury, and sulfur are the nation's chief minerals.

Forest resources, much smaller than in other Central American states, include dyewood, mahogany, cedar, and walnut. El Salvador is a leading source of balsam.

Executive: two Regents selected every six months by the Grand Council.

Principal town: San Marino (est. pop. 2,000) (capital).

Monetary unit: Lira.

Language: Italian.

Religion: Roman Catholic.

San Marino, the oldest and smallest republic in the world, is one-tenth the size of New York City. It is entirely surrounded by Italy, in the Apennines near Rimini. According to tradition, San Marino was founded about A.D. 350 and had good luck for centuries in staying out of the interminable wars and feuds on the Italian peninsula.

San Marino hires its police and judges from Italy. It no longer confers titles for a consideration, but it does derive much revenue from the exporting of its postage stamps, which are changed often to keep philatelists buying. Other exports are barley, wine and cattle, as well as building stone from Mount Titano.

Executive power is exercised by Regents, two of whom are appointed every six months from the popularly-elected Grand Council.

Saudi Arabia (Kingdom)

Area: c. 617,760 square miles.

Population (est. 1952): 7,000,000.

Density per square mile: c. 11.3.

King: Saud Ibn Abd al Aziz al Saud.

Prime Minister: Emir Faisal.

Principal cities (est. 1954): Mecca, 150,000 (joint capital, religious center); Jidda, 100,000 (chief port); Hufuf, 100,000 (commercial center); Riyadh, 80,000 (joint capital).

Monetary unit: Riyal.

Language: Arabic.

Religion: Moslem.

The kingdom of Saudi Arabia, which occupies most of the Arabian peninsula, is almost entirely the creation of King Ibn Saud (1882-1953). Its earlier history is that of Arabia. Descendant of earlier Wahabi rulers, Ibn Saud seized the emirate of Riyadh in 1901, and set himself up as leader of the Arab nationalist movement. The united kingdom of Saudi Arabia was one of the original members of the U. N. and joined the Arab League in 1945. King Ibn Saud died Nov. 9, 1953, and was succeeded by Saud (born 1905), the eldest of his many sons.

Saudi Arabia is a nearly absolute monarchy. A Council of Ministers headed by the Prime Minister was formed in Oct., 1953. Hejaz and Nejd are under separate administrations. Tribal organizations are influential. There is a small army. In March, 1958, King Saud turned over to his brother, Emir Faisal, full powers to lay down the state's internal, external, and financial policies.

San Marino (Republic)

Area: 38 square miles.

Population (est. 1955): 14,000 (mostly Italian).

Density per square mile: 368.4.

The majority of the inhabitants are Bedouin—nomads following their flocks over the desert. The population is predominantly Sunni Moslem, and the religious law of Islam is the common law of the land. Mecca and Medina are the leading religious centers of Islam and the annual influx of pilgrims to those cities is the most important commercial activity outside the oil industry.

Saudi Arabia's desert climate restricts agriculture to the highlands of Asir and scattered oases. Dates are the staple crop; grain, fruits, and vegetables are also grown. Camels, sheep, and goats are raised and some animal products, such as hides, wool and ghee (clarified butter), are exported.

Oil, discovered in 1936 in the province of Al Hasa along the Persian Gulf, is produced by the U. S.-owned Arabian-American Oil Co. (Aramco). The main production centers are Dhahran, Abqaiq, Qatif, and Ain Dar. Production has skyrocketed since World War II. The company's expenditures and payroll are important invisible exports and oil revenues have greatly strengthened the financial position of the kingdom, which receives one-half the company's profits. The oilfields are connected by pipeline with the Mediterranean port of Sidon, Lebanon.

Siam. See Thailand

Spain (Nominal Monarchy)

(España)

Area: 194,945 square miles.

Population (est. Dec. 31, 1956): 29,431,000 (Spanish, Basque, Catalan).

Density per square mile: 149.4.

Chief of State: Francisco Franco y Bahamonde.

Principal cities (est. Dec. 31, 1956): Madrid, 1,843,705 (capital); Barcelona, 1,403,028 (chief port, textiles); Valencia, 511,440 (silk, oranges); Seville, 405,853 (wines, iron ore); Málaga, 277,824 (sea-port); Saragossa, 274,222 (rail center).

Monetary unit: Peseta.

Languages: Spanish, Basque, Catalan.

Religion: Roman Catholic.

HISTORY AND GOVERNMENT (See *World Politics* section). General Francisco Franco is head of the state, national chief of the Falange party, Prime Minister, and *Caudillo* (leader) of the empire. Practically, the country is ruled by the Cabinet (appointed by Franco), the National Council of the Falange party, and, to a lesser extent, the Cortés (parliament). The principal function of the Cortés is the planning and formulation of laws without prejudice to Franco's veto power. Cabinet ministers, party officials, civil governors, university

heads, and the presidents of learned bodies become members of the Cortés *ex-officio*. There is no provision for the introduction of legislation by any of the members.

In a referendum held July 6, 1947, the Spanish people approved a Franco-drafted succession law declaring Spain a monarchy again. Franco, however, is to continue as Chief of State and upon his death or incapacity the government and a Council of the Realm constituted by the law are to nominate as King "that person of royal blood who is most qualified by right," subject to the approval of the Cortés. The law reserves to Franco the right to nominate his own successor, subject also to the Cortés approval by two-thirds vote.

ECONOMIC CONDITIONS. Livestock included in 1955, 3,011,000 cattle, 16,312,000 sheep, and 5,980,000 hogs. Wool production in 1956 was 21,000 metric tons, clean basis.

Leading customers in 1956 included Britain, Germany, the United States, and France; leading suppliers, the United States, France, Britain, and Germany. Leading exports in 1956 were iron ore and oranges. Principal imports were raw cotton, chemical products (especially fertilizer), petroleum, and vehicles.

Industry. The textile industry, concentrated in Catalonia, leads all others. The paper and chemical industries are also important. Pig iron and steel are important.

NATURAL FEATURES AND RESOURCES. Spain, less than ten miles from Africa at the closest point, and separated from France by the Pyrenees, is generally a broad plateau sloping to south and east and crossed by a series of mountain ranges and river valleys.

Minerals. Spain's mineral wealth, second to agriculture in the national economy, yields millions of tons of ore, including coal, lignite, iron ore (metal content 50%), potash ore, lead ore, zinc ore, and mercury. Spain also produces copper, gold, magnesite, sulfur, tungsten, phosphates, silver, and, reportedly, uranium.

Forests and Fisheries. Spanish forests yield lumber, pine resins, cork, and esparto.

SPANISH COLONIAL POSSESSIONS

Country	Area, sq. mi.	Census, 1950
Morocco		
Ifni	579	38,295
Ceuta, Melilla, Alhucemas, Chafarinas and Peñon de Velez	82	141,302
Spanish Sahara		
Rio de Oro	71,043	1,304
Sagula el Hamra	31,660	6,444
Spanish Guinea	10,831	198,663

Some 100,000 persons work in the fishing, canning, and related industries.

OUTLYING ISLANDS. Off Spain's east coast in the Mediterranean are the Balearic Islands, which total 1,936 square miles. The largest is Majorca. Sixty miles west of Africa are the Canary Islands.

Sudan, The (Republic)

Area: 967,500 square miles.

Population (census 1955-56)*: 10,209,703.

Density per square mile: 10.6.*

Chief executive: five-member Council of State.

Prime minister: Abdullah Khalil.

Principal cities (census 1955-56)*: Omdurman, 113,686 (commercial center); Khartoum, 92,829 (capital); El Obeld, 52,382 (gum arabic); Wad Medani, 48,131 (cotton, livestock); Port Sudan, 47,650 (chief port).

Monetary unit: Sudanese pound.

Languages: English, Arabic, Nilotic and Negro tribal dialects.

Religions: Moslem (Sunni), pagan, Christian.

* Provisional figures.

HISTORY. The early history of the Sudan (known as the Anglo-Egyptian Sudan between 1898 and 1955) is connected with that of Nubia, where a powerful local kingdom was formed in Roman times with its capital at Dongola. After conversion to Christianity in the sixth century A.D., it joined with Ethiopia and resisted Mohammedanization until the fourteenth century. Thereafter the area was broken up into many small states until 1820-22, when it was conquered by Mohammed Ali, Pasha of Egypt. Egyptian forces were evacuated during the Mahdist revolt (1881-98), but the Sudan was reconquered by the Anglo-Egyptian expeditions of 1896-98 and in 1899 became an Anglo-Egyptian condominium, which was reaffirmed by the Anglo-Egyptian treaty of 1936.

Egypt and Britain agreed in Feb., 1953, to grant self-government to the Sudan under an appointed Governor-General. Under the self-government statute of March 31, 1953, an all-Sudanese Parliament was elected in Nov.-Dec., 1953, and an all-Sudanese government was formed, headed by Ismail el-Azhari as Prime Minister. Under the agreement the Sudanese people were to determine their political status at the end of a 3-year period following the elections, but in Dec., 1955, the Parliament declared the independence of the Sudan, which, with the approval of Britain and Egypt, was proclaimed on Jan. 1, 1956. El-Azhari was replaced as Prime Minister by Abdullah Khalil on July 5. On March 20, 1958, the newly elected House of Representatives selected Abdullah Khalil to continue as Premier.

GOVERNMENT. The government is administered by the Prime Minister and his Cabinet. A bicameral Parliament has a Senate of fifty members and a House of Representatives of ninety-seven elected members.

ECONOMIC CONDITIONS. The northern part of the country is peopled by Arabic-speaking Moslems, while in the backward south Negroid pagan tribes predominate.

Long-staple cotton, the chief export crop, is grown under irrigation in the Kassala and Tokar areas of the north and in narrow strips along the main Nile. Durra, peanuts, corn, and oilseeds are grown elsewhere. Livestock raising is the occupation of the majority of the population.

Leading exports in 1956 were cotton (62%), gum arabic (8%), cottonseed (7%), and peanuts (6%). Leading customers were Britain (33%), India (13%), and Egypt (11%); leading suppliers, Britain (21%), Egypt (14%), and India (12%).

NATURAL FEATURES AND RESOURCES. About one-fourth the size of Europe, the Sudan extends from north to south about 1,200 miles and west to east about 1,000 miles. The northern region is a continuation of the Libyan Desert. The southern region is fertile, abundantly watered and, in places, heavily forested. It is traversed from north to south by the Nile, all of whose great tributaries are partly or entirely within its borders. The highest elevation is a mountain range parallel to the Red Sea, with heights of 4,000 to over 7,000 feet.

Salt is produced at Port Sudan, and gold deposits are worked at Gebelt, near the Red Sea. Most of the world's gum arabic comes from the semiarid Kordofan area of the west. The southern forests are rich in fibers and tannins.

Sweden (Kingdom)

(Sverige)

Area: 173,564 square miles.

Population (est. Dec. 31, 1956): 7,369,000 (practically all Swedish).

Density per square mile: 42.3.

Sovereign: King Gustavus VI Adolphus.

Prime Minister: Tage Frihof Erlander.

Principal cities (est. Dec. 31, 1956): Stockholm, 794,113 (capital); Göteborg, 387,061 (chief port, shipbuilding); Malmö, 213,260 (seaport); Norrköping, 89,226 (textiles); Helsingborg, 74,947 (seaport).

Monetary unit: Krona.

Language: Swedish.

Religions: Swedish Lutheran, 99%; others, 1%.

HISTORY AND GOVERNMENT (See *World Politics* section).

SOVEREIGN. Gustavus VI Adolphus, born Nov. 11, 1882, married (1) 1905, Princess Margaret Victoria (1882-1920); (2) 1923, Princess Louise Mountbatten (born 1889). To his first marriage was born Prince Gustavus Adolphus (born Apr. 22, 1906, killed in air crash Jan. 26, 1947), who was married in 1932 to Sihylla, Princess of Saxe-Coburg-Gotha; their offspring include a son, Carl Gustavus, the heir apparent, born April 30, 1946, and four daughters. Gustavus VI became King Oct. 30, 1950, on the death of his father, Gustavus V, who had reigned since 1907.

ECONOMIC CONDITIONS. *Agriculture.* Milk, butter, meat, grain, potatoes, and sugar beets are products of the broad fertile plains of the south; the north is limited to cattle raising and dairy farming.

The 1956 livestock estimates showed 284,000 horses, 2,324,000 cattle, 157,000 sheep, and 1,573,000 hogs.

Industry. The highly specialized machine industry produces separators, motors, electrical machines and apparatus, agricultural machinery, ball bearings, telephone equipment, and harbor works.

There are also large woolen, glass, and porcelain industries. Shipyards build for both Swedish and foreign fleets. The timber and woodworking industries are extensive.

Trade. Leading exports in 1956 were wood pulp (18%), machinery and apparatus (13%), timber (12%), and iron ore (10%). Leading customers were Britain (18%), western Germany (14%), Norway (8%), and the Netherlands (6%). Leading suppliers were western Germany (22%), Britain (14%), the United States (10%), and Norway (4%). The principal imports included machinery, petroleum and products, textiles and clothing, and automobiles.

NATURAL FEATURES AND RESOURCES. Sweden slopes eastward and southward from its peak elevation in the Kjölen mountains along the Norwegian border. In the north are mountains and many lakes. To the south and east are central lowlands, and south of them are fertile areas of forest, valley, and plain. Along Sweden's rocky coast, chopped up extensively by bays and inlets, are many islands, the largest of which are Gotland and Oland.

Minerals. Sweden's iron ore deposits (metal content 60%) are among the world's richest. Those in central Sweden produce principally for domestic use, while the ones in Lapland to the north are worked largely for export, with much of the output being shipped through the Norwegian port of Narvik. Other major minerals are copper, gold, lead, arsenic ore, manganese ore, and silver. Coal production (294,000 tons in

1956) is comparatively small; imports of several million tons a year are therefore necessary.

Forests and Fisheries. About 60 per cent of Sweden is forested, mostly conifers, and there are vast forest products industries in the north. Sweden supplies a large percentage of the world's mechanical and chemical pulp.

Switzerland (Republic)

(Schweiz-Suisse-Svizzera)

Area: 15,941 square miles.

Population (est. 1957): 5,117,000 (Swiss, 91.2%; German, 3.6%; Italian, 3.1%; French, .9%; others, 1.2%—figures by place of birth).

Density per square mile: 318.3.

President (1958): Thomas Holenstein.

Principal cities (est. Dec. 1956): Zürich, 422,000 (textiles, banking); Basel, 197,000 (rail center; Rhine port); Geneva, 164,400 (intellectual center); Bern, 158,700 (federal capital).

Monetary unit: Swiss franc.

Languages: German, 71.9%; French, 20.4%; Italian, 6.0%; Romansch, 1.1%; others, .6%.

Religions: Protestant, 57%; Roman Catholic, 41%; Jewish, .4%; others, 1.6%.

* The vice president ordinarily becomes president the next year. Vice-president in 1958: Paul Chaudet

HISTORY AND GOVERNMENT (See *World Politics* section).

ECONOMIC CONDITIONS. In 1956 the leading customers were western Germany (12%), the United States (10%), Italy (8%), France (6%), and Britain (5%). Leading suppliers were western Germany (24%), the United States (13%), France (11%), Italy (10%), and Britain (5%). Leading exports were machinery (21%), clocks and watches (20%), chemicals and drugs (14%), and textiles and clothing (12%). Switzerland has a world-wide reputation for its highly skilled work in the manufacture of precision instruments, especially watches.

The Rhine, navigable from Basel to the North Sea, is the principal inland waterway. Railways built over rugged terrain, entailing construction of many bridges and tunnels, total about 4,900 miles, mostly electrified.

NATURAL FEATURES: Most of Switzerland comprises a mountainous plateau bordered by the great bulk of the Alps on the south and by the Jura Mountains on the northwest. About a fourth of the total area of Switzerland is covered by scenic mountains and glaciers.

The country's largest lakes, Geneva, Constance (Boden See), and Maggiore, straddle the French, German-Austrian, and Italian borders, respectively.

Syria (Republic)

(Al-Jamhourya as-Souriya)

Egypt and Syria united in February, 1958, to form the United Arab Republic.

Area: 70,014 square miles.

Population (est. 1956): 3,970,000 (Arab, Armenian, Kurdish, Turkish, French).

Density per square mile: 57.5.

President: Gamal Abdel Nasser.

Principal cities (est. 1955): Damascus, 408,774 (capital); Aleppo, 407,613 (northern trading center); (est. 1954) Homs, 293,643 (farming, silk); Hama, 172,988 (Bedouin trading center).

Monetary unit: Syrian pound (£S).

Languages: Arabic, Aramaic, French.

Religions (est. 1949): Moslem, 85%; Christian, 13.9%; Jewish, 1%; others, .1%.

HISTORY. Ancient Syria was conquered by Egypt about 1500 B.C., and after that by Hebrews, Phoenicians, Assyrians, Chaldeans, Persians, and Greeks. From 64 B.C. until the Arab conquest in A.D. 636, it was part of the Roman Empire except during brief periods. The Arabs made it a trade center for their whole empire, but it suffered severely from the Mongol invasion in 1260 and fell to the Ottoman Turks in 1516. Syria remained a Turkish province until World War I.

A secret Anglo-French pact of 1916 put Syria in the French zone of influence. The League of Nations gave France a mandate over Syria after World War I, but the French were forced to put down several nationalist uprisings. In 1930, France recognized Syria as an independent republic, but still subject to the mandate. After nationalist demonstrations in 1939, the French High Commissioner suspended the Syrian Constitution. In 1941, British and Free French forces invaded Syria to eliminate Vichy control. During the rest of World War II, Syria was an Allied base. Again in 1945, nationalist demonstrations broke into actual fighting, and British troops had to restore order. Syrian forces met a series of reverses while participating in the Arab invasion of Palestine in 1948. After Mar. 30, 1949, when the government was overthrown by Husni Zayim, there were several army coups d'etat. That of Nov. 29, 1951, was engineered by Col. Adib Shishakly. Elected President in July, 1953, Shishakly was ousted on Feb. 25, 1954, by the army, which named Hachem Bey el-Attassi President. On Aug. 18, 1955, Shukri al-Kuwatly was elected President. In February, 1958, with the formation of the United Arab Republic through the union of Egypt and Syria, Gamal Abdel Nasser became President of the new Republic and Kuwably, who had been instrumental in the Egyptian-Syrian negotiations, retired from public office.

ECONOMIC CONDITIONS. Agriculture and animal breeding are the main industries. Only half the land is arable, and only a third is actually cultivated. Most crops require irrigation. Leading crops include sorghum, olives, cotton, wheat, barley, grapes, lentils, and tobacco. Stock raising is important among nomads.

Leading exports in 1956 were raw cotton (29%), wool (7%), and sheep (6%). Principal customers were Lebanon (21%), France (20%), and Italy (10%); leading suppliers, Britain (13%), the United States (11%), and western Germany (10%).

NATURAL FEATURES. Coastal Syria is a narrow plain. Back of that is a range of coastal mountains, and still farther inland is a steppe area. In the east is the Syrian Desert, and in the southeast next to Jordan is the Jebel Druze Range.

Thailand (Siam) (Kingdom)

(Muang Thai)

Area: 198,270 square miles.

Population (est. 1957): 21,076,000 (1937: Thal, 90%*; Chinese, 3.4%; Indian and Malayan, 3.4%; others, 3.2%).

Density per square mile: 104.3.

Ruler: King Rama IX.

Prime Minister: Sarit Thannarat.

Principal cities (census 1947): Bangkok, 620,830 (capital, chief port); Khon Kaen, 153,934 (trading center); Buri Ram, 129,000 (farming); Thonburi, 118,682 (market center).

Monetary unit: Baht.

Languages: Thai (Siamese), Chinese.

Religions (census 1947): Buddhist, 95%; Moslem, 4%; others, 1%.

* Including about 2,500,000 of Chinese descent born in Siam.

HISTORY. The Siamese first began moving down into their present homeland from the Asiatic continent in the sixth century A.D., and by the end of the thirteenth century ruled most of the western portion. During the next 400 years, the Siamese fought sporadically with the Cambodians to the east and the Burmese to the west. The British obtained recognition of paramount interest in Siam in 1824, and in 1896 an Anglo-French accord guaranteed Siamese independence.

A coup on June 24, 1932, changed the absolute monarchy into a representative government with universal suffrage. After five hours of token resistance on Dec. 8, 1941, Siam yielded to Japanese occupation and became one of the springboards in World War II for the Japanese campaign against Malaya. After the fall of its pro-Japanese puppet government in July, 1944, Siam pursued a policy of passive resistance against the Japanese, and on Aug. 16, 1945, after the Japanese surrender, Siam repudiated the declarations of war it had made against Britain and the United States in 1942.

By a treaty signed with Britain and India Jan. 1, 1946, Siam renounced all wartime acquisitions of Malayan territory and agreed that no canal linking the Gulf of Siam with the Indian Ocean would be cut across Siamese territory without British concurrence.

RULER. Rama IX, who was born Dec. 5, 1927, second son of Prince Mahidol of Songkhla, succeeded to the throne on June 9, 1946, when his brother, King Ananda Mahidol, died of a gunshot wound. He was married on April 28, 1950, to Princess Kitiyakara; their son, Vajiralongkorn, born July 28, 1952, is heir apparent.

ECONOMIC CONDITIONS. Almost 90 per cent of the population work at agriculture. Rice is the principal crop, the staple food and the leading export. It is the basis of Thailand's whole economy and the key to its prosperity. Next most important is rubber. Other products include coconuts, corn, tobacco, cotton, sesame, sugar cane, and soybeans. Livestock, poor in quality and quantity, is used mainly for hauling. Manufacturing is of little importance. Domestic business is largely controlled by Chinese.

Chief exports in 1956 were rice (41%), rubber (22%), and tin (7%). Leading customers were Malaya and Singapore (29%), the United States (25%), and Japan (9%); leading suppliers, Japan (17%), the United States (16%), and Hong Kong (16%).

NATURAL FEATURES AND RESOURCES. Thailand, about three-fourths the size of Texas, supports most of its population in the central alluvial plain which is drained by the Chaopaya River and tributaries. There are small deposits of many important minerals, and some precious stones. Only tin, gold, tungsten, and salt are in commercial production.

Almost 70 per cent of Thailand's total land area is forested. Teak, the main forest product, covers over one-third of this area, chiefly in the northern hill country.

Trieste

This former free territory (293 sq. mi.) on the northeastern Adriatic was divided *de facto* between Italy and Yugoslavia under the provisions of a memorandum of understanding signed Oct. 5, 1954. Most of the area (202 sq. mi.) went to Yugoslavia; the smaller (91 sq. mi.) but far more densely populated part, including the city of Trieste, went to Italy.

The free territory had been created under the provisions of the Italian peace treaty of 1947 and was to be under U. N. protection. It proved to be impossible to implement the treaty provisions, and

Yugoslav and Anglo-U. S. occupation forces had continued the occupation begun in 1945 of substantially the areas transferred to Yugoslavia and Italy, respectively, in 1954.

Tunisia (Republic)

Area: 48,332 square miles.

Population (est. 1957) 3,800,000. (1946, by place of birth: Tunisian, 89.9%; French, 4.5%; Italian, 2.6%; others, 3%). Density per square mile: 78.3.

President: Habib Bourguiba.

Principal cities (census 1956)*: Tunis, 410,000 (capital); Sfax, 65,635 (phosphate port); Sousse, 48,172 (seaport); Bizerte, 44,461 (seaport and naval base).

Monetary unit: Tunisian franc.

Languages: Arabic, French, Italian.

Religion: Predominantly Moslem.

HISTORY. Tunisia was settled by the Phoenicians and Carthaginians in ancient times. Except for an interval of Vandal conquest in A.D. 439-533, it was part of the Roman Empire until the Arab conquest of 648-69. Then it was ruled by various Arab and Berber dynasties until the Turks took it in 1570-74. The founder of the present dynasty, Hussein ben'Ali, was proclaimed sovereign by the occupation troops in 1705 and later succeeded in making the office hereditary, although subject to nominal Turkish sovereignty.

Throughout much of its history, Tunisia was essentially a pirate state, preying on Mediterranean shipping. In modern times, Italy became predominant economically in the area, but after French troops occupied the area in 1881, the Bey signed a treaty acknowledging a French protectorate.

Following the Allied landings in North Africa in 1942, Tunisia became a battleground with the Axis forces pinched between the British 8th Army advancing from Libya and the U. S., British and French forces from Algeria. The Axis units surrendered in May 1943, and Tunisia was turned over to the De Gaulle government.

Nationalist agitation forced France to grant internal autonomy to Tunisia in June 1955 and to recognize Tunisian independence and sovereignty in March 1956. Tunisia was admitted to the U. N. Nov. 12, 1956. The Constituent Assembly deposed the Bey on July 25, 1957, declared Tunisia a republic and elected Habib Bourguiba as the first President.

ECONOMIC CONDITIONS.

Agriculture is the chief industry. Over a quarter of the arable land is in wheat. Other important crops are barley, oats, corn, sorghum, beans, and peas. The Cap Bon region is largely devoted to citrus fruits, the southern oases to dates. In 1955

there were 3,352,100 sheep, 482,000 cattle, 1,853,000 goats and 202,000 camels.

Leading industries include flour milling, oil refining, lead smelting, and distilling. Native industries include the spinning and weaving of wool, and the making of pottery and leather goods.

Tunisia, Algeria, and France are under a single customs union for a number of products.

Leading exports in 1955 were phosphates (15%), wheat (12%), iron ore (8%), and olive oil (7%). France took 55% of the exports and supplied 75% of the imports.

NATURAL FEATURES AND RESOURCES. Tunisia, at the northernmost bulge of Africa, thrusts out toward Sicily to mark the division between the eastern and western Mediterranean. It is mountainous in the north, covered by plains in the east, and projects southward to the Sahara area.

Tunisia's extremely rich deposits of phosphates are mined principally in the Gafsa and Kef regions. The iron ore is of good quality (55% metal content). Other minerals are lead, zinc, mercury, manganese, copper, and salt.

Turkey (Republic) (Türkiye Cumhuriyeti)

Area: 296,185 square miles.

Population (est. 1956): 24,797,000 (Turkish, 94%; Greek, 2.2%; Bulgarian, 1.4%; Yugoslavian, .9%; others, 1.5%).*

Density per square mile: 83.7.

President: Celâl Bayar.

Premier: Adnan Menderes.

Principal cities (census 1955): Istanbul, 1,214,616 (chief port, commercial center); Ankara, 453,151 (capital); Smyrna, 286,310 (seaport); Adana, 172,465 (agricultural center); Bursa, 131,336 (silk, carpets); Eskişehir, 122,755 (trading center).

Monetary unit: Turkish pound (£T).

Languages: Turkish, Greek, Bulgarian.

Religions: Moslem, 98.6%; others, 1.4%.

* 1935 by place of birth.

HISTORY AND GOVERNMENT. The Ottoman Turks first appeared in the early thirteenth century A.D. Under the leadership of their Sultans, they gradually spread their hegemony over most of the Near East and the Balkans, capturing Constantinople in 1453 and storming the gates of Vienna in the seventeenth century. At the height of its power, the empire stretched from the Persian Gulf to the frontiers of Poland and from the shores of the Caspian Sea to Oran in Algeria.

The defeat of the Turkish navy at Lepanto in 1571 by the Holy League and of Turkish forces besieging Vienna in 1683 portended the decline of Ottoman power,

reducing Turkey to the status of a pawn in Europe's political maneuvers. Russia moved into the Balkans in the eighteenth century and made herself official protector of the Balkan Christians. Fear of a Russian drive on Constantinople prompted England and France to declare war on Russia, and the Crimean War (1853-56) followed. As a result of the Russo-Turkish war (1877-78), Bulgaria became practically independent, and Rumania and Serbia threw off their nominal allegiance to the sultan. Further defeats were suffered by Turkey in a war with Italy (1911-12) and in the Balkan Wars (1912-13). Meanwhile, a revolt led by the Young Turks, an organization of youthful liberals, had forced the abdication of Sultan Abdul-Hamid in 1909 and established a constitutional regime.

On Aug. 2, 1914, at the outbreak of World War I, a secret alliance was signed between Germany and Turkey, whose army was advised by a German military mission, and in September the Allies declared war on Turkey. Turkish forces successfully defended the strategic Dardanelles, but British forces seized Palestine, Mesopotamia, and Syria; and the Hejaz revolted. By 1918 Allied forces held the territory along the Dardanelles and the Bosphorus, and later Greek forces occupied Smyrna.

In 1919 the new Nationalist party, headed by Mustafa Kemal, was organized to resist the Allied occupation, and in 1920 a National Assembly elected Mustafa Kemal President of both the Assembly and the government. Under his leadership, the Nationalist government was recognized by foreign powers, the Greeks were driven out of Smyrna, and other Allied forces were withdrawn. The present Turkish boundaries (with the exception of Alexandretta, ceded to Turkey by France in 1939) were fixed by the Treaty of Lausanne (1923) and later negotiations. The caliphate and sultanate were separated and the sultanate abolished on Oct. 1, 1922. On Oct. 29, 1923, Turkey formally became a republic with Mustafa Kemal, who took the name of Kemal Atatürk, as its first President. He proceeded to carry out an extensive program of reform, modernization, and industrialization.

The Montreux Convention (1936) gave Turkey sole responsibility for the defense of the Dardanelles.

General Ismet İnönü was elected to succeed Kemal Atatürk on the latter's death in 1938 and was re-elected in 1939, 1943, and 1946, but was defeated in 1950 and succeeded by Celâl Bayar. On Oct. 19, 1939, a mutual assistance pact was concluded with Britain and France. Turkey followed a neutral course during most of World War II, but on Feb. 23, 1945, she declared war on Germany and Japan, but took no active part in the conflict. After

the abrogation of the Soviet-Turkish non-aggression pact in March, 1945, Turkey was subjected to Soviet pressure for a share in the control of the Dardanelles. To assist Turkey in effecting modernization necessary for the preservation of its national integrity, the United States in 1947 agreed to advance \$100,000,000, all of which was to be used for the armed forces or to a lesser extent for economic projects directly related to Turkish defense. Turkey also received aid under the European Recovery Program. It became a full member of NATO in 1952. (For further information on Turkish foreign policy and U. S. economic aid see article on the Middle East in *World Politics* section.)

The Constitution, as amended in 1937, defines the state as "republican, nationalist, populist, étatist, secular, and revolutionary." The President is chosen from the deputies of the National Assembly; his term of office is identical with the life of each Assembly. The members of the Assembly are elected by universal suffrage for a term of four years. According to the Turkish Constitution, the Assembly exercises the executive power through the President and the Council of Ministers (cabinet) which is appointed by him.

The Republican People's party, which had been in power since 1923, was overwhelmingly defeated in free elections held May 14, 1950, by the Democratic party. The latter was retained in office by an even wider margin in elections held May 2, 1954, in which it won 503 seats in the Assembly.

In the October, 1957, elections the Democratic Party obtained a total of 424 seats in the Grand National Assembly, thus losing 79 seats since the previous election, while the Republican People's Party gained a total of 178 seats. The Liberal Party and the Republican National Party each won 4 seats.

ECONOMIC CONDITIONS. *Agriculture and Industry.* Agriculture is the principal economic activity, engaging about 65 per cent of the population. Only about 20 per cent of the land is under cultivation, but the government has made great efforts to modernize and improve farming. The most important cash crop is tobacco. Cotton is grown in the south of Asia Minor while figs come exclusively from the Smyrna region. Grain crops, with 1956 production in metric tons, include wheat and barley. Turkey is a leading exporter of olive oil; the Brusa region and the Ionian coast are the principal areas of cultivation. Opium poppies are grown in the Smyrna, Malatia, and Tokat regions.

Turkey is rich in livestock. The most important animal is the goat, of which there were 21,045,000 in Dec., 1953, including the valuable Angora, which thrives on

the uplands of the plateau. There were also (Sept., 1956) 26,444,000 sheep, 11,059,000 cattle, and 1,214,000 horses. Wool production in 1956 was 20,000 metric tons, clean basis.

Staple industries have been established in iron, steel, textiles, paper, glass, sugar, and cement. A large proportion of the factories are government-operated. Istanbul is the major industrial area.

Principal customers in 1956 were the United States (20%), western Germany (17%), Italy (10%), and Britain (8%). Leading suppliers were western Germany (24%), the United States (21%), Britain (8%), and Italy (6%). Chief exports were tobacco (31%), hazelnuts (10%), cotton (9%), and chrome (8%); leading imports, machinery, iron, steel, fuel, and oil.

NATURAL FEATURES AND RESOURCES. Turkey is divided into two natural areas by the historic waterway formed by the Dardanelles, the Sea of Marmara, and the Bosphorus.

Turkey in Europe comprises an area about equal to the state of Massachusetts. It is hilly country drained by the Maritsa River and its tributaries. Almost all the population is concentrated in and near the two important towns, Istanbul (Constantinople) and Edirne (Adrianople). Turkey in Asia, or Anatolia, about the size of Texas, is roughly a rectangle in shape with its short sides on the east and west. Its center is a treeless plateau rimmed by mountains.

Minerals and Forests. Turkey's rich mineral resources are still comparatively unexploited. Deposits of copper are found in the large field at Arghana, near the Iraq-Syrian frontier. Turkey is also relatively rich in coal, with large deposits in the Ereğli region on the Pontic coast some 150 miles from Istanbul. A virtual world monopoly is enjoyed in meerschaum, found in the Eskişehir district. Other important minerals include chromite, petroleum, manganese ore, iron ore (metal content 65%), emery, and antimony.

Union of Soviet Socialist Republics

Area: 8,602,700 square miles.

Population (est. April 1956)*: 200,200,000 (1939: Great Russian, 58.4%; Ukrainian, 16.6%; Byelorussian, 3.1%; Uzbek, 2.9%; Tartar, 2.5%; Kazakh, 1.8%; Armenian, Azerbaijani, Georgian, each 1.3%; more than 100 others, 10.8%).

Density per square mile: 23.3.

Chairman of Presidium of Supreme Council: Klementi E. Voroshilov.

Premier: N. S. Khrushchev.

Principal cities (est. April 1956)*: Moscow, 4,389,000 (capital); Leningrad, 2,814,000 (industrial center, shipbuilding); Kiev

991,000 (Industrial center, Ukraine); Baku, 901,000 (oil center, Azerbaijan); Kharkov, 877,000 (iron and steel, coal); Gorki, 876,000 (Industrial, transportation center); Tashkent, 778,000 (textiles, tobacco); Kuybyshev, 760,000 (Industrial center, Volga port); Novosibirsk, 731,000 (Siberian Industrial center); Sverdlovsk, 707,000 (Ural Industrial center); Tbilisi, 635,000 (building materials, tobacco); Stalino, 625,000 (coal, metallurgy).

Monetary unit: Rouble.

Languages: See Population, above.

Religions: Russian Orthodox (predominant), Moslem, Roman Catholic, Jewish, Lutheran.

* Official estimate of the Central Statistical Board of the Soviet Council of Ministers.

HISTORY. The history of Russia begins with the perhaps legendary figure of the Viking, Rurik, who according to tradition came to Russia in A.D. 862 and founded the first Russian dynasty in Novgorod. The various tribes were united by the spread of Christianity in the 10th and 11th centuries; Vladimir "the Saint" was converted in 988. During the 11th century the grand dukes of Kiev held such centralizing power as existed. In 1240 Kiev was destroyed by the Mongols, and the Russian territory was split into numerous smaller dukedoms, out of which three large centers emerged—Galicia, Moscow and Novgorod. The early dukes of Moscow extended their dominions through their office of tribute collector for the Mongols.

In the late 15th century, Ivan III, the reigning duke, acquired the rival kingdoms of Novgorod and Tver and threw off the Mongol yoke. Ivan IV, the Terrible (1533-84), first Muscovite duke to assume the title of Tsar, is considered to have founded the Russian State. He crushed the power of rival princes and boyars (great land-owners), but Russia remained largely medieval until the reign of Peter the Great (1682-1725), grandson of the first Romanov Tsar, Michael (1613-45). Peter made extensive reforms aimed at westernization, and through his defeat of Charles XII of Sweden at the Battle of Poltava (1709), he extended Russia's boundaries to the west. Catherine the Great (1762-96) continued Peter's westernization program and also expanded Russian territory, acquiring the Crimea and part of Poland. During the reign of Alexander I (1801-25), Napoleon's attempt to subdue Russia was defeated (1812-13), and new territory was gained, including Finland (1809) and Bessarabia (1812). Alexander was the originator of the Holy Alliance which crushed for a time Europe's rising liberal movement.

Alexander II (1855-81), pushed Russia's borders to the Pacific and into central Asia. Serfdom was abolished in 1861, but heavy restrictions were imposed on the emancipated class. Revolutionary strikes

following Russia's defeat in the war with Japan forced Nicholas II (1894-1917) to grant a representative national body (Duma), elected by narrowly limited suffrage. It met for the first time in 1906. Nicholas continued in his reactionary course, however, and the overwhelmingly liberal Duma had little or no influence in the government.

World War I demonstrated the corruptness and inefficiency of the tsarist regime, although the call of patriotism held the poorly equipped army together for a time. Disorders broke out in Petrograd (now Leningrad) in March, 1917, and, following the winning over of the Petrograd garrison, the revolution was in full swing. Nicholas was forced to abdicate and was later killed by the revolutionists. A provisional government was formed, composed of both conservative and radical elements. This government, under the successive premierships of Prince Lvov and Alexander Kerensky, a Menshevik or moderate socialist, soon lost ground to the radical or Bolshevik wing of the Socialist Democratic Labor party. Finally, on Nov. 7, 1917, came the Second Revolution, engineered by Nikolai Lenin and Leon Trotsky. The humiliating Treaty of Brest-Litovsk (March 3, 1918) concluded the war with Germany, but civil war and intervention by foreign powers prevented the new Communist government from gaining control of all Russia until 1920. A brief war with Poland occurred in 1920, but it resulted in Russian defeat.

Soviet foreign policy—first featured by friendship with Germany and antagonism toward England and France and then, after Hitler's rise to power in 1933, by participation in the League of Nations and an anti-Fascist program—took another abrupt turn on Aug. 24, 1939, with the signing of a Soviet-German nonaggression pact. Territory seized from Poland (Sept. 1939) became part of the Ukrainian and Byelorussian S.S.R.'s; that secured from Finland at the conclusion of the Finnish war of 1939-40, part of the Karelian S.S.R. set up March 31, 1940; that secured from Rumania (Bessarabia and northern Bukovina), part of the Moldavian S.S.R. set up Aug. 2, 1940; and finally the formerly independent states of Estonia, Latvia, and Lithuania, occupied in June 1940, were absorbed into the U.S.S.R. as the 14th, 15th, and 16th Soviet Republics. The latter annexations have not been recognized by the United States, Britain, and the majority of other nations.

Immediately following their attack (June 22, 1941), the Germans seized approximately 500,000 square miles of Soviet territory, but Soviet forces resisted stubbornly, aided by increasing amounts of matériel from the United States and Brit-

ain. The great Soviet counteroffensive in the Stalingrad area (Nov., 1942-Feb., 1943) marked the turning point. Soviet troops gradually pushed the Nazis back and unleashed their final great offensive on Jan. 12, 1945. The nonaggression pact with Japan (1941) was denounced in April, 1945, and, following the declaration of war on Japan (Aug. 8, 1945), Soviet Far Eastern forces quickly occupied Manchuria, Karafuto, and the Kuriles.

(For an analysis of subsequent developments see *World Politics* section.)

Postwar territorial acquisitions include the Carpatho-Ukraine (12,617 sq. mi.) obtained from Czechoslovakia June 29, 1945, incorporated into the Ukrainian S.S.R.; the Republic of Tannu Tuva in central Asia (64,000 sq. mi.) incorporated early in 1945 into the R.S.F.S.R.; Karafuto or southern Sakhalin (13,935 sq. mi.) and the Kurile Islands (3,944 sq. mi.), occupied by Soviet troops in Aug., 1945, and incorporated into the R.S.F.S.R.; the northern part of eastern Prussia (about 7,000 sq. mi.), placed under *de facto* Soviet administration at the Potsdam Conference and incorporated into R.S.F.S.R.; the Petsamo district of Finland, obtained *de jure* under the 1947 treaty and incorporated into the R.S.F.S.R.; and Poland east of the Curzon Line (69,860 sq. mi.), under terms of the Soviet-Polish treaty of Aug. 16, 1945, incorporated into the Ukrainian and Byelorussian S.S.R.'s.

Details concerning the constituent republics of the U.S.S.R. are as follows:

Republic and capital	Area sq. mi.	Population Est. April 1956* (thousands)
Russian S.F.S.R. (Moscow)	6,592,443†	113,200†
Ukraine (Kiev)	232,618	40,600
Kazakhstan (Alma Alta)	1,063,242	8,500
Byelorussia (Minsk)	80,154	8,000
Uzbekistan (Tash- kent)	157,336	7,300
Georgia (Tbilisi)	29,488	4,000
Azerbaijan (Baku)	33,089	3,400
Lithuania (Vilnius)	25,174	2,700
Moldavia (Chisinau)	13,050	2,700
Latvia (Riga)	24,903	2,000
Kirghizia (Frunze)	76,023	1,900
Tadzhikistan (Sta- linabad)	55,058	1,800
Armenia (Erivan)	11,506	1,600
Turkmenistan (Ash- khabad)	187,181	1,400
Estonia (Tallinn)	17,413	1,100

* Official estimate of the Central Statistical Board of the Soviet Council of Ministers. † Including the Karelo-Finnish S.S.R., incorporated into the R.S.F.S.R. in July 1956.

COMMUNIST PARTY. (For an assessment of the Communist Party and the structure of government see *World Politics* section.)

DEFENSE. The land, air, and sea forces

are under control of the Defense Ministry. Military service is compulsory; the initial training period varies from two to five years. The armed forces, which were estimated to have reached a peak of more than 15,000,000 men in 1945, numbered between 4,350,000 and 4,600,000 men in 1956, and were believed to have been reduced to approximately 3,400,000 by 1957. The strength of the army, including MVD and MGN troops (secret police organizations with paramilitary formations), was between 2,800,000 and 3,200,000 in 1956. The air force had between 750,000 and 800,000 men and 20,000 planes, including advanced models of jet fighters and bombers. The navy had between 600,000 and 750,000 men.

Information about the Red fleet is as vague as that about the army and air force. In Dec., 1956, it was believed to have three battleships, thirty-two cruisers, 150 destroyers, 250 frigates and escort vessels, 475 submarines, and many coastal and river craft, patrol vessels, minesweepers, and various other small ancillary craft. Naval construction was emphasized in postwar five-year plans.

ECONOMIC CONDITIONS. *Agriculture.* Formerly an agricultural country, the Soviet Union has grown since about 1920 into an industrial-agricultural power, with agriculture making great advances at the same time.

The Union's diverse climate permits the growing of the most varied crops.

The progress of the livestock industry during the fifth Five-Year Plan was particularly disappointing.

Industry. Almost all industry in the Soviet Union is carried on by organizations owned or controlled by the state. Industrialization of the country has been a major objective of its leaders. Completion of the first two Five-Year Plans (1928-32, 1933-37) and of most of the third (1937-42) saw a great increase in the volume and versatility of Soviet industry.

The large-scale evacuation of plants to the East and the construction of new plants there during World War II, coupled with the eastward orientation of industry prior to the war, has shifted the balance to newly developed regions in Central Asia and Siberia from the Moscow-Leningrad area and the Ukraine. The new regions are now the center of Soviet industrial power accounting for almost all magnesium and aluminum production, and more than 60 per cent of the pig iron and steel production. The production of consumers' goods continues to be subordinate to the production of heavy capital equipment.

Large increases in production were reported under the fourth and fifth Five-Year Plans and further increases were projected under the sixth Five-Year Plan.

Foreign Trade. Soviet foreign trade is a state monopoly, and foreign goods are purchased in accordance with an over-all plan conducted under the supervision of the Foreign Trade Ministry.

No complete trade statistics have been issued since 1938.

According to official reports, the main exports in 1955 were machines and equipment 22.1%; metals 15.2%; cotton 11.3%; grain 10.3%; and petroleum and products 6.4%; chief imports, machines and equipment 33.0%; textile raw materials 6.0%; metals 5.3%; ores and concentrates 4.2%; and meat 4.2%.

NATURAL FEATURES AND RESOURCES.

The U.S.S.R. is the largest unbroken political unit in the world, occupying more than one-seventh of the land surface of the globe. The greater part of its territory is a vast plain stretching from eastern Europe to the Pacific Ocean. This plain, relieved only occasionally by low mountain ranges (notably the Urals), consists of three zones running east and west: (1) the frozen marshy tundra of the Arctic; (2) the more temperate forest belt; and (3) the steppes or prairies to the south, which in southern Soviet Asia become sandy deserts. The topography is more varied in the South, particularly in the Caucasus between the Caspian and Black Seas, and in the Tien-Pamir mountain system bordering Afghanistan, Sinkiang, and Mongolia. Mountains (Stanovoi and Kolyma) and great rivers (Amur, Yenisei, Lena) also break up the sweep of the plain in Siberia.

Minerals. The U.S.S.R. is probably the richest country in the world in mineral resources, containing deposits of almost every known mineral. It ranks among the top producing nations in coal, chromite, iron ore, petroleum, gold, copper, manganese, and other products. The richest mineral region is that of the Ural Mountains, which lacks only good coking coal.

Forests. With a forested area of about 2,500,000,000 acres, the U.S.S.R. possesses a large proportion of the world's timber reserves. Most of the forested area is in Siberia, but there are also valuable stands in the Caucasus. Plans were made late in 1948 for the planting of huge forest belts 60 to 90 mi. wide in the southern steppes to protect fertile food-producing areas from the dry winds of the central Asian and Caspian deserts.

Fisheries and Furs. The rivers, lakes, and surrounding seas (except the Black Sea) are rich in fish. The acquisition of former Japanese fisheries in Karafuto and the Kuriles greatly increased output of the Far Eastern fish industry. Trapping is an important secondary industry, especially in eastern Siberia.

UNITED ARAB REPUBLIC. See Egypt, Syria

UNITED ARAB STATES. See Yemen

Uruguay (Republic)

(República Oriental del Uruguay)

Area: 68,369 square miles.

Population (est. 1956): 2,650,000 (1950: white, 89.1%; others, 10.9%).

Density per square mile: 41.0.

President of Federal Council (1957-58): Arturo Lezama.

Principal cities (est. 1954): Montevideo, 810,969 (capital); Mercedes, 44,900 (farming center); Salto, 44,900 (cattle raising); Paysandú, 44,000 (meat packing).

Monetary unit: Peso.

Language: Spanish.

Religion: Roman Catholic.

HISTORY. Juan Diaz de Solís, a Spaniard, discovered Uruguay in 1516, but the Portuguese were first to settle it when they founded Colonia in 1680. After a long struggle, Spain wrested the country from Portugal in 1778. Uruguay revolted against Spain in 1811, only to be conquered in 1816-20 by the Portuguese from Brazil. Independence was reasserted with Argentine help in 1825, and the republic was set up in 1830.

GOVERNMENT. Under the 1934 Constitution, as amended in 1951, the executive power is exercised by a Federal Council of nine members, six of the majority and three of the minority party, normally elected for 4-year terms. The presidency of the Council is rotated annually. There is a bicameral Congress composed of a 99-member Chamber of Deputies and a 31-member Senate elected for four years. All literate citizens of Uruguay may vote, including women, who may also sit in congress.

ECONOMIC CONDITIONS. Cattle, sheep, meat, and wool dominate the Uruguayan economy. With nearly 80 per cent of its grassy land devoted to grazing, in 1956 there were 22,954,000 sheep and 7,305,000 cattle. Wool production in 1956 was 53,000 metric tons, clean. With only about 5 per cent of the land cultivated, a third of this grows wheat, the chief crop (1956-57: 750,000 metric tons).

Uruguay slaughters more than two million head of cattle and sheep a year, and meat processing is the largest manufacturing industry. There are many modern plants for chilling or freezing meat, and plants for liquid extract of beef.

In value, wool was the chief export (42%) in 1956, followed by wheat (14%), meat (9%), and hides (6%). Chief cus-

tomers were the Netherlands (24%), the United States (12%), and Brazil (11%); leading suppliers, the United States (16%), Brazil (12%), and Western Germany (7%). Leading imports included machinery, vehicles, gasoline, textiles, and sugar.

NATURAL FEATURES. Uruguay, a low rolling plain in the south and a low plateau in the north, has a 120-mile Atlantic shore line, a 235-mile frontage on the Río de la Plata, and 270 miles on the Uruguay River, its western boundary.

Vatican City State (Stato Città Vaticana)

Area: 108.7 acres.

Population (est. 1952): 947 (Italian, 85%; Swiss and others, 15%).

Ruler: The Supreme Pontiff.

Monetary unit: Lira.

Languages: Latin, Italian.

Religion: Roman Catholic.

The Vatican City State, sovereign and independent, is situated on the Vatican hill on the right bank of the Tiber in northwest Rome. The area has been intimately associated with the history of the Roman Catholic Church since the time of the martyrdom of St. Peter. From it the Pope exercised temporal sway for many centuries over a large part of central Italy; in 1859 the Papal States comprised an area of some 17,000 sq. mi. During the struggle for Italian unification, from 1860 to 1870, most of this area became part of Italy.

By an Italian law of May 13, 1871, the temporal power of the Pope was abrogated, and the territory of the Papacy was confined to the Vatican and Lateran palaces and the Villa of Castel Gandolfo. The Popes consistently refused to recognize this arrangement, and by the Lateran Treaty of Feb. 11, 1929, between the Vatican and the Kingdom of Italy, the exclusive dominion and sovereign jurisdiction of the Holy See over the city of the Vatican was again recognized, thus restoring the Pope's temporal authority over the area. Accompanying the treaty were conventions regulating the position of the Catholic Church in Italy and providing for reimbursement to the Vatican in final settlement of the claims of the Holy See against Italy for the loss of temporal power in 1870-71.

The Supreme Pontiff Pius XII (Eugenio Pacelli), died Oct. 9, 1958. He was born at Rome, March 2, 1876, proclaimed Cardinal in 1929, and elected Pope on March 2, 1939. He was crowned on March 12, 1939.

The Pope has full legal, executive, and judicial powers. Executive power over the area is in the hands of a Governor appointed by the Pope and exclusively responsible to him.

The College of Cardinals is the Pope's chief advisory body, and upon his death the cardinals elect his successor for life. The cardinals themselves are created for life by the Pope. When complete, the College consists of seventy members.

The central administration of the Roman Catholic Church throughout the world is carried on in the Vatican by twelve congregations, three tribunals, and four offices.

In its diplomatic relations with foreign countries, the Vatican is represented by the Papal Secretary of State. In 1956 the Vatican maintained diplomatic relations with forty states through its papal nuncios (ambassadors) and inter-nuncios (ministers). Apostolic Delegates, representatives without accredited rank, are maintained in a number of other countries throughout the world.

The Vatican has its own railway station, postal facilities, coinage, newspaper, radio, and television system. In addition to the Vatican itself, which includes St. Peter's Square, extraterritorial rights are enjoyed in thirteen buildings in the city of Rome outside Vatican City.

Venezuela (Republic) (República de Venezuela)

Area: 352,143 square miles.

Population (est. Dec. 1955): 6,134,000* (mestizo, 65%; white, 20%; Negro, 8%; Indian, 7%).

Density per square mile: 17.0*

President: Admiral Wolfgang Larrazabal.

Principal cities (est. Dec. 31, 1956): Caracas, 749,303 (capital); Maracaibo, 389,723 (oil); Barquisimeto, 164,908 (sugar, coffee, mining); Valencia, 124,376 (farming center).

Monetary unit: Bolívar.

Language: Spanish.

Religion: Roman Catholic.

* Excludes tribal Indians.

HISTORY. Venezuela, a third larger than Texas, is the world's second greatest producer of oil, outranked only by the United States. Simón Bolívar, who led the liberation of much of the continent from Spain, was born in Caracas.

Columbus discovered Venezuela on his third voyage in 1498. A subsequent Spanish explorer, for reasons of his own, gave the country its name, meaning "Little Venice." There were no important settlements until Caracas was founded in 1567. With Bolívar taking part, Venezuela was one of the first South American colonies to revolt against Spain in 1810, but it was not until 1821 that independence was won. Federated at first with Colombia and Ecuador, the country set up a republic in 1830, and then sank for many decades into a condition of revolt, dictatorship, and corruption.

GOVERNMENT. Venezuela comprises twenty states, a federal district and, two territories. Under the 1953 Constitution (Venezuela's 21st) the Congress consists of a 42-member Senate elected by state legislatures and a 104-member Chamber of Deputies elected directly. The President is elected by popular vote for five years.

ECONOMIC CONDITIONS. Agricultural production has failed to keep pace with the food needs of the rapidly increasing population. The principal crop is coffee, grown on 60,000 plantations on the slopes of the coastal mountains. Stock raising, which is centered east of Lake Maracaibo, and on the llanos, is important.

There are few industries, the most important being woodworking, cotton textiles, and tobacco products. Electric power is plentiful. In 1956, 228,260,000 bbl. of crude petroleum were refined. Venezuela's first steel plant is under construction near Puerto Ordaz.

Oil, most of which is found on the northwest shore of Lake Maracaibo, is by far the dominant factor in the economy. It accounts for 95 per cent of exports, gives the country a big foreign trade balance and a treasury surplus.

In 1956 the United States supplied over 59% of the imports, which included for the most part machinery and equipment, metals and manufactures, foodstuffs, beverages, and textiles. In addition to petroleum and products (93%), chief exports in 1956 were iron ore, coffee and, cacao. Most of the crude oil goes to the United States via the islands of Curaçao and Aruba, refining centers in the West Indies.

NATURAL FEATURES AND RESOURCES. An unusual setting of mountain systems breaks Venezuela into four distinct areas: (1) the Maracaibo lowlands; (2) the mountainous region in the north and northwest; (3) the Orinoco basin with the llanos (vast grass-covered plains) on its northern border and great forest areas in the south and southeast; (4) the Guiana highland, south of the Orinoco, accounting for nearly half the national territory. About 80 per cent of Venezuela is drained by the Orinoco and its 400 tributaries.

Oil production in 1956 was 889,180,000 barrels. Venezuela has gold mines in the region southwest of the Orinoco delta. A subsidiary of Bethlehem Steel Corp. began the mining of iron ore in the El Pao area south of the Orinoco river in 1950, while a U. S. Steel Corp. subsidiary is exploiting a rich "iron mountain" south of Ciudad Bolívar on the Orinoco.

Republic of Vietnam

Area: 65,726 square miles.
Population (est. 1956): 12,366,000.
Density per square mile: 188.1.
President: Ngo Dinh Diem.

Principal cities (est. 1956): Saigon-Cholon, 1,794,360 (capital, chief port); Tourane, 100,978 (port, naval base); Huế, 90,682 (rice, sawmills).

Monetary unit: Piastre.*

Languages: Annamese, French.

Religions: Buddhist, Christian.

* 1 piastre = 10 French metropolitan francs.

The young republic of Vietnam comprises the southern part of the former state of Việt-Nam and includes all of the former state of Cochín-China and the southern part of Annam. It is a member of the French Union, but its new status has not been fully defined.

About 90% of the people derive their livelihood from agriculture, most of them being employed in growing rice and rubber. The Mekong delta is one of the leading rice-exporting areas in the world. Production in 1956 included rice, 3,514,620 metric tons; rubber, 70,235 tons. Other crops are tea, coffee, maize, tobacco, kapok, and pepper. Water buffalo are used chiefly for draft purposes.

Factories, centered in Saigon-Cholon, are small and process goods for local consumption and agricultural and forest products for export. Most important are the rice and sawmills.

In 1956 the chief export was rubber (86%). Leading customers were France (67%), the United States (19%), and Cambodia (4%); leading suppliers, the United States (28%), Japan (26%), and France (23%).

Mineral resources are limited. Coal is most important; some deposits of phosphates and gold exist.

Democratic Republic of Vietnam

Area: 63,360 square miles.

Population (est. 1955): 12,500,000.

Density per square mile: 197.3.

President: Ho Chi-minh.

Premier: Pham Van-dong.

Principal cities (est. 1953): Hanoi, 297,900 (capital); Haiphong, 188,600 (chief port).

Monetary unit: Dong.

Languages: Annamese, Chinese, French.

Religions: Buddhist, Christian.

The Democratic Republic of Vietnam comprises the northern part of the former state of Việt-Nam and includes all of the former state of Tongking and the northern part of Annam. It is no longer a part of the French Union. The government of the republic is organized along typical communist lines.

The economy is based on agriculture and mining. The chief crop is rice, grown chiefly in the Red River delta and supplying in most years the requirements of the population. Other crops are maize, arrow-

root, sugar cane, tea, coffee, tobacco, and sweet potatoes. Industry is not highly developed. There are important coal mines in the Quangyen basin near Haiphong. Tin, limestone, and gold also are produced. A railway runs south from Hanoi along the coast and in the north connects through Langson with the railway network of Communist China.

Yemen (Kingdom)

Federated in March, 1958, with the United Arab Republic (Egypt and Syria) to form the United Arab States.

Area: c. 75,290 square miles.
Population (est. 1953): 4,500,000.
Density per square mile: c. 59.8.
King: Ahmad ibn Yahya Hamid ed-Din.
Premier: Seif ul-Islam el-Badr.
Principal cities (est.): Sana, 50,000 (capital); Hodeida, 30,000 (chief port); Taiz, 12,000 (seat of government).
Monetary unit: Riyal.
Language: Arabic.
Religion: Moslem.

The history of Yemen dates back to the Minaean kingdom (1,200-650 B.C.). It accepted Islam in 628 A.D. and in the tenth century came under the control of the Rassite dynasty of the Zaidi sect, which still rules. The Turks occupied the area from 1538 to 1630 and from 1849 to 1918. Its sovereign status was confirmed by treaties signed with Saudi Arabia and Britain in 1934. Yemen was admitted to U. N. membership in 1947.

Yemen is an absolute monarchy. The present ruler came to the throne in 1948, after insurgents murdered his father. Nearly all the population of the country is settled and nomadism prevails only in the lowlands.

Unlike most of Arabia, the Yemeni highlands are well adapted to agriculture; they produce grain, fruit, vegetables, and Mocha coffee. Stock raising flourishes, particularly in the lowlands. Exports include coffee and hides.

Yugoslavia (Republic)

(Federaciona Narodna Republika Jugoslavija)

Area: 98,700 square miles.
Population (est. 1956): 17,886,000 (1953: Serbian, 41.7%; Croat, 23.5%; Slovene, 8.8%; Macedonian, 5.3%; Albanian, 4.4%; others, 16.3%).
Density per square mile: 180.3.
President: Josip Broz (Tito).
Principal cities (census 1953): Belgrade (Beograd), 469,988 (capital); Zagreb, 350,452 (Croat commercial center); Ljubljana, 138,211 (Slovenian industrial center); Sarajevo, 135,657 (Bosnian manufacturing

center); Skopje, 121,551 (capital, Macedonia); Subotica, 115,402 (wheat).

Monetary unit: Dinar.

Languages: Serbo-Croat, Slovene, Macedonian (all official).

Religions (est. 1952): Greek Orthodox, 49.6%; Roman Catholic, 36.8%; Moslem, 12.5%; others, 1.1%.

HISTORY AND GOVERNMENT. Yugoslavia, fronting on the Adriatic Sea opposite Italy, was formed in 1919 out of some of Europe's oldest trouble spots in the Balkans. After a brief and unstable history of twenty-five years, it emerged from World War II as a Russian satellite.

The 1919 components of Yugoslavia were the old kingdoms of Serbia and Montenegro, and the following: Bosnia-Herzegovina, formerly administered jointly by Austria and Hungary; Croatia-Slavonia, which had had limited autonomy under Hungary; and Slovenia and Dalmatia, formerly administered by Austria.

Alexander I, son of King Peter of Serbia, became the first King of the new country on Aug. 16, 1921. His reign was a rocky one because the Croats, under Dr. Stephen Radić, unceasingly sought autonomy. Finally, a Croat assassinated Alexander in Marseilles, France, in 1934, and since his son Peter was a minor, a regency was set up under Prince Paul, the new King's uncle.

After pursuing an increasingly pro-Axis policy under the regent, Yugoslavia signed the Axis Pact on March 25, 1941; this caused the overthrow of the government two days later. On April 6 the country was invaded by the Nazis and was speedily occupied. While the King and government fled to the Near East and later to London, Yugoslavia was divided into German, Italian, Hungarian, and Bulgarian occupation zones.

Inside Yugoslavia, the Axis occupation was fought by two guerrilla armies—the Chetniks under Draža Mihailović, who supported the monarchy; and the Partisans under Marshal Tito (Josip Broz), who leaned toward Russia. These two groups fought not only the Germans, but also each other. In November, 1943, Tito established an Executive National Committee of Liberation to act as a provisional government, thus repudiating King Peter.

In the elections of Nov. 11, 1945, Tito's forces won overwhelmingly, partly because the monarchist factions boycotted the balloting. Convening on Nov. 29, the new Assembly abolished the monarchy and set up the Federal People's Republic of Yugoslavia. Tito was Prime Minister, and his government won recognition from Britain and the United States.

The Tito government embarked upon an internal policy of ruthless oppression and elimination of opposition factions, includ-

ing the summary trial and execution of Mikhailovic in 1946.

Soviet support enabled the nation to secure most of Italian Istria under the 1947 peace treaty, but efforts to secure sovereignty over the key port of Trieste were unsuccessful. Zone B of the former free territory of Trieste was, however, transferred to Yugoslavia in Oct., 1954.

Tito was elected President under the new Constitution on Jan. 14, 1953.

(For Tito's 1948 break with the U.S.S.R. and subsequent events, see Satellite Europe and Yugoslavia in *World Politics* section.)

Yugoslavia is a federal republic composed of six units—Serbia (which includes the autonomous province of Vojvodina and the autonomous region of Kosovo-Metohija), Croatia, Slovenia, Bosnia-Herzegovina, Macedonia, and Montenegro. Actual administration is carried on by five State Secretaries responsible to an Executive Council. Actual control of the country remains with the Yugoslav Communist Party.

ECONOMIC CONDITIONS. Agriculture occupies about 80 per cent of the population. The principal crops are corn, wheat, sugar beets, hemp, hops, opium (in Macedonia), and tobacco (chiefly in Macedonia and Herzegovina). Excellent wines are produced in Dalmatia and Herzegovina and along the Danube.

In 1956 there were 5,220,000 cattle, 11,518,000 sheep, and 4,699,000 hogs.

Manufactures are limited for the most part to consumers' goods. Legislation passed Dec. 5, 1946, nationalized all private economic enterprises, public works and industries in forty-two branches of the national economy including mining, metallurgy, and all industries which process natural products.

Leading customers in 1956 were western Germany (15%), Italy (14%), and the U.S.S.R. (13%); leading suppliers, the United States (27%), the U.S.S.R. (15%), and western Germany (10%). Chief exports in 1955 were sawn timber (13%), tobacco (6%), and pulpwood (3%).

NATURAL FEATURES AND RESOURCES. About half of Yugoslavia is mountainous. In the north, the Dinaric Alps rise abruptly from the sea and progress eastward as a barren limestone plateau called the Karst. Montenegro is a jumbled mass of mountains, containing also some grassy slopes and fertile river valleys. Southern Serbia, too, is mountainous. A rich plain in the north and northwest, drained by the Danube, is the most fertile area of the country. The Danube and tributaries—the Drava, Sava, and Morava—in the northeast are the principal rivers.

Yugoslavia is the Balkans' principal mineral producer.

Principal Deserts of the World

Desert	Location	Approximate size	Appx. elevation, ft.
Atacama.....	North Chile.....	400 mi. long.....	7,000-13,500
Black Rock.....	Northwest Nevada.....	About 1,000 sq. mi.....	2,000-5,000
Colorado.....	Southeast California from San Geronio Pass to Gulf of California.....	200 mi. long and a maximum width of 50 mi.....	Few feet above to 250 below sea level
Dasht-i-Kavir.....	Southeast of Caspian Sea in Iran.....	2,000
Dasht-i-Lut.....	Northeast of Kerman in Iran.....	1,000
Gobi (Shamo).....	Covers most of Mongolia.....	300,000 sq. mi.....	3,000-5,000
Great Arabian.....	Most of Arabia.....	1,500 mi. long.....
Syrian (El Hamad).....	North of 30° N. Latitude.....	1,850
Nefud (Red Desert).....	South of Jauf.....	400 mi. by average of 200 mi.....	3,000
Dahna.....	Southeast of Nefud.....	400 by 30 mi.....
Rub' al Khali.....	South portion of Nejd.....
Great Australian.....	Western portion of Australia.....	About one-half the continent.....	600-1,000
Great Salt Lake.....	West of Great Salt Lake to Nevada-Utah line.....	80 by 50 mi.....	4,500
Kalahari.....	South Africa between the Orange and Zambezi Rivers.....	400 by 600 mi., or about 120,000 sq. mi.....	Over 3,000
Kara Kum (Desert of Khiva).....	Southwest Turkestan south of Lake Aral.....	110,000 sq. mi.....
Kizil Kum.....	Central Turkestan southeast of Lake Aral.....	370 by 220 mi., or about 70,000 sq. mi.....	160 near Lake Aral to 2,000 in southeast
Libyan.....	Eastern Sahara west of Nile.....	More than 500,000 sq. mi.....
Mohave.....	North of Colorado Desert and south of Death Valley in SE Calif.....	15,000 sq. mi.....	2,000
Nubian.....	From Red Sea to great west bend of the Nile.....	2,500
Painted Desert.....	Northeast Arizona.....	75 mi. wide.....	High plateau 5,000
Sahara.....	Northern states of Africa to about 15° N. Lat. and from Red Sea to the Atlantic Ocean.....	3,200 mi. greatest length along 20° N. Lat.; Area over 3,500,000 sq. mi.....	440 below sea level to 11,000 above, ave. elevation, 1,400-1,600
Takla Makan.....	S. Central Sinkiang in Tarim Basin.....	700 mi. long.....
Thar (Indian).....	Chiefly Rajputana, India.....	About 300 mi. by 380 mi.....	About 500

Explorations and Discoveries

Africa

Country or place	Event	Explorer or discoverer	Date
Sierra Leone	Visited	Hanno, Carthaginian seaman	c. 520 B.C.
Congo River	Mouth discovered	Cão, Portuguese navigator	c. A.D. 1484
Cape of Good Hope	Doubled	Bartholomeu Diaz, Portuguese navigator	1488
Gambia River	Explored	Mungo Park, Scottish explorer	1795
Sahara Desert	Crossed	Denham and Clapperton, English explorers	1822-23
Zambezi River	Discovered	Livingstone, Scottish explorer	1851
Sudan	Explored	Barth, German explorer	1852-55
Victoria Falls	Discovered	Livingstone	1855
Lake Tanganyika	Discovered	Burton and Speke, British explorers	1858
Congo River	Traced	Stanley, British explorer	1877

Asia

Punjab (India)	Visited	Alexander the Great	327 B.C.
China	Visited	Marco Polo, Italian traveler	c. A.D. 1272
Tibet	Visited	Odoric, Italian monk	c. 1325
Southern China	Explored	Conti, Italian adventurer	c. 1440
India	Visited by Cape route	Vasco da Gama, Portuguese navigator	1498
Japan	Visited	St. Francis Xavier of Spain	1549
Arabia	Explored	Niebuhr, German explorer	1762
China	Explored	Richtshofen, German scientist	1868
Mongolia	Explored	Przhevalsky, Russian explorer	1870-73
Central Asia	Explored	Hedin, Swedish scientist	1890-1908

Europe

Shetland Islands	Visited	Pytheas of Massilia (Marseille)	c. 325 B.C.
North Cape	Rounded	Ottar, Norwegian explorer	c. A.D. 870
Iceland	Colonized	Norwegian noblemen	c. 890-900

North America

Greenland	Colonized	Eric the Red, Norwegian navigator	c. A.D. 985
Labrador; Nova Scotia (?)	Discovered	Lelf Ericsson, Norse explorer	1000
West Indies	Discovered	Christopher Columbus, Italian navigator	1492
North America	Coast discovered	John Cabot, for British	1497
Pacific Ocean	Discovered	Balboa, Spanish explorer	1513
Florida	Explored	Ponce de León, Spanish explorer	1513
Mexico	Conquered	Cortez, Spanish adventurer	1519
St. Lawrence River	Discovered	Cartier, French navigator	1534
Southwest U. S.	Explored	Coronado, Spanish explorer	1540-42
Colorado River	Discovered	Alarcón, Spanish explorer	1540
Mississippi River	Discovered	Hernando de Soto, Spanish explorer	1541
Frobisher Bay	Discovered	Frobisher, English seaman	1576
Maine Coast	Explored	Champlain, French explorer	1604
Jamestown, Va.	Settled	Smith, English colonist	1607
Hudson River	Explored	Hudson, English navigator	1609
Hudson Bay (Canada)	Discovered	Hudson	1610
Baffin Bay	Discovered	Baffin, English navigator	1616
Lake Michigan	Navigated	Nicolet, French explorer	1634
Arkansas River	Discovered	Marquette and Joliet, French explorers	1673
Mississippi River	Explored	LaSalle, French explorer	1682
Bering Strait	Discovered	Bering, Danish explorer	1728
Alaskan Coast	Sighted	Gvosdeff, Russian sailor	1731
Mackenzie River (Canada)	Discovered	Mackenzie, Scottish-Canadian explorer	1789
Northwest U. S.	Explored	Lewis and Clark	1804-06
Northeast Passage (Arctic Ocean)	Navigated	Nordenskjöld, Swedish explorer	1879
Greenland	Explored	Peary, American explorer	1892
Northwest Passage	Navigated	Amundsen, Norwegian explorer	1906

South America

Country or place	Event	Explorer or discoverer	Date
Continent	Visited	Columbus, Italian navigator	1498
Brazil	Discovered	Cabral, Portuguese explorer	1500
Peru	Conquered	Pizarro, Spanish explorer	1532-33
Amazon River	Explored	Orellana, Spanish explorer	1541
Cape Horn	Discovered	Schouten, Dutch navigator	1615

Oceania

New Guinea	Visited	Menezes, Portuguese explorer	1526
Australia	Visited	Jansz, Dutch explorer	1606
Tasmania	Visited	Tasman, Dutch navigator	1642
Australia	Explored	Sturt, English explorer	1828
Australia	Explored	Burke and Wills, Australian explorers	1861

Arctic, Antarctic and Miscellaneous

Ocean exploration	Expedition	Magellan's ships circumnavigated the globe	1519-22
Spitsbergen (Arctic Europe)	Visited	Barents, Dutch navigator	1596
Antarctic Circle	Crossed	Cook, English navigator	1773
Antarctica	Discovered	Palmer, U S. explorer (archipelago) and Bellingshausen, Russian navigator (mainland)	1820-21
Antarctica	Explored	Wilkes, American explorer	1840
North Pole	Discovered	Peary, American explorer	1909
South Pole	Discovered	Amundsen, Norwegian explorer	1911

The Seven Wonders of the World

THE PYRAMIDS OF EGYPT

A group of three pyramids, *Khufu*, *Khafra* and *Menkaura* at Giza, outside modern Cairo, is often called the first wonder of the world; it is also the oldest and only surviving "wonder." The largest pyramid, built by Khufu (Cheops), had an original estimated height of 482 ft. (now approximately 450 ft.). The exact date of its construction is unknown and has been estimated as early as 4700 B.C. but is probably closer to 2900 B.C.

HANGING GARDENS OF BABYLON

Often listed as the second wonder, these gardens were supposedly built by Nebuchadnezzar about 600 B.C. to please his queen, Amuhia. They are also associated with the mythical Assyrian Queen, Semiramis. Archeologists surmise that the gardens were laid out atop a vaulted building, with provisions for raising water. The terraces were said to rise from 75 to 300 ft.

The Walls of Babylon, also built by Nebuchadnezzar, are sometimes referred to as the second (or the seventh) wonder instead of the Hanging Gardens.

STATUE OF ZEUS (JUPITER)
AT OLYMPIA

The work of Phidias (5th century B.C.), this colossal figure in gold and ivory was reputedly 40 ft. high. All trace of it is lost, except for reproductions on coins.

TEMPLE OF ARTEMIS (DIANA)
AT EPHEBUS

A beautiful structure, begun about 350 B.C. in honor of a non-Hellenic goddess who later became identified with the Greek goddess of the same name. The temple, with Ionic columns 60 feet high, was destroyed by invading Goths A.D. 262.

MAUSOLEUM AT HALICARNASSUS

This famous monument was erected by Queen Artemisia in memory of her husband, King Mausolus of Caria in Asia Minor, who died in 353 B.C. Some remains of the structure are in the British Museum. This shrine is the source of the modern word "mausoleum."

COLOSSUS AT RHODES

This bronze statue of Helios (Apollo), about 105 ft. high, was the work of the sculptor Chares, who reputedly labored for 12 years before completing it in 280 B.C. It was destroyed during an earthquake in 224 B.C.

PHAROS OF ALEXANDRIA

The seventh wonder was the Pharos (lighthouse) of Alexandria, built by Sosstratus of Cnidus during the 3rd century B.C. on the island of Pharos off the coast of Egypt. It was destroyed by an earthquake in the 13th century.

Population, Land Areas of the World and World Elevations

Area	Estimated population, in thousands, 1956	Approximate area, in thousands of sq. mi.	Per cent of total land area	Population density per sq. mi.	Highest	Elevation, feet	Lowest	Dimensions, miles East-West North-South
WORLD	2,737,000	58,333	100.0	46.9	Mt. Everest, Asia, 29,028	Dead Sea, Asia, below sea level	24,902	24,860

Hood	Cascades	Oregon	11,245

Large Islands of the World

Island and status	Location	Area, sq. mi.
GREENLAND (Danish territory)	North Atlantic	839,782
NEW GUINEA (Under Dutch crown, west part; U. N. trust territory under Australian administration, northeast part; Australian territory, southeast part)	Southwest Pacific	312,329
BORNEO (United States of Indonesia, south part; British protectorate and colonies, north part)	South China Sea	290,012
MADAGASCAR (French overseas territory)	Off southeast coast of Africa	227,737
BAFFIN (Canada, Northwest Territories)	Arctic	201,600
SUMATRA (United States of Indonesia)	Northeast Indian Ocean	163,145
HONSHU (Japanese home island)	Sea of Japan—Pacific	91,278
GREAT BRITAIN (Eng., Scotland, Wales)	Off coast of northwest Europe	88,140
VICTORIA (Canada, Northwest Territories)	Arctic	80,450
ELLESMERE (Canada, Northwest Territories)	Arctic Ocean	75,024
CELEBES (United States of Indonesia)	Southwest Pacific	69,255
SOUTH ISLAND, NEW ZEALAND	South Pacific	58,093
JAVA (United States of Indonesia)	Northeast Indian Ocean	48,504
NORTH ISLAND, NEW ZEALAND	South Pacific	44,281
NEWFOUNDLAND (Canadian province)	North Atlantic	42,734
CUBA (Republic)	Caribbean Sea	42,350
LUZON	Philippine Islands	40,814
ICELAND (Republic)	North Atlantic	39,688
MINDANAO	Philippine Islands	36,537
HOKKAIDO (Japanese home island)	Sea of Japan—Pacific	34,084
IRELAND (Ireland, republic, south part; Northern Ireland, part of United Kingdom)	West of Great Britain	31,840
HISPANIOLA (Dominican Republic, east part; Haitian republic, west part)	Caribbean Sea	30,075
TASMANIA (Australian state)	South of Australia	26,215
BANKS (Canada, Northwest Territories)	Arctic	25,992
CEYLON (Member of Commonwealth of Nations)	Indian Ocean	25,332
SAKHALIN (U.S.S.R.)	North of Japan	24,560
DEVON (Canada, Northwest Territories)	Arctic	20,484
TIERRA DEL FUEGO (East part to Argentina; west part to Chile)	Southern tip of South America	18,530
MELVILLE (Canada, Northwest Territories)	Arctic	16,164
SOUTHAMPTON (Canada, N. W. Territories)	Hudson Bay	16,114

Oceans and Seas

Name	Area, sq. mi.	Average depth, feet	Greatest known depth, ft.	Place of greatest known depth
Pacific Ocean	63,801,700	14,048	35,400	Off Mindanao
Atlantic Ocean	31,830,800	12,880	30,246	Off Puerto Rico
Indian Ocean	28,358,300	13,002	22,968	Off Sumatra-Java
Arctic Ocean	5,440,200	3,953	17,850	77° 45' N.; 175° W.
Mediterranean Sea*	1,145,100	4,688	15,564	Off Cape Matapan, Greece
Caribbean Sea	1,049,500	6,685	22,788	Off Cayman Islands
South China Sea	895,400	5,419	18,090	West of Luzon
Bering Sea	875,800	4,714	13,422	Off Buldir Island
Gulf of Mexico	618,200	4,874	12,744	Sigsbee Deep
Okhotsk Sea	589,800	2,749	11,400	146° 10' E.; 46° 50' N.
East China Sea	482,300	617	9,126	25° 16' N.; 125° E.
Hudson Bay	475,800	420	600	Near entrance
Sea of Japan	389,100	4,429	12,276	Central Basin
Andaman Sea	308,000	2,854	12,392	Off Car Nicobar Island
North Sea	222,100	308	2,165	Skagerrak
Red Sea	169,100	1,611	7,254	Off Port Sudan
Baltic Sea	163,000	180	1,380	Off Gotland

* Including Black Sea and Sea of Azov. NOTE: For Caspian Sea, see Large Lakes of World elsewhere in this section.

Famous Waterfalls of the World

Waterfall	Location	River	Height, feet
Angel	Venezuela	Tributary of Caroní	3,300
Cuquenán, or Kukenaam	Venezuela-British Guiana	Cuquenán	2,000
Sutherland	South Island, N. Z.	Arthur	1,904
Tugela	Natal, South Africa	Tugela	1,800
Ribbon (Yosemite)	California	Creek, flowing into Yosemite	1,612
Upper Yosemite	California	Yosemite Creek, tributary of Merced	1,430
Gavarnie	Southwestern France	Gave de Pau	1,385
Takkakaw	British Columbia	Tributary of Yoho	1,200
Widow's Tears (Yosemite)	California	Tributary of Merced	1,170
Staubbach	Switzerland	Staubbach (Lauterbrunnen valley)	980
Trummelbach	Switzerland	Trummelbach (Lauterbrunnen)	950
Middle Cascade (Yosemite)	California	Yosemite Creek, tributary of Merced	910
Multnomah	Oregon	Multnomah Creek, tributary of Columbia	850
Vettisfos	Norway	Morkedöla	850
King Edward VII	British Guiana	Courantyne	840
Gersoppa	India	Sharavati	830
Kaiaeteur	British Guiana	Pataro	741
Kalambo	Tanganyika-N. Rhodesia	705
Fairy (Mt. Rainier Park)	Washington	Stevens Creek	700
Maradalsfos	Norway	Stream flowing into Ejkisdalsvand (lake)	650
Skykkjefos	Norway	In Skykkjedal (valley) of Inner Hardanger Flord	650
Terni	Italy	Velino, tributary of Nera	650
Maletsunyane (Le Bihan)	Basutoland, Africa	Maletsunyane	630
Bridal Veil (Yosemite)	California	Bridal Veil Creek, tributary of Merced	620
Nevada (Yosemite)	California	Merced	594
Voringfos	Norway	Bjorela	535
Skjaeggedsfos	Norway	Tyssaa	525
Marina	British Guiana	Tributary of Kuribrong, a tributary of the Pataro	500
Tequendama	Colombia	Bogotá	450
King George's	Cape Province, South Africa	Orange	450
Herval Cascades	Brazil	400
Guayra	Paraguay-Brazil	Paraná	374
Illilouette (Yosemite)	California	Illilouette Creek, tributary of Merced	370
Granite (Mt. Rainier Park)	Washington	Granite Creek	350
Splendor of Sun	Nikko, Japan	350
Victoria	Southern Rhodesia	Zambezi	343
Comet (Mt. Rainier Park)	Washington	Van Trump Creek	320
Lower Yosemite	California	Yosemite Creek	320
Vernal (Yosemite)	California	Merced	317
Virginia	Northwest Territories, Canada	South Nahanni, tributary of Mackenzie	315
Lower Yellowstone	Wyoming	Yellowstone	308
Grand	Labrador, Canada	Hamilton	302
Sluiskin (Mt. Rainier Park)	Washington	Paradise	300
Snoqualmie	Washington	Snoqualmie	270
Seven Falls	Colorado	266
Tallulah	Georgia	Tallulah	251
Shoshone	Idaho	Snake	195
Narada (Mt. Rainier Park)	Washington	Paradise	168
Niagara	New York-Ontario	Niagara	167
Tower (Yellowstone)	Wyoming	Tower Creek, tributary of Yellowstone	132

Principal Rivers of the World

River	Source	Outflow	Approx. length, miles
Nile	Lake Victoria	Mediterranean Sea	4,160
Amazon	Glacier-fed lakes, Peru	Atlantic Ocean	3,900
Missouri-Mississippi	Source of Red Rock Creek, Montana	Gulf of Mexico	3,891
Ob	Altai Mts., U.S.S.R.	Gulf of Ob	3,200
Yangtze Kiang	Tibetan plateau	China Sea	3,100
Amur	Confluence of Shilka (U.S.S.R.) and Argun (Manchuria) Rivers	Tartary Strait	2,900
Congo	Between Lakes Nyasa and Tanganyika	Atlantic Ocean	2,900
Lena	Baikal Mts., U.S.S.R.	Arctic Ocean	2,800
Yenisei	Tannu Ola Mountains, western Mongolia	Arctic Ocean	2,800
Hwang Ho (Yellow)	East part of Kunlun Mts., west China	Gulf of Chihli	2,700
Niger	Border of Sierra Leone	Gulf of Guinea	2,600
Mackenzie	Head of Finlay River, British Columbia	Beaufort Sea (Arctic Ocean)	2,514
Mékong	Tibetan highlands	South China Sea	2,500
Missouri	Actual headwaters Red Rock Creek; beginning of Missouri at conflu- ence of Gallatin, Mad- ison, Jefferson Rivers	Mississippi River	2,475 (confluence) 2,723 (headwaters)
Mississippi	Lake Itasca, Minnesota	Gulf of Mexico	2,470
Paraná	Confluence of Paranaíba and Grande Rivers, southeast Brazil	Río de la Plata (Atlantic Ocean)	2,450
Murray	Australian Alps, New South Wales	Indian (Southern) Ocean	2,310
Irish	Altai Mts., U.S.S.R.	Ob River	2,300
Volga	Valdai plateau, U.S.S.R.	Caspian Sea	2,300
Madeira	Confluence of Gauporé and Maumoré Rivers, Bolivia-Brazil border	Amazon River	2,000
St. Lawrence	St. Louis River, Minn.	Gulf of St. Lawrence	1,900
Purús	Southwest Amazonas, Brazil	Amazon River	1,850
Rio Grande	San Juan Mts., Colorado	Gulf of Mexico	1,800
São Francisco	Southwest Minas Geraes, Brazil	Atlantic Ocean	1,800
Yukon	Junction of Lewes and Pelly, Yukon Territory	Bering Sea	1,800
Salween	Tibet, south of Kunlun Mountains	Gulf of Martaban	1,750
Danube	Black Forest, Germany	Black Sea	1,725
Euphrates	Dumlu Dagħ (moun- tains), Turkey	Persian Gulf	1,700
Indus	Himalayas	Arabian Sea	1,700
Orinoco	Sierra Parima on Vene- zuela-Brazil boundary	Atlantic Ocean	1,700
Tocantins	Near Pyrenopolis, southeast Brazil	Pará River (Atlantic Ocean)	1,700
Brahmaputra	Himalayas	Ganges River (Bay of Bengal)	1,680
Si Kiang	Plateau of Yunnan, southwest China	China Sea	1,650
Nelson	Head of Bow River, west Alberta, Canada	Hudson Bay	1,600
Zambezi	11°21'S.; 24°22'E., North- ern Rhodesia, Africa	Indian Ocean	1,600
Ganges	Himalayas	Bay of Bengal	1,540
Amu Darya (Oxus)	Nicholas Range, Pamir Mountains, U.S.S.R.	Lake Aral	1,500

River	Source	Outflow	Approx. length, miles
Paraguay	Mato Grosso, Brazil	Paraná River	1,500
Yapurá	Andes, Colombia	Amazon River	1,500
Arkansas	Central Colorado	Mississippi River	1,450
Colorado	Middle Park, northern Colorado	Gulf of California	1,440
Dnieper	Valdai Hills, U.S.S.R.	Black Sea	1,400
Negro	Watershed between Ori- noco and Amazon	Amazon River	1,400
Ural	Southern Ural Moun- tains, U.S.S.R.	Caspian Sea	1,400
Ohio-Allegheny	Plateau in Potter County, Pa.	Mississippi River	1,306
Orange	Basutoland, Africa	Atlantic Ocean	1,300
Irrawaddy	Confluence of N'mai and Mali Rivers, northeast Burma	Bay of Bengal	1,250
Columbia	Columbia Lake, British Columbia	Pacific Ocean	1,214
Saskatchewan	Western Alberta, Canada	Lake Winnipeg	1,205
Darling	Central part of Eastern Highlands, Australia	Murray River	1,160
Tigris	Taurus Mts., Turkey	Euphrates River (Persian Gulf)	1,150
Sungari	Sungari Reservoir, Manchuria, China	Amur River	1,130

* Average. † The name Caspian Sea is a misnomer; it is a land-locked lake, so classified by oceanographers.

Volcanoes of the Earth

There are approximately 430 volcanoes (275 in the Northern Hemisphere and 155 in the Southern) with recorded eruptions in historical times. Of the 2,500 recorded eruptions, more than 2,000 have taken place in the Pacific area. Of known active volcanoes, about 80 are of the submarine type.

ATLANTIC-INDIAN AREA

Mediterranean Region

Italy: Mt. Vesuvius, southeast of Naples (3,858 ft.). Only active volcano on mainland of Europe. Pompeii buried by an eruption, A.D. 79. Latest eruption in 1944.

Sicily: Mt. Etna, eastern Sicily (10,741 ft.). Two new craters formed in eruptions of Feb.-Mar., 1947. Worst eruption in 50 years occurred Nov., 1950-Jan., 1951.

Lipari Islands (north of Sicily): Stromboli (about 3,000 ft.). Called "Lighthouse of the Mediterranean." Erupted 1956.

Atlantic Area

Canary Islands: Pico de Teide (Teneriffe), on island of Teneriffe (12,192 ft.).

Cape Verde Islands: Fogo (over 8,000 ft.). Severe eruption in 1857; last until 1951.

Iceland: At least 25 volcanoes active in historic times. These volcanoes very similar to those in Hawaii.

Hekla (4,747 ft.). Several craters, largest about 1¼ mi. in circumference. Most recent eruptions reported in 1947-48.

Skaptarjökull. Series of volcanoes near Skaptar; erupted in 1783 with large loss of life and produced largest known single output of lava.

Askja (4,600 ft.). Largest in Iceland.

Jan Mayen Island: Beerenberg, northern part of island (over 8,000 ft.). Extinct.

British Cameroons: Mt. Cameroon (13,353 ft.). Has several craters. Last erupted in 1922.

Lesser Antilles (West Indian Islands): Mt. Pelée, in northwestern Martinique (about 4,400 ft.). Eruption in 1902 destroyed town of St. Pierre and killed approximately 40,000.

Indian Ocean Region

Comoro Islands (east of northern Mozambique): One volcano, Kartala (over 8,500 ft.), is visible for over 100 miles. Last erupted in 1904.

Réunion Island (east of Madagascar): Piton de la Fournaise (Le Volcan) (8,610 ft.). Large lava flows.

Tanganyika Territory: Kilimanjaro (19,565 ft.). Extinct. Highest mountain in Africa.

THE PACIFIC AREA

Northwest Portion

Kamchatka: 14-18 active volcanoes.

Shiveluch (over 10,500 ft.). Most northerly volcano of Kamchatka group.

Klyuchevskaya (Kluchev) (15,912 ft.). Erupted 1954.

Koryatskaya (over 11,500 ft.). Violent eruption in 1895.

Kurile Islands: At least 13 active volcanoes and several submarine outbreaks.

Japan: at least 33 active vents.

Fujiyama (Fujisan), southwest of Tokyo (12,385 ft.). Symmetrical in outline, snow-covered. Regarded as a sacred mountain. Adzumayama (7,733 ft.).

Asamayama (8,182 ft.). Continuously active; violent eruption in 1783; latest in 1955.

Asosan (5,223 ft.). Crater 10 by 15 miles is the largest known in the world; erupted most recently in 1958, killing 12 persons.

Bandaisan, about 125 miles north of Tokyo (9,037 ft.). Violent eruption in 1888 devastated a 27-square-mile area.

Ryukyu archipelago: Nakano-shima (3,485 ft.); Suwanose-shima (2,697 ft.).

Bonin (Ogasawara) Islands: Mt. Suribachi, on Iwo Jima (546 ft.). A sulfurous steaming volcano. Raising of U. S. flag over Mt. Suribachi was one of the dramatic episodes of World War II.

New Britain archipelago: Numerous active vents, including Father, on New Britain (7,500 ft.).

Santa Cruz Islands: Tinakula (2,200 ft.).

New Hebrides: Lopevi (4,755 ft.).

Samoa archipelago: Savaii. An eruption in 1905 did considerable damage. Niuafoou (Tin Can) between Samoa and Fiji Islands has a crater 6,000 feet below and 600 feet above water.

Philippine Islands: about 100 eruptive centers; Hibok Hibok on Camiguin island erupted in Sept. 1950, and again in Dec. 1951, when about 750 were reported killed or missing; eruptions continued during 1952-53.

Taal, on Volcano Island in Lake Bombon (about 1,000 ft.). Crater over 7,500 ft. in diameter.

Mayon, in southeastern Luzon (7,946 ft.). An almost perfect cone. Continuous mild activity. Destructive eruption in 1897.

Moluccas: A volcanic chain of islands which contains several active volcanoes.

Hawaiian Group:

Mauna Loa (13,680 ft.). Also called "Long Mountain." Discharges more lava than any other volcano. Largest volcanic mountain in the world in cubic content, with crater of 3.7 sq. mi. Violent eruption in June, 1950, with lava pouring 25 mi. into the ocean.

Mauna Kea (13,784 ft.). Highest mountain in group.

Hualalal (8,269 ft.). Has many small pit craters. Only lava flow in historic times was in 1801.

Kilauea (4,090 ft.). A vent in side of Mauna Loa but apparently erupts independently of it. One of the most spectacular and active craters. Crater has an area of 4.14 sq. mi. Erupted 1952 and again in 1955, with considerable damage.

Southwest Portion

Sumatra: Ninety volcanoes have been discovered; 12 are now active. The most famous, Krakatoa, is a small volcanic island in the Sunda Strait. Numerous volcanic discharges occurred in 1883. One explosion caused the disappearance of the highest peak and the northern part of the island. Fine dust was carried around the world in the upper atmosphere. Over 36,000 persons lost their lives in resultant tidal waves, which were felt as far away as Cape Horn. Active in 1928, 1950 and 1953.

Java: Thirteen of 125 volcanic centers are active. Few serious eruptions. Galunggung is famous for two destructive eruptions in 1822. It is thought that over 100 villages and about 4,000 lives were lost. Eruption of Merapi in 1954 caused number of deaths; it was active again in 1957.

Lesser Sunda Islands: Fifteen eruptive cones. Tamboro on Soembawa (Sumbawa) (about 9,000 ft.) was 13,000 ft. prior to a severe eruption in 1815, which ejected an estimated 36 cu. mi. of material.

Melanesian area: Volcanoes are located on New Guinea, New Hebrides, Santa Cruz, Solomons, and on numerous other small islands. Eruption of Mt. Lamington in Papua Territory, New Guinea, in Jan., 1951, killed more than 3,000.

New Zealand: Tarawera, on North Island. Severe eruption in 1886 destroyed the famous pink and white sinter terraces of Rotomahana, a hot lake.

Ngauruhoe (7,515 ft.). Emits steam and vapor incessantly. Major eruptions, 1952-54.

Northeast Portion

Alutian area: There are 32 active vents known, and numerous inactive cones.

Shisaldin, on Unimak (8,683 ft.). Latest eruption Jan., 1947.

Bogosloff, on Bogosloff island (Castle) (about 1,000 ft.). Mountain first appeared after an eruption in 1796.

Alaska:

Wrangell (14,005 ft.) and Katmai (about 7,500 ft.).

On June 6, 1912, a violent eruption of the volcano Nova Rupta occurred, during which the "Valley of Ten Thousand Smokes" was formed.

United States: Lassen Peak, in California (10,453 ft.). Only observed active volcano in the United States. Last period of activity in 1914-17. Other mountains of volcanic origin include Mt. Shasta, Mt. Hood,

Mt. Rainier, and the mountain that contains Crater Lake.

Mexico:

Popocatepetl (17,883 ft.). Crater 673 ft. deep and $2\frac{1}{2}$ mi. in circumference. Not entirely extinct; steam still escapes.

Colima (14,239 ft.), in group that has had frequent eruptions.

Orizaba (Citlaltepetl) (18,696 ft.).

Tuxtla (4,900 ft.). Had a violent eruption in 1793 but is now quiescent.

Paricutin. First appeared in Feb., 1943. In less than a week a cone over 140 ft. high developed with a crater one quarter mile in circumference. Cone grew over 1,500 ft. in 1943. Erupted 1952.

Boquerón ("Big Mouth"). Newest volcano in Western Hemisphere, discovered Sept., 1952 on San Benedicto island, about 250 mi. south of Lower California.

Guatemala:

Santa María Quezaltenango (12,361 ft.). Frequent activity between 1902-08 and 1922-28 after centuries of quiescence. Most dangerously active vent of Central America. Other volcanoes include Tajumulco (13,814 ft.) and Atitlán (11,633 ft.).

El Salvador: Izalco, "beacon of Central America," which first appeared in 1770 and is still growing (erupted in 1950, 1956); San Salvador, which had a violent eruption in 1923 and Conchagua, which erupted with considerable damage early in 1947.

Nicaragua: Volcanoes include Telica, Coseguina and Momotombo. Between Momotombo on the west shore of Lake Managua and Coseguina overlooking the Gulf of Fonseca, there is a string of more than 20 cones, many still active. One of these, Cerro Negro, erupted in July, 1947, with considerable damage and loss of life, and again in 1948-50.

Costa Rica: Four volcanic cones whose bases merge are Poás (8,895 ft.), Barba (9,280 ft.), Irazú (10,525 ft.), and Turrialba (11,350 ft.).

Southeast Portion

Colombia: Huila (18,700 ft.), a vapor-emitting volcano, and Tolima (17,109 ft.).

Eruption of Puracé (15,420 ft.), 1949, killed 17.

Ecuador: Cotopaxi (19,344 ft.). Perhaps highest active volcano in the world. Possesses a beautifully formed cone.

Cayambe (19,170 ft.). Almost on equator. Other volcanoes include Tunguragua (16,689 ft.) and Sangay (17,470 ft.).

Peru and Bolivia: Many active volcanoes, Misti, near Arequipa, Peru (19,167 ft.). Sajama, in Bolivia (21,391 ft.).

Licancábur, in Bolivia (about 19,500 ft.). *Chile and Argentina:* About 25 active or potentially active; destructive eruptions of Villarrica, Chile, 1948, and of Nilahue and Ríñihue, 1955.

Interesting Caves and Caverns of the World

Aggtelek. In village of same name, northern Hungary. Large stalactitic cavern about 5 miles long.

Altamira Cave. Near Santander, Spain. Contains animal paintings (Old Stone Age art) on roof and walls.

Antiparos. On island of same name in the Grecian Archipelago. Some stalactites are 20 ft. long. Brilliant colors and fantastic shapes.

Blue Grotto. On island of Capri, Italy. Cavern hollowed out in limestone by constant wave action. Now half filled with water because of sinking coast. Name derived from unusual blue light permeating the cave. Source of light is a submerged opening, light passing through the water.

Carlsbad Caverns. Southeast New Mexico. Largest underground labyrinth yet discovered. Three levels: 754, 900, and 1,320 feet below the surface.

Fingal's Cave. On island of Staffa off coast of western Scotland. Penetrates about 200 ft. inland. Contains basaltic columns almost 40 ft. high.

Ice Cave. Near Dobsina, Czechoslovakia. Noted for its beautiful crystal effects.

Jenolan Caves. In Blue Mountain plateau, New South Wales, Australia. Beautiful stalactitic formations.

Source of much information on Paleolithic man.

Luray Cavern. Near Luray, Virginia. Has large stalactitic and stalagmitic columns of many colors.

Mammoth Cave. Limestone cavern in central Kentucky. Cave area is about 10 miles in diameter but has at least 150 miles of irregular subterranean passageways at various levels. Temperature remains fairly constant at 54°F.

Peak Cavern or Devil's Hole. Derbyshire, England. About 2,250 ft. into a mountain. Lowest part is about 600 ft. below the surface.

Postumia (Adelsberg) Grotto. Near Postumia in Julian Alps, about 25 miles N.E. of Trieste. Stalactitic cavern, largest in Europe. *Pivka* (Pivka) River flows through part of it. Caves have numerous beautiful stalactites.

Singing Cave. Iceland. A lava cave; name derived from echoes of people singing in it.

Wind Cave. In Black Hills of South Dakota. Limestone caverns with stalactites and stalagmites almost entirely missing. Variety of crystal formations called "boxwork."

Wyandotte Cave. In Crawford County, southern Indiana. A limestone cavern with five levels of passages; one of the largest in North America. "Monumental Mountain," approximately 135 ft. high, is believed to be one of the world's largest underground "mountains."

Geysers

Geysers exist in many volcanic regions of the world such as Japan and South America, but their greatest development is in Iceland, New Zealand and Yellowstone National Park, Wyoming, U. S. A.

Iceland. The principal geyser area is about 30 miles northwest of Mt. Hekla, where there are more than 100 geysers and hot springs in about two square miles. The main ones are the following:

Great Geyser (Geysir). Sends up a column 160 to 180 ft. high intermittently from an opening more than 9 ft. across and about 70 ft. deep.

Strokkur (Churn). Constant bubbling and occasional eruptions.

New Zealand. There is a great profusion of boiling springs, steam jets and mud volcanoes northeast of Lake Taupo on North Island. Main geysers are *Waikite*, with a 30-35 ft. column, *Pohutu* and *Waimauku*.

United States

Yellowstone National Park, Wyoming. There are 120 named geysers in Yellowstone and perhaps half that number un-

named. Most of the geysers and the 4,000 or more hot springs are located in the western portion of the park. The most important are the following:

Norris Geyser Basin has 24 or more active geysers; the number varies. There are scores of steam vents and hot springs. *Valentine* is highest, erupting 50-75 ft. at intervals varying from 18 hr. to 3 days or more. *Minute*, 15-20 ft. high, several hours apart. Others include *Steamboat*, *Fearless*, *Veteran*, *Vixen*, *Corporal*, *Whirligig*, *Little Whirligig* and *Pinwheel*.

Lower Geyser Basin has at least 18 active geysers. *Fountain* throws water 50-75 ft. in all directions at unpredictable intervals. *Clepsydra* erupts violently from four vents up to 30 ft. *Great Fountain* plays every 8 to 15 hr. in spurts from 30 to 90 ft. high.

Midway Geyser Basin has vast steaming terraces of red, orange, pink and other colors; there are pools and springs, including the beautiful *Grand Prismatic Spring*. *Excelsior* crater discharges boiling water into Firehole River at the rate of 6 cu. ft. per second.

Upper Geyser Basin includes *Artemisia*, which sends up a column 15-35 ft. every 24 to 30 hr. *Riverside* has an unusual cone; it throws water 75 ft. obliquely over the river for half an hour. Interval ranges from 6 to 8½ hr.

Rocket is irregular and unpredictable, as is its neighbor *Grotto*.

Giant erupts up to 200 ft. at intervals of 2½ days to 3 mo.; eruptions last about 1½ hr. *Daisy* sends water up to 75 ft. but is irregular and frequently inactive.

Old Faithful sends up a column varying from 116 to 175 ft. at intervals of about 65 min., varying from 33 to 90 min. Eruptions last about 4 min., during which time about 12,000 gal. are discharged.

Giantess seldom erupts, but during its active periods sends up streams 150-200 ft.

Lion Group: *Lion* plays up to 60 ft. every 2-4 days when active; *Little Cub* up to 10 ft. every 1-2 hr. *Big Cub* and *Lioness* seldom erupt.

Castle usually erupts twice daily to a height of 75 ft.

Mammoth Hot Springs. There are no geysers in this area. The formation is travertine. Sides of a hill are steps and terraces over which flow the steaming waters of hot springs laden with minerals. Each step is tinted by algae to many shades of orange, pink, yellow, brown, green and blue. Terraces are white where no water flows.

Other groups of geysers, hot pools and mud pots are located on the west shore of Shoshone Lake, on West Thumb Bay, at Mud Volcano, in the Grand Canyon of the Yellowstone, and on Mirror Plateau.

World Extremes of Climate

Highest recorded shade temperature:

World: 136° F. at Azizia, Libya, North Africa, September 13, 1922.

United States: 134° F. at Death Valley, California, July 10, 1913.

Lowest recorded temperature:

World: -102.1° F. near the South Pole, Antarctica, Sept. 17, 1957. In Siberia, -89.9° F. at Oimekon, February 6, 1933, and -89.7° F. at Verkhoyansk, February 5 and 7, 1892.

United States: -70° F. at Rogers Pass, Montana, January 20, 1954.

Highest mean annual temperature:

World: 88° F. at Lugh, Somaliland, Africa, 13-year average.

United States: 77.6° F. at Key West, Florida, 30 year normal.

Lowest mean annual temperature:

World: -55.7° F. (Jan. 11 through Dec. 31, 1957) near South Pole, Antarctica

United States: 26.9° F. at Mount Washington, N. H., 24 year average.

Maximum rainfall for 24-hour period:

World: 46 inches at Baguio, Luzon, Philippines, July 14-15, 1911.

United States: 26.12 inches at Hoegaes Camp, California, January 22-23, 1943. (Unofficially observed, 38.20 inches at Thrall, Texas, September 9-10, 1921.)

Maximum rainfall in one month:

World: 366.14 inches at Cherrapunji, India, July, 1861 (over 150 inches fell in 5 consecutive days in August, 1841).

United States: 71.54 inches at Helen Mine, California, January, 1909.

Maximum average annual precipitation (calendar year):

World: 471.68 inches at Mt. Waialeale, Island of Kauai, Hawaiian Islands, 1912-1949; 450 inches at Cherrapunji, India, 74 year average.

United States: 150.73 inches at Wynoochee, Washington, 13 year average.

Minimum average annual precipitation (calendar year):

World: 0.02 inch at Arica, Chile, 43 year average.

United States: 1.66 inches at Greenland Ranch, California, 44 year average. (Bagdad, California holds the U. S. record for the longest period with no measurable rain, 767 days, Oct. 3, 1912 to Nov. 8, 1914.)

Other U. S. precipitation extremes:

Wettest state: Louisiana, 65 year annual average of 57.34 inches.

Driest state: Nevada, 66 year annual average of 8.60 inches. (Average annual precipitation for the United States is about 29 inches.)

Heavy U. S. snowfall records:

Greatest average annual: 575.1 inches at Paradise Ranger Station, Rainier Park, Washington.

Greatest amount in one season: 1000.3 inches at Paradise Ranger Station, Rainier Park, Washington, 1955/56.

Greatest amount in a calendar month: 390 inches at Tamarack, California, Jan., 1911.

Greatest in 24 hours: 76 inches at Silver Lake, Colorado, April 14-15, 1921. (This storm, April 12-15, produced highest known rates in U. S. for durations up to 3 days —95 inches in 48 hours; 98 inches in 72 hours; 100 inches in 85 hours.)

In the New York City blizzard of December 26, 1947, 25.8 inches of snow fell in about 20 hours, almost 5 inches more than fell in the blizzard of March, 1888.

Largest hailstone definitely recorded in U. S.: 1½ pounds by weight, at Potter, Nebraska, July 6, 1928.

Ancient Empires

The *Egyptian* and *Babylonian* empires, Near Eastern civilizations whose cultures mark the beginning of written history, had their origins in the nebulous period of ancient history prior to the year 4000 B.C. They developed rapidly in the fertile river valleys of the Nile in Egypt and the Tigris-Euphrates in Mesopotamia after the discovery of metals and the invention of writing. Their governments were all-powerful, with the people subjugated and without political rights. The Egyptians regarded their king as a god. In Babylon, the ruler was a priest-king, earthly representative of the gods. Nevertheless, these Near East cultures made great contributions to the eternal march of man; they advanced the ways of making and doing things, produced the earliest literature, developed the principles of law (the code of Hammurabi, Babylonian king of the 18th [or possibly 17th] century B.C., the oldest code of law) and science.

The influence of Babylon and Egypt was felt in the rise of the Semitic tribes of Syria, the Hittites in Asia Minor, and the people of the Aegean region. Between the years 1200 and 800 B.C., the small Syrian states grew to great power and then were overwhelmed by the great empire of the *Assyrians*, the warlike peasants of the Tigris valley, who took the lessons learned from the Babylonians and spread that culture over their domains. The Assyrians, like the Egyptians and the Babylonians, in turn fell under the power of the *Persian* kings in the century between 600 and 500 B.C. By 525 B.C., the Persian Empire extended from India to Egypt.

The lessons learned by these early Near Eastern civilizations were transmitted to *Greece*, which developed its illustrious empire in the Aegean region, after the inhabitants of the island of Crete had absorbed the Egyptian culture. The mainland Greeks overthrew the Cretans and in turn were succeeded by the Doric Greeks, who spread their culture across the Aegean, the Asia Minor coast, and into the Mediterranean and Black Sea regions. The char-

acteristic Greek political institution was the city-state, first ruled by kings and often temporary monarchical tyrannies, and finally by the participation of free citizens. Literature and the arts flourished, and by the 5th century B.C., when Athens became the great city of the Greeks, drama had risen to full maturity with the great tragedies of Sophocles and Euripides and the comedies of Aristophanes. Architecture and art advanced apace. The Greeks, learning much from their Egyptian teachers, produced such superb buildings as the Parthenon and created amazingly beautiful statues through the use of living models. Religion, which was closely linked with art, also flourished, as did the development of philosophy, under Socrates, Plato and Aristotle. Wars weakened the city-states, and they fell to Alexander the Great in the 4th century B.C.

Last among the great ancient empires was the *Roman*, which developed in Italy and gained control over the Mediterranean region after absorbing the culture of Greece and combining with it new principles of law and art and teaching this new learning to the West. The development of the Roman civilization began in 510 or 509 B.C., when the peoples on the peninsula of Italy freed themselves from the rule of the Etruscans. The Romans, with a republican form of government, speedily conquered Italy and the Mediterranean region, and the Roman governors became men of great wealth, corrupting the city-state system and making it a graft-ridden machine of exploitation. The failure of the government to check this self-seeking influence brought on a revolt which resulted eventually in the rise of Julius Caesar to dictatorship in 46-44 B.C. Caesar's murder in the Senate at Rome was followed in 27 B.C. by the establishment of the one-man rule of Augustus over the Roman Empire. Legal practices were developed and became the foundations of modern law. This great ancient civilization began to crumble in the 3d century A.D.

Languages of the World

Gujarati (India; Pakistan)	16,000,000	Sinhalese (Ceylon)	5,500,000
Hausa (Central Africa)	9,000,000	Spanish	150,000,000
Hindi (India; Pakistan)	150,000,000	Sudan: including Hausa (Central Africa)	75,000,000
Hungarian	13,000,000	Sundanese (Indonesia)	13,000,000
Indic: including Assamese, Bengali, Bihari, Gujarati, Hindi, Lahnda, Marathi, Oriya, Punjabi, Rajasthani, Sindhi, Sinhalese	415,000,000	Swahili (E. Africa)	8,000,000
Indonesian: including Balinese,		Swedish	7,000,000

Universities—Medieval and Modern

Universities, in the modern sense of the term, sprang up in the 12th and 13th centuries in response to the resurgence of learning that preceded the Renaissance in Europe. Procedure at the early universities was informal, with students gathering at some place in a city to listen to a pre-eminent teacher. There were no campuses, buildings or endowments. Actually, the term "university" once meant a guild or corporation; there were, in the medieval period, "universities" of bootmakers, weavers, etc. Thus the university of learning was similar in organization to the guilds. The students filled the role of apprentices and the teachers were the masters.

The first European university was that of *Salerno* in the 9th century, when it was known as a school of medicine. By the 11th century, it had become one of the most famous medical schools of Europe.

University of Bologna. Originated about 1200 as student guilds for protection against the merchants and citizens of Bologna who had raised prices of food and lodging. It was famous for its legal scholars. The students were organized into two guilds and exercised a great deal of authority over the administration.

Other Italian universities famed in the Middle Ages included those at *Arezzo*, *Fer-*

rara, Florence, Modena, Naples, Padua, Pavia, Perugia, Siena and Vicenza.

University of Paris. Originated between 1150 and 1170 in a cathedral school on the Ile de la Cité, it was later moved to the left (south) bank of the Seine, although it remained under the authority of the chancellor of Notre Dame. It developed into the most famous continental center of learning of its day. Its four principal schools were theology, medicine, law and arts. By the 14th century, the university had some 40 colleges, of which the *Sorbonne* became the most celebrated.

The universities of Paris and Bologna had a marked influence in the subsequent creation of other university centers. About 1167-68 there was a migration of students from Paris to *Oxford* (founded in the 12th century) and about 1210, from Oxford to *Cambridge* (also founded in the 12th century).

Other famous universities of the Middle Ages include the *University of Toulouse* (1233), *Salamanca* (1243), *Seville* (1254), *Orléans* (1305), *Valladolid* (1346), *Prague* (1347), *Kraków* (1364), *Vienna* (1364), *Erfurt* (1379), *Heidelberg* (1385), *Cologne* (1388), *Leipzig* (1409), *Rostock* (1419) and *Louvain* (1426).

The Renaissance

The Renaissance gave fresh impetus to the universities of Europe. In France three of importance arose in the 15th century—the *University of Aix* (1409, Provence), the *University of Poitiers* (1431) and the *University of Caen* (1437).

Other French institutions of note that arose in this era were at *Bordeaux* (1441), *Valence* (1452), *Nantes* (1463) and *Bourges* (1465). New European universities were also founded at *Trier* (1450), *Freiburg* (1456), *Ingolstadt* (1459), *Basel* (1460), *Budapest* (1475), *Mainz* (1476), *Uppsala* (1477), *Tübingen* (1477), *Copenhagen* (1479), *Wittenberg* (1502), *Frankfurt on Oder* (1506) and *Coimbra* (1537).

St. Andrews, founded in 1411, was the first university in Scotland. Others were the *University of Glasgow* (1453) and the *University of Aberdeen* (1494). The *College of Edinburgh* was established in the post-Reformation period (1582). In Ireland, *Trinity College* was founded in Dublin in 1591.

Reformation and Post-Reformation

Until the Reformation, most of the institutions of higher learning in Europe were under the tutelage of the Catholic Church. After 1520, however, many established universities declared their independence of the Church. Cromwell's rule brought about new scholastic methods at both Oxford and Cambridge and the es-

tablishment of new colleges thoroughly imbued with Protestantism.

But the first Protestant university was that of *Marburg*, Germany, founded in 1527. Other Protestant universities were: *Königsberg* (1544); *Jena* (1558); *Helmstedt* (1575); *Altdorf* (1575); *Giessen* (1607); *Strasbourg* (1621); *Halle* (1693).

18th, 19th and 20th Centuries

Among the more famous institutions in this era was *Göttingen* (1736), whose school of history became celebrated throughout Europe. Others were: *Erlangen* (1743); *Berlin* (1809); *Lemberg* (Lwów) (1816); *Bonn* (1818); *Helsingfors* (1828); the *National University at Athens* (1837); *Bucharest* (1864); *Tokyo* (1877); *Sofia* (1888) and *Kyoto* (1897).

Among the more famous British universities established in the 19th and 20th centuries were the *University of London* (1828); *Manchester* (1851); the *Mason University College* in Birmingham, later *Birmingham University* (1900); *Liverpool* (1903); *Leeds* (1904); and the *University of Sheffield* (1905). The *University of Wales* (1893) is composed of the colleges of *Aberystwyth*, *Bangor* and *Cardiff*.

There are many large and important universities in the British Commonwealth. In Canada, the famous *McGill University* in Montreal was founded in 1821. Others are the *University of Toronto* (1827); *Queens University* at Kingston, Ont. (1841); *Laval University*, Quebec (1852); *Dalhousie*, Halifax (1818), and *Montreal University* (1878).

The early universities in India were patterned after London University rather than on the Oxford-Cambridge style, and were purely examining institutions. *Calcutta*, *Bombay* and *Madras* universities were founded in 1857 as examining bodies.

In Australia, the state plays an important role in the development of universities. The *University of Melbourne* (1853) has the largest enrollment. Among the others are *Adelaide* (1874); *Tasmania* (1890); *Queensland* (1909); *Sydney* (1850), and *Western Australia* (1911).

There are also many well-endowed universities in New Zealand, South Africa, and other parts of the Commonwealth.

By 1800, Russia had only three universities—*Vilna* (1578), *Dorpat* (1632) and *Moscow* (1755). Other institutions developed later were the *University of Kharkov* (1804); *Kazan* (1804); *Warsaw*, now Polish (originally established 1816, but closed 1832-69); *St. Petersburg* (1819); *St. Vladimir* in Kiev (1835); *Odessa* (1865) and *Tomsk*, in Siberia (1888). The building of universities after the Revolution of 1917 was spurred by the Soviet government.

In China, the growth of universities was hampered by the chaotic state of the government in the 1900's, the recurring civil wars and the conflict with Japan.

The United States

Universities in the United States marched in step with the progress of the nation. The early settlers brought a heritage of European culture which they planted in New England soil. The first university in the country was started as *Harvard College* in 1636, with an endowment totaling 800 pounds. Harvard was to become probably the most famous of the American universities.

The *College of William and Mary* (1693) was the second institution of higher learning established in the colonies. Others started during the colonial period (current names only) are: *Yale* (1701); *University of Pennsylvania* (1740); *Princeton* (1746); *Washington and Lee* (1749); *Columbia* (1754); *Brown* (1764); *Rutgers* (1766) and *Dartmouth* (1770).

After the Revolution of 1776, the state tax-supported university was established. The *University of Virginia* (1819) was a notable early example of this type.

Colleges for women grew up in the second quarter of the 19th century. Among these are: *Mt. Holyoke* (1837); *Elmira* (1855); *Vassar* (1861); *Wells* (1868); *Hunter* (1870); *Wellesley* (1870); *Smith* (1871) and *Bryn Mawr* (1880).

In the latter part of the 19th century, universities established by private endowments arose. Typical of these are: *Cornell* (1865), which is also a land-grant institution; *Johns Hopkins* (1876); *Stanford* (1885) and the *University of Chicago* (1890).

Libraries of the World

Europe and Asia

Among the great libraries of the world, the *British Museum* remains in the first rank with more than 6,000,000 printed volumes and 60,000 manuscripts. It contains such outstanding treasures as the *Codex Alexandrinus* and the *Codex Sinaiticus* of the Bible, the best collection of Greek papyri from Egypt, and vast collections of original historical manuscripts of incalculable value. Some 150,000 volumes were destroyed in air raids during World War II, but many were replaced later.

One of the finest libraries in the world is the *Bibliothèque Nationale* in Paris, which has approximately 6,000,000 volumes, 155,000 manuscripts, 450,000 medals and coins, 5,000,000 prints and engravings and 400,000 maps.

The *State Library* in Berlin, founded in 1659-61, was amalgamated in 1947 with the library of the University of Berlin. Prior to World War II, the State Library had 2,850,000 volumes; the new combined library had only 1,500,000. The *State Library* at Munich also suffered extensive war losses, with some 500,000 volumes destroyed; it now contains about 2,000,000. Estimates have placed the war losses of all German libraries at between 20 and 25 million volumes.

The *Nationalbibliothek* in Vienna has about 1,500,000 volumes, a large collection of papyri, and a notable theater and motion picture collection.

While not as large as some of the European state libraries, the *Biblioteca Apostolica Vaticana* in Rome has many priceless old manuscripts bequeathed to the Vatican over the centuries, including the *Codex Vaticanus* of the 4th century.

Three of the more important Italian libraries are the *Biblioteca Nazionale* in Naples, with about 1,400,000 volumes; the *Biblioteca Nazionale Centrale* in Florence, with 4,000,000 volumes; and the *Biblioteca Nazionale Centrale* in Rome, with approximately 1,970,000 volumes.

Other large European libraries are the *Bibliothèque Royale* in Brussels (2,000,000 volumes), the *Biblioteca Nacional* in Madrid (1,500,000), the *University Library* at Amsterdam (more than 1,500,000) and the *Royal Library* in Stockholm (900,000). The *Lenin State Library* in Moscow is said to contain 15,000,000 volumes (a figure that probably includes periodicals), besides many collections of valuable historical documents. In Leningrad, the *Public Library* claims 10,000,000 volumes, and the *Library of the Academy of Sciences* some 8,000,000. There are said to be 350,000 libraries in all parts of the U.S.S.R.

In the Far East, the most extensive libraries are found in Japan, although war damage in 1944-45 was severe. In Tokyo, the *National Diet Library* (formerly the *Imperial Library*) was organized in 1948 as a deposit center. With its various branches, it contains an estimated 4,100,000 volumes. The *University Library* at Kyoto has about 1,820,000.

The oldest national libraries in South America are those of Argentina and Brazil, each founded in 1810; the former has about 600,000 volumes, the latter 1,000,000.

The United States and Canada

The earliest libraries in the colonial era were privately owned, although in 1731 Benjamin Franklin projected the first subscription library in Philadelphia. Endowments helped to set up many of the large

libraries, although many of these institutions are now receiving state or municipal support.

The largest library in the United States is the *Library of Congress*, established in 1800 by Congress. In 1957, it contained more than 11,050,000 books and pamphlets, and total collections of over 36,100,000. It extends services to members of Congress and other government departments, and also offers excellent facilities for persons engaged in scholarly research.

The *New York Public Library*, with some 6,400,000 volumes in 1957, is the largest public library in the U. S.

The *American Library Directory* for 1954 listed 12,478 libraries in the U. S., including 6,925 public (with 3,106 branches), 1,374 college and university, 1,923 special and 2,256 other types.

The growth of libraries attached to colleges and universities in the United States

has been phenomenal, and some of the university libraries are among the largest in the country. Those with more than 1,000,000 volumes each in 1956 were as follows: Harvard, 6,075,000; Yale, 4,280,000; California, including branches, 3,632,000; Illinois, 3,090,000; Michigan, 2,325,000; Columbia, 2,117,000; Chicago, 1,911,000; Minnesota, 1,791,000; Cornell, 1,746,000; Princeton, 1,500,000; Pennsylvania, 1,475,000; Stanford, 1,309,000; Texas, 1,273,000; Duke, 1,198,000; Northwestern, 1,185,000; Ohio State, 1,150,000; Johns Hopkins, 1,068,000; New York University, 1,041,000; Indiana, 1,000,000.

In Canada, the most important public library is that of Toronto, which has more than 875,000 volumes. Large Canadian university libraries include those at Queens (280,000), Toronto (609,000), McGill (720,000), and Laval (339,000). The *American Library Directory* for 1954 listed a total of 719 libraries in Canada, including 683 public.

Museums of the World

(For U. S. Museums, see page 482.)

The modern museum originated during the Renaissance, when the revival of interest in the arts and classical antiquity led princes, nobles and humanists to amass specimens of historical value and to house their collections in special buildings or galleries.

Art Museums

The *British Museum*, London, contains some of the most famous historical objects of the world, including the Elgin Marbles and the Rosetta Stone.

Victoria and Albert Museum, London, whose primary object is to furnish examples to illustrate the history of art, emphasizes architecture and sculpture, ceramics, engraving, book production, paintings, textiles, etc. The library is devoted principally to fine and applied arts of all countries.

National Gallery, London, contains a great number of old Masters, including paintings by Da Vinci, Michelangelo, Titoretto, Mantegna, Titian, Bellini, Jan van Eyck, Rubens, Rembrandt, Holbein, Constable and Turner.

Tate Gallery, London, established as part of the National Gallery, was badly damaged during air raids of World War II, but was completely restored by 1949.

Wallace Collection, London, has many objets d'art and curios of French origin, and first-rank canvases and etchings of Italian, Spanish, Flemish, Dutch and English artists.

In France, the most famous gallery is the *Louvre* in Paris, noted for the magnificence of its architecture as well as for

its art collection, which is the largest in the world. Other Parisian museums of importance are *Cluny*, *Rodin*, *Guimet*, and *Carnavalet*.

Among the magnificent Italian museums, the *National Museum* at Naples contains one of the best arranged and classified collections. The *Uffizi Gallery* in Florence, founded by the Medicis, has one of the world's largest and best collections of Italian art. Other galleries in Florence are the *Gallery of Modern Art* (*Pitti Palace*) and the *National Museum* (*Bargello*). Rome has numerous museums, including several in the Vatican.

In Berlin, the *National Gallery* was damaged during World War II.

The *Royal Museum of Fine Arts* in Brussels has a fine collection of French, Flemish and Dutch masters and houses many canvases by Rubens, Van Dyck, Jordaens, Rembrandt, Frans Hals and Jan Steen.

The *State Museum* in Amsterdam contains superb works by Rembrandt, Vermeer and others.

Among the notable art museums in other countries are the world-famous *Museo del Prado* in Madrid; the *Tretyakov Gallery* and the *Pushkin State Museum of Fine Arts* in Moscow; the *Hermitage State Museum* in Leningrad; and the *National Museum* in Tokyo, famed for its many Oriental paintings and objects of art.

Science Museums

The *Ashmolean Museum*, oldest in Great Britain, was founded in 1683 by Oxford

University and houses a collection of archeological and classical rarities.

Science Museum of London has exhibits of scientific instruments and appliances which review the progress of science and the history of invention. Other London museums of science are the *Natural History (British Museum)*, the *Imperial War Museum* (exhibits of both World Wars) and the *Geological Museum*.

The *Liverpool Museums* contain valuable collections of natural history and antiquities and are divided into departments of zoology, botany, geology, archeology and ethnology. The buildings were almost completely destroyed during World War II, although most of the exhibits were saved.

The *Manchester Museum* serves as both a municipal and a university museum. The *Bristol Museum* contains departments of geology, zoology, botany, archeology and Bristol antiquities. The *National Museum of Wales* at Cardiff has departments of art, archeology, botany, geology and zoology.

In Edinburgh, Scotland, are the famed *Royal Scottish Museum*, which has collections in art, ethnography, natural history, technology and archeology; and the *National Museum of Antiquities of Scotland*, noted for its coin and manuscript collections.

The *National Museum* in Dublin and the *Municipal Museum* in Belfast have important science collections.

Notable institutions of continental Europe include the *Natural History Museum* in Paris, the *Museum of Oceanography* in Monaco, the *Natural History Museum* in Lisbon, the *State Museum of Geology and Mineralogy* in Leyden (Netherlands), the *Museum of Natural History* in Stock-

holm, the *Natural History Museum* in Vienna, the *Hungarian National Museum* in Budapest, the *National Museum* in Prague, and the various science museums in Berne, Geneva, Zurich and Neuchâtel, Switzerland. Most larger cities of the U.S.S.R. have science museums of varying sizes, some specializing in local exhibits of natural history.

Famous science museums in Germany prior to World War II included the various sections of the *Staatliche Museen* in Berlin (re-established after the war) and the museum of ethnography in Hamburg.

In Calcutta is the *Indian Museum*, outstanding for its marine fauna and vertebrate fossils, and in Bombay the *Victoria and Albert Museum*.

In Australia are the *Queensland Museum* and the *Botanic Museum* in Brisbane, the *South Australian Museum* in Adelaide, and the *Australian Museum* in Sydney.

New Zealand contains the *Canterbury Museum*, Christchurch, rich in local fauna, flora and geological items, and a Maori and Polynesian ethnological collection.

In Africa, the *South African Museum*, Capetown, holds general and local history collections and others illustrating anthropology, ethnology and archeology. The *Durban Museum* contains much anthropological material. In Cairo are the notable collections of the *Egyptian Museum*.

Other museums of note include the *Archeological Museums* at Istanbul, the *Tokyo Science Museum*, the *National Museum of Natural History* in Santiago (Chile), the *National Museum* at Rio de Janeiro, and the *Argentine National Museum of Natural Sciences* at Buenos Aires.

Zoological Gardens

North America has more than 30 major zoos, in the United States, Canada and Mexico. The *Quebec Zoological Society's* collection is made up of Canadian species; Toronto has many exotic species.

The first zoological garden in the United States was established in Philadelphia in 1874. Since that time nearly every large city in the country has acquired a zoo. Among the largest are the celebrated *Bronx Zoo* and the *Central Park Zoo* in New York, the *Lincoln Park Zoo* and the *Brookfield Zoo* in Chicago, and those in St. Louis, Cincinnati, Detroit, Kansas City and San Diego. The *National Zoological Park* in Washington, D. C., in a beautiful setting of hills, woods and streams, was established in 1890 by an act of Congress. Some of the U. S. zoos exhibit their collections in open-air, barless pits; the *Brookfield Zoo* is an example.

In Europe, zoological gardens have long been popular public institutions. The *Jardin d'Acclimatation*, in the Bois de Boulogne, Paris, was established in 1858, and a model zoo at Vincennes was added in 1937 for the Paris Exposition.

Germany had about 20 zoological gardens, many of which were developed in the peacetime years between World Wars I and II. Large zoos were located in Berlin and Frankfurt am Main. In Munich, the animals were grouped according to the continent of their origin. Others were established at Dresden, Leipzig and Cologne. At Stellingen, the *Hagenbeck Garden* became an outstanding show place and distributing center for animals. Smaller collections were established at Düsseldorf, Elberfeld and Hanover. Several German zoos, notably that at Berlin, were destroyed during World War II.

The *Schönbrunn* at Vienna is one of the oldest zoos in Europe. The Budapest zoological gardens house a fine collection of European birds. At Antwerp, the *Royal Zoological Society* founded a large menagerie in 1843. It was seriously damaged by German bombs during World War II.

In the British Isles, the outstanding collection is in the garden of the *London Zoological Society* in Regent's Park. Although this zoo received a number of direct bomb hits in 1940-41 and again in 1944, it remained open throughout World War II; visitors during this period numbered 6,500,000. Manchester and Clifton have smaller gardens, and the one at Edinburgh is famous for its collection of pen-

guins. The *Dublin Zoo* is noted for its lions, many of which were born there.

The Amsterdam zoo, with its East Indian collection and its aquarium, and the Rotterdam gardens are the two best known in the Netherlands. Built on a high elevation, the *Skansen Zoo* in Stockholm exhibits its north European specimens. The most important gardens in the U.S.S.R. are found in Moscow, where northern as well as exotic species are collected. The zoo at Rome has part of its collection confined in barless pits. At Lisbon there is a small zoological garden, and in Madrid a part of the original royal menagerie. A new zoo notable for its landscaping was opened at Naples, Italy, in 1952.

Famous Structures

(See also Seven Wonders of the World on page 791.)

Ancient

The Great Sphinx of Egypt, one of the wonders of ancient Egyptian architecture, adjoins the pyramids of Giza and has a length of 189 ft. It was built in the 4th dynasty and was used as a temple.

Other Egyptian buildings of note include the *Temples of Karnak* and *Edfu* and the *Tombs at Beni Hassan*.

The Parthenon of Greece, built on the Acropolis in Athens, was the chief temple to the goddess Athena. It was believed to have been completed by 438 B.C. The present temple remained intact until the 5th century A.D. Today, though the Parthenon is in ruins, its majestic proportions are still discernible.

Other great structures of ancient Greece were the *Temples at Paestum* (about 540 and 420 B.C.); the *Temple of Poseidon* (about 460 B.C.); the *Temple of Apollo at Corinth* (about 540 B.C.); the *Temple of Apollo at Bassae* (about 450-420 B.C.); the famous *Erechtheum* atop the Acropolis (about 421-405 B.C.); the *Temple of Athena Nike* at Athens (about 426 B.C.); the *Olympieum* at Athens (174 B.C.-A.D. 131); the *Athenian Treasury* at Delphi (about 515 B.C.); the *Propylaea* of the Acropolis at Athens (437-432 B.C.); the *Theater of Dionysus* at Athens (about 350-325 B.C.); the "*House of Cleopatra*" at Delos (138 B.C.) and the *Theater* at Epidauros (about 325 B.C.).

The Colosseum (Flavian Amphitheater) of Rome, the largest and most famous of the Roman amphitheaters, was opened for use A.D. 80. Elliptical in shape, it consisted of three stories and an upper gallery, rebuilt in stone in its present form in the third century A.D. Its seats rise in tiers, which in turn are buttressed by concrete vaults and stone piers. It could seat between 40,000 and 50,000 spectators. The

Colosseum was principally used for gladiatorial combat.

The Pantheon at Rome, begun by Agrippa in 27 B.C. as a temple, was rebuilt in its present circular form by Hadrian (A.D. 110-25). Literally the Pantheon was intended as a temple of "all the gods." It is remarkable for its perfect preservation today, and it has served continuously for 20 centuries as a place of worship.

Famous Roman arches include the *Arch of Constantine* (about A.D. 315) and the *Arch of Titus* (about A.D. 80).

Later European

St. Mark's Cathedral in Venice (1063-67), one of the great examples of Byzantine architecture, was begun in the 9th century. Partly destroyed by fire in 976, it was later rebuilt as a Byzantine edifice.

Other famous Byzantine examples of architecture are *St. Sophia* in Constantinople (A.D. 532-37); *San Vitale* in Ravenna (542); *St. Paul's Outside the Walls*, Rome (5th century); the *Kremlin* baptism and marriage church, Moscow (begun in 1397); and *St. Lorenzo Outside the Walls*, Rome, begun in 588.

The Cathedral Group at Pisa (1067-1173), one of the most celebrated groups of structures built in Romanesque style, consists of the cathedral, the cathedral's baptistery, and the *Leaning Tower*. This trio forms a group by itself in the northwest corner of the city. The cathedral and baptistery are built in black and white marble. The campanile (*Leaning Tower*) is 179 ft. high and leans more than 16 feet out of the perpendicular. There is little reason to believe that the architects intended to have the tower lean.

Other examples of Romanesque architecture include the *Vézelay Abbey* in France (1130); the *Church of Notre-Dame-*

du-Port at Clermont-Ferrand in France (1100); the *Church of San Zeno* (begun in 1138) at Verona, and *Durham Cathedral* in England.

The *Alhambra* (1248-1354), located in Granada, Spain, is universally esteemed as one of the greatest masterpieces of Moslem architecture. Designed as a palace and fortress for the Moorish monarchs of Granada, it is surrounded by a heavily fortified wall more than a mile in perimeter. The location of the Alhambra in the Sierra Nevada provides a magnificent setting for this jewel of Moorish Spain.

The *Tower of London* is a group of buildings and towers covering 13 acres along the north bank of the Thames. The central *White Tower*, begun in 1078 during the reign of William the Conqueror, was originally a fortress and royal residence, but was later used as a prison. The *Bloody Tower* is associated with Anne Boleyn and other notables.

Westminster Abbey, in London, was begun in 1045 and completed in 1065. It was rebuilt and enlarged in 1245-50.

Notre-Dame de Paris (begun in 1163), one of the great examples of Gothic architecture, is a twin-towered church with a steeple over the crossing and immense flying buttresses supporting the masonry at the rear of the church.

Other famous Gothic structures are *Chartres Cathedral* (12th century); *Sainte Chapelle*, Paris (1246-48); *Laon Cathedral*, France (1160-1205); *Rheims Cathedral* (about 1210-50; rebuilt after its almost complete destruction in World War I); *Rouen Cathedral* (13th-16th centuries); *Amiens Cathedral* (1218-69); *Beauvais Cathedral* (begun 1247); *Salisbury Cathedral* (1220-60); *York Minster* or the *Cathedral of St. Peter* (begun in the 7th century); *Milan Cathedral* (begun 1386); and *Cologne Cathedral* (13th-19th centuries; badly damaged in World War II).

The *Duomo* (cathedral) in Florence was founded in 1298, completed by Brunelleschi and consecrated in 1436. The oval-shaped dome dominates the entire structure.

The *Vatican* is a group of buildings in Rome comprising the official residence of the Pope. The *Basilica of St. Peter*, the largest church in the Christian world, was begun in 1450. The *Sistine Chapel*, begun in 1473, is noted for the art masterpieces of Michelangelo, Botticelli and others. The *Basilica of the Savior* (known as *St. John Lateran*) is the first-ranking Catholic Church in the world, for it is the cathedral of the Pope.

Other examples of Renaissance architecture are the *Palazzo Riccardi*, the *Palazzo Pitti* and the *Palazzo Strozzi* in Florence; the *Farnese Palace* in Rome; *Palazzo Grimani* (completed about 1550) in Venice;

the *Escorial* (1563-93) near Madrid; the *Town Hall of Seville* (1527-32); the *Louvre*, Paris; the *Château at Blois*, France; *St. Paul's Cathedral*, London (1675-1710; badly damaged in World War II); the *Ecole Militaire*, Paris (1752); the *Pazzi Chapel*, Florence, designed by Brunelleschi (1429); the *Palace of Fontainebleau* and the *Château de Chambord* in France.

The *Palace of Versailles*, containing the famous Hall of Mirrors, was built during the reign of Louis XIV and served as the royal palace until 1793.

Outstanding European buildings of the 18th and 19th centuries are the *Superga* at Turin, the *Hôtel-Dieu* in Lyon, the *Belvedere Palace* at Vienna, the *Royal Palace of Stockholm*, the *Opera House of Paris* (1863-75); the *Bank of England*, the *British Museum*, the *University of London* and the *Houses of Parliament*, all in London; the *Panthéon*, the *Church of the Madeleine*, the *Bourse* and the *Palais de Justice* in Paris.

The *Eiffel Tower*, in Paris, was built for the Exposition of 1889 by Alexandre Eiffel. It is 984 ft. high.

Asiatic and African

The *Taj Mahal* (1632-50), at Agra, India, built by Shah Jahan as a tomb for his wife, is considered by some as the most perfect example of the Mogul style and by others as the most beautiful building in the world. Four slim white minarets flank the building, which is topped by a white dome; the entire structure is of marble.

Other examples of Indian architecture are the temples at Benares and Tanjore.

Among famed Moslem edifices are the *Dome of the Rock* or *Mosque of Omar*, Jerusalem (A.D. 691); the *Citadel* (1166), and the *Tombs of the Mamelukes* (15th century), in Cairo; the *Tomb of Humayun* in Delhi; the *Blue Mosque* (1468) at Tabriz and the *Tamerlane Mausoleum* at Samarkand.

Angkor Vat, outside the city of Angkor Thom, Cambodia, is one of the most beautiful examples of Cambodian or Khmer architecture. The sanctuary was built during the 12th century.

Great Wall of China (228 B.C.?), designed specifically as a defense against nomadic tribes, has numerous large watch towers which could be called buildings. It was erected by Emperor Ch'in Shih Huang Ti and is 1,400 miles long. Built mainly of earth and stone, it varies in height between 18 and 30 feet.

Typical of Chinese architecture are the pagodas or temple towers. Among some of the better known pagodas are the *Great Pagoda of the Wild Geese* at Sian (founded in 652); *Nan 't'a* (11th century) at Fang Shan; the *Pagoda of Sung Yueh Ssu* (A.D. 523) at Sung Shan, Honan.

Other well-known Chinese buildings are the *Drum Tower* (1273), the *Three Great Halls* in the Purple Forbidden City (1627), *Buddha's Perfume Tower* (19th century), the *Porcelain Pagoda* and the *Summer Palace*, all at Peiping.

United States

Rockefeller Center, from 5th to 6th Aves. and from 48th to 51st Sts. in New York City, occupies 12½ acres and contains 15 buildings, the highest being the 70-story *RCA Building*.

Grant's Tomb, at Riverside Dr. near 122nd St. in New York City, contains the bodies of Ulysses S. Grant and his wife. It was completed in 1897.

The Cathedral of St. John the Divine, at Cathedral Pkwy. and Amsterdam Ave. in New York City, was begun in 1892 but

is not yet completed. When completed, it will be the largest Gothic cathedral in the world: 601 ft. long, 146 ft. wide at the nave, 320 ft. wide at the transept.

St. Patrick's Cathedral, at 5th Ave. and 50th St. in New York City, has a seating capacity of 4,500. The nave was opened in 1877; the cathedral was dedicated in 1879.

Lincoln Memorial, in Washington, D. C., was dedicated in 1922. It has 36 columns (the number of states in 1865), each 44 ft. high. The main chamber contains a statue of Lincoln.

Independence Hall, in Philadelphia, was the scene of the signing of the Declaration of Independence and the drawing up of the U. S. Constitution. It was built between 1732-41 as the State House. The Liberty Bell is on the first floor.

Great Disasters

Earthquakes and Volcanic Eruptions

- A.D. 79 Aug. 24, ITALY: eruption of Mt. Vesuvius buried cities of Pompeii and Herculaneum, killing thousands.
- 1755 Nov. 1, PORTUGAL: one of the most severe of recorded earthquakes leveled Lisbon and was felt as far away as southern France and North Africa; between 10,000 and 20,000 killed in Lisbon alone.
- 1883 Aug. 26-28, NETHERLANDS INDIES: eruption of Krakatoa; violent explosions destroyed two-thirds of island. Sea waves occurred as far away as Cape Horn, and possibly England. Estimated 36,000 dead.
- 1902 May 8, MARTINIQUE, WEST INDIES: Mt. Pelée erupted and wiped out city of St. Pierre; 40,000 dead.
- 1906 April 18, SAN FRANCISCO: earthquake accompanied by fire razed more than 4 sq. mi.; more than 500 dead or missing; property damage about 250-300 millions.
- 1908 Dec. 28, MESSINA, SICILY: about 85,000 killed and city totally destroyed by one of most disastrous of recorded earthquakes.
- 1923 Sept. 1, JAPAN: earthquake destroyed third of Tokyo and most of Yokohama; more than 90,000 persons were killed.
- 1935 May 31, INDIA: earthquake at Quetta killed an estimated 50,000.
- 1939 Jan. 24, CHILE: earthquake razed some 50,000 sq. mi.; 30,000 persons killed.
- 1939 Dec. 27, NORTHERN TURKEY: severe quakes destroyed city of Erzingan; about 100,000 casualties.
- 1949 Aug. 5, ECUADOR: earthquake killed about 6,000 and razed 50 towns.
- 1950 Aug. 15, INDIA: second heaviest earthquake on record affected 30,000 sq. mi. in Assam; 20,000-30,000 believed killed.
- 1951 Jan. 18-21, PAPUA TERRITORY, NEW GUINEA: eruption of Mt. Lamington killed more than 3,000.
- 1954 Sept. 9, ALGERIA: about 1,500 reported dead in Northern Algerian earthquake.
- 1956 June 17, AFGHANISTAN: about 2,000 killed during 10-day series of earthquakes in vicinity of Kabul.
- 1957 July 2, NORTHERN IRAN: 1,564 reported dead in earthquake.
- 1957 July 28, MEXICO: about 60 dead in quakes centering in Mexico City and vicinity of Acapulco.
- 1957 Dec. 13-15, WESTERN IRAN: 1,392 dead in earthquake.

Floods, Avalanches and Tidal Waves

WORLD

- 1228 HOLLAND: 100,000 persons reputedly drowned by sea flood in Friesland section.
- 1642 CHINA: rebels besieging Kalfeng destroyed seawall, causing flood that drowned 300,000 inhabitants.
- 1887 CHINA: hundreds of thousands of lives were reputedly lost in Honan province in overflow of Hwang Ho River.
- 1896 JAPAN: earthquake and tidal wave at Sanriku killed 27,000.
- 1939 CHINA: floods in north; casualties estimated at 10,000,000 homeless, starved or drowned.
- 1946 ALASKA-HAWAII: series of tidal waves in Pacific originating off Alaska killed about 150 in Hawaii.
- 1947 JAPAN: floods in wake of typhoon killed about 2,000 persons on Honshu Island.
- 1948 TURKEY: hundreds of persons were drowned when two rivers in southern Turkey burst their dikes.
- 1948 CHINA: about 1,000 reported dead in floods near Foochow.
- 1950 CHINA: floods in eastern and southern China left 1,000,000 homeless and killed 500.
- 1951 ALPS: snow avalanches killed more than 200 in Alpine regions of Switzerland, Italy, France and Austria.
- 1951 MANCHURIA: floods killed 1,800; 3,000 missing.
- 1953 NORTHWEST EUROPE: storm followed by floods devastated North Sea coastal areas. Netherlands was hardest hit, with 1,794 dead.
- 1954 IRAN: flash flood reportedly killed 2,000 religious pilgrims.
- 1955 INDIA: floods in Punjab, Patiala and at Delhi reported to have killed 1,700.
- 1956 CHINA: floods in three provinces following typhoon killed more than 2,000.

UNITED STATES

- 1889 PENNSYLVANIA: more than 2,000 died in Johnstown flood.
- 1913 OHIO AND INDIANA: floods of Ohio and Indiana rivers took 730 lives.

- 1927 MISSISSIPPI VALLEY: floods inundated 20,000 sq. mi.; 700,000 were left homeless.
- 1937 MISSISSIPPI AND TRIBUTARY VALLEYS: floods in the Allegheny, Mississippi, Ohio valleys killed hundreds.

- 1954 TEXAS-MEXICO BORDER: flood of the Rio Grande river killed 50 or more persons.
- 1955 NORTHERN CALIFORNIA, OREGON: week of rains caused \$150,000,000 damage, 74 deaths.

Tornadoes, Typhoons and Hurricanes

(For tornadoes and hurricanes in the U. S., see Pages 462-64.)

WORLD

- 1864 Oct. 5, INDIA: most of Calcutta denuded by cyclone; 70,000 killed.
- 1876 Oct. 31, INDIA: cyclone, tidal wave swept 3,000 sq. mi.; 215,000 killed.
- 1882 June 6, INDIA: cyclone and tidal wave killed 100,000 in Bombay.
- 1906 CHINA: typhoon at Hong Kong killed about 10,000.
- 1930 Sept. 3, SANTO DOMINGO (now Ciudad Trujillo): hurricane killed about 2,000 and injured 6,000.
- 1934 Sept. 21, JAPAN: hurricane killed more than 4,000 on Honshu.
- 1935 Oct. 25, HAITI: hurricane, flood killed 2,000 in Jérémie and Jacmel.

- 1942 Oct. 16, INDIA: cyclone devastated Bengal; about 40,000 lives lost.
- 1949 Oct. 27, INDIA: cyclone along southeastern coast killed about 1,000.
- 1949 Oct. 31-Nov. 2, PHILIPPINES: 1,000 persons believed dead following typhoon.
- 1952 Oct. 20-22, INDO-CHINA, PHILIPPINES: typhoons killed more than 1,000 persons.
- 1953 Sept. 25, VIÊT-NAM: typhoon left about 1,000 dead.
- 1954 Sept. 26, JAPAN: typhoon off Hakodate killed 1,200-1,600.
- 1955 Sept. 19, MEXICO: Hurricane Hilda killed over 200 in Tampico area.

Fires and Explosions

WORLD

- 1666 Sept. 2, ENGLAND: "Great Fire of London" destroyed 13,200 houses, St. Paul's Church, 86 parish churches, etc. Damage 10 million pounds.
- 1812 Sept. 14, RUSSIA: fire started by Russians in Moscow after French occupation destroyed 30,800 houses.
- 1917 Dec. 6, CANADA: explosion and fire at Halifax when ammunition ship collided with a vessel; 1,500 dead.
- 1922 ASIA MINOR: more than three-fifths of Smyrna destroyed by fire following Turkish occupation.
- 1948 July 28, GERMANY: explosion in I. G. Farben Ludwigshaven works killed hundreds, injured 6,000.
- 1949 Sept. 2, CHINA: fire on Chungking waterfront killed 1,700 and gutted 10,000 buildings.
- 1955 June 11, FRANCE: crash and explosion of racing car into crowd during Grand Prix race, Le Mans, killed 82.
- 1956 Aug. 7, COLOMBIA: about 1,200 reported killed when 7 army ammunition trucks exploded at Cali.
- 1956 Aug. 8, BELGIUM: 262 died in coal mine fire at Marcinelle.
- 1958 Feb. 19, INDIA: explosion in coal mine near Asansol killed 181.
- 1958 Feb. 19, BAHREIN: British freighter *Seistan* exploded; 53 killed.

UNITED STATES

- 1835 Dec. 16, NEW YORK CITY: 530 buildings destroyed by fire.
- 1871 Oct. 8, CHICAGO: the "Chicago Fire," which started in barn, swept 2,124 acres, burned 17,450 buildings, killed 250 persons; 196 million damage.
- 1872 Nov. 9, BOSTON: fire destroyed 800 buildings; 75 million damage.
- 1903 Dec. 30, CHICAGO: Iroquois Theatre fire killed 602.
- 1904 Feb. 7, BALTIMORE, MD.: fire destroyed most of business section; 125 million damage.
- 1937 March 18, NEW LONDON, TEXAS: explosion destroyed schoolhouse; 413 children and 14 teachers killed.
- 1942 Nov. 28, BOSTON: Cocoanut Grove night club fire killed about 500.
- 1944 July 17, PORT CHICAGO, CALIF.: more than 300 killed in explosion of two ammunition ships.
- 1946 Dec. 7, ATLANTA: fire in Winecoff Hotel killed 119.
- 1947 March 25, CENTRALIA, ILL.: explosion in coal mine killed 111 miners.
- 1947 April 16-18, TEXAS CITY, TEXAS: most of city destroyed, over 500 dead following explosion on ship.
- 1951 Dec. 21, near WEST FRANKFORT, ILL.: 119 coal miners died in explosion.

- 1953 Oct. 16, BOSTON, MASS.: explosion and fire aboard U. S. aircraft carrier *Leyte* killed 37.
- 1956 Nov. 25, near SAN DIEGO, CALIF.: forest fires destroyed about 40,000 ac.; 11 killed.
- 1957 Feb. 4, near BISHOP, VA.: 37 died in coal mine blast.
- 1957 Feb. 5, RENO, NEV.: gas explosions destroyed city block; 2 died.
- 1958 April 18, OKINAWA: underwater explosion of U. S. munitions ship, sunk in World War II, killed 40 persons.
- 1958 May 22, LEONARDO, N. J.: 8 Nike Ajax guided missiles exploded; 6 Army servicemen and 4 civilians killed.

Shipwrecks (not including military or naval action)

WORLD

- 1833 May 11, LADY OF THE LAKE: bound from England to Quebec, struck iceberg; 215 perished.
- 1853 Sept. 29, ANNIE JANE: emigrant vessel off coast of Scotland; 348 persons died.
- 1912 March 5, PRINCIPE DE ASTURIAS: Spanish steamer struck rock off Sebastien Pt.; 500 drowned.
- 1912 April 15, TITANIC: sank after colliding with iceberg; 1,513 died.
- 1914 May 29, EMPRESS OF IRELAND: sank after collision in St. Lawrence River; 1,024 perished.
- 1928 Nov. 12, VESTRIS: British steamer sank in gale off Virginia; 110 persons died.
- 1931 June 14, French excursion steamer overturned in gale off St. Nazaire; approximately 450 died.
- 1939 June 1, Submarine THETIS: sank in Liverpool Bay, Eng.; 99 persons perished.
- 1942 Oct. 2, QUEEN MARY: rammed and sank a British cruiser; 338 aboard the cruiser died.
- 1948 Dec. 3, KIANGYA: Chinese refugee ship wrecked in explosion; about 1,000 believed dead.
- 1949 Jan. 27, TAIPING: Chinese liner collided with collier and both sank; at least 600 died.
- 1949 Sept. 17, NORONIC: Canadian Great Lakes cruise ship burned at Toronto dock; about 130 died.
- 1950 Jan. 12, TRUCULENT: British submarine sank in Thames estuary after collision with tanker; 64 dead.
- 1951 April 16, AFFRAY: British submarine sank in English channel; 75 dead.
- 1953 Jan. 9, CHANG TYONG-HO: South Korean ferry foundered off Pusan; 249 reported dead.
- 1953 Jan. 31, PRINCESS VICTORIA: British ferry sank in Irish Sea; 133 reported lost.
- 1953 Aug. 1, MONIQUE: French motor ship with 120 aboard disappeared in South Pacific.
- 1956 June 3, Steamship sank during monsoon in Bay of Bengal; about 200 drowned.
- 1956 July 25, ANDREA DORIA: Italian liner collided with Swedish liner *Stockholm* off Nantucket Island, Mass., sinking next day; 52, mostly passengers aboard Italian ship, dead or unaccounted for; more than 1,600 rescued.
- 1957 July 14, ESHGHABAD: Soviet ship ran aground in Caspian Sea; about 270 perished.
- 1958 March 1, Passenger ferry sank in squall in Sea of Marmara, Turkey; over 200 killed.

U. S. AND U. S. LINES

- 1865 April 27, SULTANA: boiler explosion on Mississippi River steamboat near Memphis; 1,450 killed.
- 1898 Nov. 26, CITY OF PORTLAND: Loss of 157 off Cape Cod.
- 1904 June 15, GENERAL SLOCUM: excursion steamer burned in New York Harbor; 1,021 perished.
- 1915 July 24, EASTLAND: Great Lakes excursion steamer overturned in Chicago River; 812 died.
- 1934 Sept. 8, MORRO CASTLE: about 130 killed in fire occurring off Asbury Park, N. J.
- 1939 May 23, Submarine SQUALUS: sank with 59 men off Hampton Beach, N. H.; 33 members of the crew were rescued.
- 1945 April 9, U. S. ship, loaded with aerial bombs, exploded at Bari, Italy; at least 360 killed.
- 1952 Jan. 10, FLYING ENTERPRISE: freighter sank about 35 miles off southwest England after valiant 12-day effort by captain, Henrik K. Carlsen, to save ship.
- 1952 April 26, HOBSON: minesweeper collided with aircraft carrier *Wasp* and sank during night maneuvers in mid-Atlantic; 176 persons were reported lost.
- 1954 Oct. 7, MORMACKITE: freighter capsized off Cape Henry, Va.; 37 lost.
- 1956 Sept. 15, PELAGIA: freighter sank in storm off Norway; 32 lost.

Aircraft Accidents (not including military or naval action)

WORLD

- 1921 Aug. 24, ENGLAND: ZR-2, British dirigible, broke in two on trial trip near Hull; 62 died.
- 1930 Oct. 5, FRANCE: British dirigible, R-101, crashed at Beauvais; 47 died.
- 1935 May 18, U.S.S.R.: stunt flier crashed into giant plane, the *Maxim Gorkey*; 49 killed.
- 1938 July 24, COLOMBIA: military plane crashed into grandstand during air review at Bogotá, killing 53.
- 1947 Feb. 15, COLOMBIA: Avianca airliner crashed near Bogotá; 53 persons were killed.
- 1950 March 12, near CARDIFF, WALES: crash of chartered airliner killed 80.
- 1950 Nov. 13, near GRENOBLE, FRANCE: Canadian plane carrying Holy Year pilgrims crashed; 58 dead.
- 1956 Feb. 18, near VALLETTA, MALTA: Scottish airliner crash killed 50.
- 1956 Feb. 20, near CAIRO, EGYPT: desert crash of French airliner; 52 died.
- 1956 June 20, off ASBURY PARK, N. J.: Venezuelan airliner exploded and fell into Atlantic, killing all 74 aboard.
- 1956 Dec. 9, near CHILLIWACK, B. C., CANADA: Canadian airliner crashed; all 62 aboard killed.
- 1957 March 17, near CEBU CITY, PHILIPPINES: Pres. Ramón Magsaysay and 24 others killed in crash.
- 1957 July 16, near BIAK ISLAND, NEW GUINEA: Crash of Dutch airliner killed 57.
- 1957 Aug. 11, near QUEBEC, CANADA: 79 died in crash of chartered transatlantic airliner; worst Canadian air accident to date.
- 1958 Feb. 6, near MUNICH, GERMANY: British airliner crashed and burned; 21 persons, including 7 members of Manchester soccer team, were killed.
- 1958 Aug. 14, near IRELAND: Dutch KLM Super-Constellation crashed into North Atlantic; 99 killed.
- U. S. AND U. S. LINES
- 1925 Sept. 3, CALDWELL, OHIO: U. S. dirigible *Shenandoah* broke apart, killing 14.
- 1933 April 4, NEW JERSEY COAST: U. S. dirigible *Akron* crashed into sea; 73 died.
- 1937 May 6, LAKEHURST, N. J.: German zeppelin *Hindenburg* destroyed by fire at tower mooring; 36 persons were killed.
- 1947 June 13, near LEESBURG, VA.: fifty killed in crash of airliner.
- 1947 Oct. 24, BRYCE CANYON, UTAH: airliner crashed into hillside after catching fire in midair; 52 persons were killed.
- 1949 June 7, near SAN JUAN, PUERTO RICO: crash of converted army transport into ocean killed 53; 28 rescued.
- 1949 Nov. 1, WASH., D. C.: fighter plane rammed airliner, killing 55.
- 1950 Aug. 31, near CAIRO, EGYPT: crash of U. S. airliner killed 55, including 23 Americans.
- 1951 March 23, ATLANTIC OCEAN: U. S. Air Force transport with 53 aboard disappeared.
- 1951 April 25, near KEY WEST, FLA.: Cuban airliner and U. S. Navy plane collided; 43 killed.
- 1951 June 30, ROCKY MOUNTAIN NATIONAL PARK, COLO.: airliner crash killed 50.
- 1951 Dec. 16, ELIZABETH, N. J.: nonscheduled airliner crash killed 56.
- 1952 Jan. 22, ELIZABETH, N. J.: 29 killed, including former Sec. of War Robert P. Patterson, when airliner hit apartments; 7 were on ground.
- 1952 Feb. 11, ELIZABETH, N. J.: third major air disaster in Elizabeth within 2 months fatally injured 33.
- 1952 April 11, near SAN JUAN, PUERTO RICO: airliner crashed into sea; 52 killed, 17 rescued.
- 1952 April 29, NORTH CENTRAL BRAZIL: airliner bound for New York crashed in jungle; 50 died.
- 1952 Nov. 23, near ANCHORAGE, ALASKA: Air Force transport crash; 52 killed.
- 1952 Dec. 20, MOSES LAKE, WASHINGTON: crash of Air Force "Globemaster" killed 87 servicemen, injured 28.
- 1953 Feb. 14, GULF OF MEXICO: airliner crash during storm killed 46.
- 1953 June 18, near TOKYO, JAPAN: crash of U. S. Air Force "Globemaster" killed 129 servicemen in world's worst air disaster to date.
- 1953 July 11, PACIFIC OCEAN: airliner crashed about 325 mi. east of Wake Island; 58 persons were killed.
- 1954 Oct. 31, ATLANTIC OCEAN: U. S. navy plane with 42 aboard lost.
- 1955 March 22, near HONOLULU, HAWAII: crash of U. S. navy transport plane killed 66.
- 1955 Aug. 11, near EDELWEILER, GERMANY: two U. S. troop carriers collided; 66 air force personnel killed.
- 1955 Oct. 6, near LARAMIE, WYO.: airliner hit mountain; 66 died.
- 1955 Nov. 1, near LONGMONT, COLO.: crim-

- inally placed time-bomb destroyed airliner in flight, killing 44.
- 1956 June 30, GRAND CANYON, ARIZ.: 128 died in collision of two airliners; worst commercial air disaster to date.
- 1956 July 13, near FORT DIX, N. J.: 45 of 66 aboard killed in crash of U. S. air force transport.
- 1956 Oct. 11, ATLANTIC OCEAN: U. S. Air Force plane with 59 aboard disappeared.
- 1957 Feb. 1, New YORK, N. Y.: airliner crash on Rikers Island killed 20 of 101 aboard.
- 1957 March 21, PACIFIC OCEAN: U. S. Air Force plane disappeared; 67 lost.
- 1958 Feb. 1, LOS ANGELES, CALIF.: military air transport and Navy bomber collided in flight; 47 servicemen killed.
- 1958 March 7, OKINAWA: U. S. Marine Corps transport and Marine jet fighter collided in flight; 26 killed.
- 1958 March 27, BRIDGEPORT, TEX.: 2 Air Force transports collided; 18 killed.
- 1958 April 6, near MIDLAND, MICH.: Capital Airlines Viscount plane crashed; 47 killed.
- 1958 April 21, near LAS VEGAS, NEV.: airliner and Air Force jet plane collided in flight; 49 killed.

Railroad Accidents WORLD

- 1857 March 17, DES JARDINS (SOULANGES) CANAL, CANADA: train derailed on bridge; about 60 killed.
- 1864 June 29, near BELOEIL, CANADA: about 90 killed when train ran through open switch.
- 1879 Dec. 28, DUNDEE, SCOTLAND: train blown off Tay bridge; 73 drowned.
- 1881 June 24, near CUARTLA, MEXICO: about 200 died when train fell into river.
- 1882 July 13, near TCHERNY, RUSSIA: more than 150 killed in derailment.
- 1889 June 12, near ARMAGH, IRELAND: about 80 killed in collision.
- 1891 June 14, near BASEL, SWITZERLAND: about 100 killed in collision.
- 1915 May 22, GREYNA, SCOTLAND: two passenger trains and troop train collided; 227 killed.
- 1917 Dec. 12, MODANE, FRANCE: almost 550 reported killed in derailment of troop train near mouth of Mt. Cenis tunnel.
- 1938 Dec. 25, near KISHINEV, RUMANIA: about 100 killed in collision.
- 1939 Dec. 22, near MAGDEBURG, GERMANY: more than 125 killed in collision; 99 killed in another wreck near Friedrichshafen.
- 1940 Jan. 29, OSAKA, JAPAN: 200 killed in collision.
- 1944 March 2, near SALERNO, ITALY: 521 suffocated when Italian train stalled in tunnel.
- 1949 Oct. 22, near NOWY DWOR, POLAND: more than 200 reported killed in derailment of Danzig-Warsaw express.
- 1950 April 6, near RIO DE JANEIRO, BRAZIL: train wrecked when bridge collapsed; 108 killed or missing.
- 1952 March 4, near RIO DE JANEIRO, BRAZIL: about 120 reported killed in collision of 2 trains.
- 1952 Oct. 8, HARROW-WEALDSTONE, ENGLAND: two express trains crashed into commuter train; 112 dead.
- 1953 Dec. 24, near WAIOURI, NEW ZEALAND: train plunged through bridge; 155 dead and others missing.
- 1953 Dec. 24, near SAKVICE, CZECHOSLOVAKIA: crash of two trains reported to have killed 103.
- 1954 Sept. 28, near HYDERABAD, INDIA: 137 dead when train plunged into river.
- 1956 Sept. 2, near MAHBUBNAGAR, INDIA: at least 120 killed when bridge collapsed under train.
- 1957 Sept. 1, near KENDAL, JAMAICA: about 175 killed when train plunged into ravine.
- 1957 Sept. 29, near MONTGOMERY, WEST PAKISTAN: express train crashed into standing oil train; nearly 300 killed.
- 1957 Dec. 4, ST. JOHN'S, ENGLAND: 92 killed, 187 injured as one commuter train crashed into rear of another in dense fog.

UNITED STATES

- 1943 Dec. 16, near RENNERT, N. C.: 72 killed in derailment and collision.
- 1944 Dec. 31, near OGDEN, UTAH: 48 killed in collision.
- 1946 April 25, NAPERVILLE, ILL.: at least 47 killed in collision.
- 1950 Feb. 17, ROCKVILLE CENTRE, N. Y.: head-on crash of two commuter trains killed 30.
- 1950 Nov. 22, RICHMOND HILL, N. Y.: 79 died when one commuter train crashed into rear of another.
- 1951 Feb. 6, WOODBRIDGE, N. J.: 85 died when commuter train plunged through temporary overpass.
- 1958 Sept. 15, near BAYONNE, N. J.: over 40 killed when train went through open drawbridge.

HISTORICAL AND NEWS EVENTS

FROM ANCIENT TO MODERN TIMES

Compiled by

ENCYCLOPAEDIA BRITANNICA

- Actium, Battle of** (31 B.C.). Octavius defeats Mark Anthony.
- Alexander the Great** conquers Greece, Persia, Egypt and part of India (334-323 B.C.). Major battles: Granicus (334 B.C.), Issus (333), Arbela (331).
- American Revolution** (1775-83). Outstanding events: 1775—Battle of Lexington-Concord (Apr. 19). Battle of Bunker Hill (June 17). 1776—Battle of Long Island (Aug. 27). 1777—Burgoyne surrenders at Saratoga (Oct. 17). 1781—Battle of Cowpens (Jan. 17). Battle of Yorktown (Sept. 28-Oct. 19), and British surrender by Cornwallis. 1783—Treaty signed by U. S. and Britain (Sept. 3).
- "Babylonian Captivity"** of Papacy with seat at Avignon (1309-77).
- Bacon's Rebellion** (May 10-Oct. 18, 1676). Nathaniel Bacon leads unsuccessful insurrection in Virginia because of abuses in government administration and taxation.
- Balfour Declaration** (Nov. 2, 1917) promises Jewish homeland in Palestine.
- Balkan Wars** (1912-13). Bulgaria, Serbia, Greece and Montenegro defeat Turkey; later, Bulgaria attacks Serbia and Greece and is defeated.
- Bastille destroyed** (July 14, 1789).
- Benedictine Order** founded at Monte Cassino (c. A.D. 529).
- Bible** translated by Wycliffe into English (1382-84); Douay Version published (1582 & 1609-10); King James Version published (1611).
- Black Death** (beginning c. 1347) wipes out at least one-quarter of population of Europe.
- Black Friday** (Sept. 24, 1869). Financial panic results from gold corner in U. S.
- Boer War** (1899-1902). Boers defeated by British; sign peace treaty at Pretoria (May 31, 1902).
- Boston Massacre** (Mar. 5, 1770). British soldiers fire on Boston mob, killing 3.
- Boston Tea Party** (Dec. 16, 1773). Colonials dump tea in Boston Harbor because of tea tax.
- Boxer Rebellion** (1900). Uprising by secret society in northern China against foreigners.
- Brown, John**, and 18 followers raid Harpers Ferry (Oct. 16, 1859) and seize arsenal; taken prisoners by U. S. Marines (Oct. 18); Brown hanged (Dec. 2).
- Burr-Hamilton duel**. *See* Hamilton.
- Cape-to-Cairo Railroad** completed (1918).
- Carthage** founded by Phoenicians (c. 900 B.C.); destroyed by Romans (146 B.C.).
- Châlons, Battle of** (A.D. 451). Attila the Hun defeated by Romans.
- Charlemagne** crowned Emperor of the West (A.D. 800).
- Charles I** beheaded (Jan. 30, 1649). *See also* Great Rebellion.
- Children's Crusade** (1212). About 50,000 unarmed children set out to recover Holy Sepulchre; all lost or die on the way.
- Chinese-Japanese War** (1894-95). Japan wins Formosa, Pescadores and part of southern Manchuria; Korea becomes independent (annexed by Japan 1910).
- Christianity** made official religion of Roman Empire (A.D. 330).
- Civil War, American** (1861-65). Outstanding events: 1861—First Battle of Bull Run (July 21). 1862—*Monitor* defeats *Merrimac* (Mar. 9). Battle of Antietam (Sept. 15-17). 1863—Lincoln's Emancipation Proclamation (Jan. 1). Battle of Gettysburg (July 1-3). Grant captures Vicksburg (July 4). Battle of Lookout Mountain (Nov. 23-25). 1864—Battle of the Wilderness (May 5-6). Sherman's March through Georgia (Nov. 14-Dec. 22). 1865—Lee surrenders at Appomattox (Apr. 9).
- Code Napoléon**, unified codification of French law, adopted (1804).
- Code of Hammurabi** (c. 2300 B.C.). Oldest existing written code of laws.
- Communist Manifesto** issued by Karl Marx and Friedrich Engels (1848).
- Compromise of 1850** admits California as free state; organizes Utah and New Mexico as territories without mention

- of slavery; prohibits slave trade in D. C.; returns fugitive slaves to masters; pays Texas \$10 million for her claim to New Mexico.
- Confederacy** proclaimed by seceding states (Feb. 9, 1861); Jefferson Davis named President.
- Congress of Vienna (1814-15).** European powers, under leadership of Metternich, meet to settle problems of territory and government resulting from Napoleonic Wars.
- Constantinople** founded (as Byzantium) by Greeks (c. 660 B.C.); made capital of Eastern Roman Empire by Constantine the Great (A.D. 330); captured by Turks (1453); renamed Istanbul (1930).
- Council of Nicaea (A.D. 325).** Called by Constantine the Great; establishes official creed of Christianity (Nicene Creed).
- Council of Trent (1545-64).** Called by Pope Paul III, at suggestion of Emperor Charles V, to establish Catholic Counter Reformation.
- "Coxey's Army" (March. 25-May 1, 1894).** Jacob S. Coxey leads 20,000 unemployed on Washington, D. C.
- Crimean War (1853-56).** Russia loses claim to Greek Christians under Turkish flag.
- Crucifixion of Christ (c. A.D. 29).** According to New Testament, Christ rose from the dead 2 days later.
- Crusades (1096-1291).** European Christians, in 7 periods of conflict, attempt to recover Holy Land from Moslems. *See also* Children's Crusade.
- Custer massacre (June 25, 1876).** Gen. George A. Custer and his forces killed at Battle of Little Big Horn by Sioux.
- Divine Comedy** begun by Dante (1307); probably finished in last year of his life (1321).
- Dominican Order** founded (1215).
- Dorr Rebellion (1841-42).** Thomas W. Dorris leads unsuccessful attempt to extend franchise in Rhode Island; franchise extended 1843.
- Dred Scott case (1846).** Dred Scott, Negro slave, sues for freedom on claim he has lived for a time on free soil; U. S. Supreme Court rules (Mar. 6, 1857) that Scott is not a citizen and has no standing in court.
- Dreyfus case (1894).** Capt. Alfred Dreyfus found guilty of treason in France and sentenced to Devil's Island. Finally acquitted (1906).
- Easter Rebellion (April. 24, 1916).** Irish nationalists unsuccessfully attempt to throw off British rule.
- Edict of Nantes (1598).** Extends toleration to Huguenots (French Protestants); its revocation (1685) causes widespread persecution of Huguenots.
- Evolution trial.** *See* Scopes.
- Fawkes, Guy.** *See* Gunpowder Plot.
- Feudalism,** lord-vassal social system, established throughout Europe (9th century); begins to break up (14th-15th centuries).
- Franciscan Order** founded (1210).
- Franco-Prussian War (1870-71).** France defeated by German states; loses Alsace-Lorraine.
- Freedom of press** established in America as John Peter Zenger, New York editor, is acquitted in libel case against Gov. Cosby (1735).
- French and Indian War.** *See* Seven Years' War.
- French Revolution (1789-99).** Outstanding events: 1789—Bastille destroyed (July 14). Feudal rights abolished (Aug. 4). 1792—September Massacres (Sept. 2-6). France becomes republic (Sept. 21). 1793—Louis XVI beheaded (Jan. 21); Marie Antoinette beheaded (Oct. 16). Reign of Terror (spring 1793—summer 1794). 1795—Napoleon heads army. Directory established (Oct. 27). (Revolution merges into Napoleonic Wars.)
- Gold rush** develops as gold is discovered at Sutter's Mill, near Sacramento, Calif. (Jan. 2, 1848).
- Great Rebellion (1642-49).** Civil wars in England. Charles I beheaded (Jan. 30, 1649); Cromwell establishes Commonwealth (1649).
- Great Wall of China** begun (255 B.C.).
- Gregorian Calendar** replaces Julian Calendar in Catholic countries (1582), in Britain and her Colonies (1752), in Russia (1918).
- Gunpowder Plot (1605).** Guy Fawkes, agent of conspirators against King and Parliament, seized as he is about to blow up House of Lords (Nov. 5).
- Hamilton-Burr duel (July 11, 1804)** results in Hamilton's death next day.
- Hastings, Battle of (1066).** Normans led by William the Conqueror invade England.
- Hegira (A.D. 622).** Mohammed flees from Mecca to Medina. Year I of Moslem calendar.
- Holy Alliance** formed by Russia, Austria and Prussia (Sept. 26, 1815); intended to regulate government according to Christianity but actually used for repressing political liberty.
- Holy Roman Empire** founded by Otto the Great (962); dissolved by Napoleon (1805).
- Huguenots.** *See* Edict of Nantes; St. Bartholomew Massacre.

- Hundred Years' War (1338-1453).** England loses lands in France. Major battles: Crécy (1346), Poitiers (1356), Agincourt (1415).
- Industrial Revolution begins in England (c. 1760).** Machines gradually replace hand tools, bringing about vast industrial and social changes.
- Inquisition established (c. 1233)** to combat heresy; put under state control in Spain (1480); abolished in France (1772), in Spain (1834).
- International, First (1864).** Founded in London to further world socialism; dissolved in Philadelphia (1876).
- International, Second (1889).** Founded in Paris to celebrate 100th anniversary of French Revolution.
- International, Third (1919).** Founded in Moscow as protest against inactivity of Second International; dissolved (1943). Also called *Communist International* or *Comintern*.
- Jamestown, Va.,** settled by British under Capt. John Smith (1607).
- Jerusalem destroyed by Nebuchadnezzar (586 B.C.);** returned to Jews by Cyrus (538 B.C.); captured by Titus (A.D. 70); captured by Crusaders (1099); captured by Saladin (1187).
- Jesus (Society of Jesus) founded by Ignatius of Loyola (1534).**
- Joan of Arc burned at stake (1431).**
- Justinian Code (A.D. 529).** Codification of Roman law by Byzantine Emperor Justinian.
- Kansas-Nebraska Act (1854)** abrogates Missouri Compromise; permits territories of Kansas and Nebraska local option on slavery question; results in rioting and bloodshed.
- Leopold-Loeb case (1924).** Nathan Leopold and Richard Loeb kidnap and kill Bobby Franks in Chicago (May 22); sentenced to life imprisonment (July 21); Loeb killed by fellow convict (Jan. 28, 1936); Leopold receives parole (Feb. 20, 1958).
- Lindbergh flight (May 20-21, 1927).** Charles A. Lindbergh makes first solo flight across Atlantic.
- Locarno Conferences (Oct. 1925)** seek to insure peace and preserve boundaries in Europe by mutual guarantees.
- Louis XVI beheaded (Jan. 21, 1793).** See also French Revolution.
- Magna Carta,** charter listing rights and privileges of English barons, proclaimed at Runnymede (June 15, 1215); King John forced by barons to accept it.
- Manhattan Island purchased by Peter Minuit from Indians (1626)** for trinkets worth 60 guilders (about \$24).
- Mary, Queen of Scots,** convicted in England (1586) of being accomplice in plot to murder Queen Elizabeth; beheaded (Feb. 8, 1587).
- Maximilian, Emperor of Mexico,** executed by Benito Juárez (June 19, 1867) after Napoleon III of France withdraws support of Mexican empire.
- Merrimac.** See *Monitor*.
- Mexican War (1846-1848)** ends in American victory; Treaty of Guadalupe Hidalgo signed (1848).
- Ming Dynasty (1368-1644).** Noted for great development of culture and art in China.
- Missouri Compromise (1820)** admits Maine as free state, Missouri as slave state; slavery prohibited in Louisiana Territory north of 36° 30'. See also *Kansas-Nebraska Act*.
- Monitor, Union ship,** defeats *Merrimac*, Confederate ship (Mar. 9, 1862).
- Mooney, Tom,** sentenced to death for bomb explosion in San Francisco during Preparedness Day Parade (1916); sentence commuted to life (1918); freed (1939).
- Mormonism (Church of Jesus Christ of Latter-day Saints)** founded by Joseph Smith at Fayette, N. Y. (Apr. 6, 1830).
- Moses leads Jews out of Egypt (c. 1300 B.C.).**
- Napoleonic Wars (1796-1815).** Outstanding events: 1798—Campaign in Egypt. 1805—Nelson defeats French at Battle of Trafalgar (Oct. 21). French defeat Russians and Austrians at Battle of Austerlitz (Dec. 2). 1813—French defeated in Battle of Leipzig (Oct. 16-19). 1814—Napoleon abdicates (Apr. 11); sent to Elba. 1815—Napoleon flees Elba (Feb. 26). Napoleon defeated in Battle of Waterloo (June 18). See also *Congress of Vienna*.
- Northwest Ordinance (1787).** Adopted for territory north of Ohio River. Establishes method for admitting new states; prohibits slavery in territory.
- Orthodox Eastern Church** excommunicated by Pope Leo IX (1054); schism final between Western and Eastern Churches.
- Parliament established in England (1295).**
- Peloponnesian War (431-404 B.C.).** Sparta under Lysander defeats Athens.
- Persian Wars (499-478 B.C.).** Greece defeats Persia. Major battles: Marathon (490 B.C.), Thermopylae (480), Salamis (480), Plataea (479), Mycale (479).
- Pilgrims land at Plymouth Rock (Dec. 21, 1620).**
- Plague in London ("Great Plague")** causes 68,596 deaths (1665).
- Plymouth Rock.** See *Pilgrims*.

- Poland partitioned out of existence among Prussia, Russia and Austria (1772, 1793, 1795).
- Pony Express (1860-61). Between St. Joseph, Mo., and Sacramento, Calif.
- Pullman strike (June-July 1894). Strike smashed by Federal troops; Eugene V. Debs jailed for contempt.
- Punic Wars (264-146 B.C.). Romans defeat Carthaginians and destroy Carthage (146 B.C.). Major battles: Cannae (216 B.C.), Zama (202).
- Rasputin ("Black Monk"), confessor to Tsarina, murdered (Dec. 31, 1916).
- Reformation (beginning 16th century). Outstanding events: Luther nails his 95 theses to church door at Wittenberg, Germany (1517). Zwingli begins Reformation in Switzerland (1519). Luther burns papal bull and canon law (1520). Calvin publishes *Institutes of the Christian Religion* (1536). Act of Supremacy makes King head of Church of England (1534). Calvin organizes Geneva as theocratic state (1541). Knox establishes Presbyterian Church in Scotland (1560).
- Renaissance (14th-16th centuries). Revival of classical learning in Europe stimulates vigorous activity in arts, literature, humanities, etc.
- Roman Empire established under Augustus (27 B.C.); divided into Western and Eastern Empires (A.D. 395); Western Empire falls (476); Eastern Empire falls with capture of Constantinople (1453).
- Rome founded, according to legend, by Romulus (753 B.C.); burned, perhaps by Nero (A.D. 64); sacked by Visigoths under Alaric (410); sacked by Vandals under Genserik (455).
- Russo-Japanese War (1904-05). Port Arthur surrenders to Japanese (Jan. 2, 1905); Treaty of Portsmouth, N. H. (Sept. 5).
- Russo-Turkish War (1877-78). Power of Turkey in Europe broken; redivision of southeastern Europe at Congress of Berlin (June 13-July 13, 1878).
- St. Bartholomew, Massacre of (Aug. 24-Oct. 3, 1572). Some 50,000 Huguenots (French Protestants) killed in Paris and provinces at instigation of Catherine de Médici.
- St. Valentine's Day Massacre (Feb. 14, 1929). 8 members of Moran gang lined up against wall by rival gang and shot.
- Savonarola, Florentine priest and dictator, tried for sedition and heresy (1498); hanged and burned (May 23).
- Scopes Evolution Trial held at Dayton, Tenn. (July 10-21, 1925). John T. Scopes prosecuted by William Jennings Bryan for teaching evolution in Tennessee school; defended by Clarence Darrow.
- Scopes convicted but decision later set aside.
- Seven Years' War (1756-63). France, Austria, Sweden, Russia vs. England and Prussia. Clive defeats French at Battle of Plassey (1757), giving British supremacy in India; England wins Canada; Prussia retains Silesia. (American phases of war known as French and Indian War, 1754-63.)
- Shays' Rebellion (1786). Capt. Daniel Shays leads unsuccessful insurrection against Massachusetts government because of economic crisis.
- Slavery in British Empire abolished by Parliament (1833).
- Slavery introduced into American Colonies at Jamestown, Va. (1619); abolished in U. S. by 13th Amendment (1865).
- Snyder-Gray case (1927). Ruth Snyder and Judd Gray murder her husband, Albert Snyder (Mar. 20); both executed at Sing Sing (Jan. 12, 1928).
- Spanish-American War (1898). Outstanding events: U. S. battleship *Maine* blown up in Havana harbor (Feb. 15). Dewey destroys Spanish fleet at Manila (May 1). Charge of San Juan Hill (July 1). Cervera's fleet destroyed off Santiago, Cuba, by U. S. ships (July 3). Treaty of Paris (Dec. 10).
- Spanish Armada destroyed by British (1588).
- Spartacus, Roman slave and gladiator, leads unsuccessful slave insurrection (73-71 B.C.).
- Stamp Act (effective Nov. 1, 1765). First direct tax placed on America by Britain; protested by Stamp Act Congress in New York (Oct. 7-25); repealed by Britain (Mar. 18, 1766).
- Sutter's Mill. *See* Gold.
- Texan war of independence from Mexico (1836). Major battles: Alamo (Mar. 6), San Jacinto (Apr. 21).
- Thaw-White case (1906). Harry K. Thaw, millionaire, murders Stanford White, noted architect, in Madison Square Garden (June 25).
- Thirty Years' War (1618-1648). England, Holland, France, Sweden and German Protestants against Spain, Italy and German Catholics; Peace of Westphalia ends conflict, Alsace going to France, Swiss independence recognized, and German secularized states given religious freedom.
- Tours, Battle of (A.D. 732). Charles Martel defeats Moslems, checking their advance in western Europe. Also called Battle of Poitiers.
- Trojan War (c. 1200 B.C.). Greeks defeat Trojans; destroy city of Troy.

Tutankhamen's tomb discovered near Luxor by Lord Carnarvon and Howard Carter (1922).

Tweed Ring, corrupt New York political group headed by Wm. Marcy Tweed, Tammany Boss, broken up (1872); Tweed convicted (Nov. 5).

War of 1812 (1812-1815). Outstanding events: 1813—Battle of Lake Erie (Sept. 10). 1814—British burn White House at Washington (Aug. 24-25). Battle of Lake Champlain (Sept. 11). U. S. signs treaty with Britain at Ghent (Dec. 24). 1815—Battle of New Orleans (Jan. 8). (Slowness of communications was responsible for continuation of hostilities after treaty.)

Wars of the Roses (1455-85). House of York (white rose) against House of Lancaster (red rose). Richard III slain at Battle of Bosworth Field (1485); Tudor line started by Henry VII.

Whisky Insurrection (July-Nov. 1794). Farmers in western Pennsylvania revolt unsuccessfully against excise tax of 1791.

Witch trials in Salem, Mass., result in death sentences for 19 women by Judge Samuel Sewall (1692).

Woman suffrage first granted in U. S. by Wyoming Territory (1869).

World War I (1914-18). Central Powers (Austria-Hungary, Germany, Bulgaria, Turkey) vs. Allies (U. S., Britain, France, Russia, Belgium, Serbia, Greece, Rumania, Montenegro, Portugal, Italy, Japan). Outstanding events: 1914—Austria declares war on Serbia (July 28). Germany declares war on Russia (Aug. 1) and on France (Aug. 3). Germany invades Belgium (Aug. 4). Britain declares war on Germany (Aug. 4). Germans defeat Russians at Tannenberg, East Prussia (Aug. 31). First Battle of the Marne (Sept. 5-12). 1915 Dardanelles campaign against Turkey fails. 1916—Battle of Jutland (May 31). Battles of the Somme (July-Nov.). Germans turned back at Verdun (Sept. 3). Rumania overrun by Central Powers; fall of Bucharest (Dec. 6). 1917—Germany begins unrestricted submarine warfare. U. S. declares war (Apr. 6). Battle of Caporetto (Oct. 24-Dec. 26). 1918—Second Battle of the Somme (Aug. 21-Sept. 3). Third Battle of the Aisne (May 27-June 6). Second Battle of the Marne (July 15-Aug. 7). U. S. troops take St. Mihiel (Sept. 13). Battle of the Meuse-Argonne (Sept. 20-Nov. 11). Allies break Hindenburg line (Oct. 5). Armistice signed (Nov. 11).

Zenger case. *See* Freedom of press.

Firsts in America

Occasionally other sources may differ with this list. Our selection is based on our editorial judgment.

Admiral in U. S. Navy: David Glasgow Farragut, 1866.

Air-mail route, first transcontinental: Between New York City and San Francisco, 1920.

Assembly, representative: House of Burgesses, founded in Virginia, 1619.

Bank established: Bank of North America, Philadelphia, 1781.

Birth in America of English parents: Virginia Dare, born Roanoke Island, N. C., 1587.

Botanic garden: Established by John Bartram in Philadelphia, 1728. (Oldest existing one was established in Cambridge, Mass., in 1807.)

Cartoon, colored: "The Yellow Kid," by Richard Outcault, in *New York World*, 1895.

College to confer degrees on women: Oberlin (Ohio) College, 1841.

College to establish coeducation: Oberlin (Ohio) College, 1833.

Electrocution of a criminal: William Kemmler in Auburn Prison, Auburn, N. Y., Aug. 6, 1890.

Five and Ten Cents Store: Founded by Frank Woolworth, Utica, N. Y., 1879 (moved to Lancaster, Pa., same year).

Fraternity: Phi Beta Kappa; founded Dec. 5, 1776, at College of William and Mary.

Law to be declared unconstitutional by U. S. Supreme Court: Judiciary Act of 1789. Case: *Marbury vs. Madison*, 1803.

Library, circulating: Philadelphia, 1731.

Newspaper published for a continuous period: *The Boston News-Letter*, April, 1704.

Newspaper, illustrated daily: *New York Daily Graphic*, 1873.

Newspaper published daily: *Pennsylvania Packet and General Advertiser*, Philadelphia, Sept., 1784.

Newsreel: Pathé Frères of Paris, in 1910, circulated a weekly issue of their *Pathé Journal*.

Oil well, commercial: Titusville, Pa., 1859.

Panel quiz show on radio: *Information Please*, May 17, 1938.

Postage stamps issued: 1847.

President pro tempore of the U. S. Senate: John Langdon, of New Hampshire, 1789.

Railroad, transcontinental: Central Pacific and Union Pacific railroads joined near Ogden, Utah, May 10, 1869.

Savings bank: The Provident Institute for Savings, Boston, 1816.

Science museum: Founded by Charleston (S. C.) Library Society, 1773.

Skyscraper: Home Insurance Co., Chicago, 1885 (10 floors, 2 added later).

Slaves brought into America: At Jamestown, Va., 1619, from a Dutch ship.

Sorority: Kappa Alpha Theta, at De Pauw University, 1870.

State to abolish capital punishment: Michigan, 1847.

State to enter Union after original 13: Vermont, 1791.

State to ratify U. S. Constitution: Delaware, Dec. 7, 1787.

Steam-heated building: Eastern Hotel, Boston, 1845.

Steam railroad (carried passengers and freight): Baltimore & Ohio, 1830.

Strike on record by union: Journeymen Printers, New York, 1776.

Subway: Opened in Boston, 1897.

"Tabloid" picture newspaper: *The Illustrated Daily News* (now *The Daily News*), New York City, 1919.

Vaudeville theater: Gaiety Museum, Boston, 1883.

Woman cabinet member: Frances Perkins, Secretary of Labor, 1933.

Woman candidate for President: Belva Ann Bennett Lockwood, National Equal Rights party, 1884.

Woman doctor of medicine: Elizabeth Blackwell; received M.D. from Geneva Medical College of Western New York, 1849.

Woman elected governor of a state: Mrs. Nellie Tayloe Ross, Wyoming, 1925.

Woman elected to U. S. Senate: Mrs. Hattie Caraway, Arkansas; elected Nov. 1932.

Woman graduate of law school: Mrs. Ada H. Kepley, Union College of Law, Chicago, 1870.

Woman member of U. S. House of Representatives: Jeannette Rankin; elected Nov. 1916.

Woman member of U. S. Senate: Mrs. Rebecca Latimer Felton of Georgia; appointed Oct. 3, 1922.

Woman suffrage granted: Wyoming Territory, 1869.

Written constitution: *Fundamental Orders of Connecticut*, 1639.

Zoo: Philadelphia, 1874.

Societies and Foundations

Source: Questionnaires to Societies and Foundations.

AMERICAN BIBLE SOCIETY: Founded 1816 to translate, publish and encourage wider distribution of Holy Scriptures.

AMERICAN RED CROSS: Founded 1881. Program includes services to armed forces and their families, disaster relief, and other health, safety, and welfare activities.

BOY SCOUTS OF AMERICA: Founded 1910. Purpose is to promote character development, citizenship training and physical fitness for boys.

CAMP FIRE GIRLS, INC.: Founded 1910, to perpetuate spiritual ideals of the home and to stimulate and aid habits making for health and character. Educational-recreational program available to all girls from 7 to 18.

CARNEGIE CORPORATION OF NEW YORK: Founded 1911 by Andrew Carnegie to advance knowledge and understanding in U. S. and certain British Commonwealth areas. Grants awarded to colleges and organizations engaged in research. Assets (1957): \$192,000,000 (cost basis).

CARNEGIE ENDOWMENT FOR INTERNATIONAL PEACE: Founded 1910 by Andrew Carnegie. To work toward international peace. Assets (June 30, 1957): \$19,803,188.

COMMONWEALTH FUND: Founded 1918 by Mrs. Stephen V. Harkness. Purpose is to promote health through grants for medical education, research, etc. Endowment (1958): \$77,000,000.

DUKE ENDOWMENT, THE: Founded 1925 by James B. Duke. Purpose is to assist North and South Carolina philanthropic institutions, including universities, hospitals, orphanages and the Methodist Church. Assets (Dec. 31, 1956): \$142,000,000 (book value).

ELKS, BENEVOLENT AND PROTECTIVE ORDER OF: Founded 1868 to practice charity, justice, brotherly love and fidelity. Charitable expenditures (1957): \$7,000,000 (by Lodges, 1880-1937, \$132,830,121).

FIELD FOUNDATION, INC.: Founded 1940 by Marshall Field. Present purpose is to promote the welfare of children and improve intercultural and interracial relations. Assets (1957): Over \$18,000,000.

FORD FOUNDATION: Founded 1936 by Henry and Edsel Ford to advance human welfare by identifying problems of national importance and granting funds for efforts toward their solution. Assets (1957): \$748,171,313.

FREEMASONRY: Originated in England (1717); brought to America about 1730. It includes Symbolic Lodge (3 basic de-

grees), Royal Arch, Council of Royal and Select Masters, Knights Templar and Scottish Rite. It is universal in its philosophy, nonsectarian in membership.

GIRL SCOUTS OF THE U.S.A.: Founded 1912. Purpose is to help girls develop as happy, resourceful individuals.

GUGGENHEIM (JOHN SIMON) MEMORIAL FOUNDATION: Founded 1925. Purpose is to offer fellowships in all fields. Endowment (1957): \$45,000,000.

INFANTILE PARALYSIS, NATIONAL FOUNDATION FOR: Founded 1938 by Franklin D. Roosevelt, with Basil O'Connor (volunteer president) and friends to direct fight on infantile paralysis. Funds raised by "March of Dimes." Financed research resulting in development of Salk vaccine, 1953-55.

KELLOGG FOUNDATION: Founded 1930 by W. K. Kellogg. Operates by making grants supporting experimental programs in health, agricultural and educational fields. Assets (Aug. 31, 1957): \$72,683,185, book value; \$125,159,953, market value.

KIWANIS INTERNATIONAL: Founded 1915 to render service to youth, community and nation.

KNIGHTS OF COLUMBUS: Founded 1882. Purpose is to render pecuniary aid to its sick, disabled and needy members; promotes social and intellectual intercourse among its members and conducts educational, charitable, social, relief and religious work.

KNIGHTS OF PYTHIAS: Founded 1864. Purpose is to promote social and fraternal well-being of its members. Auxiliary bodies: Dramatic Order of Knights Khorassan, Junior Order of Princes of Syracuse, Order of Pythian Sisters.

LEAGUE OF WOMEN VOTERS OF THE U. S.: Founded in 1920 upon ratification of 19th Amendment to inform the electorate and increase citizen participation in government. Annual expenditure: about \$1,350,000.

LIONS CLUBS, INTERNATIONAL ASSOCIATION OF: Founded 1917. Purpose is to recognize community needs and develop means of meeting them. World's largest service club organization.

NATIONAL ASSOCIATION FOR THE ADVANCEMENT OF COLORED PEOPLE: Organized 1909. It seeks equal citizenship rights for Negroes through legal action, legislation and education.

NATIONAL GEOGRAPHIC SOCIETY: Founded 1888. Purpose is to increase and diffuse geographic knowledge. Publishes monthly *National Geographic Magazine* and weekly *Geographic School Bulletins*.

ODD FELLOWS, INDEPENDENT ORDER OF: Introduced into U. S. in 1819. Purpose is to promote social relations and to provide benefits for members.

ROCKEFELLER FOUNDATION: Founded 1913 to promote well-being of mankind throughout world; makes grants to agencies in fields of medical education and public health, biological and medical research, agriculture, social sciences and humanities. Principal Fund (Dec. 31, 1957): \$492,365,671, market value.

ROTARY INTERNATIONAL: Founded 1905. Purpose is to foster the ideal of service in business and community life and promote international understanding.

RUSSELL SAGE FOUNDATION: Founded 1907 by Mrs. Russell Sage to improve social and living conditions in U. S. Program emphasizes social science research. Assets (Sept. 1957): \$23,117,000.

SLOAN FOUNDATION, INC., ALFRED P.: Founded 1934 by Alfred P. Sloan, Jr. Purpose is to increase and spread economic knowledge and promote basic research in science and other subjects. Assets (Dec. 1957): \$135,158,000.

TWENTIETH CENTURY FUND: Founded 1919 by Edward A. Filene to promote research and public education on economic and social problems. Assets (Dec. 31, 1957): \$12,951,573.

YOUNG MEN'S CHRISTIAN ASSOCIATION: Founded 1844. Purpose is to improve spiritual, social, recreational and physical lives of young people. Endowment (1957): \$68,615,800.

SPORTS

For 1958 sports champions and records,
see special section beginning on Page 905.

BASEBALL

THE POPULAR TRADITION that baseball was invented by Abner Doubleday at Cooperstown, N. Y., in 1839, has been enshrined in the Hall of Fame and National Museum of Baseball erected in that town, but research has proved that a game called "Base Ball" was played in this country and England before 1839. However, the first team baseball as we know it was played at the Elysian Fields, Hoboken, N. J., on June 19, 1846, between the Knickerbockers and the New York Nine. There was a gradual growth of baseball and an improvement of equipment and playing skill in the next fifty years. Soldiers returning home from the Civil War spread over the country the game they had learned to play in camp.

Historians have it that the first pitcher to throw a curve was William A. (Candy) Cummings in 1867. The Cincinnati Red Stockings were the first all-professional team and in 1869 they played 64 games without a loss. The standard ball of the

same size and weight, still the rule, was adopted in 1872. The first catcher's mask was worn in 1875. The National League was organized in 1876. The first chest protector was donned in 1885. The three-strike rule was put on the books in 1887 and the four-ball ticket to first base came in 1889. The pitching distance, formerly shorter, was lengthened to 60 feet 6 inches in 1893 and the rules have been only slightly modified since that time.

The American League, under the vigorous leadership of B. B. Johnson, blossomed forth as a major league in 1901. Judge Kenesaw Mountain Landis, by action of the two major leagues, became Commissioner of Baseball in 1921 and, upon his death (1944), Albert B. Chandler, former United States Senator from Kentucky, was elected to that office (1945). Chandler failed to obtain a new contract, and he was succeeded by Ford C. Frick (1951), the National League president.

NO ONE ADMITTED TO HALL OF FAME IN 1958

No candidates received sufficient votes in the annual polling to gain admission to the Baseball Hall of Fame in 1958. Whereas 199 (or three-quarters) of the votes were

needed for election, Max Carey, who led the poll, had 136. Edd Roush was next with 112. Charlie (Red) Ruffing was third and Hack Wilson fourth.

MOST VALUABLE PLAYERS

(Baseball Writers' Association selections)

American League

1931—Robert Grove, Philadelphia
1932—James Foxx, Philadelphia
1933—James Foxx, Philadelphia
1934—Gordon Cochran, Detroit
1935—Henry Greenberg, Detroit
1936—Lou Gehrig, New York
1937—Charles Gehringer, Detroit
1938—James Foxx, Boston
1939—Joe DiMaggio, New York
1940—Henry Greenberg, Detroit
1941—Joe DiMaggio, New York
1942—Joe Gordon, New York
1943—Spurgeon Chandler, N. Y.
1944—Harold Newhouser, Detroit
1945—Harold Newhouser, Detroit
1946—Ted Williams, Boston
1947—Joe DiMaggio, New York
1948—Lou Boudreau, Cleveland

1949—Ted Williams, Boston
1950—Phil Rizzuto, New York
1951—Lawrence Berra, New York
1952—Robert Shantz, Phila.
1953—Al Rosen, Cleveland
1954—Lawrence Berra, New York
1955—Lawrence Berra, New York
1956—Mickey Mantle, New York
1957—Mickey Mantle, New York

National League

1931—Frank Frisch, St. Louis
1932—Charles Klein, Philadelphia
1933—Carl Hubbell, New York
1934—Jerome Dean, St. Louis
1935—Charles Hartnett, Chicago
1936—Carl Hubbell, New York
1937—Joseph Medwick, St. Louis

1938—Ernest Lombardi, Cinc.
1939—William Walters, Cinc.
1940—Frank McCormick, Cinc.
1941—Adolph Camilli, Brooklyn
1942—Morton Cooper, St. Louis
1943—Stanley Musial, St. Louis
1944—Marty Marion, St. Louis
1945—Phil Cavarretta, Chicago
1946—Stanley Musial, St. Louis
1947—Robert Elliott, Boston
1948—Stanley Musial, St. Louis
1949—Jackie Robinson, Brooklyn
1950—Jim Konstanty, Phila.
1951—Roy Campanella, Brooklyn
1952—Henry Sauer, Chicago
1953—Roy Campanella, Brooklyn
1954—Willie Mays, New York
1955—Roy Campanella, Brooklyn
1956—Don Newcombe, Brooklyn
1957—Henry Aaron, Milwaukee

* Night game. aFourteen innings. bFive innings, rain. cTwelve innings.

Dodgers Set Single Game Attendance Record

A major league record for regular season single game attendance was established when the Dodgers made their debut in Los Angeles in 1958. With the San Fran-

cisco Giants as their opponents on April 18, Los Angeles drew a turnout of 78,672. The old record for a single game was 78,382, set in Cleveland in 1948.

Major League Individual All-Time Records

Highest batting average, season—Hugh Duffy, Boston (N), 1894	438
Highest batting average (15 or more years)—Ty Cobb, Detroit and Philadelphia (A), 1905-28	367
Most years batting over .300—Ty Cobb	23
Most hits—Ty Cobb	4,191
Most hits, season—George Sisler, St. Louis (A), 1920	257
Most consecutive hits, game—Wilbert Robinson, Baltimore (N), 1892	7
Most successive hits—Frank Higgins, Boston (A), 1938; Walt Dropo, Detroit, 1952	12
Most consecutive games batted safely—Joe DiMaggio, New York (A), May 15 to July 16, 1941, inclusive	56
Most long hits—Babe Ruth, Boston and New York (A), Boston (N), 1914-35 (506 2b, 136 3b, 714 home runs)	1,356
Most total bases—Ty Cobb	5,863
Most total bases, season—Babe Ruth, New York (A), 1921	457
Most total bases, game—Joe Adcock, Milwaukee vs. Brooklyn, July 31, 1954 ...	18
Most home runs—Babe Ruth	714
Most home runs, season—Babe Ruth, New York (A), 1927	60
Most home runs, 1 game—Lowe, Boston (N), 1894; Delahanty, Phila. (N), 1896; Gehrig, N. Y. (A), 1932; Klein, Phila. (N), 1936 (10 innings); Seerey, Chicago (A), 1948 (11 innings); Hodges, Brooklyn, 1950; Adcock, Milwaukee, 1954 ...	4
Most 3-base hits—Sam Crawford, Cincinnati (N), 1899-1902; Detroit (A), 1903-17	312

Most 3-base hits, season—J. Owen Wilson, Pittsburgh (N), 1912	36
Most 2-base hits—Tris E. Speaker, Boston, Cleveland, Washington, Philadelphia (A), 1907-28	793
Most 2-base hits, season—Earl W. Webb, Boston (A), 1931	67
Most singles—Ty Cobb	3,052
Most singles, season—William Keeler, Baltimore (N), 1898	202
Most runs—Ty Cobb	2,244
Most runs batted in—Babe Ruth ...	2,209
Most runs batted in, season—Hack Wilson, Chicago (N), 1930	190
Most runs batted in, single game—James L. Bottomley, St. Louis (N) vs. Brooklyn, Sept. 16, 1924	12
Most games played—Ty Cobb	3,033
Most consecutive games played—Lou Gehrig, New York (A). Streak started June 1, 1925, and stopped May 2, 1939 ...	2,130
Longest service as player—Eddie Collins, Philadelphia and Chicago (A), 1906-30; Bobby Wallace, Cleveland (N), St. Louis (A), St. Louis (N), 1894-1918 ..	25 years
Most times at bat—Ty Cobb	11,429
Most bases on balls—Babe Ruth ...	2,056
Most bases on balls, season—Babe Ruth, 1923	170
Most bases on balls, game (modern record)—Jimmy Foxx Boston (A), 1938	6
Most stolen bases—Ty Cobb	892
Most stolen bases, season (modern record)—Ty Cobb, Detroit (A), 1915	96
Fewest strikeouts, season (150 or more games)—Joe Sewell, Cleveland (A), 1925, 1929	4
Most consecutive years manager, one club—Connie Mack, Phila. (A), 1901-50 ...	50

PITCHING

Most games—Cy Young (516 in National League, 390 in American League), 1890-1911	906
Most games won—Cy Young, Cleveland (N), 1890-98; St. Louis (N), 1899-1900; Boston (A), 1901-08; Cleveland (A), 1909-11 (part); Boston (N), 1911 (part)	511
Most complete games, season—Jack Chesbro, New York (A), 1904	48
Most games, season (modern record)—Jim Konstanty, Philadelphia (N), 1950 ...	74
Most innings, season—Ed Walsh, Chicago (A), 1908	464
Lowest earned-run average, season—Ferdie Schupp, New York (N), 1916	0.90
Fewest hits in two consecutive games—John Vander Meer, Cincinnati (N), 1938 (both no-hit games)	0

Most games won, season (modern record)—Jack Chesbro, New York (A), 1904 ...	41
Most consecutive games won, season—Tim Keefe, New York (N), 1888; Rube Marquard, New York (N), 1912	19
Most shutout games—Walter Johnson, Washington (A), 1907-27	113
Most shutout games, season—Grover Alexander, Philadelphia (N), 1916	16
Most consecutive shutout innings—Walter Johnson, 1913	56
Most strikeouts—Walter Johnson ...	3,497
Most strikeouts, season (modern record)—Bobby Feller, Cleveland (A), 1946 ...	348
Most strikeouts in 9 innings (1901 to date)—Bobby Feller, Cleveland (A) vs. Detroit, Oct. 2, 1938	18

The First World Series No-Hitter

Don Larsen of the New York Yankees pitched the first no-run no-hit game in World Series history in 1956 and hurled a perfect game in so doing. Facing the Brooklyn Dodgers at the Yankee Stadium

in the fifth game of the series on Oct. 8, Larsen retired 27 batters in a row. The righthander made only 97 pitches. The Yankees won, 2 to 0. The attendance was 64,519. The box score:

FOOTBALL

THE PASTIME of kicking a ball around goes back beyond the limits of recorded history. Ancient savage tribes played football of a primitive kind. There was a ball-kicking game played by Athenians and Spartans and Corinthians 2500 years ago and the Greeks had a name for it: *Episkuros*. The Romans had a somewhat similar game called *Harpastum* and are supposed to have carried the game with them when they invaded the British Isles in the First Century, B.C.

Undoubtedly the game known in the United States as Football traces directly to the English game of Rugby, though the modifications have been many and rather sweeping in some directions. There was informal football on our college lawns well over a century ago and an annual Freshman-Sophomore series of "scrimmages" began at Yale in 1840. But the first formal intercollegiate football game in this country was the Princeton-Rutgers contest at New Brunswick, N. J., on Nov. 8, 1869, with Rutgers winning by 6 goals to 4.

In those old days games were played with twenty-five, twenty, fifteen or eleven men on a side by mutual agreement. In 1880 there was a football convention at

which Walter Camp of Yale persuaded the delegates to agree to a rule calling for eleven players on a side. In 1882 there was adopted the rule requiring the offensive team to make 5 yards in three downs or surrender the ball to its opponents. The game grew so rough that it was attacked as brutal by many critics and some colleges abandoned the sport. Conditions were so bad in 1906 that President Theodore Roosevelt, an enthusiast for all sports, called a meeting of Yale, Harvard, and Princeton representatives at the White House in the hope of reforming and improving the game. The outcome was that the game, with the forward pass introduced and some other modifications of the rules inserted, became faster and cleaner and gradually grew to the tremendous popularity it enjoys today.

Professional football, now firmly established, is an outgrowth of intercollegiate football. The first professional game was played in 1895 at Latrobe, Pa. The National Football League was founded in 1921. The All-America Conference went into action in 1946. At the end of the 1949 season the two major play-for-pay circuits merged, retaining the name of the older league.

NATIONAL COLLEGE FOOTBALL CHAMPIONS

The "National Collegiate A. A. Football Guide" recognizes as unofficial national champion the team selected each year by press association polls. Where The Associated Press poll (of writers) does not agree with the United Press International poll (of coaches), the guide lists both teams selected. Prior to the press polls, the Rissman and Knute Rockne trophies, symbolic of the national title, were awarded annually from 1924 to 1936.

Collegians Triumph in All-Star Game

The Detroit Lions, professional football champions of 1957, were trounced, 35-19, by the collegians in the 1958 renewal of the annual All-Star game in Chicago. It was the eighth victory for the College All-Stars in the series. The pros have won 15 times, while two other games ended in ties. Jim Ninowski of Michigan State, who threw two touchdown passes, and Bobby Mitchell of Illinois, who caught them, were co-winners of the game's most valuable college player award.

LAWN TENNIS

LAWN TENNIS is a comparatively modern modification of the ancient game of court tennis. Major Walter Clopton Wingfield thought that something like court tennis might be played outdoors on lawns and in December, 1873, at Nantclwyd, Wales, he introduced his new game under the name of *Sphairistike* at a lawn party. The game was a success and spread rapidly, but the name was a total failure and almost immediately disappeared when all the players and spectators began to refer to the new game as "lawn tennis." In the early part of 1874 a young lady named Mary Ewing Outerbridge returned from Bermuda to New York, bringing with her the implements and necessary equipment of the new game that she had obtained from a British Army supply store in Bermuda. Miss Outerbridge and friends played the first game of lawn tennis in the United States on the grounds of the Staten Island

Cricket and Baseball Club in the spring of 1874.

For a few years the new game went along in haphazard fashion under varying rules. Tennis balls were of no standard size or texture. The nets were set at different heights up to 5 feet on the side and 4 feet in the middle. Some courts were marked out in hour-glass shape, narrow in the middle and wide at both ends. But about 1880 standard measurements for the court and standard equipment within definite limits became the rule. In 1881 the United States Lawn Tennis Association was formed and conducted the first national championship at Newport, R. I. The international matches for the Davis Cup began with a series between the British and United States players on the courts of the Longwood Cricket Club, Chestnut Hill, Mass., in 1900, with the home players winning.

1906—Athens	1928—St. Moritz (W)	1936—Berlin (S)	pezzo, Italy (W)
1908—London	1928—Amsterdam (S)	1948—St. Moritz (W)	1956—Melbourne (S)
1912—Stockholm	1932—Lake Placid (W)	1948—London (S)	

THE first Olympic Games of which there is record occurred in 776 B.C. and consisted of one event, a great foot race of about 200 yards held on a plain by the River Alpheus (now the Ruphia) just outside the little town of Olympia in Greece. It was from that date that the Greeks began to keep their calendar by "Olympiads," the four-year spans between the celebrations of the famous games. There was a religious as well as an athletic significance to the ancient games and the shrines, temples and sacred fires within the Olympic enclosure were the scenes of worship all through the year whereas the Olympic Games, at the height of their popularity, never lasted more than five days and were held only once every four years.

The competition was entirely amateur at the start and the only prizes were laurel wreaths. Only free Greek citizens were allowed to compete and they had to undergo a strict training course that lasted ten months. But civic rivalry led to trickery and professionalism and the

games became degraded after some centuries. When Rome conquered Greece, the Roman emperors turned the Olympic Games from patriotic, religious and athletic festivals into carnivals and circuses. They dragged on malodorously until they were finally halted by decree of Emperor Theodosius I of Rome in A.D. 394.

The modern Olympic Games, which started in Athens in 1896, are the result of the devotion of a French educator, Baron Pierre de Coubertin, to the idea that, since boys and athletics have gone together down the ages, education and athletics might well go hand-in-hand toward a better international understanding. He planned a revival of the ancient Olympic Games on a world-wide basis and succeeded in getting nine nations to send athletes to the first of the modern games in 1896. Since then more than 35,000 athletes representing about 60 nations have competed in the games.

Interrupted for the second time by war, the modern Olympic Games were resumed at London in 1948.

OLYMPIC GAMES CHAMPIONS, 1896-1956

TRACK AND FIELD—MEN

60-Meter Run

1900	A. E. Kraenzlein, United States.....	7s.
1904	Archie Hahn, United States.....	7s.

100-Meter Run

1896	T. E. Burke, United States.....	12s.
1900	F. W. Jarvis, United States.....	10.8s.
1904	Archie Hahn, United States.....	11s.
1906	Archie Hahn, United States.....	11.2s.
1908	R. E. Walker, South Africa.....	10.8s.
1912	R. C. Craig, United States.....	10.8s.
1920	C. W. Paddock, United States.....	10.8s.
1924	H. M. Abrahams, Great Britain.....	10.6s.
1928	Percy Williams, Canada.....	10.8s.
1932	Eddie Tolan, United States.....	10.3s.
1936	Jesse Owens, United States.....	10.3s.*
1948	Harrison Dillard, United States.....	10.3s.
1952	Lindy Remigino, United States.....	10.4s.
1956	Bobby Morrow, United States.....	10.5s.

* Wind assisted.

200-Meter Run

1900	J. W. B. Tewksbury, United States.....	22.2s.
1904	Archie Hahn, United States.....	21.6s.
1908	Robert Kerr, Canada.....	22.4s.

1912	R. C. Craig, United States.....	21.7s.
1920	Allan Woodring, United States.....	22s.
1924	J. V. Scholz, United States.....	21.6s.
1928	Percy Williams, Canada.....	21.8s.
1932	Eddie Tolan, United States.....	21.2s.
1936	Jesse Owens, United States.....	20.7s.
1948	Melvin E. Patton, United States.....	21.1s.
1952	Andrew Stanfield, United States.....	20.7s.
1956	Bobby Morrow, United States.....	20.6s.

400-Meter Run

1896	T. E. Burke, United States.....	54.2.
1900	M. W. Long, United States.....	49.4.
1904	H. L. Hillman, United States.....	49.2.
1906	Paul Pilgrim, United States.....	53.2.
1908	W. Halswelle, Great Britain (walkover).....	50s.
1912	C. D. Reidpath, United States.....	48.2s.
1920	B. G. D. Rudd, South Africa.....	49.6s.
1924	E. H. Liddell, Great Britain.....	47.6s.
1928	Ray Barbuti, United States.....	47.8s.
1932	William Carr, United States.....	46.2s.
1936	Archie Williams, United States.....	46.5s.
1948	Arthur Wint, Jamaica, B.W.I.....	46.2s.
1952	George Rhoden, Jamaica, B. W. I.....	45.9s.
1956	Charles Jenkins, United States.....	46.7s.

800-Meter Run

1896	E. H. Flack, Great Britain	2m.11s.
1900	A. E. Tysoe, Great Britain	2m.1.4s.
1904	J. D. Lightbody, United States	1m.56s.
1906	Paul Pilgrim, United States	2m.1.2s.
1908	M. W. Sheppard, United States	1m.52.8s.
1912	J. E. Meredith, United States	1m.51.9s.
1920	A. G. Hill, Great Britain	1m.53.4s.
1924	D. G. A. Lowe, Great Britain	1m.52.4s.
1928	D. G. A. Lowe, Great Britain	1m.51.8s.
1932	Thomas Hampson, Great Britain	1m.49.8s.
1936	John Woodruff, United States	1m.52.9s.
1948	Malvin Whitfield, United States	1m.49.2s.
1952	Malvin Whitfield, United States	1m.49.2s.
1956	Tom Courtney, United States	1m.47.7s.

1,500-Meter Run

1896	E. H. Flack, Great Britain	4m.33.2s.
1900	Charles Bennett, Great Britain	4m.6s.
1904	J. D. Lightbody, United States	4m.5.4s.
1906	J. D. Lightbody, United States	4m.12s.
1908	M. W. Sheppard, United States	4m.3.4s.
1912	A. N. S. Jackson, Great Britain	3m.56.8s.
1920	A. G. Hill, Great Britain	4m.1.8s.
1924	Paavo Nurmi, Finland	3m.53.6s.
1928	H. E. Larva, Finland	3m.53.2s.
1932	Luigi Beccali, Italy	3m.51.2s.
1936	J. E. Lovelock, New Zealand	3m.47.8s.
1948	Henri Eriksson, Sweden	3m.49.8s.
1952	Joseph Barthel, Luxemburg	3m.45.2s.
1956	Ron Delany, Ireland	3m.41.2s.

5,000-Meter Run

1912	Hannes Kolehmainen, Finland	14m.36.6s.
1920	Joseph Guillemot, France	14m.55.6s.
1924	Paavo Nurmi, Finland	14m.31.2s.
1928	Willie Ritola, Finland	14m.38s.
1932	Lauri Lehtinen, Finland	14m.30s.
1936	Gunnar Hockert, Finland	14m.22.2s.
1948	Gaston Reiff, Belgium	14m.17.6s.
1952	Emil Zatopek, Czechoslovakia	14m.6.6s.
1956	Vladimir Kuts, U.S.S.R.	13m.39.6s.

5-Mile Run

1906	H. Hawtrey, Great Britain	26m.26.2s.
1908	E. R. Voigt, Great Britain	25m.11.2s.

10,000-Meter Run

1912	Hannes Kolehmainen, Finland	31m.20.8s.
1920	Paavo Nurmi, Finland	31m.45.8s.
1924	Willie Ritola, Finland	30m.23.2s.
1928	Paavo Nurmi, Finland	30m.18.8s.
1932	Janusz Kusocinski, Poland	30m.11.4s.
1936	Ilmari Salminen, Finland	30m.15.4s.
1948	Emil Zatopek, Czechoslovakia	29m.59.6s.
1952	Emil Zatopek, Czechoslovakia	29m.17s.
1956	Vladimir Kuts, U.S.S.R.	28m.45.6s.

Marathon

1896	Spiridon Loues, Greece	2h.55m.20s.
1900	Michel Teato, France	2h.59m.
1904	T. J. Hicks, United States	3h.28m.53s.
1906	W. J. Sherring, Canada	2h.51m.23.6s.
1908	John J. Hayes, United States	2h.55m.18.4s.
1912	K. K. McArthur, South Africa	2h.36m.54.8s.
1920	Hannes Kolehmainen, Finland	2h.32m.35.8s.
1924	A. O. Stenroos, Finland	2h.41m.22.6s.
1928	A. B. El Ouafi, France	2h.32m.57s.
1932	Juan Zabala, Argentina	2h.31m.36s.
1936	Kitei Son, Japan	2h.29m.19.2s.
1948	Delfo Cabrera, Argentina	2h.34m.51.6s.
1952	Emil Zatopek, Czechoslovakia	2h.23m.3.2s.
1956	Alain Mimoun, France	2h.25m.

110-Meter Hurdles

1896	Thomas Curtis, United States	17.6s.
1900	A. E. Kraenzlein, United States	15.4s.
1904	F. W. Schule, United States	16s.
1906	R. G. Leavitt, United States	16.2s.
1908	Forrest Smithson, United States	15s.
1912	F. W. Kelly, United States	15.1s.
1920	E. J. Thomson, Canada	14.8s.
1924	D. C. Kinsey, United States	15s.
1928	Sydney Atkinson, South Africa	14.8s.
1932	George Saling, United States	14.6s.
1936	Forrest Towns, United States	14.2s.
1948	William Porter, United States	13.9s.
1952	Harrison Dillard, United States	13.7s.
1956	Lee Calhoun, United States	13.5s.

200-Meter Hurdles

1900	A. E. Kraenzlein, United States	25.4s.
1904	H. L. Hillman, United States	24.6s.

400-Meter Hurdles

1900	J. W. B. Tewksbury, United States	57.6s.
1904	H. L. Hillman, United States	53s.
1908	C. J. Bacon, United States	55s.
1920	F. F. Loomis, United States	54s.
1924	F. M. Taylor, United States	52.6s.
1928	Lord David Burghley, Great Britain	53.4s.
1932	Robert Tisdall, Ireland	51.8s.*
1936	Glenn Hardin, United States	52.4s.
1948	Roy Cochran, United States	51.1s.
1952	Charles Moore, United States	50.8s.
1956	Glenn Davis, United States	50.1s.

* Record not allowed.

2,500-Meter Steeplechase

1900	G. W. Orton, United States	7m.34s.
1904	J. D. Lightbody, United States	7m.39.6s.

3,000-Meter Steeplechase

1920	Percy Hodge, Great Britain	10m.2.4s.
1924	Willie Ritola, Finland	9m.33.6s.
1928	T. A. Loukola, Finland	9m.21.8s.
1932	Volmari Iso-Hollo, Finland	10m.33.4s.*
1936	Volmari Iso-Hollo, Finland	9m.3.8s.
1948	Thure Sjostrand, Sweden	9m.4.6s.
1952	Horace Ashenfelter, United States	8m.45.4s.
1956	Chris Brasher, Great Britain	8m.41.2s.

* About 3,450 meters—extra lap by error.

3,200-Meter Steeplechase

1908	A. Russell, Great Britain	10m.47.8s.

TRACK AND FIELD

RUNNING, jumping, hurdling and throwing weights—track and field sports, in other words—are as natural to boys and young men as eating, drinking and breathing. Unorganized competition in this form of sport goes back beyond the Cave Man era. Organized competition begins with the first recorded Olympic Games in Greece, 776 B. C., when Coroebus of Elis won the only event on the program, a race of approximately 200 yards. The Olympic Games, with an ever-widening program of events, continued until “the glory that was Greece” had faded and “the grandeur that was Rome” was tarnished, and finally were abolished by decree of Emperor Theodosius I of Rome in A. D. 394. The Tailteann Games of Ireland are supposed to have antedated the first Olympic Games by some centuries, but we have no records of the specific events and winners thereof.

Professional contests of speed and strength were popular at all times and in many lands, but the widespread competition of amateur athletes in track and field

sports is a comparatively modern development. The first organized amateur athletic meet of record was sponsored by the Royal Military Academy at Woolwich, England, in 1849. Oxford and Cambridge track and field rivalry began in 1864 and the English amateur championships were established in 1866. In the United States such organizations as the New York Athletic Club and the Olympic Club of San Francisco conducted track and field meets in the 1870's, and a few colleges joined to sponsor a meet in 1874. The success of the college meet led to the formation of the Intercollegiate Association of Amateur Athletes of America and the holding of an annual set of championship games beginning in 1876.

Many athletic clubs joined the National Association of Amateur Athletes of America, formed in 1879, but dissension broke up this organization and the Amateur Athletic Union, organized in 1888, has been the ruling body in American amateur athletics since that time.

Track and Field Statistics

Runs Mile in 3:58.6—Finishes Fifth in Race!

Until May 6, 1954, the day Roger Bannister of England ran the mile in 3 minutes 59.4 seconds, many observers clung to the belief it was impossible for man to dip below four minutes.

The progress man has made since is best illustrated by the performance of Albert Thomas, an Australian, four years after Bannister's epic feat. Competing in Dublin, Ireland, on Aug. 6, 1958, Thomas went by the finish line in 3:58.6, four-fifths of a second faster than Bannister's clocking, and netted no more than a dismal fifth place in the race! It was in this race that

Herb Elliott, Thomas' countryman, shattered the world record with a time of 3:54.5.

When Elliott, on Sept. 3, 1958, won a mile in London, in 3:55.4, it marked the tenth time he had bettered four minutes in the calendar year. From Bannister in '54 to Elliott in '58, the mile had been run under four minutes 46 times. Only one of these was performed by an American. Don Bowden of the University of California ran 3:58.7 at Stockton, Calif., on June 1, 1957.

BOWLING

THE GAME of bowling that is the favorite sport of millions of "keglers" in the United States is an indoor development of the more ancient outdoor game that survives as lawn bowling. The outdoor game is prehistoric in origin and probably goes back to Primitive Man and round stones that were rolled at some target. It is believed that a game something like nine-pins was popular among the Dutch, Swiss and Germans as long ago as A.D. 1200 at which time the game was played outdoors with an alley consisting of a single plank 12 to 18 inches wide along which was rolled a ball toward three rows of three pins each placed at the far end of the alley. When the first indoor alleys were built and how the game was modified from time to time are matters of dispute. Much of the confusion arises from a lack of certainty as to which game is meant, "bowls" or "bowling", one with a "jack" and the other with "pins", in historical passages.

It is supposed that the early settlers of New Amsterdam (New York City) being Dutch, they brought their two bowling games with them. About a century ago the game of nine-pins was flourishing in the United States but so corrupted by gambling on matches that it was barred by law in New York and Connecticut. Since the law specifically barred "nine-pins", it was eventually evaded by adding another pin and thus legally making it a new game. The genius who thought up that simple method of outwitting the law and putting a popular game in motion once more remained modestly anonymous. With the increase in the number of pins, the old diamond formation of nine-pins was abandoned for the triangle set-up of ten-pins that remains the rule to this day. Various organizations were formed to make rules for bowling and supervise competition in the United States but none was successful until the American Bowling Congress, organized Sept. 9, 1895, became the ruling body.

ATHLETES OF THE YEAR

The Associated Press annually polls outstanding sportswriters and broadcasters throughout the nation to select the outstanding male and female athletes of the year. The winners since 1931:

MALE

Year	Athlete	Sport
1931	Pepper Martin	Baseball
1932	Gene Sarazen	Golf
1933	Carl Hubbell	Baseball
1934	Dizzy Dean	Baseball
1935	Joe Louis	Boxing
1936	Jesse Owens	Track and field
1937	Don Budge	Tennis
1938	Don Budge	Tennis
1939	Nile Kinnick	Football
1940	Tommy Harmon	Football
1941	Joe DiMaggio	Baseball
1942	Frank Sinkwich	Football
1943	Gunder Hagg	Track
1944	Byron Nelson	Golf
1945	Byron Nelson	Golf
1946	Glenn Davis	Football
1947	Johnny Lujack	Football
1948	Lou Boudreau	Baseball
1949	Leon Hart	Football
1950	Jim Konstanty	Baseball
1951	Dick Kazmaier	Football
1952	Bob Mathias	Track and field
1953	Ben Hogan	Golf
1954	Willie Mays	Baseball
1955	Howard (Hopalong) Cassady	Football
1956	Mickey Mantle	Baseball
1957	Ted Williams	Baseball

FEMALE

Year	Athlete	Sport
1931	Helene Madison	Swimming
1932	Mildred (Babe) Didrikson	Track and field
1933	Helen Jacobs	Tennis
1934	Virginia Van Wie	Golf
1935	Helen Wills Moody	Tennis
1936	Helen Stephens	Track
1937	Katherine Rawls	Swimming
1938	Patty Berg	Golf
1939	Alice Marble	Tennis
1940	Alice Marble	Tennis
1941	Betty Hicks Newell	Golf
1942	Gloria Callen	Swimming
1943	Patty Berg	Golf
1944	Ann Curtis	Swimming
1945	Mildred (Babe) Didrikson Zaharias	Golf
1946	Mildred (Babe) Didrikson Zaharias	Golf
1947	Mildred (Babe) Didrikson Zaharias	Golf
1948	Fanny Blankers-Koen	Track
1949	Marlene Bauer	Golf
1950	Mildred (Babe) Didrikson Zaharias	Golf
1951	Maureen Connolly	Tennis
1952	Maureen Connolly	Tennis
1953	Maureen Connolly	Tennis
1954	Mildred (Babe) Didrikson Zaharias	Golf
1955	Patty Berg	Golf
1956	Patricia McCormick	Diving
1957	Althea Gibson	Tennis

SULLIVAN AWARD WINNERS

The James E. Sullivan Memorial Award is given annually to the amateur athlete voted by sports leaders as having done the most to advance sportsmanship.

Year	Winner	Sport
1930	Robert T. Jones, Jr.	Golf
1931	Bernard E. Berlinger	Track and field
1932	James A. Bausch	Track and field
1933	Glenn Cunningham	Running
1934	William R. Bonthron	Running
1935	W. Lawson Little, Jr.	Golf
1936	Glenn Morris	Track and field
1937	J. Donald Budge	Tennis
1938	Donald R. Lash	Running
1939	Joseph W. Burk	Rowing
1940	J. Gregory Rice	Running
1941	Leslie MacMitchell	Running
1942	Cornelius Warmerdam	Pole vaulting
1943	Gilbert L. Dodds	Running
1944	Ann Curtis	Swimming
1945	Felix (Doc) Blanchard	Football
1946	Y. Arnold Tucker	Football
1947	John B. Kelly, Jr.	Rowing
1948	Robert B. Mathias	Track and field
1949	Richard T. Button	Figure skating
1950	Fred Wilt	Running
1951	Robert E. Richards	Track and field
1952	Horace Ashenfelter	Running
1953	Major Sammy Lee	Diving
1954	Malvin Whitfield	Running
1955	Harrison Dillard	Running
1956	Patricia McCormick	Diving
1957	Bobby Morrow	Running

HICKOK AWARD WINNERS

The richest award in sports is the \$10,000 S. Rae Hickok Belt, which annually goes to the professional athlete of the year, as selected in a poll of sportswriters and sportscasters throughout the country. The winners:

1950	Phil Rizzuto	Baseball
1951	Allie Reynolds	Baseball
1952	Rocky Marciano	Boxing
1953	Ben Hogan	Golf
1954	Willie Mays	Baseball
1955	Otto Graham	Football
1956	Mickey Mantle	Baseball
1957	Carmen Basilio	Boxing

TOP ATHLETES OF A HALF-CENTURY

In 1950 The Associated Press polled the nation's sports experts on the "greats" in various fields during the past half-century. The list of winners:

Male athlete—Jim Thorpe.
 Female athlete—Mildred D. Zaharias.
 Baseball player—Babe Ruth.
 Football player—Jim Thorpe.
 Fighter—Jack Dempsey.
 Basketball player—George Mikan.
 Track performer—Jesse Owens.
 Golfer—Bobby Jones.
 Tennis player—Bill Tilden.
 Swimmer—Johnny Weissmuller.
 Race horse—Man o' War.

BASKETBALL

BASKETBALL may be unique in sports. It is one game concerning which it is safe to state when, where and how it originated. In the winter of 1891-92, Dr. James Naismith, an instructor in the Y.M.C.A. Training College (now Springfield College) at Springfield, Mass., deliberately invented the game of basketball in order to provide indoor exercise and competition for the students during the closing of the football season and the opening of the baseball season. He affixed peach baskets overhead on the walls at opposite ends of the gymnasium and, with an association (soccer) football, organized teams to play his new game in which the purpose was to toss the ball into one basket and prevent, as far as possible, the opponents from tossing the ball into the other basket. Fun-

damentally, the game is the same today, though there have been some improvements in equipment and many changes in the rules.

Because Dr. Naismith had eighteen available players when he invented the game, the first rule was: "There shall be nine players on each side." Later the number of players became optional, depending upon the size of the available court, but the five-player standard was adopted when the game spread over the country. United States soldiers introduced the game in Europe in World War I and, being taken up by foreign nations, it soon became a world-wide sport. An odd point is that, though it is still chiefly an indoor game in the United States, in other countries it flourishes almost entirely outdoors.

 1949—Oakland (Calif.) Bittners
 1950—Phillips Oilers, Bartlesville, Okla.
 1951—Stewart Chevrolets, San Francisco
 1952-54—Caterpillar Diesels, Peoria, Ill.
 1955—Phillips Oilers, Bartlesville, Okla.
 1956—Buchan Bakers, Seattle
 1957—U. S. Air Force

Professional Champions

The National Basketball Association (N.B.A.) was created in 1949 by a merger of the National Basketball League and the Basketball Association of America. Champions follow:

National League

1938—Goodyears	1946—Rochester
1939-40—Firestones	1947—Chicago
1941-42—Oshkosh	1948—Minneapolis
1943-45—Fort Wayne	1949—Anderson

Association of America

1947—Philadelphia	1949—Minneapolis
1948—Baltimore	

National Association (NBA)

1950—Minneapolis
1951—Rochester
1952—Minneapolis
1953—Minneapolis
1954—Minneapolis
1955—Syracuse
1956—Philadelphia
1957—Boston

ROWING

ROWING goes back so far in history that there is no possibility of tracing it to any particular aboriginal source. The oldest rowing race still on the calendar is the "Doggett's Coat and Badge" contest among professional watermen of the Thames (England) that began in 1715. The first Oxford-Cambridge race was held at Henley in 1829. Competitive rowing in the United States began with matches between boats rowed by professional oarsmen of the New York water front. They were oarsmen who rowed the small boats that plied as ferries from Manhattan Island to Brooklyn and return, or who rowed salesmen down the harbor to meet ships arriving from Europe. Since the first salesman to meet an incoming ship had some advantage over his rivals, there was keen competition in the bidding for fast boats and the best oarsmen. This gave rise to match races for a purse or a side bet on many occasions. The first of such races was held in June, 1811, in four-oared gigs.

Amateur boat clubs sprang up in the United States between 1820 and 1830 and

seven students of Yale joined together to purchase a four-oared lap-streak gig in 1843. The first Harvard-Yale race was held Aug. 3, 1852, on Lake Winnepesaukee, N. H. The first time an American college crew went abroad was in 1869 when Harvard challenged Oxford and was defeated on the Thames. There were early college rowing races on Lake Quinsigamond, near Worcester, Mass., and on Saratoga Lake, N. Y., but the Intercollegiate Rowing Association, in 1895, settled on the Hudson, at Poughkeepsie, as the setting for the annual "Poughkeepsie Regatta." In 1950 the I.R.A. shifted its classic to Marietta, Ohio, and in 1952 it was moved to Syracuse, N. Y. The National Association of Amateur Oarsmen, organized in 1872, has conducted annual championship regattas since that time. The first rowing races were held with lap-streak gigs but shells came into general favor about a century ago. The outrigger was invented in 1830 by Clasper, an Englishman. Yale used the sliding seat in 1870.

Rowing Statistics

Source: From *American Rowing*, Copyright by Robert F. Kelley; courtesy of G. P. Putnam's Sons.

Yale-Harvard Varsity Race Record

Rowed at Centre Harbor, N. H., in 1852; Springfield, Mass., in 1855, 1872-73, 1876-77; Worcester, Mass., 1859 to 1870; Saratoga Lake, N. Y. 1874-75; New London, Conn., 1878 to 1895, 1898 to 1916, 1919 to 1941, and since 1947; triangular race at Poughkeepsie, N. Y., in 1897 with Cornell victor in 20:34; Derby, Conn., in 1918, 1942, and Boston, Mass., in 1946. Course was 2 miles in 1852; 3 miles from 1855 to 1875, and 4 miles thereafter.

MOTORBOATING

SINCE the source of power—the internal combustion engine—is the same in the motorboat as it is in the automobile, the history of motorboat racing parallels that of auto racing. There was a sporting risk in driving the early power boats. As soon as they began to show a degree of dependability, there came the informal rivalries of the rivers and lakes. These led to the formal contests of speed and endurance

over marked courses under the control of the American Power Boat Association. The races were severe tests of all parts of power boats and what was learned in the annual Gold Cup competition, which started in 1904, caused a great improvement in the designing of engines and hulls. The development of the outboard motor opened up another branch of power boat competition of wide popularity.

Motorboating Statistics

GOLD CUP WINNERS

Beginning with 1922 the race for the American Power Boat Association Gold Cup was open only to displacement boats of over 25 feet in length and powered with motors of not more than 625 inches piston displacement. In 1946 the rules were liberalized to encourage the entry of smaller, less expensive craft. Boats now are required to be between 19 and 40 feet in length, with horsepower unlimited.

* In statute miles per hour.

† First of hydroplanes to win, predecessors being all displacement craft.

YACHTING

JASON sailed in search of the Golden Fleece. Cleopatra (according to Shakespeare) had a royal barge with purple sails. Columbus had three sailing ships when he crossed the Atlantic westward in 1492. But who the first sailor was and where he launched his primitive craft nobody ever will know. The word "yacht" is of Dutch origin and the first "yacht race" of record in the English language was a sailing contest from Greenwich to Gravesend and return in 1662 between a Dutch yacht designed and, at some part of the race, sailed by Charles II of England. The royal yacht won the contest.

The first yacht club was organized at Cork, Ireland, in 1720 under the name of the Cork Harbour Water Club, later changed to the Royal Cork Yacht Club. The Royal Yacht Squadron was organized

at Cowes in 1812 and the name changed to the Royal Yacht Club in 1820. The New York Yacht Club was organized aboard the Stevens schooner "Gimcrack" on July 30, 1844, and a clubhouse erected at Elysian Fields, Hoboken, N. J., the following year.

From that time until the Civil War races were held over courses starting from the water off the yacht club promontory. One course was to the Sandy Hook Lightship and return.

In 1850 the celebrated "America" was built by a group of New York yachtsmen and sent abroad to compete at Cowes. In a race around the Isle of Wight, with a special cup as a prize, the "America" defeated fourteen English boats and brought back the trophy that has been raced for as "The America's Cup" in many international yacht races since that time.

AMERICA'S CUP RECORD

First race in 1851 around Isle of Wight, Cowes, England. First defense and all others through 1920 held 30 miles off New York Bay. Races from 1930 through 1937 held 30 miles off Newport, R. I. Conducted as one race only in 1851 and 1870; best four-of-seven basis, 1871; best two-of-three, 1876-1887; best three-of-five, 1893-1901; best four-of-seven, 1930-1937. Figures in parentheses indicate number of races won.

 1957 Bernard Bukiet, Cleveland

MEN'S DOUBLES

- 1932 James M. Jacobson-George T. Bacon, Jr., New Rochelle.

* Co-champions. At the time there were two national associations, each with its own champion. † Open championships. ‡ Closed championships.

College Rodeo Laurels to McNeese

McNeese State captured the 1958 National Intercollegiate Rodeo Association team championship in competition at

Colorado Springs. Doyle McSpaden of Texas A. & M. won individual laurels as all-around cowboy.

POLO

POLO originated "somewhere east of Suez" but exactly where never has been determined. There is pictorial proof that it was played many centuries ago in Persia, Japan, China and Tibet, but it reached England by way of a border tribe in India known as the Manipuri. British army officers in India, about 1860, found the Manipuri playing polo and learned the game from them. The fact that the Manipuri used small native horses—they had no others—was the reason for the early height limit (14 hands) on polo mounts, from which arose the custom of calling them "polo ponies," which was abandoned in 1919.

In 1869 some officers of the 10th Hussars, returning from India, introduced the game in England and informal games were played with as many as eight players on a side. Formal competition at Hurlingham, the great shrine of the game, began in 1876 with five players on a side, which

number was cut to four in 1882. In 1884 an outstanding English player by the name of John Watson invented the backhand stroke and much improved the tactics of the game.

James Gordon Bennett, Jr., noted American newspaper owner and editor, saw polo at Hurlingham in 1875, brought the implements to this country, had a carload of cow ponies sent up from Texas and promoted a game that was played indoors at the Dickel Riding Academy at Fifth Avenue and 39th Street, New York City, in 1876. Polo moved outdoors to the Jerome Park race course and other suitable places soon after. One field on which it was played, at Fifth Avenue and 110th Street, was taken over by the New York baseball team in the National League and that is why the field on which the "Giants" played ball, although there had been two changes in site, still is called "the Polo Grounds."

World Champions

1851-58 Adolph Anderssen, Germany
1858-62 Paul Morphy, New Orleans, La.
1862-66 Adolph Anderssen, Germany
1866-94 William Steinitz, Austria
1894-1921 Emanuel Lasker, Germany
1921-27 Jose R. Capablanca, Cuba
1927-35 Alexander A. Alekhine, Russia
1935-37 Dr. Max Euwe, Netherlands
1937-46 Alexander A. Alekhine, Russia*
1948-57 Mikhail Botvinnik, Russia
1957 Vassily Smyslov, Russia

* Alekhine, a French citizen, died while champion.

United States Champions

1852-62 Paul Morphy, New Orleans, La.
1871-87 George H. Mackenzie, New York

1887-92 Max Judd, St. Louis, Mo.
1892-94 Simon Lipschuetz, New York
1894 Jackson W. Showalter, Georgetown, Ky.
1894 Albert B. Hodges, Staten Island, N. Y.*
1894-97 Jackson W. Showalter, Georgetown, Ky.
1897-1906 Harry Nelson Pillsbury, Boston, Mass.
1906-09 Jackson W. Showalter, Georgetown, Ky.
1909-36 Frank J. Marshall, New York
1936-44 Samuel Reshevsky, New York†
1944-46 Arnold S. Denker, New York
1946 Samuel Reshevsky, Boston
1948 Herman Steiner, Los Angeles
1951 Larry Evans, New York
1954-57 Arthur Bisguier, New York

* Retired after winning return match with Showalter.
† In 1942, Isaac I. Kashdan of New York was co-champion for a while because of a tie with Reshevsky in that year's tournament. Reshevsky won the play-off.

GOLF

IT MAY BE that golf originated in Holland—historians believe it did—but certainly Scotland fostered the game and is famous for it. In fact, in 1457 the Scottish Parliament, disturbed because football and golf had lured young Scots from the more soldierly exercise of archery, passed an ordinance that "futeball and golf be utterly cryit down and nocht usit". James I and Charles I of the royal line of Stuarts were golf enthusiasts, whereby the game came to be known as "the royal and ancient game of golf".

The golf balls used in the early games were leather covered and stuffed with feathers. Clubs of all kinds were fashioned by hand to suit individual players. The great step in spreading the game came with the change from the feather ball to the gutta-percha ball about 1850, and in 1860 formal competition began with the establishment of an annual tournament for the British open championship. There are records of "golf clubs" in the United

States as far back as colonial days but no proof of actual play before John Reid and some friends laid out six holes on the Reid lawn in Yonkers, N. Y., in 1888 and played there with the golf balls and clubs brought over from Scotland by Robert Lockhart. This group then formed the St. Andrews Golf Club of Yonkers, and golf was established in this country.

However, it remained a rather sedate and almost aristocratic pastime until a 20-year-old ex-caddy, Francis Ouimet of Boston, defeated two great British professionals, Harry Vardon and Ted Ray, in the United States Open championship at Brookline, Mass., in 1913. This feat put the game and Francis Ouimet on the front pages of the newspapers and stirred a wave of enthusiasm for the sport. The greatest feat so far in golf history was that of Robert Tyre Jones, Jr. of Atlanta, Ga., in winning the British Open, the British Amateur, the U. S. Open and the U. S. Amateur titles in one year, 1930.

1948

June 25 Joe Walcott, Yankee Stadium.....	KO 1
(Announced retirement as champion Mar. 1, 1949)	

1950

Sept. 27 Ezzard Charles, Yankee Stadium.....	L 1
(Came out of retirement and sought to regain championship in bout with Charles)	

BOXING

WHETHER it be called pugilism, prize fighting or boxing, there is no tracing "the Sweet Science" to any definite source. Tales of rivals exchanging blows for fun, fame or money go back to earliest recorded history and classical legend. There was a mixture of boxing and wrestling called the "pancratium" in the ancient Olympic Games and in such contests the rivals belabored one another with hands fortified with heavy leather wrappings that were sometimes studded with metal. More than one Olympic competitor lost his life at this brutal exercise.

There was little law or order in pugilism until Jack Broughton, one of the early champions of England, drew up a set of rules for the game in 1743. Broughton, called "the father of English boxing," also is credited with having invented boxing gloves. However, these gloves—or "mufflers" as they were called—were used only in teaching "the manly art of self-defense" or in training bouts. All professional

championship fights were contested with "bare knuckles" until 1892 when John L. Sullivan lost the heavyweight championship of the world to James J. Corbett in New Orleans in a bout in which both contestants wore regulation gloves.

The Broughton rules were superseded by the London Prize Ring Rules of 1838. The 8th Marquess of Queensberry, with the help of John G. Chambers, put forward the "Queensberry Rules" in 1866, a code that called for gloved contests. Amateurs took quickly to the Queensberry Rules, the professionals slowly.

There is no official international set of rules for boxing even today. Amateur organizations set rules for amateurs in different countries and professional rules set by boxing commissions vary even in different sections of the United States, but the variations are for the most part minor. A prize fighter doesn't have to change his style greatly to ply his trade anywhere in the world.

Boxing Statistics

(a) Jeffries retired as champion in March 1906. He named Marvin Hart and Jack Root as leading contenders and agreed to referee their fight in Reno, Nev., on July 3, 1906, with the stipulation that he would term the winner the champion. Hart, 190 (28), knocked out Root, 171 (29), in the 12th round. (b) Burns claimed the title after defeating Hart. (c) Tunney retired as champion after defeating Tom Heeney on July 26, 1928. (d) After Louis defeating Hart. (e) Charles won recognition from the National Boxing Association as champion by defeating Walcott. (f) Charles gained undisputed recognition as champion by defeating Louis, who came out of retirement. (g) Retired as champion April 27, 1956.

BARE-KNUCKLE HEAVYWEIGHT CHAMPIONS, 1719-1892

- 1719—Jim Figg
 1734—George Taylor
 1740—Jack Broughton
 1750—Jack Slack
 1760—Bill Stevens
 1761—George Meggs
 1765—Bill Darts
 1777—Harry Sellers
 1780—Jack Harris
 1785—Tom (Jackling) Johnson
 1790—Big Ben Brain
 1792—Daniel Mendoza
 1795—John Jackson (retired)
 1802—Jem Belcher
 1805—Henry Pearce (Game Chicken)
 1808—John Gully (declined title)
 1809—Tom Cribb received belt, not transferable, and cup.
 1824—Tom Spring received four cups; resigned title.
 1825—Jem Ward received belt, not transferable.
 1838—James (Deaf) Burke claimed title.
 1839—William Thompson (Bendigo) beat Burke; claimed championship; received belt from Jem Ward.
 1841—Nick Ward (Jem's brother) beat Ben Caunt, Feb. 2. In return match Caunt beat Nick Ward and received belt by subscription. It was transferable.
 1845—Thompson beat Caunt and got belt.
 1850—Bill Perry (The Tipton Slasher), after fight with Paddock, claimed title.
 1851—Harry Broome won title from Perry.
 1853—Perry claimed title when Broome forfeited £200 to him in a match; retired from ring on Aug. 13.
 1857—Tom Sayers beat Perry for £200 a side and new belt.
 1860—Sayers retired after 42-round draw with John C. Heenan (The Benicia Boy), leaving old belt open for competition.
 1860—Sam Hurst (The Stalybridge Infant) beat Paddock and received belt.
 1861—Jem Mace beat Hurst.
 1862—Mace beat Tom King for £200 a side and the belt.
 1862—King beat Mace and claimed belt. Subsequently gave it up. Declined to meet Mace again. Mace claimed belt.
 1863—King beat Heenan for £1,000 a side.
 1865—Joe Wormald beat Andrew Marsden for £200 a side and belt, which had been claimed by both. Belt was given to Wormald, who forfeited £120 to Mace.
 1866—Mace and Joe Goss fought draw with £200 a side and belt at stake.
 1867—Wormald received £200 forfeit from Ned O'Baldwin and claimed belt when O'Baldwin failed to appear at starting place.
 1867—Mace and O'Baldwin drew; £200 a side; title and belt in abeyance.
 1869—Mike McCool defeated Tom Allen and claimed American championship.
 1870—Mace claimed world title by knocking out Allen in 10 rounds.
 1873—Mace retired and Allen claimed title of world champion by defeating McCool.
 1876—Allen fought Joe Goss, ranked next to Mace in England. Allen was disqualified in the 27th round for fouling and Goss was recognized as world champion under London Prize Ring Rules.
 1880—Paddy Ryan knocked out Goss in the 87th round on May 30, near Colliers Station, W. Va., and became the first American to hold the undisputed world bare knuckle championship.
 1882—John L. Sullivan knocked out Ryan in the 9th round at Mississippi City, Miss., on Feb. 7 and became the last bare knuckle champion.
 1889—Sullivan defeated Jake Kilrain in the last bare knuckle championship fight. The bout, on July 8 at Richburg, Miss., went 75 rounds.

Marciano Was Unbeaten as a Pro

Rocky Marciano, heavyweight boxing champion of the world and winner of each of his 49 fights as a professional, announced his retirement from the ring on April 27, 1956. He is the only heavyweight champion ever to retire without losing a professional fight or even boxing to a draw.

Marciano won the title on Sept. 23, 1952, in Philadelphia, by knocking out Joe Walcott in the 13th round. He defended his crown six times. His gross purses for his 49 professional bouts have been estimated at \$2,000,000.

Marciano was born in Brockton, Mass., on Sept. 1, 1924.

Of his 49 victories, the retired champion scored 43 by knockouts, more than half of them within three rounds.

These were Marciano's championship fights:

*Sept. 23, 1952—Joe Walcott, Philadelphia.....	KO 13
May 15, 1953—Joe Walcott, Chicago.....	KO 1
Sept. 24, 1953—Roland LaStarza, New York.....	KO 11
June 17, 1954—Ezzard Charles, New York.....	W 15
Sept. 17, 1954—Ezzard Charles, New York.....	KO 8
May 16, 1955—Don Cockell, San Francisco.....	KO 9
Sept. 21, 1955—Archie Moore, New York.....	KO 9

* Won title.

ICE HOCKEY

ICE HOCKEY, by birth and upbringing a Canadian game, is an offshoot of field hockey. Some historians state that the first ice hockey game was played in Montreal in December, 1879, between two teams composed almost exclusively of McGill University students, but others assert that Kingston, Ont., or Halifax, N. S., were scenes of earlier hockey games. In the Montreal game of 1879 there were fifteen players on a side and they used an assortment of crude sticks to keep the puck in motion. Early rules allowed nine men on a side but the number was reduced to seven in 1886 and finally reduced to six, the standard of today.

The first governing body of the sport was the Amateur Hockey Association of Canada, organized in 1887. In the winter of 1894-95 a group of college students from the United States visited Canada, saw hockey played, became enthused over the game and introduced it as a winter sport when they returned home. This was the

start of hockey in the United States. The first professional league was the International Hockey League that operated, strangely enough, not in Canada but in northern Michigan in 1904-06 and included as players such famous stars as Cyclone Taylor and Hod Stuart, later included in the Hockey Hall of Fame.

Until 1910, professionals and amateurs were allowed to play together on "mixed teams," but this arrangement ended with the formation of the first "big league," the National Hockey Association, in eastern Canada in 1910. The Pacific Coast League, to provide professional hockey in the West, was organized in 1911 with Seattle (and later other American cities) included in the circuit. The National Hockey League replaced the National Hockey Association in 1917. Boston, in 1924, was the first American city to join that circuit. The Stanley Cup, top trophy of hockey, was competed for by "mixed teams" from 1894 to 1910, thereafter by professionals.

SWIMMING

THERE IS THE ancient tale of Leander of Abydos swimming the Hellespont nightly to call on Helen of Sestos but nobody kept the time on his trips. However, Lord Byron swam one leg of the old Leander course, Sestos to Abydos, on May 3, 1810, in 1 hour 10 minutes. The famous British poet was a noted swimmer and once, in an endurance trial at Venice, was in the water for 4 hours 10 minutes. Distance swimming was the early type of competition. Captain Matthew Webb achieved fame by being the first to swim the English Channel—Dover to Calais—in August, 1875, in 21 hours 45 minutes. Many other swimmers, men and women, have conquered the

Channel since that time. Gertrude Ederle, of New York City, was the first woman to accomplish the feat. Miss Ederle swam the Channel Aug. 6, 1926, in 14 hours 34 minutes, breaking the existing record at that time. Since then the record has been lowered by a number of men and women.

Regular competition at short as well as long distances and indoor as well as outdoor came with the development of such organizations as the Amateur Athletic Union and the building of indoor and outdoor swimming pools. Swimming has been on the Olympic program since the start of the modern Olympic Games at Athens in 1896.

WORLD RECORDS

In a move to end confusion over world records, the International Amateur Swimming Federation (F.I.N.A.) began in 1957 to recognize only those marks which are made in 50-meter or 55-yard pools. As of May 1, 1957, all previously recognized records established in pools of other lengths were wiped out. Some of these were replaced when the F.I.N.A. certified new records later in 1957, and again in 1958, but others continued open.

Where no record yet has been authorized for a standard distance, the table of world records below lists the mark as "vacant." The time given in such a case is the slowest the F.I.N.A. will consider for record application for the event.

BILLIARDS

APPARENTLY nobody knows where billiards originated. Some trace the game back to ancient Greece or early Egyptian days; others insist it originated in France or England in medieval times. Shakespeare must have believed the Egyptian tale, because in *Antony and Cleopatra* he has Cleopatra saying: "Let's to billiards; come, Charmian." There is an illustration of Louis XIV of France playing billiards in 1694 and using a shovel-shaped stick to set the "cue ball" in motion, from which it is evident that the pointed cue was a later development.

Certainly the game was popular in England and on the Continent in the seven-

teenth and eighteenth centuries and early settlers in North America are supposed to have introduced the game here. How to apply "English" to a billiard ball was discovered by Jack Carr, an Englishman, in 1820. A Frenchman named Mingaud is credited with having invented the "draw" shot at about the same time and also to have devised leather tips for wooden cues. Championship competition, amateur and professional, is a modern development in billiards. The first formal professional tournament held in the United States took place in New York in 1863 with eight players competing. The first three-cushion tournament was held in St. Louis in 1878.

* World champion.

† Match.

Standard Measurements in Sports

BASEBALL

- Home plate to pitcher's box—60 feet 6 inches.
- Plate to second base—127 feet 3 $\frac{3}{8}$ inches.
- Distance from base to base (home plate included)—90 feet.
- Size of bases—15 inches by 15 inches.
- Pitcher's plate—24 inches by 6 inches.
- Batter's box—6 feet by 4 feet.
- Home plate—17 inches by 17 inches, cut to a point at rear.
- Home plate to backstop—Not less than 60 feet.
- Weight of ball—Not less than 5 ounces nor more than 5 $\frac{1}{4}$ ounces.
- Circumference of ball—Not less than 9 inches nor more than 9 $\frac{1}{4}$ inches.
- Bat—Must be round, not over 2 $\frac{3}{4}$ inches in diameter at thickest part, nor more than 42 inches in length, and of hard-wood in one piece or laminated.

FOOTBALL

- Length of field—120 yards.*
- Width of field—53 $\frac{1}{2}$ yards (160 feet).
- Height of goal posts—20 feet.
- Height of crossbar—10 feet.
- Width of goal posts—18 feet 6 inches, inside to inside, and not more than 19 feet 2 inches, outside to outside.
- Length of ball—11 to 11.25 inches (long axis).
- Circumference of ball—21.25 to 21.50 inches (middle); 28 to 28.5 inches (long axis).

* Includes 10 yards of end zone on either side.

LAWN TENNIS

- Size of court—Rectangle 78 feet long and 27 feet wide (singles); 78 feet long and 36 feet wide (doubles).
- Height of net—3 feet in center, gradually rising to reach 3-foot 6-inch posts at each side of court.
- Ball—Shall be more than 2 $\frac{1}{2}$ inches and less than 2 $\frac{5}{8}$ inches in diameter and weigh more than 2 ounces and less than 2 1/16 ounces.
- Service line—21 feet from net.

BOWLING

- Lane dimensions—Overall length 62 feet 10 3/16 inches, measuring from foul line to pit (not including tail plank), with $\frac{1}{2}$ inch tolerance permitted. Foul line to No. 1 pinspot 60 feet, with $\frac{1}{2}$ inch tolerance permitted. Lane width, not less than 41 inches, nor more than 42. Approach, not less than 15 feet. Gutters, not less than 9 inches nor more than 9 $\frac{1}{2}$ inches wide.
- Ball—Circumference, not more than 27 inches. Weight, 10 pounds minimum, 16 pounds maximum. Balance, tolerance of 3 ounces between top finger hole,

side and bottom. One ounce tolerance between right and left sides. One ounce tolerance between front and back sides.

GOLF

- Weight of ball—Not greater than 1.620 ounces.
- Size of ball—Not less than 1.680 inches in diameter.
- Velocity of ball—Not greater than 250 feet per second, with 2 per cent tolerance.
- Hole—Shall be 4 $\frac{1}{4}$ inches in diameter and at least 4 inches deep.
- Clubs—No restrictions on the size; 14 is the maximum number permitted.

ICE HOCKEY

- Size of rink—200 feet long by 85 feet wide (desired size).
- Size of goal—6 feet wide by 4 feet in height.
- Puck—1 inch thick and 3 inches in diameter; made of vulcanized rubber; weight—six ounces (unofficial).
- Length of stick—Not more than 53 inches from heel to end of shaft nor 14 $\frac{3}{4}$ inches from heel to end of blade. Blade should not exceed 3 inches in height, except goalkeeper's stick, which shall not exceed 3 $\frac{1}{2}$ inches in height except at the heel, where it must not exceed 4 $\frac{1}{2}$ inches.

BASKETBALL

(National Collegiate A. A. Rules)

- Playing court—94 feet long by 50 feet wide (maximum dimensions).
- Baskets—Rings 18 inches in inside diameter, with white cord nets, 15 to 18 inches in length. Each ring is made of metal and is not more than $\frac{5}{8}$ of an inch in diameter.
- Height of basket ring—10 feet.
- Weight of ball—Not less than 20 ounces nor more than 22.
- Circumference of ball—No greater than 30 inches and not less than 29 $\frac{1}{2}$.
- Free-throw line—15 feet from the face of the backboard.

BOXING

- Size of ring—The matches take place in an area, not less than 18 nor more than 20 feet square. It is enclosed by three 1-inch covered ropes. The floor has a 2-inch padding that extends at least 6 inches beyond the roped area in the case of elevated rings and 3 feet if the ring is at floor level.
- Gloves—In professional fights, 8-ounce gloves generally are used, except in title contests, where 6-ounce gloves are the custom. A.A.U., 8 ounces up to welter-weight, 10 ounces in heavier divisions. Colleges, minimum of 12 ounces.

AUTO RACING

THE FIRST automobiles on the road were erratic in action and driving them or even riding in them was considered a trifle risky, hence it became the sporting thing to do. Experimental excursions in crude cars gave rise to rivalry in speed over the rough roads of the Gay Nineties and this eventually led to formal contests, the first of which was a road race from Paris to Rouen in 1894, with 26 cars showing up at the starting line. Formal competition in the United States started with a road race in the Chicago district on Thanksgiving Day, 1895, and the winner, J. F. Duryea, covered the road distance of 54.36 miles at the astonishing average of 7.5 miles per hour!

Around 1900 Paris became the hub of road racing in Europe and each year there were raucous, dusty and dangerous races from Paris to Berlin, to Vienna, to Madrid

and other cities on the Continent. Accidents were so numerous to drivers and spectators that, after a gory group of mishaps in the forepart of the Paris-Madrid race of 1903, the contest was halted at Bordeaux by public authorities and all road racing was brought under control. Other kinds of auto racing were exposed to view. Some contests, including 24-hour races for stock models, were held on circular or oval tracks originally built for horse racing. Finally came the special racing strips for autos, including such famous autodromes as Brooklands in England and the Indianapolis Speedway in the United States.

As a test of engine and chassis under severe conditions and great strain, auto racing rendered invaluable assistance in the development of the motor car of today.

National Champions

(A. A. A. champions, 1909-1955; U. S. Auto Club champions, 1956.)

1909 Bert Dingley	1923 Eddie Hearne	1937 Wilbur Shaw
1910 Ray Harroun	1924 Jimmy Murphy	1938 Floyd Roberts
1911 Ralph Mulford	1925 Peter DePaolo	1939 Wilbur Shaw
1912 Ralph DePalma	1926 Harry Hartz	1940 Rex Mays
1913 Earl Cooper	1927 Peter DePaolo	1941 Rex Mays
1914 Ralph DePalma	1928 Louis Meyer	1946 Ted Horn
1915 Earl Cooper	1929 Louis Meyer	1947 Ted Horn

1918 Ralph Mulford	1932 Bob Carey	1950 Henry Banks
1919 Howard Wilcox	1933 Louis Meyer	1951 Tony Bettenhausen
1920 Gaston Chevrolet	1934 Bill Cummings	1952 Charles Stevenson
1921 Tommy Milton	1935 Kelly Petillo	1953 Sam Hanks
1922 Jimmy Murphy	1936 Mauri Rose	1954 Jimmy Bryan
		1955 Bob Sweikert
		1956 Jimmy Bryan
		1957 Jimmy Bryan

History of the One-Mile Speed Mark

The first recorded effort for one mile was made in 1898 by Chasseloup-Laubat, driving a Jentaud, in France. His average was 39.23 m.p.h. This was increased to 65.79 in 1899 by Jenatzky, also in France. The first man to travel better than 100 m.p.h. was Rigolly, in 1904, at 103.56 m.p.h., followed by Baras, with 104.53 in the same year. The first over 200 m.p.h. was Major H. O. D. Segrave, who drove at 203.79 in 1927 at Daytona, Florida.

In 1947 John Cobb of London became the first person to travel more than 400 m.p.h. on land. The Englishman accomplished the

feat on Sept. 16 at Bonneville, Utah, while raising the world mile record to 394.196 m.p.h. and the world kilometer (.62137 of a mile) mark to 393.825 m.p.h.

Cobb's fastest mile was covered in 8.93 seconds and his average speed was 9.1325 seconds. The Briton drove at the rate of 385.645 m.p.h. for the mile and 388.019 for the kilometer on the southward run, then increased his pace to 403.135 m.p.h. and 399.808, respectively, on the northward sprint, the best times ever recorded.

Those who drove 300 m.p.h. or better follow (all at Bonneville):

Date	Driver	Car	Average
Sept. 3, 1935	Sir Malcolm Campbell	Bluebird Special	301.1292
Nov. 19, 1937	Capt. G. E. T. Eyston	Thunderbolt #1	311.42
Aug. 27, 1938	Capt. G. E. T. Eyston	Thunderbolt #1	345.5
Sept. 15, 1938	John Cobb	Ralton	350.2
Sept. 16, 1938	Capt. G. E. T. Eyston	Thunderbolt #1	357.5
Aug. 23, 1939	John Cobb	Ralton Red Lion	368.9
Sept. 16, 1947	John Cobb	Ralton Mobil Special	394.196

HORSE RACING

ANCIENT DRAWINGS on stone and bone prove that horse racing is at least 3000 years old, but Thoroughbred Racing is a modern development. Practically every thoroughbred in training today traces its registered ancestry back to one or more of three sires that arrived in England about 1728 from the Near East and became known, from the names of their owners, as the Byerly Turk, the Darley Arabian and the Godolphin Arabian. The Jockey Club (English) was founded at Newmarket in 1750 or 1751 and became the custodian of the Stud Book as well as the court of last resort in deciding turf affairs.

There was horse racing in this country before the Revolution, but the great lift to the breeding industry came with the importation in 1798, by Col. John Hoomes of Virginia, of Diomed, winner of the Epsom Derby of 1780. Diomed's lineal descendants included such famous stars of the American turf as American Eclipse and Lexington. From 1800 to the time of the Civil War there were race courses and breeding establishments plentifully scattered through Virginia, North Carolina, South Carolina, Tennessee, Kentucky, and

Louisiana. In fact, thoroughbred racing was largely a Southern sport and that was one reason why the Confederacy had such excellent cavalry in the Civil War. A century ago crack horses were matched in four-mile races that were run in heats, best two out of three!

The oldest stake event in North America is the Queen's Plate, a Canadian fixture that was first run in the Province of Quebec in 1836. The oldest stake event in the United States is The Travers, which was first run at Saratoga in 1864. The gambling that goes with horse racing and trickery by jockeys, trainers, owners, and track officials caused attacks on the sport by reformers and a demand among horse racing enthusiasts for an honest and effective control of some kind, but nothing of lasting value to racing came of this until the formation of The Jockey Club in 1894. The Jockey Club, composed of about sixty members chosen from the aristocracy of the turf, was all-powerful in racing regulation until the State Racing Commissions came into being as a result of mutual betting and the great revenues that came with the tax on the "daily handle."

Jockey Wins 12 Straight Races

A jockey in Southern Rhodesia equaled a world record in 1958 by riding 12 consecutive winners at a horse race meeting. Pieter Strobel started his streak at the

Bulawayo Turf Club on June 7 by winning the last race. On the next racing day, June 28, he won all six races. Then on July 5, he won the first five.

LEADING JOCKEYS SINCE 1935

Round Table Racing's Biggest Money Winner

Round Table, 4-year-old colt owned by Travis Kerr of Oklahoma City, displaced Nashua as the top money winning horse of all time on Oct. 11, 1958. His victory that day in the Hawthorne Gold Cup at Chicago added \$73,250 to Round Table's earnings to give him a lifetime total of \$1,336,364. Nashua's old record was \$1,288,565. The Gold Cup was Round Table's 52nd race in his career and his 34th triumph. The colt had scored six seconds and three thirds.

Horses which led the list of all-time money winners before Round Table:

	Starts	1st	2d	3d	Earnings
Nashua	30	22	4	1	\$1,288,565
Citation	45	32	10	2	1,085,670

Sun Beau	74	33	12	10	376,744

HARNESS RACING

OLIVER WENDELL HOLMES, the famous Autocrat of the Breakfast Table, wrote that the running horse was a gambling toy but the trotting horse was useful and, furthermore, "horse-racing is not a republican institution; horse-trotting is." Oliver Wendell Holmes was a born and bred New Englander and New England was the nursery of the harness racing sport in America. Pacers and trotters were matters of local pride and prejudice in Colonial New England and, shortly after the Revolution, the Messenger and Justin Morgan strains produced many winners in harness racing "matches" along the turnpikes of New York, Connecticut, Rhode Island, Massachusetts, Vermont, and New Hampshire.

There was English thoroughbred blood in Messenger and Justin Morgan and, many years later, it was blended in Rysdyk's

Hambletonian, foaled in 1849. Hambletonian was not particularly fast under harness but his descendants have had almost a monopoly of prizes, titles, and records in the harness racing game. Hambletonian was purchased as a foal with its dam for a total of \$124 by William Rysdyk of Goshen, N. Y., and made a modest fortune for the purchaser.

Trotters and pacers often were raced under saddle in the old days and, in fact, the custom still survives in some places in Europe. Dexter, the great trotter that lowered the mile record from 2:19 $\frac{1}{4}$ to 2:17 $\frac{1}{4}$ in 1867, was said to handle just as well under saddle as when pulling a sulky. But as sulkies were lightened in weight and improved in design, trotting under saddle became less common and finally faded out in this country.

WORLD RECORDS

Established in a Race or Against Time at One Mile

Betting Record for Pari-Mutuel Harness Racing

A record for betting at a pari-mutuel harness racing track was established at Roosevelt Raceway, Westbury, N. Y., on May 29, 1958, when a crowd of 37,046 wagered \$2,502,196 on the nine-race program.

The previous record, set at Roosevelt Raceway on Aug. 17, 1957, was \$2,388,674, wagered by a crowd of 50,336. The latter figure was an attendance record for harness racing.

HISTORY OF TRADITIONAL HARNES RACING STAKES

The Hambletonian

Three-year-old trotters. One mile. Raced at Syracuse, N. Y., 1926, 1928; at Lexington, Ky., 1927, 1929; at Goshen, N. Y., 1930-42, 1944-56; at Yonkers, N. Y., 1943; at Du Quoin, Ill., since 1957.

BARREL JUMPING

LeBel Retains World Title

Leo LeBel of Hartford, Conn., won the world barrel jumping on ice skates championship for the fourth straight year in 1958. Competing at the Grossinger (N. Y.) Country Club, LeBel cleared 16 barrels for a distance of 25 feet 10½ inches. Terry Browne of Detroit, who held the title from 1951 through 1954, was second, hurdling 16 barrels for a leap of 25 feet 7 inches. George Coallier of Montreal placed third. He cleared 15 barrels and 24 feet 7¼ inches.

World Indoor Mile Mark to Delany

Ron Delany of Dublin, Ireland, and Villanova University lowered the world indoor mile record in 1958 to 4:03.4. His performance in the Bankers Mile at the Chicago Relays erased the old record of 4:03.6 set by Gunnar Nielsen of Denmark in the Wanamaker Mile at the Millrose Games in New York in 1955.

Pacific Coast Conference to Dissolve

The Pacific Coast Intercollegiate Athletic Conference voted in 1958, its 43rd year, to dissolve, effective June 30, 1959. Four member schools, California, Southern California, U.C.L.A. and Washington, later created the "Big Four," an association to become active on July 1, 1959.

SOVIET UNION vs. UNITED STATES

The Soviet Union and the United States engaged in dual athletic competition for the first time in 1958. These are the results of the various contests:

TRACK AND FIELD

(At Moscow, July 27-28)

United States 126, U.S.S.R. 109*

WINNING PERFORMANCES

100 meters—Ira Murchison, United States...	10.2
200 m.—Ed Collimore, United States...	21.3
400 m.—Glenn Davis, United States...	45.6
800 m.—Tom Courtney, United States...	1:48.8
1,500 m.—Jim Grelle, United States...	3:46.7
5,000 m.—Hubert Pyrnakivi, U.S.S.R. (Bill Dellinger, United States, placed 2d)...	14:28.4
10,000 m.—Evgeny Zhukov, U.S.S.R. (Jerry Smartt, United States, placed 3d)...	29:59.8
3,000-m. steeplechase—Semen Rzhishchin, U.S.S.R. (Phil Coleman, United States, placed 2d)...	8:42.0
20,000-m. walk—Leonid Spirin, U.S.S.R. (James Hewson, United States, placed 3d)...	1:33:43.2
110-m. high hurdles—Ancil Robinson, United States...	14.5
400-m. hurdles—Glenn Davis, United States...	50.4
400-m. relay—United States (Ira Murchison, Ira Davis, James Segrest, Ed Collimore)...	39.6
1,600-m. relay—United States (Jack Yerman, Tom Courtney, Eddie Southern, Glenn Davis)...	3:07.0
High jump—Yuri Stepanov, U.S.S.R. (Charles Dumas, United States, placed 3d)...	6 ft. 11½ in.
Broad jump—Ernie Shelby, United States...	26 ft. ½ in.
Hop, step and jump—Oleg Ryakhovski, U.S.S.R. (Kent Floerke, United States, placed 3d)...	54 ft. 5½ in.

Pitching (earned run average)—Stu Miller, San Francisco (2.47); Sam Jones, St. Louis (2.88); Lew Burdette, Milwaukee (2.91); Warren Spahn, Milwaukee (3.07); Robin Roberts, Philadelphia (3.27)

1958 ALL-STAR GAME

Baseball's 25th annual All-Star Game, played in Baltimore on July 8, 1958, was won by the American League, 4 to 3. A pinch-single by Gil McDougald of the New York Yankees in the sixth inning produced the winning run against the National League. A crowd of 48,829 saw the contest. The victory was the 15th in the series for the American League.

	R	H	E
National.....	2	1	0
American.....	1	1	0

Batteries—Spahn, Friend (4), Jackson (6), Farrell (7) and Crandall; Turley, Nalteski (2), Wynn (6), Odell (7) and Triandos, Berra. WP—Wynn. LP—Friend. Time of game—2:13. Attendance—48,829. Receipts (gross)—\$202,494. Receipts (net)—\$183,253.21. Managers, AL—Stengel, NL—Haney.

Two No-Hit Games in '58

Two no-hit games were recorded in the majors in 1958, both in the American League. Jim Bunning of the Detroit Tigers blanked the Boston Red Sox, 3-0, in the first game of a doubleheader in Boston on

July 20 and Hoyt Wilhelm of the Baltimore Orioles stopped the New York Yankees, 1-0, in Baltimore on Sept. 20. Bunning, 25, and Wilhelm, 35, both are right-handed pitchers.

Pennant Is Ninth for Stengel

The New York Yankees' pennant acquisition in the American League in 1958 was Casey Stengel's ninth in his ten years as manager of the team. The Yankees won seven of their nine World Series engagements under Stengel.

393,909 Saw Seven Series Games

The second largest paid attendance for a World Series and the second biggest total for net gate receipts were recorded in 1958. Attendance for the seven games between the New York Yankees and the Milwaukee Braves was 393,909 and net receipts \$2,397,-223.03. Records in both categories were set in 1957 when 394,712 saw the same teams in action. Receipts that year amounted to \$2,475,978.94.

Musial Gets 3,000th Hit

A double by Stan Musial of the St. Louis Cardinals on May 13, 1958, against the Chicago Cubs was his 3,000th major league hit. He became the eighth big league player to achieve that many safeties. Others were Ty Cobb, Tris Speaker, Honus Wagner, Eddie Collins, Nap Lajoie, Paul Waner, and Cap Anson. Cobb leads the list with 4,191 hits.
